## Section 4 – Specification and about this procurement

### 1. Introduction

Across UK Research and Innovation (UKRI) overseas field work and travel is increasing, with the work often involving visits to remote or underdeveloped locations, representing a significant area of risk to be managed.

In 2019 UKRI had 2549 employees/representatives travelling internationally, often making multiple trips. This totals 3646 flights in approximately 120 countries. Please see **Appendix A** for details regarding the airport destinations.

Currently travel support and advice is provided by three separate contractors, Control Risk Group (CRG) providing security advice to the Natural Environment Research Council (NERC), who are part of UKRI, CHUBB providing travel insurance cover across UKRI and Corporate Travel Management (North) (CTM) Limited providing UKRI booking services and some information on the location of travellers.

The proposed service would provide a platform for co-ordinating all international travel and field work risk management across UKRI Research Councils. The service would need to provide comprehensive, single point of contact, pre-travel medical and security advice, training and security. Medical support whilst “in country” is required and this would also include the management of international incidents and emergencies affecting UKRI employees.

The service is required to enhance the existing risk management processes across in UKRI for overseas fieldwork and travel and provide a more robust emergency incident response process. It is also required to support the delivery of effective Health and Safety management in UKRI as defined in the UKRI Health and Safety Policy (**Appendix B**).

The service would need the capability to transfer data from the existing travel booking system, currently CTM (Corporate Travel Management (North) Limited) and contracts of overseas travel insurance held by UKRI such as with CHUBB.

### 2. Aims and Objectives

The aim is to provide a one stop service for the risk management of overseas field work and provide a single point of contact solution for travellers and managers.

- 2.1. To improve international travel and field work safety with increased access to pre-travel risk assessment, planning tools and information
- 2.2. Improve the provision of training for employees working overseas in relation to health, security and cultural issues
- 2.3. Provide the ability to keep employees informed of any emerging or changing medical and security risks while overseas and providing options for assistance.
- 2.4. Provide UKRI with the ability to communicate with and manage travellers in terms of location tracking and communications e.g. mobile app.

- 2.5. Improve the ability to manage emergency incidents and coordinate actions and communications with other support suppliers such as CTM and CHUBB.

### **3. Background to the Requirement**

Within UKRI the Natural Environment Research Council (NERC) have had a service contract with International SOS/CRG for travel security advice for several years.

As per the introduction, the amount of overseas travel has increased for UKRI substantially with the introduction of additional Overseas Development funding for research activities overseas.

Travellers are broadly split into people attending international conferences, usually in well-developed counties and cities and those that undertake practical fieldwork in often remote locations in underdeveloped countries. We can, on occasion, work in areas rated as “high risk” by the UK Foreign Office and International SOS/CRG.

UKRI has a corporate policy (Appendix C) and procedure for the planning and risk assessment of overseas travel and fieldwork. Individual Research Councils have internal arrangements to deliver the UKRI corporate policy.

Travel bookings are currently made through CTM by the line manager and the field work risk assessment and planning is managed by the individual travellers and their line management. Professional Health & Safety advisors can also be involved.

### **4. Scope**

The scope of the service would include all employees travelling and working overseas for UKRI. This would include students and researchers from other organisations working with/ on UKRI Research Councils managed projects.

Excluded from the scope would be employees working in Antarctica and other Arctic regions where the travel is managed by the British Antarctic Survey (BAS) <https://www.bas.ac.uk/>, but would include employees traveling to and from Antarctic gateway locations such as South Africa, Falklands and South America. BAS will manage travel support from the gateways to Antarctica/Arctic stations.

## Award Evaluation of criteria

### Non-Price elements

Each question will be evaluated on a score from 0 to 100, which shall be subjected to a multiplier to reflect the percentage of the evaluation criteria allocated to that question.

Where an evaluation criterion is worth 20% then the 0-100 score achieved will be multiplied by 20%.

Example if a Bidder scores 60 from the available 100 points this will equate to 12% by using the following calculation:

$$\text{Score} = \{\text{weighting percentage}\} \times \{\text{bidder's score}\} = 20\% \times 60 = 12$$

The same logic will be applied to groups of questions which equate to a single evaluation criterion.

The 0-100 score shall be based on (unless otherwise stated within the question):

0	The Question is not answered, or the response is completely unacceptable.
10	Extremely poor response – they have completely missed the point of the question.
20	Very poor response and not wholly acceptable. Requires major revision to the response to make it acceptable. Only partially answers the requirement, with major deficiencies and little relevant detail proposed.
40	Poor response only partially satisfying the award question requirements with deficiencies apparent. Some useful evidence provided but response falls well short of expectations. Low probability of being a capable supplier.
60	Response is acceptable but remains basic and could have been expanded upon. Response is sufficient but does not inspire.
80	Good response which describes their capabilities in detail which provides high levels of assurance consistent with a quality provider. The response includes a full description of techniques and measurements currently employed.
100	Response is exceptional and clearly demonstrates they are capable of meeting the requirement. No significant weaknesses noted. The response is compelling in its description of techniques and measurements currently employed, providing full assurance consistent with a quality provider.

All questions will be scored based on the above mechanism. Please be aware that there may be multiple evaluators. If so, their individual scores will be averaged (mean) to determine your final score as follows:

### Example

Evaluator 1 scored your bid as 60

Evaluator 2 scored your bid as 40

Evaluator 3 scored your bid as 80

Evaluator 4 scored your bid as 60

Your final score will  $(60+40+80+60) \div 4 = 60$

**Price elements** will be evaluated on the following criteria.

The lowest price for a response which meets the pass criteria shall score 100.

All other bids shall be scored on a pro rata basis in relation to the lowest price. The score is then subject to a multiplier to reflect the percentage value of the price criterion.

For example - Bid 1 £100,000 scores 100.

Bid 2 £120,000 differential of £20,000 or 20% remove 20% from price scores 80

Bid 3 £150,000 differential £50,000 remove 50% from price scores 50.

Bid 4 £175,000 differential £75,000 remove 75% from price scores 25.

Bid 5 £200,000 differential £100,000 remove 100% from price scores 0.

Bid 6 £300,000 differential £200,000 remove 100% from price scores 0.

Where the scoring criterion is worth 50% then the 0-100 score achieved will be multiplied by 50

In the example if a supplier scores 80 from the available 100 points this will equate to 40% by using the following calculation: Score/Total Points multiplied by 50 ( $80/100 \times 50 = 40$ )

The lowest score possible is 0 even if the price submitted is more than 100% greater than the lowest price.

## 5.5. Evaluation process

5.5.1. The evaluation process will feature some, if not all, the following phases

Stage	Summary of activity
Receipt and Opening	<ul style="list-style-type: none"><li>RFP logged upon opening in alignment with UK SBS's procurement procedures.</li><li>Any RFP Bid received after the closing date will be rejected unless circumstances attributed to the Contracting Authority or the e-sourcing tool beyond the bidder control are responsible for late submission.</li></ul>
