Description	An interactive, data-driven map of entities within the UK Artificial Intelligence ecosystem. This will be a public facing web application that will allow users to browse companies, funders, incubators and academic institutions that are involved in creating AI products, services, processes and research. An identified gap in the UK AI ecosystem is the lack of an overview of who the key players are, where to go for funding etc. The development of such a landscape map will support innovative firms in the UK but will also support inward investment and firms looking to expand into the UK. This is an initiative that has wide cross government support
