

Layout 1:1000@A1

Proposed 1:12 access ramp section to be excavated low existing track in order to access gradient on the first section

Existing track with speed bumps _____

maintainance gras

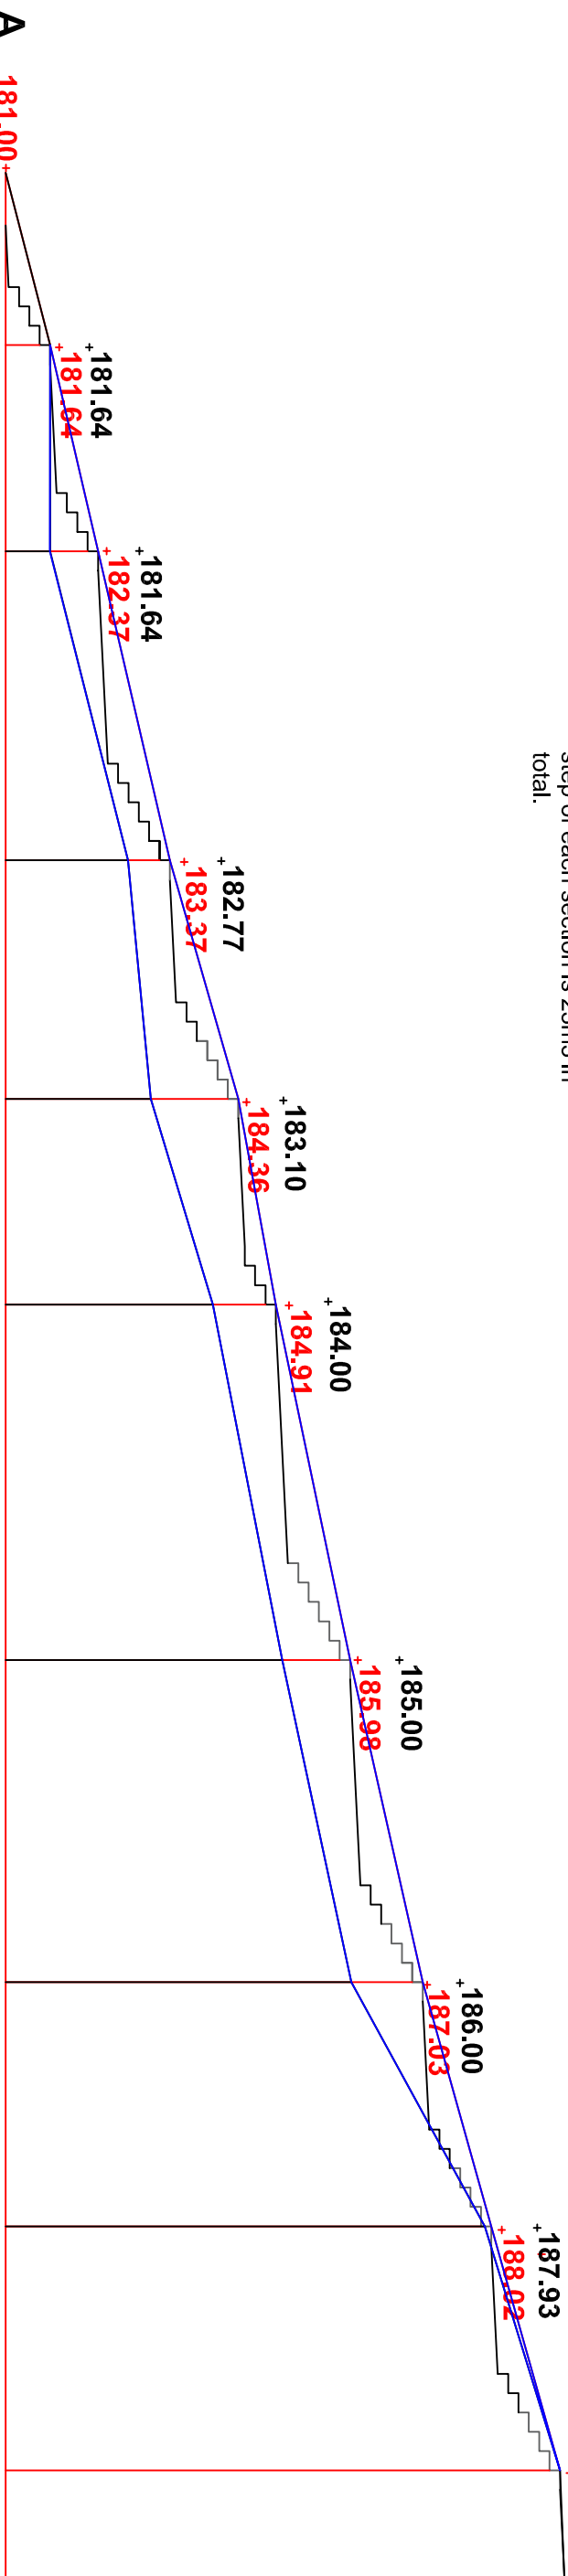

Proposed shade tolerant wildflower turf supplied and laid over regraded profile of existing levels, with 100mm depth surface dressing of free draining topsoil.

Layout 1:1000 @ A1

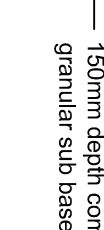

NB: Approximate volume of fill to achieve proposed levels at top step of each section is 23m3 in total.

+185.00	Existing level
+185.98	Proposed leve

AA

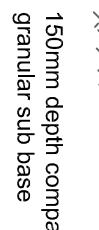

Layout 1:100 @ A1

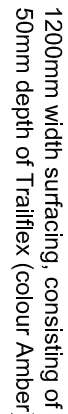

well compacted Type 1 sub base

Layout 1:100 @ A1

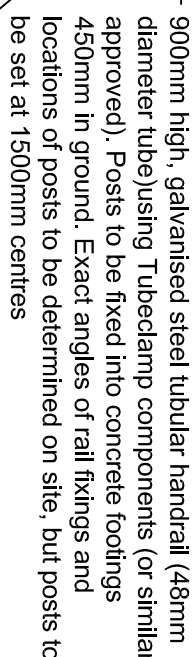

Random walling stone retaining wall, varying height. Constructed using random walling stone. To be set on 150mm depth well compacted Type 1 sub base.

Layout 1:100 @ A1

granular sub base

Layout 1:100 @ A1

Dimensions:
Step width 1200mm
Riser height above ground level 150mm
Tread depth 280mm
Wall cap width 150mm

Treated timber pegs 600 x 50mm with pointed end driven into ground, 2Nr per step and 2 Nr nails per peg

Treated timber risers 200mm x 47mm fixed to pegs and boards using chipboard screws

Retaining wall with stone cap
