- 4.3.3 The Buyer shall not unreasonably withhold or delay its decision to Approve or not the Security Management Plan pursuant to Paragraph 4.3.2. However a refusal by the Buyer to Approve the Security Management Plan on the grounds that it does not comply with the requirements set out in Paragraph 4.2 shall be deemed to be reasonable.
- 4.3.4 Approval by the Buyer of the Security Management Plan pursuant to Paragraph 4.3.2 or of any change to the Security Management Plan in accordance with Paragraph 4.4 shall not relieve the Supplier of its obligations under this Schedule.

4.4 Amendment of the Security Management Plan

 - (e) any reasonable change in requirements requested by the Buyer.
- 4.4.2 The Supplier shall provide the Buyer with the results of such reviews as soon as reasonably practicable after their completion and amendment of the Security Management Plan at no additional cost to the Buyer. The results of the review shall include, without limitation:

- (a) suggested improvements to the effectiveness of the Security Management Plan;
- (b) updates to the risk assessments; and
- (c) suggested improvements in measuring the effectiveness of controls.

4.4.3 Subject to Paragraph 4.4.4, any change or amendment which the Supplier proposes to make to the Security Management Plan (as a result of a review carried out in accordance with Paragraph 4.4.1, a request by the Buyer or otherwise) shall be subject to the Variation Procedure.

4.4.4 The Buyer may, acting reasonably, Approve and require changes or amendments to the Security Management Plan to be implemented on timescales faster than set out in the Variation Procedure but, without prejudice to their effectiveness, all such changes and amendments shall thereafter be subject to the Variation Procedure for the purposes of formalising and documenting the relevant change or amendment.

5. Security breach

5.1 Either Party shall notify the other in accordance with the agreed security incident management process (as detailed in the Security Management Plan) upon becoming aware of any Breach of Security or any potential or attempted Breach of Security.

5.2 Without prejudice to the security incident management process, upon becoming aware of any of the circumstances referred to in Paragraph 5.1, the Supplier shall:

- 5.2.1 immediately take all reasonable steps (which shall include any action or changes reasonably required by the Buyer) necessary to:
- (a) minimise the extent of actual or potential harm caused by any Breach of Security;
 - (b) remedy such Breach of Security to the extent possible and protect the integrity of the Buyer and the provision of the Goods and/or Services to the extent within its control against any such Breach of Security or attempted Breach of Security;

Order Schedule 20 (Order Specification)

1. Introduction and Summary

The Department for Energy Security and Net Zero (DESNZ; formerly BEIS) would like to commission an evaluation of the Climate Science (CS) Research Programme. This will be the first HM Government (HMG)-commissioned quantitative evaluation of this CS programme. DESNZ places high importance on independent impact evaluation and considers this a priority area. Project outputs will enable the Department to ensure the CS research programme delivers value for HMG spend.

We invite bidders to compile a bid response to develop a theory of change for the CS Research Programme, going on to evaluate the benefits and impacts of several (roughly 4-5) selected research projects (case studies) commissioned by the climate science team and completed 2020-2025. The project will focus on the CS research programme only and its impacts and benefits to the UK and (if applicable) the international impacts of these individual projects. Information from this evaluation will be used to plan and design future climate research projects to be as impactful as possible, and help DESNZ better understand the overall impact and economic benefits of their climate research.

2. Background

The Climate Science (CS) team, based in the Science and Innovation for Climate and Energy Directorate (SICE), are responsible for managing UK climate capability and greenhouse gas emissions reporting; leading the UK's relationship with the Intergovernmental Panel on Climate Change; and providing scientific input to a broad range of domestic and international policies, including climate mitigation and resilience.

Historically, the CS research programme has consisted of a variety of individual research projects, most of which are tendered competitively and delivered by a mixture of private sector and public sector suppliers, as well as academic research organisations. This includes the National Atmospheric Emissions Inventory (NAEI) contract, which provides key datasets that underpin the UK's international reporting of greenhouse gas emissions, enabling us to better understand whether we are on track to meet our legally binding emissions targets, including delivery of Net Zero by 2050. Data from the inventory also feeds into the analysis required for setting Carbon Budgets. There is a £3 million inventory improvement programme in place to ensure that the inventory data itself is underpinned by the latest available science and adheres to international guidelines, such as those produced by the IPCC and UNFCCC.

Another notable example is “Climate services for a Net Zero resilient world” (CS-N0W), a £5million research programme that uses the latest scientific knowledge to inform UK climate policy; support international climate negotiations; help us meet our global decarbonisation ambitions; and strengthen the climate resilience of UK infrastructure, housing and communities. The CS-N0W programme is structured around 4 research and analysis themes outlined below, as well as a fifth cross-cutting knowledge synthesis and translation theme:

- Climate science support for international reports
- Decarbonisation and global ambition
- Climate impacts at different spatial and temporal scales
- Co-benefits of climate action

The programme is delivered by a consortium of world-leading institutions from across the UK, which work on behalf on the UK government (DESNZ, DfT, DEFRA, EA, Ofgem, CCC) as well as UK local enterprise partnerships and local authorities, and international policy makers.

Climate mitigation research in the team is broad and reflects the need for a range of sectors to play their part in reducing emissions to meet Net Zero. Work in the team not only focusses on bioenergy and land use science but also to develop a better understanding of the co-benefits and trade-offs of mitigation options. These projects are developed in close collaboration with relevant departments, such as Defra, who for example own land use policy and have a significant interest in ensuring mitigation options do not result in perverse environmental outcomes. This evaluation of the DESNZ climate science research programme will seek to quantify its benefits to the UK, propose routes to increase impacts of successive research programmes in the future, and maximise value for HMG spend.

The evaluation will start as soon as a supplier is in place and should therefore run from June 2024-March 2025.

The evaluation will seek to quantify the benefits of the Climate Science research programme to the UK, provide insight to help the team design future research contracts, propose routes to increase impacts of successive research programmes in the future, and maximise value for HMG spend.

The evaluation will feed into ongoing and future programmes and establish the impact and value for money of the programme.

3. Aims and Objectives

This 9-month project will seek to quantify and maximise the benefits of the range of projects and programmes overseen and run by the climate science team in SICE, based on the latest best practice for evaluations of this kind, as outlined in the UK government’s Magenta book. In this period, the successful supplier will first deliver an evaluation plan within the first 4-6 weeks detailing the agreed case studies and methodology for evaluation, an interim report and then a final report which responds to comments from DESNZ. Throughout the project, the successful supplier will provide informal progress updates to DESNZ at regular

intervals to be agreed. This will allow the findings and recommendations to feed into the next spending review so that the team understand the economic value and impact of the research delivered through the team.

The two overarching aims of the evaluation are to:

- **To estimate and quantify the impact of the current climate science research programme.** This evaluation will provide an up-to-date value-for-money assessment of the programme to the UK and evaluate other measures of benefit including policy impact, strengthening UK climate science capabilities, and supporting UK climate change mitigation, adaptation, and resilience efforts. The evaluation will primarily assess a range of research projects that have been completed, or are being delivered – the exact projects will be agreed with DESNZ. However, this is likely to include projects that have significant spend against them, such as:
 - the National Atmospheric Emissions Inventory (NAEI) Improvement programme (£3 million): The NAEI produce, each year, a Greenhouse Gas Inventory (GHGI), which contains estimates of UK emissions of Greenhouse gases from 1990 to y-2. Using the inventory a series of other products, such as a digest of the full inventory reporting as National Statistics, inventories for each of the Devolved Administrations etc. are produced. The workstream also contains an 'improvement programme' which updates the science underlying the inventory, and a verification programme which seeks to independently measure emissions fluxes, to verify inventory estimates.
 - the **Forestry Research (FR) MoU** (£3 million): This funds a range of activities by FR that support two key areas of BEIS work. Delivery of Carbon Budgets, and accurate reporting of UK GHG emissions. Carbon Budgets are supported by a programme of research that seeks to better constrain our understanding of the contributions that forestry can make to climate mitigation and through this improved understanding provide evidence to policymakers on the best ways in which UK forestry can be used to help achieve net-zero. This evidence will allow policymakers to design and implement better UK forestry policy. The research also improves the ability of BEIS to model the impact of forestry on carbon budgets, thus improving our understanding of future UK GHG emissions, and the level of effort required to meet net zero.
 - CS-NOW (£5 million): A major programme of research to translate climate science outputs into useable products, analysis and tools for policymakers. This programme provides policy teams across DESNZ (and in related HMG groups, e.g. Ofgem, EA, DfT) with quality-assured data and analysis from a research consortium (UCL, Tyndall, UKRI-NERC, Ricardo), to improve resilience to climate change.

The evaluation will primarily be an impact evaluation of these individual projects but will also include a process evaluation, to understand whether these projects have been run efficiently and effectively. It will also include case studies, specific examples of where the research outputs have fed into policy development and an evaluation of those policy impacts.

- To provide advice and recommendations for future research, to maximise impact and benefit. The project will also be forward- looking. It will include developing a theory of change, benefits mapping and recommendations for improving the impacts of future research commissioned and/or produced by the climate science team and will help ensure we prioritise and strategically target where we invest. It will also provide insight into why certain outputs have had more impact than others, which in turn, will serve to improve our processes, e.g. stakeholder engagement and knowledge integration. Importantly, it will provide recommendations on how to design future research projects to maximise impact.

Research questions:

Bidders should note that the following research questions are subject to refinement at the initial project meeting between the Authority and the successful supplier . Nevertheless, the Climate Science research programme evaluation project should look to answer the following research questions for each of the case study research projects:

1. To what extent did the research project meet the intended outcomes set out in the workplan?
 - What features of the project contributed to this?
 - To what extent did the outputs support HMG in delivering its climate ambitions?
 - To what extent have the outputs contributed to the reputation of the UK as a world leader in climate science research?
 - To what extent does/did the CS project support and grow climate change adaptation, mitigation and resilience efforts in the UK?
 - To what extent does/did the CS research project build the UK's climate science capabilities?
2. To what extent, and how, were the research projects designed and delivered to achieve their impacts?
 - What insights are there to improve the delivery of future projects?
 - How effective and efficient was the project delivery?
 - Are the project outputs reaching the correct end-users?
 - How are research project outputs and tools used in other programmes and projects?
 - How have relationships with industry, academic, policy makers etc... been impacted?
 - To what extent, and how, have the project's governance, management and operational processes enabled it to deliver its outputs and objectives?
3. Recommendations to improve the impact and effectiveness of the research
 - How could the processes involved in the running of each project (project management, governance, ways of working, KPIs etc) be improved?
 - What type of information and data needs to be collected to monitor the effectiveness and impact of each project?

- What is the best way to build in and structure monitoring, evaluation and learning into each project?
- How could impact be improved?

More generally the evaluation will seek to address the following questions:

4. To what extent and how do the CS research projects represent positive value for money for HMG?
 - Does this differ across the different climate science research projects?

4. Suggested Methodology

Bidders are encouraged to propose approaches and methodologies, which they believe will best achieve our aims and objectives as set out in this specification. All bids must fit within the budget, timeline and output criteria, regardless of methodology proposed.

For the value for money study, the Bidders should follow HM Treasury's Green Book guidance around which aspects of the overall economic impacts can be monetised and by whom. The Bidder should propose a methodology for assessing the quality, relevance, and comparability of their sources of data, including evidencing a judgement on whether they cover current uses of climate information.

As a guide, bidders may want to consider the following:

Desk-based review of the literature

A review of relevant studies and best practice in the field of evaluation techniques around climate services will likely be needed to complete this project, and/or background/context within which the funded projects are situated.

Theory of Change

To produce a Theory of Change for the overall climate science team's research activities, the Bidder(s) should use a combination of document review (e.g., business cases, work plans, reports etc), familiarisation meetings with relevant stakeholders to build an understanding of what the Climate Science research programmes have achieved/aim to do, and a workshop with stakeholders from across HMG and wider users of the CS research outputs. To deliver greater impacts in future Programmes, this project will require the use of benefits frameworks and impact pathways to illustrate how this might be achieved.

Evaluation plan

The Theory of Change will then be used to inform a plan for the evaluations of process, impact and value for money, including plans for data collection and analysis.

For the impact evaluation, the focus should be on observing outcomes and then assessing causality. We do not expect experimental or quasi-experimental impact evaluation methodologies to be appropriate here due to an inability to construct a robust and suitable counterfactual. Outcome identification and causality assessment can instead occur in two ways:

- Forward projections – hypotheses are developed on the expected outcomes of the project outputs and objectives, usually informed by the Theory of Change. Methods such as process tracing can be deployed within this approach to pre-determine the evidence required to confirm or reject contribution hypotheses; however, bidders can suggest other approaches.
- Backward projections – outcomes occurring over a period of time are searched for and identified, and then the contribution or influence of the programme in bringing about that outcome is tested. Methods such as outcome harvesting or Most Significant Change can be deployed within this approach, which can support the identification of unintended outcomes.

Bidders should detail their approach to identifying and testing the causality of outcomes and the attribution or contribution of the SICE climate science research programme. They are welcome to suggest other methodologies to the two listed above. Where ‘backward projection’ approaches are included, bidders should detail how data collection would work given the need to first identify possible outcomes and then test the contribution and influence of Climate Science research programme activities.

For the value for money study, a single methodology such as but not limited to ‘avoided cost’ approaches, break-even analysis or value estimations may be used, or a mixture could be applied if preferable.

Data collection and analysis

The evaluation plan should include data that need to be collected. Qualitative data may be obtained, for example, by semi-structured interviews with stakeholders and policy teams mostly from DESNZ, but in cases this may involve individuals from across HMG and its arms-length bodies (including but not limited to the Department for the Environment, Food and Rural Affairs, the Foreign, Commonwealth and Development Office, the Climate Change Committee etc) and also other beneficiaries of Climate Science outputs such as academics, NGOs and in the private sector, where relevant.

Bidders should include a minimum of 3 stakeholder interviews per case study interview at different stages of the value chain. A maximum of 5 case studies with the aim of covering a broad range of stakeholders, policy areas and research project outputs.

5. Deliverables

Expected deliverables include:

- Evaluation plan within the first 4-6 weeks
- Programme level theory of change
- Interim report
- Quality assured final report.
- Workshop and PowerPoint slides summarising the key findings at conclusion of project.
- Models and datasets to accompany the analysis

Evaluation project deliverables and outputs

Phase 0

- Introductory meeting (June 1 2024). The Supplier shall attend an initial meeting with DESNZ to review work plans and clarify project objectives and timelines within the first two weeks of the project start date. This can take place in person or virtually.
- Theory of change development (June -August2024)
- Evaluation plan (June-August 2024). This will be delivered following initial project meeting with the SICE research project managers and/or the project's steering group. It will include final agreement of the case studies to be used.
- Draft Theory of Change results and (proposed) methodology report delivered

Phase 1

- Interim Report (due October 2024).
- Project meeting with DESNZ (October 2024). This meeting will be used to present an overview of the high-level theory of change, results of the process evaluation with recommendations, proposed methodologies, updates on case studies, issues which may have occurred, any early findings of the impact evaluation, and levels of uncertainty in the results. This will include a presentation to the climate science research team and the project's steering group (October 2024). This presentation can be in the form of a slide deck.

Phase 2

- Draft final evaluation report (December 2024). This report will include the process, impact and value-for-money assessment, along with the information collected via the case studies. It will also provide recommendations, as described in the specification.
- Final evaluation report (January 2024). This final version will respond to comments on the draft. This report will be published on GOV.UK in due course using the DESNZ branded template, so that the results of the project are publicly available. This will be presented to the project steering group who will sign it off.
- Presentation of final results and recommendations to the climate science team (Jan/Feb 2025).

The final report will include:

1. **High-level theory of change.** This will be at programme level, rather than at project level. It will highlight areas of the current research portfolio that provides the greatest societal benefit and use this information to make specific recommendations on how the impact might be improved in the future. It will detail the inputs, outputs, users, outcomes and products that have been delivered to date, and the short- and longer-term impacts.
2. **Methodologies** – develop a coherent, robust methodology to value benefits of the climate science research programme and ensure the project can withstand scrutiny and aligns with best practice for evaluation studies on research and development activities.
3. **Case studies** giving specific examples and supporting evidence of how the research outputs have been used by HMG and those users external to government (e.g., academics and private sector organisations). The evaluation will take a case-study approach to identify the most significant research projects (in terms of spend, importance and/or impact). A limited number of case studies will be budgeted for to

represent the breadth of the research programme. Information from these case studies will be used to develop the economic value assessment.

4. **An up-to-date economic value-for-money assessment of the climate research programme to the UK.** This has not been undertaken before - this will consider both the domestic and international costs and benefits of the Programme, where relevant. This will depend on ascertaining and agreeing the most appropriate and robust methodology to estimate the monetary benefits of research and development programmes such as this one.
5. **Evaluation of non-economic benefits of the climate research programme to the UK.** This will include, but not be limited to, health and wellbeing, equality, access to green spaces, flood control and biodiversity measures of value. This assessment may be qualitative where it is not possible to monetise the benefits, for example the ONS developed a framework in 2011 to monitor and report on various measures of national wellbeing.

Other reporting requirements or deliverables

- Wider recommendations for the CS programme. This includes:
 - Why particular projects have had significant/minimal impact and how best to design future research projects to maximise impact.
 - Suggestions on what data (qualitative and quantitative) should be collected to inform future independent evaluations and how we can build monitoring into our research more effectively.
 - Recommendations on the design of our governance structures and mechanisms, and overall project delivery, including project-level KPIs
- Datasets and workings. Where relevant, outputs should include technical annexes and datasets which are necessary to understand how the results have been derived. Outputs should include anonymised/aggregated interview data and detailed notes of qualitative interviews for the purposes of QA and any further analysis. Published reports should aim not to exceed 50 pages in length (plus annexes).
- A dissemination plan that describes how the findings will be presented and discussed (in an accessible format) to the climate science team and the SICE Directorate during the project's lifespan.

We would welcome suggestions as to any further outputs and would expect to agree a final set of deliverables at the inception stage. To demonstrate relevant expertise in producing high-quality reporting, bids must:

Specify who in the project team will be responsible for drafting the reports.
Specify who will be responsible for quality assurance before it comes to DESNZ.

We expect this project to be delivered within nine months of the contract being signed.

6. Budget

The total contract price is maximum £400,000.00 excluding VAT.

7. Quality Assurance

Sign-off for quality assurance must be conducted by someone of sufficient seniority within the contractor organisation to be able to take responsibility for the work done. Acceptance of the work by DESNZ will take this into consideration. DESNZ reserves the right to refuse to sign off outputs which do not meet the required standard specified in this invitation to tender and/or the contractors' QA plan. QA should cover all aspects of the project undertaken by the contractors, including data collection, data analysis and reporting.

To demonstrate an effective process to produce high quality reporting, the contractor(s) must ensure that quality assurance is done by individuals who were not directly involved in that research or analysis.

Bidders should note that DESNZ may appoint its own peer reviewer(s) to QA publishable outputs. Consideration should be given to how the external peer reviewer(s) will be included in the QA process.

Where complex or innovative methods are proposed, bidders should specify how additional quality assurance will be provided. Where necessary, this should include the use of external experts. A DESNZ appointed peer reviewer will not be expected to provide detailed quality assurance; their role will be focused on higher level peer review.

Outputs will be subject to DESNZ internal approvals, the more substantive the output the longer the approval time required. Published reports will require three rounds of comments, which should be factored into the timelines.

The successful supplier will be responsible for any work supplied by sub-contractors. For primary research, contractors should be willing to facilitate DESNZ research staff to attend interviews or listen in to telephone interviews as part of the quality assurance process.

Useful sources of guidance and advice that will help bidders and the resulting work be of the highest quality include:

- The [Government Social Research Code](#), in particular those that relate to GSR Products:
- [UK Statistics Authority Code of Practice](#) or an equivalent standard.
- Supplementary Guidance on the Quality in Policy Impact Research
- [Quality in Qualitative Research: A Framework for assessing research evidence](#) provides a framework for appraising the quality of qualitative research.

8. Working Arrangements

The successful supplier will be expected to identify one named point of contact through whom all enquiries can be filtered. A DESNZ project manager will be assigned to the project and will be the central point of contact. Where a consortium or sub-contractors are in place, DESNZ expect that they are included in relevant meetings, workshops, and review points to ensure their full engagement in the project. The successful supplier and sub-contractors (if relevant) are responsible for the delivery of outputs to the appropriate time and quality. It is expected that the lead supplier takes an active role in oversight of all workstreams and bears the overall responsibility for the delivery of the evaluation activities and outputs.

Bidders should assume that DESNZ take an active role in review and quality assurance of research materials, analysis, and outputs, beyond external peer review. It should be expected that research materials and outputs go through at least four iterations (i.e., three

UK OFFICIAL

rounds of comments from DESNZ), dependent on the complexity of the product. It is expected that all outputs are drafted to a very high standard, including early versions. Additional amendments may be required for published outputs.

We envisage the need for close interaction between the DESNZ Project Manager and successful supplier throughout the process, to ensure that emerging issues are dealt with promptly and that DESNZ fully understand the assumptions and approach taken. Bidders should assume that engagement with DESNZ will include weekly project management phone calls, weekly progress updates (analytical including updates on interview recruitment), steering group meetings (frequency to be confirmed), and face to face meetings as required to design, and deliver the chosen methods. Throughout the research, DESNZ will be required to review and sign off all final data collection instruments, approaches (including key assumptions) and outputs.

9. Challenges

There may be several challenges in conducting this research; some are given in the following section. Bidders must consider how these, and any other challenges will be addressed through the research design and delivery.

Impact Attribution, additionality of funding and identification of a counterfactual

It is the evaluation's task to disentangle what results can be attributed directly to the programme and what results it has contributed to (and to what extent), and whether it produced benefits over and above what would have happened anyway in its absence. Causal attribution can be tested by estimating the counterfactual (what would have happened in the absence of the intervention, compared to the observed situation). This involves the identification of control and/or comparison groups, with similar characteristics to those that have participated in the competitions.

A number of benefits of the Climate Science Research Programme may not be possible to monetise. Qualitative findings may need to be used alongside quantitative evidence to reflect this.

Access to data and contacts for qualitative interviews. Existing monitoring data for CS research projects is extremely limited. Project managers may not hold contact details for every potentially relevant stakeholder, therefore collection of data and stakeholder interviews may be time intensive. Final report should include recommendations for future project monitoring practices.

10. Ethics

We expect suppliers to adhere to the following Government Social Research (GSR) Principles:

- Clear and defined public benefit
- Sound application, conduct and interpretation
- Data protection regulations
- Specific and informed consent
- Enabling participation
- Minimising personal and social harm.

4.4 The Buyer must pay the Supplier the Charges within 30 days of receipt by the Buyer of a valid, undisputed invoice, in cleared funds using the payment method and details stated in the Order Form.

4.5 A Supplier invoice is only valid if it:

- (a) includes all appropriate references including the Contract reference number and other details reasonably requested by the Buyer;
- (b) includes a detailed breakdown of Delivered Deliverables and Milestone(s) (if any); and
- (c) does not include any Management Levy (the Supplier must not charge the Buyer in any way for the Management Levy).

4.6 The Buyer must accept and process for payment an undisputed Electronic Invoice received from the Supplier.

4.7 The Buyer may retain or set-off payment of any amount owed to it by the Supplier if notice and reasons are provided.

4.8 The Supplier must ensure that all Subcontractors are paid, in full, within 30 days of receipt of a valid, undisputed invoice. If this does not happen, CCS or the Buyer can publish the details of the late payment or non-payment.

4.9 If CCS or the Buyer can get more favourable commercial terms for the supply at cost of any materials, goods or services used by the Supplier to provide the Deliverables, then CCS or the Buyer may require

the Supplier to replace its existing commercial terms with the more favourable terms offered for the relevant items.

- 4.10 If CCS or the Buyer uses Clause 4.9 then the DPS Pricing (and where applicable, the Charges) must be reduced by an agreed amount by using the Variation Procedure.
- 4.11 The Supplier has no right of set-off, counterclaim, discount or abatement unless they are ordered to do so by a court.

5. The buyer's obligations to the supplier

5.1 If Supplier Non-Performance arises from an Authority Cause:

- (a) neither CCS or the Buyer can terminate a Contract under Clause 10.4.1;
- (b) the Supplier is entitled to reasonable and proven additional expenses and to relief from liability and Deduction under this Contract;
- (c) the Supplier is entitled to additional time needed to make the Delivery; and (d) the Supplier cannot suspend the ongoing supply of Deliverables.

5.2 Clause 5.1 only applies if the Supplier:

- (a) gives notice to the Party responsible for the Authority Cause within 10 Working Days of becoming aware;
- (b) demonstrates that the Supplier Non-Performance would not have occurred but for the Authority Cause; and
- (c) mitigated the impact of the Authority Cause.

6. Record keeping and reporting

6.1 The Supplier must attend Progress Meetings with the Buyer and provide Progress Reports when specified in the Order Form.

6.2 The Supplier must keep and maintain full and accurate records and accounts on everything to do with the Contract:

- (a) during the Contract Period;
- (b) for 7 years after the End Date; and (c) in accordance with UK GDPR, including but not limited to the records and accounts stated in the definition of Audit in Joint Schedule 1.

6.3 The Relevant Authority or an Auditor can Audit the Supplier.

Core Terms - DPS

6.4 During an Audit, the Supplier must:

- (a) allow the Relevant Authority or any Auditor access to their premises to verify all contract accounts and records of everything to do with the Contract and provide copies for an Audit; and
- (b) provide information to the Relevant Authority or to the Auditor and reasonable co-operation at their request.

6.5 Where the Audit of the Supplier is carried out by an Auditor, the Auditor shall be entitled to share any information obtained during the Audit with the Relevant Authority.**6.6 If the Supplier is not providing any of the Deliverables, or is unable to provide them, it must immediately:**

- (a) tell the Relevant Authority and give reasons;
- (b) propose corrective action; and
- (c) provide a deadline for completing the corrective action.

6.7 The Supplier must provide CCS with a Self Audit Certificate supported by an audit report at the end of each Contract Year. The report must contain:

- (b) the sampling techniques applied; (c) details of any issues; and (d) any remedial action taken.

6.8 The Self Audit Certificate must be completed and signed by an auditor or senior member of the Supplier's management team that is qualified in either a relevant audit or financial discipline.

7. Supplier staff

7.1 The Supplier Staff involved in the performance of each Contract must:

- (a) be appropriately trained and qualified;
- (b) be vetted using Good Industry Practice and the Security Policy; and
- (c) comply with all conduct requirements when on the Buyer's Premises.

7.2 Where a Buyer decides one of the Supplier's Staff is not suitable to work on a contract, the Supplier must replace them with a suitably qualified alternative.**7.3 If requested, the Supplier must replace any person whose acts or omissions have caused the Supplier to breach Clause 27.**

- 7.4 The Supplier must provide a list of Supplier Staff needing to access the Buyer's Premises and say why access is required.
- 7.5 The Supplier indemnifies CCS and the Buyer against all claims brought by any person employed by the Supplier caused by an act or omission of the Supplier or any Supplier Staff.

8. Rights and protection

8.1 The Supplier warrants and represents that:

- (a) it has full capacity and authority to enter into and to perform each Contract;
- (b) each Contract is executed by its authorised representative;
- (c) it is a legally valid and existing organisation incorporated in the place it was formed;
- (d) there are no known legal or regulatory actions or investigations before any court, administrative body or arbitration tribunal pending or threatened against it or its Affiliates that might affect its ability to perform each Contract;
- (e) it maintains all necessary rights, authorisations, licences and consents to perform its obligations under each Contract;
- (f) it does not have any contractual obligations which are likely to have a material adverse effect on its ability to perform each Contract;
- (g) it is not impacted by an Insolvency Event; and (h) it will comply with each Order Contract.

8.2 The warranties and representations in Clauses 2.10 and 8.1 are repeated each time the Supplier provides Deliverables under the Contract.

8.3 The Supplier indemnifies both CCS and every Buyer against each of the following:

- (a) wilful misconduct of the Supplier, Subcontractor and Supplier Staff that impacts the Contract; and (b) non-payment by the Supplier of any Tax or National Insurance.

8.4 All claims indemnified under this Contract must use Clause 26.

8.5 The description of any provision of this Contract as a warranty does not prevent CCS or a Buyer from exercising any termination right that it may have for breach of that clause by the Supplier.

8.6 If the Supplier becomes aware of a representation or warranty that becomes untrue or misleading, it must immediately notify CCS and every Buyer.

8.7 All third party warranties and indemnities covering the Deliverables must be assigned for the Buyer's benefit by the Supplier.

9. Intellectual Property Rights (IPRs)

- 9.1 Each Party keeps ownership of its own Existing IPRs. The Supplier gives the Buyer a non-exclusive, perpetual, royalty-free, irrevocable, transferable worldwide licence to use, change and sub-license the Supplier's Existing IPR to enable it to both:
- (a) receive and use the Deliverables; and
 - (b) make use of the deliverables provided by a Replacement Supplier.
- 9.2 Any New IPR created under a Contract is owned by the Buyer. The Buyer gives the Supplier a licence to use any Existing IPRs and New IPRs for the purpose of fulfilling its obligations during the Contract Period.
- 9.3 Where a Party acquires ownership of IPRs incorrectly under this Contract it must do everything reasonably necessary to complete a transfer assigning them in writing to the other Party on request and at its own cost.
- 9.4 Neither Party has the right to use the other Party's IPRs, including any use of the other Party's names, logos or trademarks, except as provided in Clause 9 or otherwise agreed in writing.
- 9.5 If there is an IPR Claim, the Supplier indemnifies CCS and each Buyer against all losses, damages, costs or expenses (including professional fees and fines) incurred as a result.
- 9.6 If an IPR Claim is made or anticipated the Supplier must at its own expense and the Buyer's sole option, either:
- (a) obtain for CCS and the Buyer the rights in Clause 9.1 and 9.2 without infringing any third party IPR; or
 - (b) replace or modify the relevant item with substitutes that do not infringe IPR without adversely affecting the functionality or performance of the Deliverables.
- 9.7 In spite of any other provisions of a Contract and for the avoidance of doubt, award of a Contract by the Buyer and placement of any contract task under it does not constitute an authorisation by the Crown under Sections 55 and 56 of the Patents Act 1977 or Section 12 of the Registered Designs Act 1949. The Supplier acknowledges that any authorisation by the Buyer under its statutory powers must be expressly provided in writing, with reference to the acts authorised and the specific IPR involved.

10. Ending the contract or any subcontract

10.1 Contract Period

- 10.1.1 The Contract takes effect on the Start Date and ends on the End Date or earlier if required by Law.

10.1.2 The Relevant Authority can extend the Contract for the Extension Period by giving the Supplier no less than 3 Months' written notice before the Contract expires.

10.3 Rectification plan process

10.3.1 If there is a Default, the Relevant Authority may, without limiting its other rights, request that the Supplier provide a Rectification Plan.

10.3.2 When the Relevant Authority receives a requested Rectification Plan it can either:

- (a) reject the Rectification Plan or revised Rectification Plan, giving reasons; or
- (b) accept the Rectification Plan or revised Rectification Plan (without limiting its rights) and the Supplier must immediately start work on the actions in the Rectification Plan at its own cost, unless agreed otherwise by the Parties.

10.3.3 Where the Rectification Plan or revised Rectification Plan is rejected, the Relevant Authority:

- (a) must give reasonable grounds for its decision; and
- (b) may request that the Supplier provides a revised Rectification Plan within 5 Working Days.

10.3.4 If the Relevant Authority rejects any Rectification Plan, including any revised Rectification Plan, the Relevant Authority does not have to request a revised Rectification Plan before exercising its right to terminate its Contract under Clause 10.4.3(a).

10.4 When CCS or the buyer can end a contract

10.4.1 If any of the following events happen, the Relevant Authority has the right to immediately terminate its Contract by issuing a Termination Notice to the Supplier:

- (j) the Supplier or its Affiliates embarrass or bring CCS or the Buyer into disrepute or diminish the public trust in them.

10.4.2 CCS may terminate the DPS Contract if a Buyer terminates an Order Contract for any of the reasons listed in Clause 10.4.1.

10.4.3 If any of the following non-fault based events happen, the Relevant Authority has the right to immediately terminate its Contract by issuing a Termination Notice to the Supplier:

- (a) the Relevant Authority rejects a Rectification Plan;
- (b) there is a Variation which cannot be agreed using Clause 24 (Changing the contract) or resolved using Clause 34 (Resolving disputes);
- (c) if there is a declaration of ineffectiveness in respect of any Variation; or (d) any of the events in 73 (1) (a) or (c) of the Regulations happen.

10.5 When the supplier can end the contract

The Supplier can issue a Reminder Notice if the Buyer does not pay an undisputed invoice on time. The Supplier can terminate an Order Contract if the Buyer fails to pay an undisputed invoiced sum due and worth over 10% of the annual Contract Value within 30 days of the date of the Reminder Notice.

10.6 What happens if the contract ends

10.6.1 Where a Party terminates a Contract under any of Clauses 10.2.1, 10.2.2, 10.4.1, 10.4.2, 10.4.3, 10.5 or 20.2 or a Contract expires all of the following apply:

10.6.2 In addition to the consequences of termination listed in Clause 10.6.1, where the Relevant Authority terminates a Contract under Clause 10.4.1 the Supplier is also responsible for the Relevant Authority's reasonable costs of procuring Replacement Deliverables for the rest of the Contract Period.

10.6.3 In addition to the consequences of termination listed in Clause 10.6.1, if either the Relevant Authority terminates a Contract under Clause 10.2.1 or 10.2.2 or a Supplier terminates an Order Contract under Clause 10.5:

- (a) the Buyer must promptly pay all outstanding Charges incurred to the Supplier; and
- (b) the Buyer must pay the Supplier reasonable committed and unavoidable Losses as long as the Supplier provides a fully itemised and costed schedule with evidence - the maximum value of this payment is limited to the total sum payable to the Supplier if the Contract had not been terminated.

10.6.4 In addition to the consequences of termination listed in Clause 10.6.1, where a Party terminates under Clause 20.2 each Party must cover its own Losses.

10.7 Partially ending and suspending the contract

10.7.1 Where CCS has the right to terminate the DPS Contract it can suspend the Supplier's ability to accept Orders (for any period) and the Supplier cannot enter into any new Order Contracts during this period. If this happens, the Supplier must still meet its obligations under any existing Order Contracts that have already been signed.

10.7.2 Where CCS has the right to terminate a DPS Contract it is entitled to terminate all or part of it.

10.7.3 Where the Buyer has the right to terminate an Order Contract it can terminate or suspend (for any period), all or part of it. If the Buyer suspends a Contract it can provide the Deliverables itself or buy them from a third party.

10.7.4 The Relevant Authority can only partially terminate or suspend a Contract if the remaining parts of that Contract can still be used to effectively deliver the intended purpose.

10.7.5 The Parties must agree any necessary Variation required by Clause 10.7 using the Variation Procedure, but the Supplier may not either:

- (a) reject the Variation; or
- (b) increase the Charges, except where the right to partial termination is under Clause 10.2.

10.7.6 The Buyer can still use other rights available, or subsequently available to it if it acts on its rights under Clause 10.7.

10.8 When subcontracts can be ended

- 11.6 In spite of Clauses 11.1, 11.2 but subject to Clauses 11.3 and 11.4, the Supplier's aggregate liability in each and any Contract Year under each Contract under Clause 14.8 shall in no event exceed the Data Protection Liability Cap.

- 12.3 The Supplier must appoint a Compliance Officer who must be responsible for ensuring that the Supplier complies with Law, Clause 12.1 and Clauses 27 to 32.

13. Insurance

The Supplier must, at its own cost, obtain and maintain the Required Insurances in Joint Schedule 3 (Insurance Requirements) and any Additional Insurances in the Order Form.

- 14.5 If at any time the Supplier suspects or has reason to believe that the Government Data provided under a Contract is corrupted, lost or sufficiently degraded, then the Supplier must notify the Relevant Authority and immediately suggest remedial action.
- 14.6 If the Government Data is corrupted, lost or sufficiently degraded so as to be unusable the Relevant Authority may either or both:
- (a) tell the Supplier to restore or get restored Government Data as soon as practical but no later than 5 Working Days from the date that the Relevant Authority receives notice, or the Supplier finds out about the issue, whichever is earlier; and/or
 - (b) restore the Government Data itself or using a third party.

15.2 In spite of Clause 15.1, a Party may disclose Confidential Information which it receives from the Disclosing Party in any of the following instances:

- (h) to the Serious Fraud Office where the Recipient Party has reasonable grounds to believe that the Disclosing Party is involved in activity that may be a criminal offence under the Bribery Act 2010.

15.3 In spite of Clause 15.1, the Supplier may disclose Confidential Information on a confidential basis to Supplier Staff on a need-to-know basis to allow the Supplier to meet its obligations under the Contract. The Supplier Staff must enter into a direct confidentiality agreement with the Relevant Authority at its request.

17. Invalid parts of the contract

If any part of a Contract is prohibited by Law or judged by a court to be unlawful, void or unenforceable, it must be read as if it was removed from that Contract as much as required and rendered ineffective as far as possible without affecting the rest of the Contract, whether it is valid or enforceable.

18. No other terms apply

The provisions incorporated into each Contract are the entire agreement between the Parties. The Contract replaces all previous statements, agreements and any course of dealings made between the Parties, whether written or oral, in relation to its subject matter. No other provisions apply.

19. Other people's rights in a contract

No third parties may use the Contracts (Rights of Third Parties) Act 1999 (CRTPA) to enforce any term of the Contract unless stated (referring to CRTPA) in the Contract. This does not affect third party rights and remedies that exist independently from CRTPA.

20. Circumstances beyond your control

20.1 Any Party affected by a Force Majeure Event is excused from performing its obligations under a Contract while the inability to perform continues, if it both:

- (a) provides a Force Majeure Notice to the other Party; and
- (b) uses all reasonable measures practical to reduce the impact of the Force Majeure Event.

20.2 Either Party can partially or fully terminate the affected Contract if the provision of the Deliverables is materially affected by a Force Majeure Event which lasts for 90 days continuously.

21. Relationships created by the contract

No Contract creates a partnership, joint venture or employment relationship. The Supplier must represent themselves accordingly and ensure others do so.

22. Giving up contract rights

A partial or full waiver or relaxation of the terms of a Contract is only valid if it is stated to be a waiver in writing to the other Party.

23. Transferring responsibilities

23.2 The Relevant Authority can assign, novate or transfer its Contract or any part of it to any Central Government Body, public or private sector body which performs the functions of the Relevant Authority.

- (a) with the Variation Form, where the Supplier requests the Variation; or
- (b) within the time limits included in a Variation Form requested by CCS or the Buyer.

- (a) agree that the Contract continues without the Variation; or
- (b) terminate the affected Contract, unless in the case of an Order Contract, the Supplier has already provided part or all of the provision of the Deliverables, or where the Supplier can show evidence of substantial work being carried out to provide them; or
- (c) refer the Dispute to be resolved using Clause 34 (Resolving Disputes).

24.4 CCS and the Buyer are not required to accept a Variation request made by the Supplier.

24.5 If there is a General Change in Law, the Supplier must bear the risk of the change and is not entitled to ask for an increase to the DPS Pricing or the Charges.

24.6 If there is a Specific Change in Law or one is likely to happen during the Contract Period the Supplier must give CCS and the Buyer notice of the likely effects of the changes as soon as reasonably practical. They must also say if they think any Variation is needed either to the Deliverables, DPS Pricing or a Contract and provide evidence:

- (a) that the Supplier has kept costs as low as possible, including in Subcontractor costs; and
- (b) of how it has affected the Supplier's costs.

24.7 Any change in the DPS Pricing or relief from the Supplier's obligations because of a Specific Change in Law must be implemented using Clauses 24.1 to 24.4.

24.8 For 101(5) of the Regulations, if the Court declares any Variation ineffective, the Parties agree that their mutual rights and obligations will be regulated by the terms of the Contract as they existed immediately prior to that Variation and as if the Parties had never entered into that Variation.

25. How to communicate about the contract

- 25.1 All notices under the Contract must be in writing and are considered effective on the Working Day of delivery as long as they are delivered before 5:00pm on a Working Day. Otherwise the notice is effective on the next Working Day. An email is effective at 9:00am on the first Working Day after sending unless an error message is received.
- 25.2 Notices to CCS must be sent to the CCS Authorised Representative's address or email address indicated on the Platform.
- 25.3 Notices to the Buyer must be sent to the Buyer Authorised Representative's address or email address in the Order Form.
- 25.4 This Clause does not apply to the service of legal proceedings or any documents in any legal action, arbitration or dispute resolution.

26. Dealing with claims

- 26.1 If a Beneficiary is notified of a Claim then it must notify the Indemnifier as soon as reasonably practical and no later than 10 Working Days.
- 26.2 At the Indemnifier's cost the Beneficiary must both:
- (a) allow the Indemnifier to conduct all negotiations and proceedings to do with a Claim; and
 - (b) give the Indemnifier reasonable assistance with the claim if requested.
- 26.3 The Beneficiary must not make admissions about the Claim without the prior written consent of the Indemnifier which can not be unreasonably withheld or delayed.
- 26.4 The Indemnifier must consider and defend the Claim diligently using competent legal advisors and in a way that does not damage the Beneficiary's reputation.
- 26.5 The Indemnifier must not settle or compromise any Claim without the Beneficiary's prior written consent which it must not unreasonably withhold or delay.
- 26.6 Each Beneficiary must take all reasonable steps to minimise and mitigate any losses that it suffers because of the Claim.

Order Schedule 4 (Order Tender)

The first part of the paper discusses the importance of the research and the objectives of the study. It then presents a literature review of the existing research on the topic. The methodology section describes the research design and the data collection process. The results section presents the findings of the study, and the conclusion section summarizes the main findings and provides recommendations for future research.

The study was conducted in a laboratory setting, and the data were collected using a series of experiments. The results of the experiments were analyzed using statistical methods, and the findings were compared with the results of previous studies. The study found that the research objectives were achieved, and the results were consistent with the findings of previous research.

The study has several limitations, and there are some areas for future research. The study was conducted in a laboratory setting, and the results may not be generalizable to real-world situations. Future research should focus on conducting field studies to validate the findings of the laboratory experiments.

In conclusion, the study has provided valuable insights into the research topic, and the findings are consistent with the existing literature. The study has identified several areas for future research, and the results provide a solid foundation for further exploration of the topic.

the first of these is the fact that the majority of the population is now living in urban areas. This has led to a concentration of people in a few large cities, which has in turn led to a number of problems. One of the most serious is the lack of adequate housing. In many of these cities, the population has grown so rapidly that there has not been time to build enough houses to accommodate everyone. As a result, many people are forced to live in slums or shanty towns, which are often unsanitary and overcrowded. This is a major cause of disease and death, particularly among children.

Another problem is the lack of adequate employment opportunities. In many of these cities, the economy is based on a few industries, such as manufacturing or services. When these industries are not doing well, there are no jobs available for the large number of people who are looking for work. This leads to high unemployment rates, which in turn leads to poverty and social unrest.

One of the most serious problems is the lack of adequate education. In many of these cities, the schools are overcrowded and the teachers are underpaid. As a result, the quality of education is poor, and many children do not learn the basic skills they need to find work. This leads to a cycle of poverty, as the children grow up and are unable to find jobs that pay enough to support their families.

These are just some of the problems that are facing the cities of the developing world. There are many more, but these are the most serious. If we do not find a way to solve these problems, the cities of the developing world will continue to grow in poverty and despair. It is our responsibility to find a way to help these cities, and to make sure that everyone has a chance to live a better life.

One of the most important things we can do is to provide adequate housing. This means building new houses, and making sure that the existing ones are in good condition. We also need to make sure that the houses are affordable, so that everyone can afford to live in them. This is a major challenge, but it is one that we must face if we want to solve the problems of the cities of the developing world.

Another important thing we can do is to provide adequate employment opportunities. This means creating new jobs, and making sure that the existing ones are well-paying. We also need to make sure that the jobs are available to everyone, and that there are no barriers to entry. This is a major challenge, but it is one that we must face if we want to solve the problems of the cities of the developing world.

One of the most important things we can do is to provide adequate education. This means building new schools, and making sure that the existing ones are in good condition. We also need to make sure that the schools are affordable, so that everyone can afford to send their children to school. This is a major challenge, but it is one that we must face if we want to solve the problems of the cities of the developing world.

These are just some of the things that we can do to help the cities of the developing world. There are many more things that we can do, but these are the most important. If we do these things, we can make a big difference in the lives of the people who live in these cities. We can make sure that everyone has a chance to live a better life, and that everyone has a chance to succeed.
