What is more, being a not-for-profit organisation owned by the Department for Business, Energy & Industrial Strategy (BEIS), UK SBS' goals are aligned with the public sector and delivering best value for the UK taxpayer.

UK Shared Business Services Ltd changed its name from RCUK Shared Services Centre Ltd in March 2013.

Our Customers

Growing from a foundation of supporting the Research Councils, 2012/13 saw Business Innovation and Skills (BIS) transition their procurement to UK SBS and Crown Commercial Services (CCS – previously Government Procurement Service) agree a Memorandum of Understanding with UK SBS to deliver two major procurement categories (construction and research) across Government.

UK SBS currently manages £700m expenditure for its Contracting Authorities. Our Contracting Authorities who have access to our services and Contracts are detailed [here](#).

Section 4 – Specification and about this procurement

1. Background to Requirement

ISIS is a world-leading centre for research in the physical and life sciences at the UKRI-STFC Rutherford Appleton Laboratory (RAL, the 'Agency') near Oxford.

ISIS is an intense pulsed neutron source providing beams of neutrons and muons to enable scientists to study the structure and properties of matter for the benefit of Science and Engineering in the UK and abroad. Our suite of neutron and muon instruments gives unique insights into the properties of materials on the atomic scale.

We support a national and international community of more than 3,000 scientists for research into subjects ranging from clean energy and the environment, pharmaceuticals, and health care, through to nanotechnology and materials engineering, catalysis, and polymers, and on to fundamental studies of materials.

ISIS facility is formed by a LINAC and a proton synchrotron accelerator that delivers an 800 MeV proton beam to 2 different tungsten-based targets where the 2 intense pulsed neutron sources are created. Next to each target there are about 20 beamlines where the scientists perform their experiments.

In order to monitor the radiation generated in the different areas of ISIS, the ISIS Health Physics (IHP) staff (located at RAL) use portable instruments dedicated for ionisation radiation detection which requires periodic checks. These instruments are used to measure radioactive contamination (alpha and beta particles) and ionisation radiation (in gamma, X-ray, or neutron field, or in a mixture of them). The Contracting Authority is looking for bidders capable of performing the required calibration checks for all the portable instruments used by IHP.

2. Introduction

ISIS Health Physics Section (IHP) requires that the instruments used for ionisation radiation detection have to be checked and calibrated periodically by a certified UKAS laboratory.

Current quantity levels of the type of instruments is:

- Alpha & beta: 45 instruments
- Gamma & X-rays: 240 instruments
- Neutron: 30 instruments

Note – current quantity levels maybe subject to slight variances in the future.

The Bidder should have a quality assurance management system implemented and the capacity of performing this kind of instruments calibration (including the evaluation of any repair if it is needed and repair it on behalf of the Contracting Authority). Also, the Bidder should be capable of managing the carriage instrumentation for any given quantity (from the instrumentation list given in the paragraph #5 'Present list of instruments' below and the instruments weight specified in 2 categories as follows:

1. Below 2.0 kg per instrument.
2. Between 2.0 kg and 14.0 kg per instrument.
3. Up to 40 kg per gamma & neutron trolley.

3. Scope of Requirement

The Bidder should provide documentation that they are capable of addressing all of the requirements of this contract

3.1 Technical capacity – Service required

a) Main Service

The Bidder should be capable of calibrating the following type of ionisation radiation instruments:

- Alpha and beta contamination
- Gamma ray
- X-ray (from 6 keV)
- Neutron

(The energy of the measurement range for each type of radiation will cover all the Contracting Authorities instruments requirements, plus any special conditions given by the instrument manufacturer)

b) Additional Service

- i. The Bidder should be capable of producing a report about the evaluation of the instrument calibration requirements and the instrumentation conditions.
- ii. In the event that the instrument needs to be repaired, the Bidder should be capable of reporting to the Agency about the reasons of the work, giving an estimative cost and repairing it (on behalf of the Agency and once the Agency accept it).
- iii. In the event that the instrument is new, the Bidder should be capable of calibrating first used instrument.

3.2 Test facilities capabilities

The Bidder should be capable of calibrating any IHP instrument from low to high dose rates levels with more than one source type of the following type of radiation:

- i. Alpha
- ii. Beta
- iii. Gamma
- iv. X-ray (from 6 keV)
- v. Neutron

4. Administration and Customer Service

a) Certificate document:

Each calibrated instrument shall have a document that certifies the calibration pass/fail criterion. It shall contain at least:

- Instrument details and type of radiation used for the calibration
- Details of the test (including the test conditions)
- Results of the test: pass/fail
- The staff involved in the test.

b) Repair document:

In the event that an instrument has been repaired by the Bidder (after IHP approval), a document detailing work carried out shall be sent to IHP with the corresponding instrumentation certificate.

c) First used instrument calibration

In the event that the instrument is new, each calibration of a first used instrument shall have a document that certifies the calibration pass/fail criterion. It shall contain at least:

- Instrument details and type of radiation used for the calibration
- Details of the test (including the test conditions)
- Results of the test: pass/fail
- The staff involved in the test.

d) Turn around days:

The Bidder should indicate the time required to calibrate each instrument type:

- Alpha & beta
- Gamma & X-rays
- Neutron

Under two possible scenarios:

- 1 instrument of each type
- 10 instruments of each type

e) Carriage for instruments:

The Bidder should be capable of managing an adequate carriage for any quantity of instruments from IHP to the Bidder's calibration laboratory. The Bidder is requested to give a quote of two types of carriages:

- 20 (minimum) instruments of 2.0 kg each
- 10 (minimum) instruments of 14.0 kg each

10 (minimum) instruments (gamma & neutron trolley) of 40.0 kg each

Note: this could be an additional service depending on the Agency carriage availability for the date that the transportation should be done.

Award Scoring criteria

Evaluation Justification Statement

In consideration of this particular requirement the Contracting Authority has decided to evaluate Potential Providers by adopting the weightings/scoring mechanism detailed within this RFP. The Contracting Authority considers these weightings to be in line with existing best practice for a requirement of this type.

Questionnaire	Q No.	Question subject	Maximum Marks
Price	AW5.2	Price	40.00%
Quality	PROJ2.1	Scope of Requirement	15.00%
Quality	PROJ2.3	Administration and Customer Service	15.00%
Quality	PROJ2.4	Service Levels and Performance	15.00%
Quality	PROJ2.5	Risk Register	5.00%
Quality	PROJ2.6	Test Facilities	10.00%

Award Evaluation of criteria

Non-Price elements

Each question will be evaluated on a score from 0 to 100, which shall be subjected to a multiplier to reflect the percentage of the evaluation criteria allocated to that question.

Where an evaluation criterion is worth 20% then the 0-100 score achieved will be multiplied by 20%.

Example if a Bidder scores 60 from the available 100 points this will equate to 12% by using the following calculation:

$$\text{Score} = \{\text{weighting percentage}\} \times \{\text{bidder's score}\} = 20\% \times 60 = 12$$

The same logic will be applied to groups of questions which equate to a single evaluation criterion.

The 0-100 score shall be based on (unless otherwise stated within the question):

0	The Question is not answered, or the response is completely unacceptable.
10	Extremely poor response – they have completely missed the point of the question.
20	Very poor response and not wholly acceptable. Requires major revision to the response to make it acceptable. Only partially answers the requirement, with major deficiencies and little relevant detail proposed.
40	Poor response only partially satisfying the question requirements with deficiencies apparent. Some useful evidence provided but response falls well short of expectations. Low probability of being a capable supplier.
60	Response is acceptable but remains basic and could have been expanded upon. Response is sufficient but does not inspire.
80	Good response which describes their capabilities in detail which provides high levels of assurance consistent with a quality provider. The response includes a full description of techniques and measurements currently employed.
100	Response is exceptional and clearly demonstrates they are capable of meeting the requirement. No significant weaknesses noted. The response is compelling in its description of techniques and measurements currently employed, providing full assurance consistent with a quality provider.

All the above questions will be marked based on the above mechanism. Please be aware that there may be multiple evaluators. If so, their individual scores will be reviewed in an evaluator meeting, once the individual evaluations are complete and a consensus score will be agreed to determine your final score

Example

Evaluator 1 scored your bid as 60
 Evaluator 2 scored your bid as 40
 Evaluator 3 scored your bid as 80
 Evaluator 4 scored your bid as 60
 Your final score will $(60+40+80+60) \div 4 = 60$

Once the above evaluation process has been undertaken and the scores are apportioned by evaluator(s) this will then be subject to an independent commercial review and moderation meeting, if required by the commercial lead, any and all changes will be formally recorded relative to the regulatory obligations associated with this procurement, so as to ensure that the procurement has been undertaken in a robust and transparent way.

Price elements will be evaluated on the following criteria.

The lowest price for a response which meets the pass criteria shall score 100.

All other bids shall be scored on a pro rata basis in relation to the lowest price. The score is then subject to a multiplier to reflect the percentage value of the price criterion.

For example - Bid 1 £100,000 scores 100.

Bid 2 £120,000 differential of £20,000 or 20% remove 20% from price scores 80

Bid 3 £150,000 differential £50,000 remove 50% from price scores 50.

Bid 4 £175,000 differential £75,000 remove 75% from price scores 25.

Bid 5 £200,000 differential £100,000 remove 100% from price scores 0.

Bid 6 £300,000 differential £200,000 remove 100% from price scores 0.

Where the scoring criterion is worth 50% then the 0-100 score achieved will be multiplied by 50

In the example if a supplier scores 80 from the available 100 points this will equate to 40% by using the following calculation: Score/Total Points multiplied by 50 $(80/100 \times 50 = 40)$

The lowest score possible is 0 even if the price submitted is more than 100% greater than the lowest price.

This evaluation criteria will therefore not be subject to any averaging, as this is a mathematical scoring criteria, but will still be subject to a commercial review.

5.5. Evaluation process

5.5.1. The evaluation process will feature some, if not all, the following phases

Stage	Summary of activity
Receipt and Opening	<ul style="list-style-type: none"> RFP logged upon opening in alignment with UK SBS's procurement procedures. Section 7 – General Information

What makes a good bid – some simple do's

DO:

Do comply with Procurement document instructions. Failure to do so may lead to disqualification.

Do provide the Bid on time, and in the required format. Remember that the date/time given for a response is the last date that it can be accepted; we are legally bound to disqualify late submissions. Responses received after the date indicated in the RFP shall not be considered by the Contracting Authority, unless the Bidder can justify that the reason for the delay, is solely attributable to the Contracting Authority

Do ensure you have read all the training materials to utilise e-sourcing tool prior to responding to this Bid. If you send your Bid by email or post it will be rejected.

Do use Microsoft Word, PowerPoint Excel 97-03 or compatible formats, or PDF unless agreed in writing by the Buyer. If you use another file format without our written permission, we may reject your Bid.

Do ensure you utilise the Delta eSourcing messaging system to raise any clarifications to our RFP. You should note that we will release the answer to the question to all Bidders and where we suspect the question contains confidential information, we may modify the content of the question to protect the anonymity of the Bidder or their proposed solution

Do answer the question, it is not enough simply to cross-reference to a 'policy', web page or another part of your Bid, the evaluation team have limited time to assess bids and if they can't find the answer, they can't score it.

Do consider who the Contracting Authority is and what they want – a generic answer does not necessarily meet every Contracting Authority's needs.

Do reference your documents correctly, specifically where supporting documentation is requested e.g. referencing the question/s they apply to.

Do provide clear, concise and ideally generic contact details; telephone numbers, e-mails and fax details.

Do complete all questions in the questionnaire or we may reject your Bid.

Do ensure that the Response and any documents accompanying it are in the English language, the Contracting Authority reserve the right to disqualify any full or part responses that are not in English.

Do check and recheck your Bid before dispatch.

What makes a good bid – some simple do not's

DO NOT

Do not cut and paste from a previous document and forget to change the previous details such as the previous buyer's name.

Do not attach 'glossy' brochures that have not been requested, they will not be read unless we have asked for them. Only send what has been requested and only send supplementary information if we have offered the opportunity so to do.
