## Schedule 1 - Services

The General Data Protection Regulation (GDPR) is new data protection legislation that comes into effect on 25<sup>th</sup> May 2018. Aiming to strengthen and update existing data protection law, GDPR will take into account changes in technology and attitudes to privacy in the digital age. The regulation will give people more rights, impose harsher financial penalties, and mean that organisations have to be much more transparent about how they use personal data.

There are three objectives for building a robust data service in DfE:

- A single scalable data hub, with common data architecture, and an appropriate technological stack, with robust automated supply chain management, to ensure all the data collected across the Department is available, with minimal duplication, to enable timely and efficient analysis to support policy priorities.
- Data security by design, developing a three line of defence structure to protect both our data assets, and our staff.
- Appropriate organisational and operating model to enable user focused effective and efficient acquisition, ingest and exploitation of the Department's data assets.

The changes will also play an important part in three areas:

- Enhancing the Department's integral data security
- Assisting in the Department's compliance with GDPR
- Improving integration and alignment of data, processes and policies that clearly fit together. In particular, ensuring that our strategic data collection transformation work (Data exchange) aligns with our key data storage & access project (Data Hub) to ensure smooth and efficient flow of data and reduce risks of expensive rework.

The supplier will provide services for GDPR compliance and Data Transformation as follows:

1. Technical input, oversight and assurance services to support the DfE's journey to achieve a GDPR compliant position by end of January 2019. The services will provide a mix of enterprise, technical data analysis, and business analysis to provide:

As outlined and agreed in the GDPR programme plan, certain deliverables in the D2 – Data Enablement and D3 – Business Change workstreams will continue beyond January 31, 2019.

2. Strategic, enterprise, technical data analysis, business analysis, and data assurance services in support of the GDPR programme and development of DfE's broader Data Strategy including:
  - Data Strategy and Governance
  - Data Platform and Architecture (this includes advisory work to help design the CDO operating model and integrated enterprise level data platform. This work will also help develop the DfE's broader data strategy)
  - Data Operating Model and Process
  - Specific Data Services:
    - i. Learner Data Service
    - ii. Data Hub
  - Stakeholder Engagement and Leadership for Data related initiatives

The progress of the overarching programme will be judged as follows:

At each milestone date the review process (described below) will cover the amount of progress across both (1) and (2). A judgement will be made as to whether the work complete is in line with the payment milestones, based on the deliverables in the GDPR programme as defined by the Programme and steered by the Programme Board. This will be agreed by the SRO. Changes to the programme are controlled through the programme board, understanding that changes will need to be impact assessed.

Delivery of the agreed plan will be supported by appropriate project management approaches including change control procedures. The supplier will complete deliverables and milestones with the following dependencies:

- Appropriate DfE resources are made available to achieve the milestones.
- Review and feedback on draft deliverables, response to escalations and decision-making will take place in a timely manner.
- DfE will participate in planning activities, as well as review and retrospectives and make the supplier aware immediately should it feel milestones have not been met, or the scope of the services has changed significantly from that outlined above.
- The supplier's expert resources will create deliverables using all reasonable professional judgement and care and consult with the client throughout the engagement.

Regular monthly milestone reviews will be scheduled with the SRO to agree outcomes, completion of deliverables, and determine priorities for the next period as follows:

- Monthly programme board for GDPR
- Weekly update meetings for Data Transformation Services

Following each monthly milestone review, the SRO will send an email to the supplier stating approval of progress against deliverables and authorization for milestone payment.

Resources required to deliver the agreed outcomes of the work for January 2019 will be provided via SFIA rates as per G-Cloud 9 framework and will include the following types:

- Data Architects
- Data Specialists
- Data Modellers
- Business Analysts
- Project Management
- PMO support
- QA/ Oversight

Resources will be agreed with the CDO and Lead Delivery Manager at the initiation of each milestone period.

## Schedule 2 - Call-Off Contract charges

Call-Off Contract charges will be against milestones for agreed services delivered. The detail of the scope and cost of each milestone will be reviewed with the Chief Data Officer (CDO) and Lead Delivery Manager (as specified in the contract) prior to the start of each period to optimise resources and outcomes to ensure value for money at each stage. This review will also assess milestone delivery and charging for the previous period.

The initial period will run from contract commencement for one month (planned milestone date of 31<sup>st</sup> August 2018). This will commence the activity and scope as defined in Schedule 1 to complete the initial planning and discovery activity. Following completion of this milestone, a revised plan and projected costs will be agreed with the CDO.

The total projected cost is not to exceed the contract value.

The Table below provides the initial breakdown of cost by milestone through to end-January 2019.

| Date |  | Milestone |  | Cost<br>( ex VAT) |  | Milestone Value<br>(ex VAT) |  |
|------|--|-----------|--|-------------------|--|-----------------------------|--|

These costs are based on the SFIA prices published under G-Cloud for the service.

All costs are exclusive of VAT but include any expenses claimable in line with DfE's T&S Policy.

The total cost of £900,000 + VAT must not be exceeded without prior consultation and agreement by DfE.

Specific deliverables and outcomes are to be agreed within the first 30 days of this contract and added to the payment schedule to measure progress.
