

Questions raised by potential tenderer at site visit on 08/09/2023 and responses:

Is there an area that can be used for site storage?

The area in the bottom car park which is already partially enclosed can be used.

To what depth was the existing pathway excavated?

To a depth of 0.225m

Is it possible to completely close off the area where the works are taking place?

Yes, we will need to send out letters in advance to advise visitors to the cemetery that the area will be closed off for several days for their safety whilst works are taking place.

Is it possible to take plant and materials across the lower (grassed) part of the cemetery?

This should be possible providing the ground is not too wet at the time the works are taking place.
