Specification

Suppliers will be professional bat ecologists who will work closely with each of the churches to gather ecological and social information to help facilitate the planning and implementation of approaches to solving the conflict between bats and people at these most impacted churches.

At each church, the supplier will be expected to gain a full understanding of the issues being faced by the church communities, including the physical and social impacts caused by bats as well as a full understanding of how bats are using the building as roosts.

The work will involve significant time on site and will include meetings with Parochial Church Council (PCC) members, e.g. the Churchwardens. These meetings can be chaired and facilitated by Bats in Churches project staff (Heritage Adviser) but the suppliers will be expected to develop a positive working relationship with church representatives.

The supplier will use the ecological and social information they gather at the initial meetings and during ecological surveys to devise a range of options for reducing the impact of bats at the church over the course of the Bats in Churches project. The solutions presented will be designed in the context of the outcomes of the project and existing regulatory mechanisms, e.g. the Bats in Churches Class Licence.

Church representatives, project staff and the supplier will work together to select a preferred approach from the suggested options. The supplier will then create a management plan around the preferred approach and submit a BiCCL site registration form to Natural England. They will also provide advice (e.g. a detailed statement of works, including specifications, drawings/photos and timescales) to the BiC Heritage Adviser and PCC representatives, architects and Diocesan Advisory Committee (DAC), so that the PCC is able to submit any planned works for faculty permission in line with the requirements of the management plan and to the appropriate timescale.

Execution of the management plan will follow over the remainder of the project (to latest autumn 2023) and will also fall under this contract. Securing permission, enlisting suppliers and execution of capital works will largely fall to the PCC, working under agreement with the BiC project. However all ecological elements will fall under this contract, so the supplier will need to work closely with the PCC. This includes supervision of works, procurement of specific technical equipment (e.g. bespoke bat boxes, or deterrents), post intervention monitoring, annual BiC Class Licence monitoring and returns, and final reporting.

We are inviting bids for some or all of the 17 churches identified. Tenderers will be required to state which locations they wish to bid for and provide a quote for each location in the commercial envelope. Bids will be evaluated for each location separately, and one contract may be awarded for all one, some or all locations.

Suppliers will carry out all necessary bat surveys and preparation to support a full site registration application under the Bats in Churches Class Licence. The application must be completed and submitted to Natural England before capital works commence (the licence has a 30 day turnaround time).

Solutions proposed might involve specialist management techniques highlighted by the bats in churches class license, the use of physical barriers and / or deterrents installed into the church to keep the bats away from sensitive areas; All monitoring of capital works must comply with the Bats in Churches Class Licence monitoring guidelines. Design and implementation of solutions must be done by working closely with the BiC Heritage Adviser, the PCC representatives, DAC advisers, Historic England regional advisers and church architects. In particular any work requiring faculty permission, listed building consent or planning permission will require careful co-ordination and good communication (PCCs will lead on this, but the supplier will need to ensure their work provides the information required in a timely fashion and that timescales for management work build in time to gain permissions).

Accreditations

Suppliers for this contract will be required to already be or become a Registered Consultant for the Bats in Churches Class Licence.

Church locations

The work is required at the following churches:

ITT Lot	Church code	Grid Ref	Name of Church	County
Lot 2	639101	SW 8785 4172	St Moran, Lamorran	Cornwall

Working with bat volunteers

The Bats in Churches project aims to recruit and train volunteers to help support church communities with their bats. The objective is to produce a sustainable network of skilled volunteers able to support churches in order to ensure a future legacy beyond the funded project. As part of this aim we would like the supplier to be in touch with the bat group local to each church and where

possible invite bat or mammal group volunteers along to help with surveys and where appropriate be present at discussions around management. This has multiple benefits:

- Ensures that the supplier gains any relevant information already collected by volunteers on bats at the church/in the area or existing relationships with the church
- Allows supplier and volunteers to learn from each other
- Allows the supplier to reduce survey costs, where volunteers are willing and able to assist in surveys
- Gathers local bat group support and buy-in to the management measures, and takes views into account
- Gives volunteers an enjoyable experience
- Allows volunteers to learn the BiCCL annual monitoring method, to allow them to take over annual surveys after the end of the project to ensure longer-term learning.

However working with volunteers is not without its risks, so suppliers will have to gauge this relationship and use it appropriately. In particular sensitivity is required around their role in discussions with the PCC, so that confusion and conflict don't arise. Equally the supplier must ensure that volunteers are gaining from the experience.

All volunteer numbers and hours must be logged and reported. Volunteer expenses can be reimbursed directly by the project.

List of activities required

1. Activity 1 - Development of management proposals (2019):

- Initial meeting (suggested three hours) – suppliers will attend an initial face to face meeting with the church PCC. The meeting will be organised by the supplier and chaired by the Project Heritage Adviser. The purpose of the meeting is to gain a good understanding of the needs and requirements of the church representatives, to provide information about the project and the constraints around any solutions that can be offered and to answer questions. It will be a good opportunity to enable the supplier to initiate and build a relationship with the Churchwarden and PCC. The Historic England regional officer, DAC secretary and church architect should also be invited to join this meeting.
- Daytime inspection (suggested five hours and could be carried out same day as initial meeting) – a full day time 'light touch' survey of church will be carried out to gather data (species information, impacts, photos, observations) on the building, its monuments, areas of particular sensitivity and bat usage. The format of the 'light touch' survey will be standardised and report form provided.
- Bat surveys – a full suite of nocturnal bat surveys will be conducted at each church to build a full picture of how bats are using the building. This will involve at least three night time surveys and one dawn bat survey in-line with the bats in churches survey criteria. Surveys must enable identification of main entry/exit points and roost locations and observations of bat behaviour.
- Progress meeting (suggested four hours approx.) – carried out towards end of survey period or when surveys are complete. Purpose of meeting is for results and suggested

solutions to be discussed with PCC, Historic England (HE) regional adviser, church architect, DAC secretary and BiC Heritage Adviser, and to agree/finalise a preferred approach to tackling the issue.

- Reporting to include
 - o Full ecological report with a summary of bat survey data and a complete picture of how bats are utilising the church. Includes floor plans of the church, internal and external photographs, entry / exit points identified for each species, assessment of the impacts caused by bats. Heritage consultants will be writing a statement of significance for the church, which will be available by the end October and can be referenced in this report.
 - o Presentation of all bat management options considered and the reasons why non favoured options were rejected. Favoured option presented in detail and fully costed (including all works and monitoring) – this should be presented in a format which can be copied into this contract to specify future implementation. Report to include a record of meetings and opinions presented by the PCC, DAC, HE and architect etc.
 - o Statement of works – a summary of the capital works, their specifications, cost and timings needs to be included, as this will need to be supplied as part of seeking faculty permissions/listed building consents. This must include clear diagrams, plans, photos, costs and any architect's specifications for work and materials. The supplier may need to seek architect's expertise to draw up these proposals. Where this is required they will need to communicate this early to the BiC Heritage Adviser, including how much/what input is required, so that the BiC Heritage Adviser can contract this work to feed into the statement in a timely fashion.
 - o Site registration form for Bats in Churches Class Licence application completed and submitted to Natural England for assessment.
 - o Faculty Permissions – work with PCC and ecclesiastical architect to ensure faculty permissions for proposed approach are obtained (process expected to be managed by PCC members but supplier will assist).
 - o Volunteer numbers and hours contributed.
- Architect consultation – provide plans and details of approach to ecclesiastical architect for comment and sign-off.

2. Activity 2 - Implementation of the agreed plans (2020-23)

As the plans have not yet been designed or agreed, it is accepted that the need for surveys or their complexity during the period of 2020-2023 remains unclear at this stage. However total price for the annual monitoring surveys (2 x activity surveys of the whole building May-Aug, including any T&S (2020 to 2023) has been provided for comparative costings.

Suppliers have provided an annual hourly rate. This contract will be reviewed annually to agree the next year quote, using the hourly rates provided as a guide.

This phase of the work will require the following work:

- Update contract with BiC project staff to include surveys/monitoring required for management works.
- Liaison with church PCC to co-ordinate work and monitoring of work.
- Supervision, input to and monitoring of any management works as required by the management plan
- Annual BiC CL surveys and reporting. These will need to fulfil the requirements of the BiCCL; namely 2 x activity surveys of the whole building in the pre and post maternity periods, between May-August. Annual BiCCL returns need to be submitted to Natural England as part of the licence.
- Final project report – this will be an update of the management plan report produced in the first phase of the project but will also include monitoring results, details and photos of the work undertaken, and conclusions to date. This report will be uploaded to the BiC website as a case study to provide learning and information to other professionals working on bats in churches in future. A version of the report with all sensitive information removed will need to be supplied for this purpose.

Budget Cap for Management Plan Implementation

The total cost of the capital works and ecologist fees for Activity Two, the implementation of the agreed plans, must be on average £38,888 (excl VAT or £46,666 including VAT) and must not exceed £42,000 (excl VAT or £50,400 including VAT).

Please note that:

- Should radio tagging be recommended within the Site Registration form the costs is excluded from the cost outlined above. However, please note that costs for radio tagging must not exceed £15,000 per church (excl VAT or £18,000 including VAT).
- Radio tagging will only be expected to be required at fewer than half of the above churches, so should only be recommended where the risks to bat Favourable Conservation Status is highest.
- The costs outlined above do not include the work required to prepare the management plan (i.e. work in 2019 for Activity 1).

Working relationships

Suppliers will work closely with and receive support from Bats in Churches project staff including:

- **Project Manager** – Role based at Natural England. The PM will evaluate, let and project manage this contract. Supplier will report to the Project Manager. Annual contract review will be agreed with the PM.
- **Heritage Adviser** – Role based in Churches Conservation Trust. The Heritage Adviser will be responsible for keeping an oversight of and providing advice on all capital works at project churches. They will write the specifications of work to be undertaken by PCCs. As part of this they will need to be present at all meetings with the PCC in designing the management plans and will be the main point of contact between the project and the supplier. They will ensure that heritage needs are met and will support the PCC to implement their capital works in line with the ecologist's management plan.
- **Engagement Officer** – roles based in the Church of England. The Engagement Officer will work with church communities to support them in delivering their activity plans at each church. The supplier will need to include them in conversations and site meetings so they understand the planned works, so that community activities can work successfully alongside capital works.

- **Volunteer & training Officer** – role based at the Bat Conservation Trust. The Volunteer & training Officer will be responsible for running mainly bat related volunteer engagement and training, but will be a point of contact for information on bat groups and bat volunteers.

The supplier is also expected to work closely with PCC representatives, the church architect, builders contracted by the PCC and DAC officials as required. A schematic of the relationship is shown in figure 1.
