The prices quoted do not include the addition of VAT.

Data List - Custom Research

1. Supplier is required to provide a dataset on a one-off basis covering (as comprehensively as possible) the entire cross-section of residential development sites in GB over the past three years to 31 March 2023.
2. The dataset should include:
 - developments which have been recently completed;
 - developments which are in the process of being completed;
 - proposed developments which are yet to start but which have obtained planning permission;
 - proposed developments which are currently going through the planning process; and
 - (where possible) proposed developments which have not yet entered the planning system.
3. For the avoidance of doubt, the CMA does not require data on non-residential developments.
4. The dataset must provide site-by-site details on a number of aspects of each site and the companies involved as specified in the attached data dictionary (the green and yellow highlighted rows).
5. Supplier must provide promptly (and no later than within two weeks of this agreement):
 - the data itself as a one-time download in a CSV and/or Excel file;
 - a statement setting out the scope of coverage of the dataset including any limitations (e.g. in particular areas, types of site or developments);
 - a statement setting out the key actions taken to ensure the quality and accuracy of the data provided; and
 - such documentation as is required to understand the dataset and use the dataset (field explanations etc).
6. Supplier will provide reasonable assistance on a timely basis in the event of any clarificatory questions the CMA may have in using or interpreting the data provided.
7. Supplier agrees to the Terms and Conditions outlined in the "CMA Specific Terms" document attached with this order form and this supersedes any other terms including for the avoidance of doubt any terms published in the Glenigan website.
