Schedule 7 - Processing, Personal Data and Data Subjects

Subject matter of the processing:

The Strategic Workforce Planning tool (the tool) will provide data integration and visualisation capabilities using the following Highways England sources:

- Oracle Primavera P6.
- Capability Assessment Toolkit returns.
- Oracle Taleo Recruitment.
- Oracle Fusion.

This tool will provide a picture of the workforce within Highways England's Major Projects (MP) directorate to better inform decision making and how the future demand of work in the company's Road Investment Strategy can be met.

There are a maximum of 15 users within MP requiring regular access. The service will be used on a monthly basis by MP's Strategic Resourcing Committee to forecast future workforce requirements in the short, medium and long term. It will provide the ability to match the future workforce requirements for capacity and capability with the current workforce; supporting both decision making and action planning.

Note – Highways England's Data Protection Team will work with the Supplier to ensure compliance with GDPR requirements. The target is to achieve GDPR compliance within one month of the service commencement date.

Duration of the processing:

Processing of the Highways England provisioned data sources will be performed between the first and fifth working day of each month. The data will be extracted and securely sent to the SWP team. All data is received in an Excel format and is stored in a secure file location within the ISO27001 accredited PwC data centre. A QlikView application will then be run against the latest data file extracts to produce visual, high level resource demand and supply reporting capability.

Nature and purposes of the Processing:

The data sets are already available within Highways England as stand-alone entities. However, the tool has the capability to combine the information sets to provide visually, simple and significant multi-dimensional strategic insights into workforce capability.

The purpose of the processing is to:

- Target and increase the development of resources to meet strategic objectives and priorities.
- Consistently deploy resource management across programmes of work to meet capacity and capability requirements, aligned with a centrally defined approach.
- Enable projects to consistently establish resource management to meet their capacity and capability requirements, aligned with a centrally defined approach

Type of Personal Data:

The following personal data types will be held by the system:

HE Data Source	Personal Data Types
Capab ty Assessment Too k t Quest onna res	Username F rst Name Last Name E-ma CAT Sk s Prof e D v s on Sub-D v s on Staff Number Emp oyment Current PPD area of work Grade Exper ence work ng n project management Base Off ce (or nearest) Are you a tra ned mentor or coach? Cost Centre (4 d g ts)

Categories of Data Subject:

The following categories of data subjects will be held within the system:

- Highways England permanent staff.
- Highways England contingent labour.
- Members of the public who have been successfully recruited by Highways England, but not yet formally accepted positions.

Plan for return or destruction of the data once the Processing is complete UNLESS requirement under union or member state law to preserve that type of data:

Data will be held within the system for a maximum period of one calendar month; this is because all data held within the system will be deleted and re-populated during a monthly data refresh exercise. The only data that is held longer than one month is a 'Last 6 Month' view for planned vs. actual recruitment and the number of completed and validated capability assessments from CAT.

The data sets to be held on the system are copies of information already owned by Highways England, therefore the latest set can be destroyed at the end of the contract. However, Highways England retains the right to request a copy of this final data set prior to contract termination. For the avoidance of doubt, after contract termination, Highways England expects the Supplier to destroy all Highways England data in line with GDPR requirements.
