

1. We see the tower and slide example has one tube slide but the spec asks for 2 tubes slides. Please clarify.

The example is purely to give an example of the kind of thing we want. 1 tube slide is definitely wanted. The second slide doesn't necessarily have to be a tube. We want your best play solutions, so happy to see your best suggestions in terms of equivalence that provides maximum playability.

All play manufacturers have different equipment portfolios so we are not expecting to see towers identical to the example product. That is purely indicative.

2. Painting fence posts black will increase cost. Are black posts essential?

- No not essential. In fact play value is a key driver. So an unpainted galvanised bow topped fence is acceptable.

3. What material is preferred in the football/multigoal area? We suggest Enviro pave - 50% wet pour 50% aggregate because wet pour is often slippery when wet - for football.

- Happy for the area around the goal mouth D zone to be enviro paved.
