Schedule 1 - Services

This Call Off Contract is for the provision of Services under Lot 3 Cloud Support. For the provision of services to deliver a Microsoft Dynamics 365 service for the Buyer in line with the service details provided under Service I.D. 800623260837158 "Microsoft Dynamics 365 Alpha".

Highways England are implementing a centralised approach to knowledge management. This has the potential to realise significant business benefits through learning lessons from major infrastructure projects and applying this knowledge and wisdom to other activities. The future state will see Highways England being proactive in capturing good – and less good – practice, and ensuring information is at the fingertips of those that need it, when they need it.

Dynamics has the potential to provide the right technology platform for this. Microsoft have produced an initial proof of concept, and Highways England wish to take this forward. In order to do so they need to understand the rough costs associated with its implementation and the timescales and activities involved in doing this.

Tisski are a Microsoft Gold Partner and have significant experience in central government and public-sector Dynamics 365 implementations. Highways England are looking for expert support to help them to address some of the challenges faced in implementing knowledge management across Highways England.

This scope of this engagement is to produce a costed implementation plan for Highways England's Knowledge Management roll-out. This will detail potential phases of implementation (alpha/ private beta/ public beta/ go-live) and provide a risk, issues and dependencies log. This will give Highways England the collateral needed to make an accurate investment decision regarding the wider roll-out of this functionality.
