SCHEDULE ONE**1 BACKGROUND**

The UK has a world-class Higher Education sector, which operates in a global market. The UK currently collects comprehensive data on staffing at 167 HE providers, which employ 419,710 staff, of whom 49,530 are from the EU: 35,920 on academic contracts and 13,610 on non-academic contracts. EU staff make up 11% of all HE staff, 18% of those on academic contracts and 6% of those on non-academic contracts (2016/17 figures).

2 AIM

The Contractor shall use all reasonable endeavours to achieve the following aims:

- Strengthen our evidence base and develop a deeper understanding of the population of EU staff who work in higher education in the UK, covering their routes in to working in the UK, their skills, current roles and longer-term career plans.
- Increase our understanding of how this relates to providers' recruitment plans in the short, medium and long-term, along with wider workforce planning.

3 OBJECTIVES

The Contractor shall use all reasonable endeavours to achieve the following objectives:

1. Explore what the job roles, skillsets, and career trajectories are for EU staff working in UK Higher Education? How do these change over time and/or with experience?
2. Understand what the pay and contractual arrangements are for these staff? How do these change over time and/or with experience?
3. Explore what routes EU staff have taken to work in UK Higher Education? At what stage in their studies or career did they come here?
4. Understand what motivated staff to come to the UK? What has motivated them to continue living in the UK? Have any of these factors changed over time?
5. Understand what EU workers' career plans. Do they plan to continue working in the UK in either the short, medium or long term?
6. Explore what providers' workforce plans are for the next few years? Do they anticipate any changes to their recruitment or retention processes and do they have any contingency plans in place?

8. RISK MANAGEMENT

Description of risk	Consequences	Comment and controls to mitigate or eliminate risk
Delays by HEIs in sampling staff and administering staff survey	Unable to launch the staff survey before the end of term.	Known senior contacts used to ensure staff support; close support with institutional contacts from the project team, and identifying any challenges for the timetable; clear instructions for sampling and contact point in case of queries; use of cloned surveys enables some asynchronicity; focused monitoring of responses by HEI.
Low response rates to staff survey	Failure to achieve to minimum achieved sample, affecting the power of response analysis	Use of engaging communications and question style; keep survey length to minimum necessary; schedule survey fieldwork during term-time; extend fieldwork period; close monitoring of response levels and iterative use of reminders; other channels (e.g. unions) used to promote value of survey participation.
Significant policy shifts resulting in change of research focus after the fieldwork has been completed	Inability to answer any new/emerging research questions	Close liaison with DfE; monitoring and updating of the research framework; recognition that once surveys have been launched questions cannot be changed or added; look to alternative methods to address new issues.
Unwillingness of HEIs to support staff survey	Failure to achieve to minimum achieved sample	Tried and tested approach; clear instructions and support provided to institutions; warm contacts at very senior level will ensure buy-in; opportunity to adjust HEI sample if needed (from the sample short-list); census approach to minimise sampling task for institutions.
Tight timescale with dependent/consecutive research activities	Delays in any research element will lead to delays in all following research activities and the research may not be completed by August 2018.	Inception meeting to highlight key pinch-points; tight project management and close liaison with DfE; partners' ability to expand capacity at times of pressure;
Significant policy shifts and/or continually developing	Could require rewording/numerous re-workings of the research report	Close liaison with DfE to discuss direction and likely implications for the report; delay editing/amending the final report until March.

Low response rate to institutional survey (consultation)	Potential for unbalanced coverage of the issues across the sector	Use of partnership networks to pre-warn and engage respondents; survey access control enables monitoring of responses and individualised reminders.
Sensitive topic area requiring careful wording of research approach and survey questions	Could deter respondents from completing the survey	Experience of partners in surveying sensitive HR topics; strong assurances of confidentiality; testing with user groups.
Delays in signing off research materials	Unable to test survey prior to launch or unable to launch the staff survey before the end of term	Timetable to allow for development of materials during prior research phase; close liaison with DfE and clear identification of dates for signing off materials; warm contacts to be used for testing.
Change in DfE project manager	May have limited understanding of the project process and decisions made to date	Expertise and experience of partners assures momentum.
Poor or variable quality of responses to institutional survey (consultation)	Potential for unbalanced coverage of the issues across the sector	Partnership has existing contacts for best target informants; experience from previous surveys will inform style of questioning.
Extensive replies to open questions and large numbers of additional documents supplied.	Data overload, and inability to analyse all the materials within the research timeframe	High level of topic expertise in partnership enables rapid identification/analysis of key data.
Staff sickness or turnover	Need for new research team members or increasing the role of existing team members, potential for lack of consistency in research approach	Capacity exists in partnership and associates to expand or adjust team; expertise of partners assures quality of potential new team members; good documentation of project progress and approach to allow new team members to get up to speed quickly.

9 DATA COLLECTION

The Department seeks to minimise the burdens on Schools, Children's Services and Local Authorities (LAs) taking part in surveys.

When assessing the relative merits of data collection methods the following issues should be considered;

- only data essential to the project shall be collected;
- data should be collected electronically where appropriate/preferred;
- questionnaires should be pre-populated wherever possible and appropriate;

- schools must be given at least four working weeks to respond to the exercise from the date they receive the request; and
- LAs should receive at least two weeks, unless they need to approach schools in which case they too should receive 4 weeks to respond;

The Contractor shall clear any data collection tools with the Department before engaging in field work.

The Contractor shall check with the Department whether any of the information that they are requesting can be provided centrally from information already held.

10. CONSENT ARRANGEMENTS

The Department and the contractor shall agree in advance of any survey activity taking place the consent arrangements that shall apply for each of the participant groups. All participants should be informed of the purpose of the research, that the Contractor is acting on behalf of the Department and that they have the option to refuse to participate (opt out). Contact details should be provided including a contact person at the Department. Children who are 16 or over will usually be able to give their own consent but even where this is so, the Contractor, in consultation with the Department, should consider whether it is also appropriate for parents, guardians or other appropriate gatekeepers (e.g. schools, Local Authorities) to be informed when a child has been invited to participate in research.

11. PROJECT COMMUNICATION PLAN

The Contractor shall work with the Project Manager and Steering Group to agree the content of the Project Communication Plan on the standard Department Communication Plan Template at the start of the Project, and to review and update at agreed key points in the Project and at the close of the Project. The Communication Plan shall set out the key audiences for the Project, all outputs intended for publication from the Project, the likely impact of each output, and dissemination plans to facilitate effective use by the key audiences.
