Schedule 2 (Specification)

This Schedule sets out what the Buyer wants.

As per Section 4 – Specification of the Request for Proposal document below.

Section 4 – Specification and about this Procurement

Introduction

UK Shared Business Services (UK SBS), on behalf of the UK Research and Innovation through Innovate UK wishes to establish a contract for the provision of the Energy Catalyst Accelerator Programme' for Energy Catalyst Round 9 & 10, of the programme along with bolstering non-grant support through business acceleration support for both the UK companies and international partners.

UK SBS is managing this procurement process in accordance with the Public Contracts Regulations 2015 (as may be amended from time to time) (the "Regulations").

The award of this contract will be based on a single lot, with multiple work packages and one supplier/consortium will be appointed.

Despite significant progress in recent years, we are not on track to meet Sustainable Development Goal 7 (SDG7) to deliver universal access to energy by 2030. Around 789 million people lacked access to electricity in 2018¹. Without sustained efforts, 650 million people will still be left without access to electricity in 2030². Even more remain without access to clean cooking – almost 3 billion people across Africa and Asia in 2016. The World Bank has estimated that poor electricity access is costing Africa 2% point reduction off gross domestic product (GDP) growth each year³. To solve this, there is a need for investment, innovation and business support.

The Energy Catalyst's mission is to accelerate the innovation needed to meet this challenge. By providing financial and advisory support to innovators we help create strategic partnerships, uncover insights and develop business models to improve lives in Africa and Asia. To date we have provided £190m of public grant funding to 438 projects delivered by 1300+ organisations to support innovators through 9 rounds of the Energy Catalyst Programme.

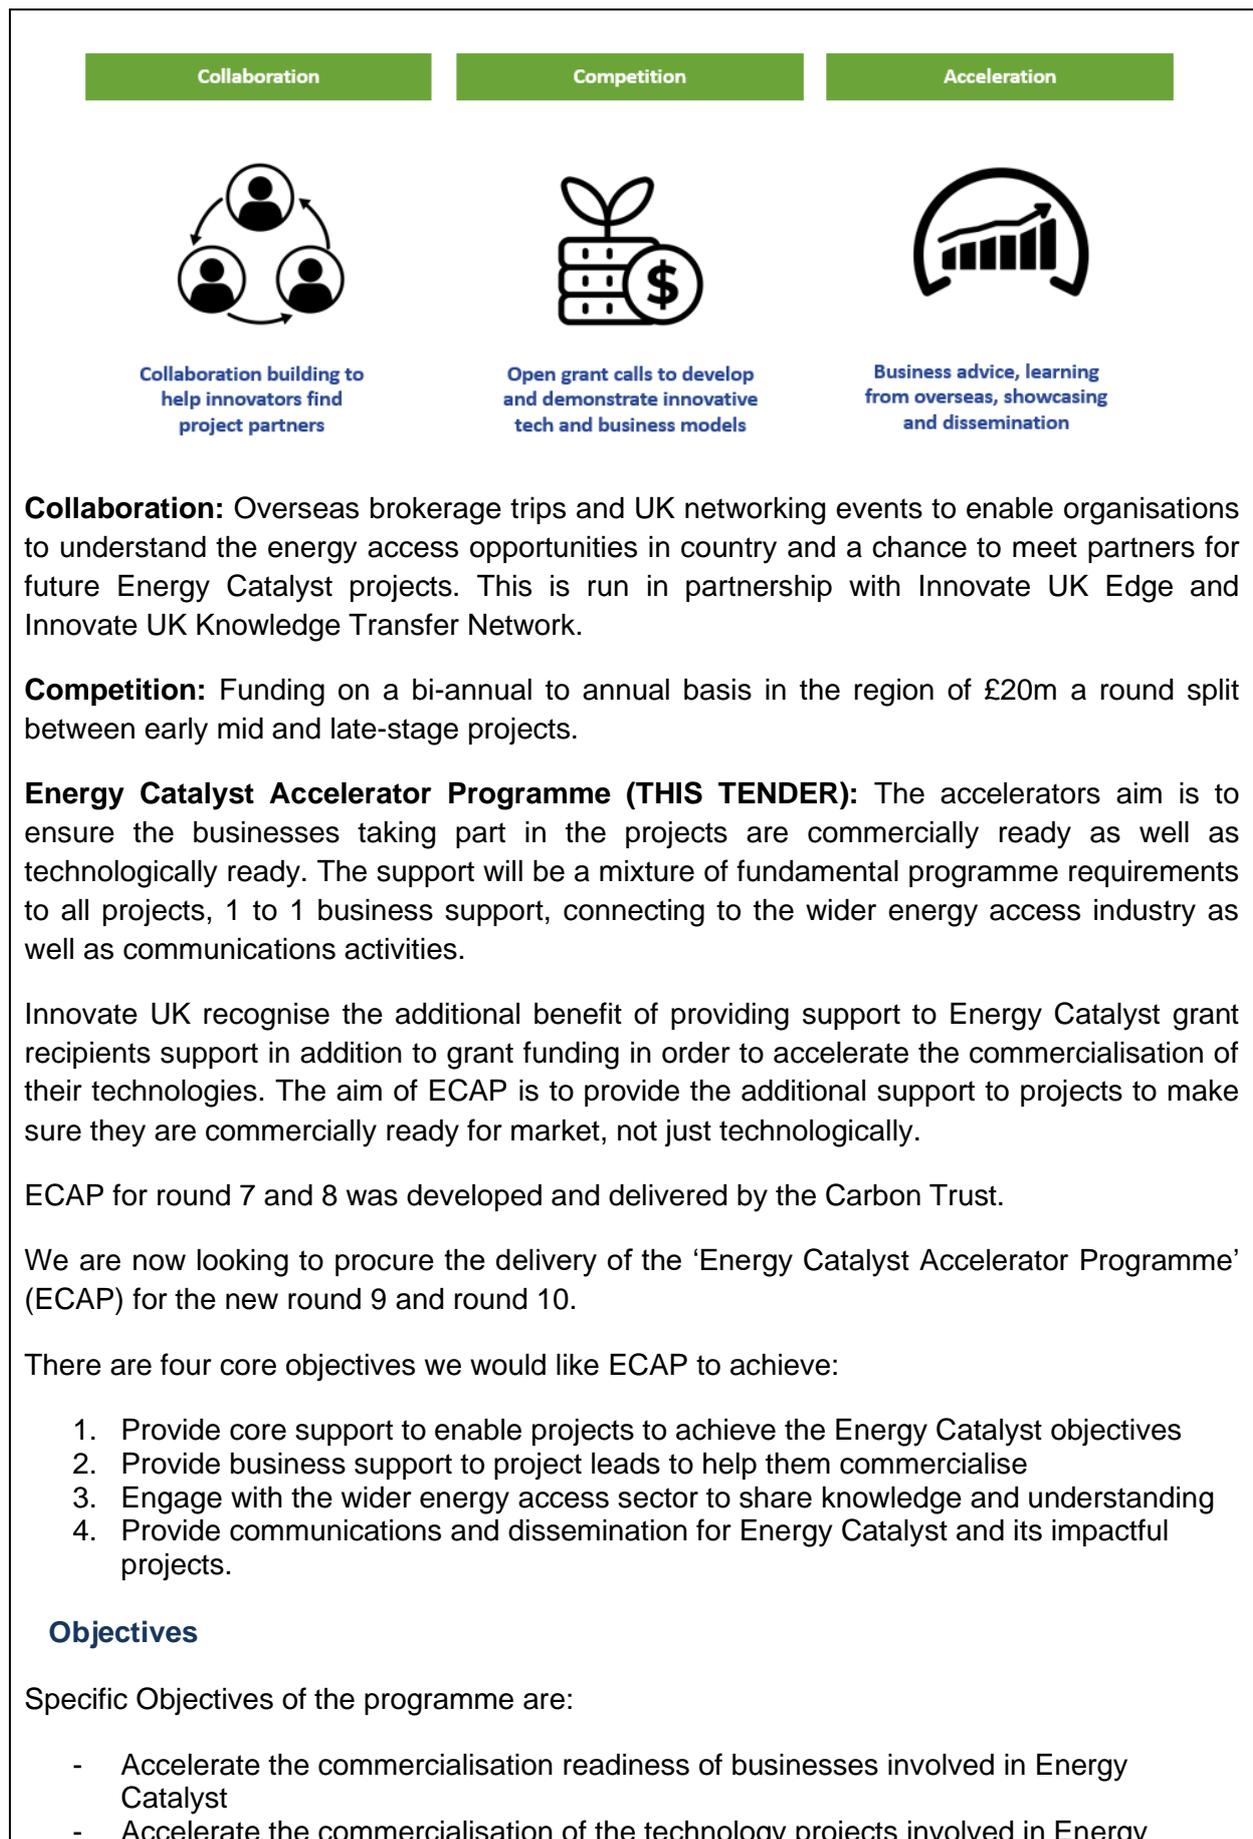

This all forms part of the UK's aid budget meaning all projects are awarded in line with the Official Development Assistance (ODA) commitment following the [ODA guidelines](#). The support is provided under subsidy control and is provided to the participants of the accelerator programme under minimal financial assistance. We expect the appointed contractor will need to ensure these rules are followed and reported against.

The programme has three key activities to deliver its vision:

¹ International Energy Agency (IEA), Tracking SDG7, Energy Progress Report 2020 - <https://webstore.iea.org/download/direct/3004>

² World Bank, Tracking SDG7: The Energy Progress Report, 2018, <https://trackingsdg7.esmap.org/> [accessed 01/06/2020]

³ Vivid Economics, Rapid market assessment of energy storage in weak and off-grid contexts of developing countries, 2019, <https://www.vivideconomics.com/casestudy/rapid-market-assessment-of-energy-storage-in-weak-and-off-grid-contexts-of-developing-countries/> [accessed 01/06/2020]

Catalyst

- Bring together a cohort of Energy Catalyst Round 9 & 10 grant recipients
- Facilitate cross project and cross-country learning
- Provide opportunities to engage with investors, corporate organisations and follow on support programmes such as the TEA Shell Foundation partnership.
- Work with the LEIA programme to incorporate Energy Catalyst support as a prize to their Student Design Challenge
- Work with accelerators across Africa and Asia
- Share learning between UK and overseas organisations operating in the energy sector
- Promote gender equality and social inclusion
- Disseminate the impact of the Energy Catalyst Programme

Background

Energy Catalyst has so far supported 438 projects delivered by 1300+ organisations and committed a total of £190 million across all Energy Catalyst rounds. £108 million of this funding is official development assistance support to energy access relevant technologies and business models comprising:

- 243 projects
- Over 500 unique organisations
- Wide range of energy access technologies and themes
- Targeting at least 34 countries in sub-Saharan Africa and South Asia and Indo-Pacific regions

Its aim is to create energy access in Africa and Asia with any benefit to non ODA countries either developing IP or collaborating on a project, being a secondary consideration. It can be broken down like the following:

Primary benefit in Africa and Asia:

- increased access to affordable, sustainable clean energy options for poor households and enterprises
- increased engagement between UK, African and Asian businesses, including successful collaborations and lasting partnerships post project
- reduced GHG emissions and improved air quality.

Secondary benefit:

- increased understanding of the energy needs and opportunities in Africa and Asia amongst UK businesses.
- increased understanding by UK businesses of social inclusion and gender issues as well as action plans for action and mitigation.
- Increased commercial readiness of UK businesses.
- Job and IP creation (as per Innovate UK normal KPIs/metrics).

Most of the support to date has gone to SME's and while early stage makes up the most number of projects (Figure), the most funding goes into mid stage.

Most of the support has gone to early stage projects and start-up businesses

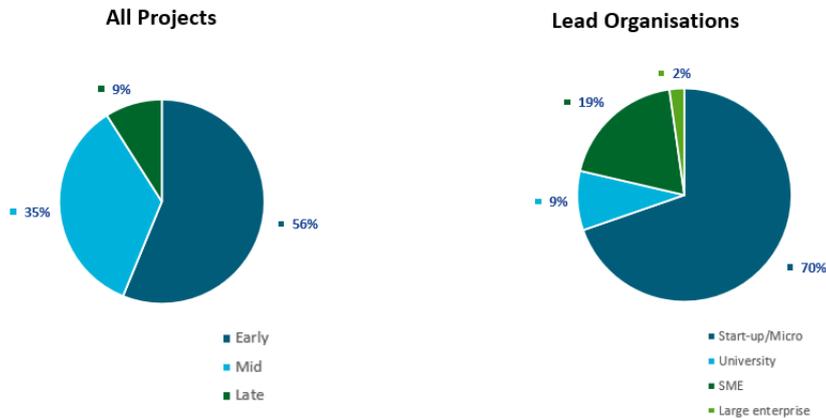

Figure 2: Projects by Technology Type

Projects by Ayrton Theme and Stage

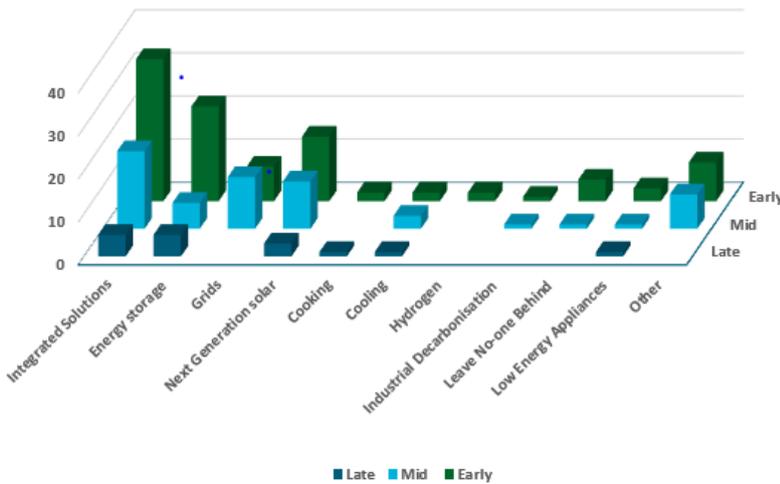

Figure 1: Funding Distribution (excl round 9)

While historically most projects have been in East Africa and India, there has been a gradual increase in the geographical spread of projects. In the latest round, there has been a particular focus on Asia and the Indo Pacific Region and we have successfully gained new projects in Pakistan, a few in the Philippines, Vietnam and Thailand. Nigeria has also increasingly become a focus due to increasing recognition of the enormous market need, but also the more progressive funding programmes and regulations. The geographical spread (excl round 9) can be seen in figure 3.

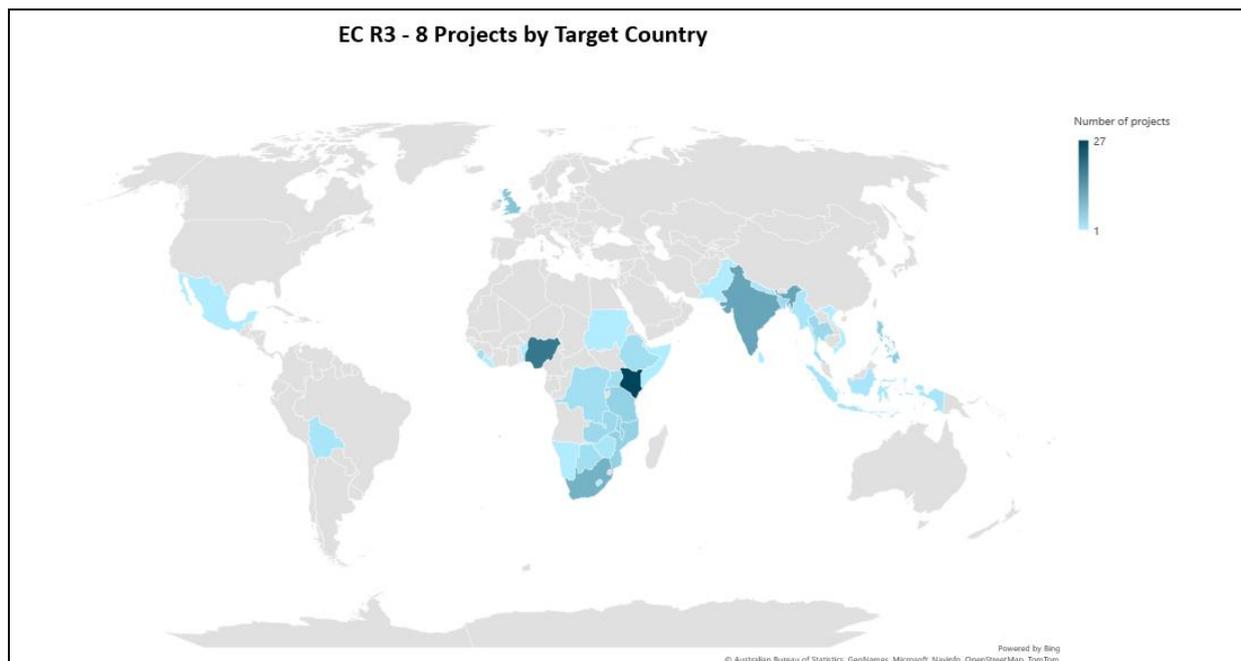

Figure 3: Geographical Spread

Project Types

Projects can vary in size from £50k costs to £5m and can last between 3 months and 3 years (up to 2 years in round 10). Depending on the stage of project, the funding intervention rate for a small business can vary from 70% for an early stage project to only 45% for a late stage. The project focus can encompass both technology innovation, technology transfer as well as business model innovation.

Scope

This project is to support grant recipients from Early, Mid and Late stage Energy Catalyst Round 9 and 10.

Energy catalyst competition is open to any organisation from anywhere in the world who have an innovative technology and/or business model which can create better energy access in sub Saharan Africa, South Asia and Indo Pacific Region.

While there are a large number of UK organisations, for mid and late stage projects there is a mandatory requirement for a legal entity in one of the in scope countries to be part of the consortium. This means partners could include UK organisations, organisations from Africa and Asia and/or organisations from anywhere else in the world. Provision will need to be made to provide business support to all eligible businesses.

The number of projects and therefore the number of businesses requiring support, will not be determined until each round has been approved and gone through the set up process. However, provisionally we are expecting:

Round 9	64	210
Round 10	35-45	160

Expected Country Focus

For mid and late stage projects, there is a mandatory requirement for a legal entity in one of the in scope countries to be part of the consortium. For example while the scope is expected to continue to centre around the clean energy transition and creating energy access in developing and emerging economies, the terminology may change and the countries in scope may increase. We expect the supplier to take a flexible approach in working with the evolution of the programme.

The current round 9 projects are focused on the following regions:

 - 28.5.2 demonstrates to the Buyer's reasonable satisfaction that the Variation is technically impossible to implement and that neither the Tender nor the Specification state that the Supplier has the required technical capacity or flexibility to implement the Variation.
