*[This is a template format for a Change Control Form, to be used for initiation and management of contract changes from change initiation to sign off. The change details and progress should be also captured in the central Change Control Register (#9). The form headings correlate to key stages in the change approval process. Not all the information listed under each stage will necessarily be needed for every contract and the content may need to be supplemented with contract-specific provisions. However all the stages need to be filled in and signed off before the change is regarded as complete.]*

***Before progressing the change from stage to stage always make sure that representatives signing the change on behalf of the customer, supplier and CCS have the authority to approve the scope and cost of the relevant change. Refer to CM Standards Change Control stage for further guidance]***

*[This is a template format for a Change Control Form, to be used for initiation and management of contract changes from change initiation to sign off. The change details and progress should be also captured in the central Change Control Register (#9). The form headings correlate to key stages in the change approval process. Not all the information listed under each stage will necessarily be needed for every contract and the content may need to be supplemented with contract-specific provisions. However all the stages need to be filled in and signed off before the change is regarded as complete.*

***Before progressing the change from stage to stage always make sure that representatives signing the change on behalf of the customer, supplier and CCS have the authority to approve the scope and cost of the relevant change. Refer to CM Standards Change Control stage for further guidance***

*[Guidance on how to fill in specific stages or the wording to be added in relation to each specific contract is put in square brackets and in Italics throughout the document]*
