

STATEMENT ABOUT POTENTIAL CHANGES TO KERBSIDE COLLECTIONS OF GREEN WASTE IN RUTLAND

Bidders should be aware of a recent change in direction regarding the kerbside collections of Green Waste in Rutland, where the intention is to implement a charge for the service from summer 2017.

Whilst our current Green Waste tonnage is of a volume that is unlikely to require operations or facilities that are unique or specific only to this Rutland Contract, the tonnage may still be affected significantly.

This may be an overall reduction in the tonnage of Green Waste and/or a shift from Kerbside Green Waste to CA Site Green Waste.
