2 Brief Development

2.1 Explaining the Process

As part of the core activities of RIBA Stage 1, the team reviewed the Initial Brief and Space Planning Study produced by the London Institute of Medical Sciences (LMS) and Imperial College London (ICL). It is understood that this document was developed in tandem with key members of the Building Working Group and was thought to be an accurate representation of the Institutes aspiration for the new LMS building.

As part of the team's initial review process Hawkins\Brown, Abell Nepp and Buro Happold led a series of user consultation meetings with key users including Pls and Section Leads. Alongside the information gathered from talking to the users, the team have utilised benchmarking against similar building precedents as well as further investigation into the existing facilities at the LMS and ICL to aid the development of the original brief with LMS. This brief development process to date highlighted areas that could be made more efficient as well as key aspirations that shape the brief and accommodation schedule.

Based on the guidance obtained from the benchmarking exercise and a review of existing accommodation on campus, the current brief emerged and is outlines towards the end of this section.

2 Brief Development

Project Governance Structure

Design Team

Hawkins\Brown
Buro Happold
Abell Nepp
Turner & Townsend Project
Management

Specialist Consultants

Land Use Consultants: Land Use Consultants

BIM Consultant: Infinite BIM

Independent Commissioning
Consultant: TBC

Building Regulations Approved

Inspector: TBC

Party Wall Advisor: TBC

Project Board Group

MRC: Susan Simon
MRC LMS: Amanda Fisher & Carole Swan
ICL: Nick Jennings & Jonathan Weber
MRC LMS Facilities: Novica Jevric

Turner & Townsend Project Management

Strategic overview

Building Working Group

MRC: Susan Simon
MRC LMS: Carole Swan
ICL: Stephen Pullen

MRC LMS Facilities: Novica Jevric

Research Section Leads: Epigenetics: Luis Aragon

Integrative Biology: Matthias Merkenschlager

Genes & Metabolism: Irene Miguel-Aliaga Clinical Research Lead: Dominic Withers

Animal Research Lead: Niall Dillon
Hawkins\Brown

Turner & Townsend Project Management

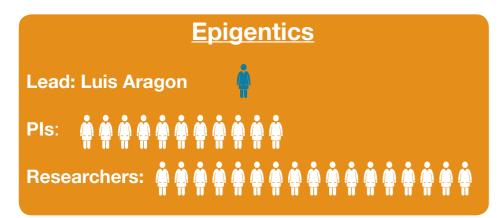

Strategic overview of user client requirements

Overview of project aspirations

Project governance / formal approvals

- Vision for the project
- Shared knowledge base through building visits / research / user consultations
- Department adjacencies
- Project wide strategies for space allocations, lab, servicing, shared spaces, interior design and materiality etc
- Costs / programme

ACADEMIC RESEARCH SECTIONS

Integrative Biology

Lead: Matthias Merkenschlager

Lead:

Genes and Metabolism

Lead: Irene Miguel-Aliaga

Researchers:

12

- Individual department requirements
- Room to room adjacencies
- Key servicing / specific equipment requirements
