Section 1 – About UK Shared Business Services

Putting the business into shared services

UK Shared Business Services Ltd (UK SBS) brings a commercial attitude to the public sector; helping our customers improve efficiency, generate savings and modernise.

It is our vision to become the leading provider for our customers of shared business services in the UK public sector, continuously reducing cost and improving quality of business services for Government and the public sector.

Our broad range of expert services is shared by our customers. This allows our customers the freedom to focus resources on core activities; innovating and transforming their own organisations.

Core services include Procurement, Finance, Grants Admissions, Human Resources, Payroll, ISS, and Property Asset Management all underpinned by our Service Delivery and Contact Centre teams.

UK SBS is a people rather than task focused business. It's what makes us different to the traditional transactional shared services centre. What is more, being a not-for-profit organisation owned by its customers, UK SBS' goals are aligned with the public sector and delivering best value for the UK taxpayer.

UK Shared Business Services Ltd changed its name from RCUK Shared Services Centre Ltd in March 2013.

Our Customers

Growing from a foundation of supporting the Research Councils, 2012/13 saw Business Innovation and Skills (BIS) transition their procurement to UK SBS and Crown Commercial Services (CCS – previously Government Procurement Service) agree a Memorandum of Understanding with UK SBS to deliver two major procurement categories (construction and research) across Government.

UK SBS currently manages £700m expenditure for its Customers.

Our Customers who have access to our services and Contracts are detailed [here](#).

Section 2 – About Our Customer

Medical Research Council (MRC)

The Medical Research Council is a publicly-funded organisation dedicated to improving human health.

The organisation supports research across the entire spectrum of medical sciences, in universities and hospitals, in its own units, centres and institutes in the UK, and in our units in Africa.

Supporting scientists

- Around 5,700 research staff are supported by the MRC, either employed directly in our institutes and units or funded through grants and fellowships.
- We spent £86m on training awards for postgraduate students and fellows in 2011/12, including those in the MRC's own institutes and units.
- At March 2012 there were around 1,900 MRC-funded PhD students and around 400 MRC fellows in higher education institutes and MRC research establishments.

Research examples

- The benefits of MRC research have a national and global impact; from infections in Africa, stem cell advances that can potentially combat brain and heart diseases and improvements in the design of tests for treatments. As well as more and better healthcare, medical research can lead to wider impacts; many millions more lives saved, a vastly improved quality of life and hence a more productive workforce and economic benefits to nations.
- MRC researchers have found markers for cancer cells that may help detect thousands of new cases of cancer a year. The markers are already part of an MRC-developed device that screens for cancer of the oesophagus, are being trialled for cervical cancer screening and could potentially be used in a test for bowel cancer.
- The NHS newborn hearing screening programme, introduced in 2002, improves the early detection of hearing impairment in babies, allowing earlier and more effective treatment for the 900 babies born each year in the UK with permanent hearing loss.
- An estimated 73,000 adults are living with HIV in the UK, according to 2006 figures, but around a third of those people haven't been diagnosed and don't know they're infected. Black and ethnic minority populations accounted for just over half of all 7,000 new cases in 2006. Among many other aspects of HIV research, such as the molecular basis of the condition, treatments and diagnosis, MRC scientists are also researching social and behavioural factors.

Section 4 – Specification and about this procurement

Minor Works Package for LMB & ARES

Laboratory for Molecular Biology (LMB)

Background – The MRC Laboratory for Molecular Biology (LMB)

The MRC Laboratory of Molecular Biology (LMB) is a world-class research laboratory, dedicated to understanding important biological processes at the molecular level with the goal of using this knowledge to tackle major problems in human health and disease.

The LMB is one of the birthplaces of modern molecular biology. Many techniques were pioneered at the laboratory, including DNA sequencing, methods for determining the three-dimensional structure of proteins and the development of monoclonal antibodies.

Over the years, the work of LMB scientists has attracted ten Nobel prizes, many Royal Society awards and numerous other scientific honours.

The LMB building is a state of the art laboratory facility, which was completed in 2012, it has a floor area of 32,700m² (GIA) and accommodates over 660 staff. It has specialist research facilities with a highly complex engineering system to enable the ground-breaking science and allow flexibility to support future scientific developments.

To support the scientific requirement, the LMB building has a vast amount of plant room areas, located within the energy centre, plant towers and interstitial floors. Complexity of the design of the engineering systems was demonstrated during the commissioning of the building, which took over 18 months to completely balance the system adequately for use by the scientists. The systems are still undergoing post-occupancy evaluations to ensure that resilience and efficiency requirements are all appropriately in place.

The facility houses laboratories that require in-depth specialist knowledge of their critical requirements to ensure appropriate standards are maintained. Areas are subject to specific legislative regulations, such as the HSE requirements for Containment Level 2 and 3 Laboratories, the Home Office requirements for licensed areas [under the Animals (Scientific Procedures) Act] for animal holding and experimentation, and Environment Agency requirements for facilities employing the use of radioisotopes. In the case of the Animal facilities, if their environmental requirements cannot be maintained, the facilities would be closed by the Home Office.

These and other facilities, such as the laboratories containing the Krios electron microscopes, mass spectrometers and nuclear magnetic resonance equipment have very specific and stringent operational requirements including tightly controlled environmental conditions (temperature, humidity, pressure control, air change rates, lighting levels etc) whilst needing to be kept free from sources of vibration, noise and electro-magnetic interference.

Such specialist laboratory areas are highly sensitive to any deviation from the established norm for their environment and changes can not only have devastating consequences for the research carried out, but for the safety of staff working in the vicinity of these rooms.

The LMB manages a separate animal facility (**ARES**) 6'715m² which is located on the Babraham Institute facility just outside of Cambridge. The ARES building is a successful fully automated animal

facility that provides genetically modified mice and other rodent species for research at the LMB.

The whole building is operated under strict Home Office guidelines and has maintained an excellent working relationship with the Home Office based on an exceptional record of maintaining control of the building environment.

The MRC have determined that the ARES building's control systems represents a business critical facility due to the risk to life safety and scientific operations should the systems not be well maintained and reactive repairs not be immediately addressed. It should be noted that the criticality of environmental controls at ARES is also governed by Home Office & HSE requirements and Government Legislation for both COSHH and the Animal (Scientific Protection) Act – ASPA.

LMB has highly trained technicians as part of the Estate's & Facilities team who have an intrinsic and detailed understanding of the environmental / scientific requirements of the Institute and the complex engineering systems of the ARES and LMB facilities.

Finally, it should be noted that the LMB also has a small off-site NMR (Nuclear Magnetic Resonance) facility, housed in the **MRS** building which is included for as part of the LMB's servicing requirement.

Scope of Service for the Minor Works package – LMB & ARES

The scope of service for the Minor Works package shall ensure that all maintainable assets, including software, non-fixed plant and equipment within the various premises and supplemented where necessary by an initial site survey, are maintained to the required 'fit for function' performance level, meeting the manufacturer's and installer's recommendations (whilst taking account of any supplementary servicing needs that arise from the as-built environment) and to ensure strict compliance with all statutory/legal and mandatory obligations.

1) Equipment / systems covered - LMB & ARES

There is a plethora of daily tasks and smaller works required to be carried out within the LMB & ARES facilities, including painting, general Mechanical & Electrical modifications, small Laboratory modifications, small office modifications, small building works etc.

Much of the works undertaken in the MRC's facilities are either specialist in nature of the technology, material, etc. that is required or in relation to the understanding of the wider complexity and consequently impact of any action taken. As a consequence the majority of the works may not be covered under the specifications and would require separate, out of specification pricing.

Fitness for purpose: works on the laboratory and animal facilities are more expensive than in a general office/admin area or similar estates types. This tends to be influenced by the complex mechanical and electrical engineering involved and due to the difficulties to carry out works whilst maintaining full operation of the science, which is sensitive to noise, vibration, dust, etc. Value for money in this sense is the minimum disruption to research, which often requires a more specialist solution for the works.

1) Scope of Supply- Undertake laboratory modifications as per typical example below:

Award Scoring criteria
Evaluation Justification Statement
In consideration of this particular requirement UK SBS has decided to evaluate Potential Providers by adopting the weightings/scoring mechanism detailed within this RFP. UK SBS considers these weightings to be in line with existing best practice for a requirement of this type.

Questionnaire	Q No.	Question subject	Maximum Marks
Price	AW5.2	Price	30%
Quality	PROJ3.2	Method Statement	15%
Quality	PROJ 3.3	Experience, Ability and Risk Mitigation	40%
Quality	PROJ 3.4	Competency and Approvals	10%

Award Evaluation of criteria

Non-Price elements

Each question will be judged on a score from 0 to 100, which shall be subjected to a multiplier to reflect the percentage of the evaluation criteria allocated to that question.

Where an evaluation criterion is worth 20% then the 0-100 score achieved will be multiplied by 20.

Example if a Bidder scores 60 from the available 100 points this will equate to 12% by using the following calculation: Score/Total Points available multiplied by 20 ($60/100 \times 20 = 12$)

Where an evaluation criterion is worth 10% then the 0-100 score achieved will be multiplied by 10.

Example if a Bidder scores 60 from the available 100 points this will equate to 6% by using the following calculation: Score/Total Points available multiplied by 10 ($60/100 \times 10 = 6$)

The same logic will be applied to groups of questions which equate to a single evaluation criterion.

The 0-100 score shall be based on (unless otherwise stated within the question):

0	The Question is not answered or the response is completely unacceptable.
10	Extremely poor response – they have completely missed the point of the question.
20	Very poor response and not wholly acceptable. Requires major revision to the response to make it acceptable. Only partially answers the requirement, with major deficiencies and little relevant detail proposed.
40	Poor response only partially satisfying the selection question requirements with deficiencies apparent. Some useful evidence provided but response falls well short of expectations. Low probability of being a capable supplier.
60	Response is acceptable but remains basic and could have been expanded upon. Response is sufficient but does not inspire.
80	Good response which describes their capabilities in detail which provides high levels of assurance consistent with a quality provider. The response includes a full description of techniques and measurements currently employed.
100	Response is exceptional and clearly demonstrates they are capable of meeting the requirement. No significant weaknesses noted. The response is compelling in its description of techniques and measurements currently employed, providing

	full assurance consistent with a quality provider.
<p>All questions will be scored based on the above mechanism. Please be aware that there may be multiple evaluators. If so, their individual scores will be averaged (mean) to determine your final score as follows:</p> <p>Example</p> <p>Evaluator 1 scored your bid as 60</p> <p>Evaluator 2 scored your bid as 40</p> <p>Evaluator 3 scored your bid as 80</p> <p>Evaluator 4 scored your bid as 60</p> <p>Your final score will $(60+40+80+60) \div 4 = 60$</p>	
<p>Price elements will be judged on the following criteria.</p> <p>The lowest price for a response which meets the pass criteria shall score 100.</p> <p>All other bids shall be scored on a pro rata basis in relation to the lowest price. The score is then subject to a multiplier to reflect the percentage value of the price criterion.</p> <p>For example - Bid 1 £100,000 scores 100. Bid 2 £120,000 differential of £20,000 or 20% remove 20% from price scores 80 Bid 3 £150,000 differential £50,000 remove 50% from price scores 50. Bid 4 £175,000 differential £75,000 remove 75% from price scores 25. Bid 5 £200,000 differential £100,000 remove 100% from price scores 0. Bid 6 £300,000 differential £200,000 remove 100% from price scores 0.</p> <p>Where the scoring criterion is worth 50% then the 0-100 score achieved will be multiplied by 50</p> <p>In the example if a supplier scores 80 from the available 100 points this will equate to 40% by using the following calculation: Score/Total Points multiplied by 50 $(80/100 \times 50 = 40)$</p> <p>The lowest score possible is 0 even if the price submitted is more than 100% greater than the lowest price.</p>	

Once the evaluation process and due diligence is complete, should the result of the process result in a tied place(s) then the supplier(s) who scored the highest total in the following quality criteria PROJ3.3 shall be considered the successful supplier and shall be awarded the opportunity

Quality question PROJ3.3

- 7.1.14 Bidders should read this document, RFx attachments, messages and the evaluation questionnaires carefully before completing the Response submission. Failure to comply with any of these instructions for completion and submission of the Submitted Response may result in the rejection of the Response. Bidders are advised therefore to acquaint themselves fully with the extent and nature of the goods/services/goods and services and contractual obligations. These instructions constitute the Conditions of Response. Participation in the RFP process automatically signals that the Bidder accepts these Conditions.
- 7.1.15 All material issued in connection with this RFP shall remain the property of UK SBS and/or as applicable relevant OPB and shall be used only for the purpose of this procurement. All Due Diligence Information shall be either returned to UK SBS or securely destroyed by the Bidder (at UK SBS's option) at the conclusion of the procurement

For these purposes, UK SBS may disclose within Government any of the Bidders documentation/information (including any that the Bidder considers to be confidential and/or commercially sensitive such as specific bid information) submitted by the Bidder to UK SBS during this Procurement. A key aspect of this is the reduction in the number of security classifications used. All Bidders are encouraged to make themselves aware of the changes and identify any potential impacts in their Bid, as the protective marking and applicable protection of any material passed to, or generated by, you during the procurement process or pursuant to any Contract awarded to you as a result of this tender process will be subject to the new GSC from 2nd April 2014. Bidders should note, however, that, even where information is identified as commercially sensitive, UK SBS may be required to disclose such information in accordance with the FoIA or the Environmental Information Regulations. In particular, UK SBS is required to form an independent judgment concerning whether the information is exempt from disclosure under the FoIA or the EIR and whether the public interest favours disclosure or not. Accordingly, UK SBS cannot guarantee that any information marked 'confidential' or "commercially sensitive" will not be disclosed.
- 7.4.4 Where a Bidder receives a request for information under the FoIA or the EIR during the procurement, this should be immediately passed on to UK SBS and the Bidder should not attempt to answer the request without first consulting with UK SBS.
- 7.4.5 Bidders are reminded that the Government's transparency agenda requires that sourcing documents, including RFP templates such as this, are published on a designated, publicly searchable web site, and, that the same applies to other sourcing documents issued by UK SBS, and any contract entered into by UK SBS with its preferred supplier once the procurement is complete. By submitting a response to this RFP Bidders are agreeing that their participation and contents of their Response may be made public.
