Schedule 2 – Specification

1. Introduction

The Department for Transport (DfT) invites proposals for the provision of a **Flight Schedules Data Subscription Service**. This contract will be subject to the DfT Standard Conditions of Contract.

The anticipated value of the project is approximately £20,000. This value is given in good faith as a guide to aid bidders planning for submitting their Tender. It should not be interpreted as an undertaking to purchase any goods or services to any value and does not form part of the Contract.

Bidders intending to bid for this requirement are requested to confirm their intention to submit / or not to submit proposals via the DfT e-Sourcing platform, Jaggaer. The deadline for the submission of bids via the Jaggaer platform will be **12:00pm (noon) on 16th November 2021**.

2. Background to the Requirement

Covid-19 has caused widespread disruption across the global aviation industry and subsequently affected global travel trends. The DfT requires access to a detailed dataset on flight schedules to monitor the capacity of the aviation sector and respond to any business-critical disruption in air transport, including the Covid-19 pandemic.

To both anticipate and identify disruptions to flights, the DfT requires detailed information about flight schedules at UK and overseas airports in an accessible format which is easy to analyse. The service should enable unrestricted download of data snapshots, both forward looking and historical, at least on a weekly basis. The data will need to be provided in a format that suits DfT business requirements, in a tool that is easy to query and considering the option for direct API access to the data.

This data will directly feed into the DfT's contingency planning and response, being used by analysts to get a retrospective and forward look of flights and be able to identify any potential for disruptions in advance. The DfT would be seeking a one-year subscription to this data provision with the possibility to extend for another year.

The DHSC requires access to similar data on flight schedules for disease modelling, to identify transport hubs, routes to the UK and connectedness of territories. The subscription to this data service will include one user account for DHSC and its agencies for this purpose.

3. Procurement Timetable

4. Scope

The supplier will be required to provide 2 user accounts for the exclusive use of the DfT and 1 user account for the exclusive use of the DHSC and its agencies for uninterrupted access to flight schedules data for the period of 12 months, plus a further 12-month option of extension with a review on the number of user accounts.

Two user accounts obtained through this subscription service will be owned by the Aviation Statistics teams at the DfT who will access the service. Specific data and analysis obtained or derived from the service will be distributed across the DfT to meet specific user needs.

The DfT will incorporate insubstantial portions, extracts, abstracts or summaries of the data and/or data service provided into analyses or presentations which can be made available and shared to other government departments so that the DfT can appropriately share insights into flight schedules across the different Departments that may be involved in the management of international travel or the management of related emergency response.

The DfT will also incorporate insubstantial portions, extracts, abstracts or summaries of the data and/or data service provided into analyses, presentations and publications which could be made publicly available on the GOV.UK website should the need arise. In such circumstances, all references to the data or manipulations of the data provided will be sourced as "DfT analysis of [supplier] data".

One user account will be owned by the UK Health Security Agency (UKHSA), executive agency of DHSC, who will access the service. Specific data and analysis obtained or derived from the service will be distributed across the DHSC and its agencies to meet specific user needs.

5. Implementation and Deliverables

The deliverable will be a data portal or platform which the DfT will be able to access through 2 user accounts and the DHSC will be able to access through 1 user account, for a period of 12

months beginning on the proposed commencement date outlined in the Procurement Timetable. The DfT may choose to extend this contract for another period of 12 months after the end of the initial contract period. As part of this extension the DfT will review how many user accounts are required. The price breakdown per user account in the initial procurement will be used to change the cost of the service if the number of user accounts change.

The deliverable should allow the DfT and the DHSC to access the required data (outlined in Section 6).

The deliverable should provide the ability to download the data in different formats. Bidders will also be required to provide a price for an optional module to access the data through an API service. This will be evaluated as part of Contract Award and if required will be requested throughout the Contract Term with 1 months' notice.

6. Specifying Goods and / or Services

The deliverable must fulfil the following criteria:

- The data portal or platform containing the relevant flight schedules data must be accessible for a period of 12 months for 3 user accounts. The data service must provide the user accounts the unrestricted ability to download the data or any derived analysis of the data on the platform in a machine-readable format (e.g. Excel file). The online tool must also provide the ability to flexibly query parameters and save reports for later use.
- Data must be available through a 'tidy data' format. In tidy data:
 - Each variable forms a column.
 - Each observation forms a row.
 - Each type of observational unit forms a table.
- The data provided should be at individual flight level and include the following data fields (but is not limited to):
 - Scheduled date and local departing/arriving time of flight
 - Flight number, aircraft name and code
 - Number of scheduled seats (split by business/first and economy)
 - Carrier name, code and category (low cost / mainline)
 - Origin and destination of the flight – departing/arriving airport name, city, state, country, and region with accompanying identification codes
 - Distance (Great-Circle Distance) in kilometres, flying time in minutes
 - Service type (passenger/cargo/both)
 - Number of stops
- The data provided should use standardised coding where applicable, such as IATA (International Air Transport Association) or ICAO (International Civil Aviation Organisation) codes.
- The data provided must cover schedules at least 12 months into the future to provide a forward-looking assessment of capacity, as well as historical flights schedules for comparison purposes back to at least the start of the 2019 calendar year.
- The data provided must have worldwide coverage, including complete coverage of UK international and domestic flights.

- The data must be updated at a minimum on a weekly basis so that weekly snapshots can be downloaded. The supplier must specify the update timetable they would typically seek to provide. A comprehensive backlog of snapshots at different dates should also be available for past data.
- The data the DfT and DHSC acquires should not be subject to unnecessary conditions on usage or limits; the Departments will be able to download as much or as little data as required during the year. The Departments will reserve the right to use any acquired/downloaded data for producing analysis even after the end of the subscription year without having to subscribe again or requiring any permission.
- The DfT will not consider trial periods to assess the proposed data services, and so suppliers are encouraged to make clear the functionality and breadth of the data service through written or visual content in their proposal.
- To aid with the facilitation of large-scale data analytics, the supplier must additionally, provide the cost of an optional module for the DfT to access the data through an Application Programming Interface (API). Any restrictions in the number of 'calls' that can be made through the API service should be clearly specified in your response alongside additional costs if subscribed and any limitation in accessing the API.
- To comply with financing and invoicing rules for goods and services used during financial years, the DfT requires that the service is paid for through two invoices, one at service commencement to cover the first half of the service value, and one 6 months after commencement to cover the remaining half of the service value.

7. Skills and Apprenticeships

Not applicable.

8. Quality Assurance Requirements

The provider will ensure data is accessible through the entire subscription period and ensure it is of a suitable standard to produce statistical analysis.

9. Service Conditions and Environmental Factors

The supplier should:

- make available customer support services through appropriate mechanisms for the entire period of the contract, and outline the service levels it aims to provide;
- communicate any changes, amendments and/or errors to the data provided when identified in a timely manner through appropriate mechanisms;
- communicate any planned platform downtime, outages or maintenance periods at least 5 working days in advance through written correspondence.

10. Management and Contract Administration

A Purchase Order Number for this requirement will be provided to the successful supplier. All invoices must be sent to:

SSa.invoice@sharedservicesarvato.co.uk

**Accounts Payable,
Shared Services Arvato,
5 Sandringham Park,
Swansea Vale,
Swansea
SA7 0EA.**

copying in the contract lead, with the invoice for the subscription, to the DfT Contract Manager with the specified Purchase Order Number.

The DfT Contract Manager will set in place contract review meetings at a frequency appropriate to the length, value and complexity of the contract. The Contract Manager will agree with the supplier at the contract implementation meeting what will be reviewed and measured at these meetings, and define the format data should be provided in.

Sub-contracting to Small and Medium Enterprises (SMEs)

DfT is committed to removing barriers to SME participation in its contracts, and would like to also actively encourage its larger suppliers to make their sub-contacts accessible to smaller companies and implement SME-friendly policies in their supply-chains (see our [website](#) for further information).

To help us measure the volume of business we do with SMEs, our Form of Tender document asks about the size of your own organisation and those in your supply chain.

If you tell us you are likely to sub-contract to SMEs, and are awarded this contract, we will send you a short questionnaire asking for further information. This data will help us contribute towards Government targets on the use of SMEs. We may also publish success stories and examples of good practice on our website.

11. Security

Not applicable.

12. Data Protection

The supplier will be required to comply with all applicable requirements of the Data Protection Legislation (including the General Data Protection Regulation ((EU) 2016/679) ("GDPR"), the Law Enforcement Directive (Directive (EU) 2016/680), and all applicable Law about the processing of personal data and privacy).

The supplier will not be required to process any Personal Data on behalf of the DfT.

13. Training / Skills / Knowledge Transfer

The supplier should offer an initial introductory training session on the use of the data service provided. Should there be a substantial change in the hosted solution provided throughout the contract period (e.g. substantial upgrade, or substantially new functionality), the supplier should provide notification of this and offer any necessary training sessions or training materials.

14. Documentation

The supplier should share or otherwise make available any documentation on the data and the data platform including available user manuals.

15. Arrangement for End of Contract

The Departments will reserve the right to use any acquired/downloaded data for producing analysis even after the end of the subscription year without having to subscribe again or requiring any permission.

16. Evaluation Criteria

Selection will be based on the evaluation criteria encompassing the most economically advantageous tender, which demonstrates a high degree of overall value for money.

This tender will be evaluated using the weightings below and further set out at Annex 1 to obtain the optimal balance of quality and cost. Only those tenders achieving a minimum score of 60% for each question will be accepted.

Evaluation criteria	Score
Quality Factors	70%
Financial / Price Factors	30%

Proposals will be evaluated against the Evaluation Criteria listed above. The following weightings and sub-criteria will be utilised in the Evaluation to ascertain the best value for money proposition.

Quality Factors:

The Quality Factors will be assessed against the criteria specified in Annex 1.

Quality Factors Scoring Methodology

Score	Definition of Score
5	The Tenderer demonstrates fully that they can meet the requirement as detailed in the Specification
4	Meets all requirements but with minor issues
3	Meets some requirements but with a few major gaps or issues
2	Meets some requirements; major concerns
1	Meets few requirements; serious concerns

0	The method of fulfilling the stated requirement is inadequate / not addressed
----------	---

Financial / Price Factors Scoring Methodology:

The Percentage Scoring Methodology will be used to evaluate all proposals for this requirement. This methodology is based on the following principles:

Firstly, the lowest tendered price will be scored 100, and each subsequent bid will be baselined to this score. So a bid which is 25% more expensive on price than the lowest tendered price will be allocated a score of 80.
