

## Section 4

### Technical specifications

Supply and install a covered bridge over a dry stream to include:

- Metal design
- Functional
- Durable and sturdy
- Seasonal bulbs and wildflowers surrounding
- Interactive areas (to include tactile brass rubbings of nature/wildlife)
- Historical element linking the old town to present day with information boards
- Seating

The site does not have access to water or electricity; therefore, the design cannot include features that would need access to these utilities;

Submissions will need to show different viewpoints with a minimum of a side and an overhead view.

The design of a piece of public art will be placed in the central grass area at Badbury Heights, see highlighted in red on the map below.
