## Annex 2 Specification

This section sets out the Authority's requirements.

### 1. Background

1.1 The Environment Agency (EA) (the 'Authority') is an executive non-departmental public body sponsored by DEFRA and works to create better places for people and wildlife and support sustainable development. It is responsible for managing the risk of flooding from main rivers, reservoirs, estuaries and the sea. EA is also responsible for the following;

- regulating major industry and waste
- treatment of contaminated land
- water quality and resources
- fisheries
- inland river, estuary and harbour navigations
- conservation and ecology

Further information on our responsibilities, Corporate Plan and how we are structured can be found on our website.

<https://www.gov.uk/government/organisations/environment-agency/about>

1.2 The Environment Agency Monitoring Laboratories (ML) operates as a business unit of the EA and is based at two (2) locations; Starcross and Leeds. The ML has responsibility for the provision of analytical analysis in accordance with the EA's statutory responsibility for monitoring the environment.

1.3 Our procurement strategy may be of interest to you as a potential supplier. It sets out our priorities and key commitments in a range of areas such as delivering our corporate plan, Government policy, supplier management and sustainable procurement:

[Procurement at EA - Environment Agency - GOV.UK](#)

### 2. Requirement

2.1 The purpose of this procurement is to provide the Authority with Inductively Couple Plasma Optical Emission Spectrometer (ICPOES) Equipment for the analysis of a range of metals in water, sediment, soil, biota and waste materials. The instruments will be asset replacement for the existing systems and will need to meet the current specification. These instruments are the industry standard for these measurements and are used across regulatory, water industry and commercial laboratories. The EA requires the data from these instruments in establishing the 'state of the environment', informing on environmental understanding and risk and during their incident response.

- 2.2 The EA has identified a need to have a contract in place to asset replace its four (4) Inductively Couple Plasma Optical Emission Spectrometer (ICPOES) Equipment, used for the analysis of a range of metals in water, sediment, soil, biota and waste materials.
- 2.3 The requirement is for the purchase, installation and commissioning of up to four (4) ICPOES Equipment.

The Equipment shall:

- 2.4.1 Be a fully automated, computer controlled inductively coupled plasma torch ion source with an optical emission analyser and detection system, capable of radial and axial plasma viewing, as well as solutions for combining both views during a single analytical run and measurement.
- 2.4.2. Not require any physical input from the user during all stages of routine analysis and the system shall be capable of functioning from the user controlling it via the computer.
- 2.4.3 Have a computer, printer, and software to control the system and collect and process data.
- 2.4.4 Have a sample introduction system including nebuliser and spray chamber.
- 2.4.5 Have a flow injection valve for the automatic switching between loading sample/rinse and injecting sample/rinse.
- 2.4.6 Include any cooling systems for any of the above.
- 2.4.7 Have an auto-sampler which must have interchangeable racks.
- 2.4.8 Have a peristaltic pump with a minimum of three (3) channels.
- 2.4.9 Include software which must provide data indicating the number of measurements taken and/or hours the instrument is in use, in order to aid the maintenance schedule of the instrument.
- 2.5 If any further Equipment accessories are required for routine analysis, other than the items mentioned above (such as a compressor and associated quiet box), then the Tenderer is required to specify any further equipment within their Tender response.

### 3. Analytical Performance

- 3.1 The Equipment must have a proven performance in environmental analysis and be able to satisfy the needs of the Authority in all operational and analytical performance criteria.
- 3.2 The Equipment must be capable of performing major, minor, and trace (parts per billion) multi elemental analysis in aqueous media with high accuracy and precision.
- 3.3 The Equipment must be robust enough to be able to analyse a variety of samples with varying matrices within a single analytical run.
- 3.4 The Equipment must allow the operator to select wavelengths to avoid interferences that would otherwise lead to bias in sample results.
- 3.5 The Equipment must be capable of analysing the elements in detail, as shown in Annex one (1): Tables one (1), to seven (7) inclusive. The tables show the required detection limits and calibration range(s) required.
- 3.6 The Equipment must have the capability of analysing the full wavelength range in one analytical measurement, in Axial, Radial and Simultaneous mode to the limits of detection (LOD) stated in Annex one (1). (The LOD calculated as specified by the Water Research Centre 'A Manual on Analytical Quality Control for the Water Industry', NS 30, ISBN 0 902156 85 3).
- 3.7 The targets provided in Annex One (1) apply to samples corrected for interference and background effects and using a standard torch and nebuliser. **If these limits can only be achieved using non-standard techniques or equipment of unique design, then full details must be provided.**
- 3.8 The Equipment must be capable of routinely handling samples in up to twenty (20)% volume/volume (v/v) acid, up to two (2)% weight/volume (w/v) total dissolved solids without significant calibration drift of  $\pm$  ten (10)%.
- 3.9 The plasma torch must use argon gas, and the radio frequency generator must have a minimum output of 1.4kW.
- 3.10 The sample introduction system must be inert to various levels of nitric acid and hydrochloric acid up to twenty (20)% Aqua Regia.
- 3.11 The Equipment must meet or exceed the following requirements:
  - Wavelength Range:170-780nm
  - Sample throughput: $\leq$  3 minutes per sample.
  - RF emissions: Proof of full FCC or equivalent certification for all RF emissions must be provided.

#### **4. AUTOMATION**

- 4.1 The Equipment must provide for minimal operator intervention after setting up and must be capable of unattended overnight operation with auto shutdown of plasma at end of the run. It is therefore imperative that the system must be fitted with the necessary interlocks and any other features to enable this mode of operation to be used. Should there be a failure of services, the system must shut down safely and automatically and not restart until proper operating conditions have been restored.
- 4.2 The Equipment must be supplied with an auto-sampler that has interchangeable racks with either a minimum of 360 places with rack sizes of 90 tubes or 240 places with rack sizes of 60 tubes. The user shall have the option to configure the auto-sampler racks to different specifications. The autosampler must have a flow through rinse station and a variable speed peristaltic pump to supply the rinse station.
- 4.3 The Equipment must be supplied with a compatible flow injection valve for increased throughput.
- 4.4 The flow injection valve must have the ability to automatically switch between the simultaneous loading of sample through the autosampler while injecting rinse solution into the nebuliser and the simultaneous injecting of sample into the nebuliser while loading rinse solution through the autosampler.
- 4.5 The peristaltic pump must have a minimum of three channels and the pump speed must be variable. Online addition of internal standard must be possible and if this is achieved through less channels an explanation must be given.
- 4.6 The software supplied shall include QC protocols which allow the user to visually see a user defined "out of range" QC result. This should include (but not be limited to) internal standard drift  $\pm 30\%$ , %RSD of replicate  $> 5\%$ , Calibration coefficient  $< 0.995$ . The QC protocol facility shall be entirely user selectable.

#### **5. BACKGROUND AND INTERFERENCE CORRECTION / REMOVAL**

- 5.1 The Equipment must include full automated background correction without the need for operator setup or the need of operator intervention at any stage of method development and routine analysis.
- 5.2 The Equipment must have interference correction procedures selectable by the operator. These are to include but not be limited to: the choice of multiple wavelengths for one element, the use of one or more internal standards and the function for inter element correction calculations.
- 5.3 The procedures must be capable of correcting for interference effects arising from spectral overlap such that no significant effects are observed at the reporting values quoted in Annex 1.

- 5.4 The Equipment must be capable of using multiple internal standards. Internal standard compensation is to be applied to analytes individually.

## **6. DATA HANDLING AND STORAGE**

- 6.1 The Equipment must be provided with the appropriate computer hardware and software, fully programmed for operation.

The computer system must have the following minimum specifications:

- Sample identifiers consisting of an alpha numeric field of at least twelve (12) characters will be required. Capacity on the system must provide for the input of at least three-hundred and sixty (360) samples per batch.
  - Capacity to store all raw data, calibration, analytical quality control and results files.
  - The ability to define separate identification of analytical quality control standards and blank samples. The ability to schedule blanks and standards at pre-set intervals.
  - The format of the results report must be user definable.
  - The software must allow the post-run reprocessing of data.
- 6.2 For data transfer to and from the LIMS system, the Equipment shall be able to import/export to allow for:
- The Equipment to receive an electronic file of analysis required from LIMS.
  - LIMS to receive an electronic file of results exported from the Equipment.
- 6.3 The software must allow for the following operations:
- Setting up a new batch of sample details while the previous batch is being analysed.
  - Data transfer to and from the LIMS system while other samples are being analysed.
  - Amendment of other methods while analysis is in progress.
  - Facility to view real time sample analysis and calibration data on screen.
  - Adding additional runs of samples with differing methods to be run sequentially.
  - Manual updating and/or editing of the sample identifiers after the test run has started, including extension of the run.
  - The facility to input sample volumes, dilutions and weights for incorporation into the final calculated results.

Tenderers must clearly state whether the software supplied as standard with the Equipment includes semi-quantitative analysis and extended calibration routines e.g. method of standard additions, weighted least squares regression in their response to question E07.

- 11.6 The Supplier shall remove any of its staff from the premises where the Authority requests on grounds of efficiency, safety or public interest.

## **12. Performance Management Framework (including Key Performance Indicators and Service Credits)**

- 12.1 As part of the Authority's continuous drive to improve the performance of all Contracts, this Performance Management Framework (PMF) will be used to monitor, measure and control all aspects of the Supplier's performance of

contract responsibilities. The purpose of the PMF is to set out the obligations on the Supplier, to outline how the Supplier's performance will be evaluated and to detail the sanctions for performance failure. The Supplier is responsible for the performance of any sub-contractors.

- 12.2 Key Performance Indicators (KPIs) are essential in order to align Supplier performance with the requirements of the Authority and to do so in a fair and practical way. KPIs have to be realistic, measurable and achievable; they also have to be met otherwise indicating that the service is failing to deliver. Without the use of service credits in such a situation, this service failure places strain on the relationship as delivery falls short of agreed levels.
- 12.3 The proactive approach to correcting failures and addressing their cause improves the relationship and enables a partnership rather than a confrontational style of working. Its focus is on managing and improving service.
- 12.4 The Authority shall review performance against KPI's and, if appropriate, instigate meetings and work closely with the Supplier to agree action plans. The Authority expects the Supplier to agree and implement these plans. If this does not happen, only then shall service credit principles be applied.

The KPIs for this Contract are set out at Annex A.

### **Service Credit Principles**

- 12.5 The use of service credits is governed by the following principles:
- 12.6 Service credits sit within the wide service management approach being pursued by the Supplier and the Authority. Use of service credits does not preclude any other remedy for failure of performance available to the Authority under the terms and conditions of the contract.
- 12.7 The service credit regime shall be instigated on each occasion where there is a service failure. Failure to meet a KPI may also give rise to a remediation plan.
- KPIs with a service credit rating of 1 will have a service credit of 3% of the invoice amount for the monitoring period, applied for each KPI failure.
  - The maximum annual service credit to be applied will be no more than 10% of the total annual contract value.
- 12.8 The Authority has full and complete discretion on whether to claim all, part or none of a service credit to which it is due.
- 12.9 Service credits claimed shall be paid to EA as a credit note within one (1) month following the date at which the service credits were applied.

12.10 The full, agreed service credit regime will operate from the Contract start date until the end of the contract period. The KPIs may be adjusted to ensure that they are appropriate and achievable.

### 3. How the Contract works

3.1 The Order Form is an offer by the Authority to purchase the Deliverables subject to and in accordance with the terms and conditions of the Contract.

3.2 The Supplier is deemed to accept the offer in the Order Form when the Authority receives a copy of the Order Form signed by the Supplier.

3.3 The Supplier warrants and represents that its Tender Submission and all statements made and documents submitted as part of the procurement of Deliverables are and remain true and accurate.

## 4. What needs to be delivered

### 4.1 All Deliverables

(a) The Supplier must provide Deliverables: (i) in accordance with the Specification and Tender Submission; (ii) to a professional standard; (iii) using all reasonable skill and care; (iv) using Good Industry Practice; (v) using its own policies, processes and internal quality control measures as long as they don't conflict with the Contract; (vi) in accordance with such policies and procedures of the Authority (as amended from time to time) that may be specified in the Contract (vii) on the dates agreed; and (viii) in compliance with all applicable Law.

(b) Without prejudice to the Specification the Supplier must provide Deliverables with a warranty of at least one (1) year (or longer where the Supplier offers a longer warranty period to the Authority) from Delivery against all obvious damage or defects.

### 4.2 Goods clauses

(a) All Goods Delivered must be capable of meeting the requirements set out in the Specification and be either (i) new and of recent origin, (ii) reused or (iii) recycled.

(b) All manufacturer warranties covering the Goods will be assigned to the Authority on request and for free.

(c) The Supplier transfers ownership of the Goods on completion of Delivery (including off-loading and stacking) or payment for those Goods, whichever is earlier.

(d) Risk in the Goods transfers to the Authority on Delivery but remains with the Supplier if the Authority notices any damage or defect following Delivery and lets the Supplier know within three Working Days of Delivery.

(e) The Supplier must have full and unrestricted ownership of the Goods at the time of transfer of ownership.

(f) The Supplier must Deliver the Goods on the date and to the specified location during the Authority's working hours.

(g) The Supplier, its subcontractor(s) and supply chain must minimise packaging used whilst providing sufficient packaging for the Goods to reach the point of Delivery safely and undamaged. The Supplier must take back any primary packaging where it is possible to do so. Packaging must be 100% re-usable, recyclable or compostable, use recycled content where reasonably practicable and support the Government's commitment to eliminate single use plastic.

(h) All Deliveries must have a delivery note attached that specifies the order number, type, quantity of Goods, contact and details of traceability through the supply chain.

(i) The Supplier must provide all tools, information and instructions the Authority needs to make use of the Goods. This will include, where appropriate, any operation manuals which, unless specified otherwise, will be written in English and provided in electronic form.

(j) The Supplier will notify the Authority of any request that Goods are returned to it or the manufacturer after the discovery of safety issues or defects that might endanger health or hinder performance and shall indemnify the Authority against the costs arising as a result of any such request. Goods must be disposed of in line with the waste management hierarchy as set out in Law. The Supplier will provide evidence and transparency of the items and routes used for disposal to the Authority on request.

(k) The Authority can cancel any order or part order of Goods which have not been Delivered. If the Authority gives less than 14 calendar days' notice then it will pay the Supplier's reasonable and proven costs already incurred on the cancelled order as long as the Supplier takes all reasonable steps to minimise these costs.

(l) The Supplier must at its own cost repair, replace, refund or substitute (at the Authority's option and request) any Goods that the Authority rejects because they don't conform with clause 4.2. If the Supplier doesn't do this it will pay the Authority's costs including repair or re-supply by a third party.

(m) The Authority will not be liable for any actions, claims, costs and expenses incurred by the Supplier or any third party during Delivery of the Goods unless and to the extent that it is caused by negligence or other wrongful act of the Authority or its servant or agent. If the Authority suffers or incurs any damage or injury (whether fatal or otherwise) occurring in the course of Delivery or installation then the Supplier shall indemnify from all losses, damages, costs or expenses (including professional fees and fines) which arise as a result of or in connection with such damage or injury where it is attributable to any act or omission of the Supplier or, where related to the Contract, any of its subcontractors or suppliers.

#### **4.3 Services clauses**

(c) The Authority must provide the Supplier Staff with reasonable access to its premises at such reasonable times agreed with the Authority for the purpose of supplying the Services.

Any equipment provided by the Authority to the Supplier for supplying the Services remains the property of the Authority and is to be returned to the Authority on expiry or termination of the Contract.

(e) The Supplier must allocate sufficient resources and appropriate expertise to the Contract.

(f) The Supplier must take all reasonable care to ensure performance does not disrupt the Authority's operations, employees or other contractors.

(g) On completion of the Services, the Supplier is responsible for leaving the Authority's premises in a clean, safe and tidy condition and making good any damage that it has caused to the Authority's premises or property, other than fair wear and tear and any pre-existing cleanliness, safety or tidiness issue at the Authority's premises that existed before the commencement of the Term.

(h) The Supplier must ensure all Services, and anything used to deliver the Services, are of the required quality and free from damage or defects.

(i) The Authority is entitled to withhold payment for partially or undelivered Services or for Services which are not delivered in accordance with the Contract but doing so does not stop it from using its other rights under the Contract.

## 5. Pricing and payments

5.1 In exchange for the Deliverables delivered, the Supplier shall be entitled to invoice the Authority for the charges in Annex 3. The Supplier shall raise invoices promptly and in any event within 90 days from when the charges are due.

5.2 All Charges:

(a) exclude VAT, which is payable on provision of a valid VAT invoice and charged at the prevailing rate;

(b) include all costs connected with the supply of Deliverables.

5.3 The Authority must pay the Supplier the charges within 30 days of receipt by the Authority of a valid, undisputed invoice, in cleared funds to the Supplier's account stated in the Order Form.

5.4 A Supplier invoice is only valid if it:

(a) includes all appropriate references including the Purchase Order Number and other details reasonably requested by the Authority as set out in Annex 3; and

(b) includes a detailed breakdown of Deliverables which have been delivered (if any).

Details of the Authority's requirements for a valid invoice at the Start Date are set out in Annex 3.

5.5 If there is a dispute between the Parties as to the amount invoiced, the Authority shall pay the undisputed amount. The Supplier shall not suspend the provision of the Deliverables unless the Supplier is entitled to terminate the Contract for a failure to pay undisputed sums in accordance with clause 11.6. Any disputed amounts shall be resolved through the dispute resolution procedure detailed in clause 35.

5.6 If any sum of money is recoverable from or payable by the Supplier under the Contract (including any sum which the Supplier is liable to pay to the Authority in respect of any breach of the Contract), that sum may be deducted unilaterally by the Authority from any sum then due, or which may become due, to the Supplier under the Contract or under any other agreement or contract with the Authority. The Supplier shall not be entitled to assert any credit, set-off or counterclaim against the Authority in order to justify withholding payment of any such amount in whole or in part.

5.7 The Supplier must ensure that its subcontractors and supply chain are paid, in full, within 30 days of receipt of a valid, undisputed invoice. If this doesn't happen, the Authority can publish the details of the late payment or non-payment.

## 6. The Authority's obligations to the Supplier

6.1 If the Supplier fails to comply with the Contract as a result of an Authority Cause:

(a) the Authority cannot terminate the Contract under clause 11 on account of the failure to comply, provided this will not prejudice the Authority's right to terminate for another cause that may exist at the same time;

(b) the Supplier will be relieved from liability for the performance of its obligations under the Contract to the extent that it is prevented from performing them by the Authority Cause and will be entitled to such reasonable and proven additional expenses that arise as a direct result of the Authority Cause;

(c) the Supplier is entitled to any additional time needed to deliver the Deliverables as a direct result of the Authority's Cause;

(d) the Supplier cannot suspend the ongoing supply of Deliverables.

(b) demonstrates that the failure only happened because of the Authority Cause;

(c) has used all reasonable endeavours to mitigate the impact of the Authority Cause.

## 7. Record keeping and reporting

7.2 The Supplier must keep and maintain full and accurate records and accounts on everything to do with the Contract for seven years after the date of expiry or termination of the Contract.

7.4 The Supplier must provide information to the auditor and reasonable co-operation at their request.

7.5 If the Supplier is not providing any of the Deliverables, or is unable to provide them, it must immediately:

- (a) tell the Authority and give reasons;
- (b) propose corrective action;
- (c) agree a deadline with the Authority for completing the corrective action.

7.6 If the Authority, acting reasonably, is concerned either:

- (a) as to the financial stability of the Supplier such that it may impact on the continued performance of the Contract; or
- (b) as to the sustainability or health and safety conduct of the Supplier, subcontractors and supply chain in the performance of the Contract;

then the Authority may:

- (i) require that the Supplier provide to the Authority (for its approval) a plan setting out how the Supplier will ensure continued performance of the Contract (in the case of (a)) or improve its sustainability conduct or performance (in the case of (b)) and the Supplier will make changes to such plan as reasonably required by the Authority and once it is agreed then the Supplier shall act in accordance with such plan and report to the Authority on demand
- (ii) if the Supplier fails to provide a plan or fails to agree any changes which are requested by the Authority or materially fails to implement or provide updates on progress with the plan, terminate the Contract immediately for material breach (or on such date as the Authority notifies).

## 8. Supplier staff

8.1 The Supplier Staff involved in the performance of the Contract must:

- a) be appropriately trained and qualified;

8.3 If requested, the Supplier must replace any person whose acts or omissions have caused the Supplier to breach clause 8.

8.4 The Supplier must provide a list of Supplier Staff needing to access the Authority's premises and say why access is required.

8.5 The Supplier indemnifies the Authority against all losses, damages, costs or expenses (including professional fees and fines) arising from claims brought against it by any Supplier Staff caused by an act or omission of the Supplier or any other Supplier Staff.

8.6 The Supplier shall use those persons nominated in the Order Form (if any) to provide the Deliverables and shall not remove or replace any of them unless:

- (a) requested to do so by the Authority;
- (b) the person concerned resigns, retires or dies or is on maternity, adoption, shared parental leave or long-term sick leave; or
- (c) the person's employment or contractual arrangement with the Supplier or any subcontractor is terminated.

9.5 All third party warranties and indemnities covering the Deliverables must be assigned for the Authority's benefit by the Supplier.

## 10. Intellectual Property Rights (IPRs)

10.1 Each Party keeps ownership of its own Existing IPRs. The Supplier gives the Authority a non-exclusive, perpetual, royalty-free, irrevocable, transferable worldwide licence to use, change and sub-license the Supplier's Existing IPR to enable it and its sub-licensees to both:

(a) receive and use the Deliverables;

(b) use the New IPR.

10.2 Any New IPR created under the Contract is owned by the Authority. The Authority gives the Supplier a licence to use any Existing IPRs for the purpose of fulfilling its obligations under the Contract and a perpetual, royalty-free, non-exclusive licence to use any New IPRs.

10.3 Where a Party acquires ownership of intellectual property rights incorrectly under this Contract it must do everything reasonably necessary to complete a transfer assigning them in writing to the other Party on request and at its own cost.

10.4 Neither Party has the right to use the other Party's intellectual property rights, including any use of the other Party's names, logos or trademarks, except as provided in clause 10 or otherwise agreed in writing.

10.5 If any claim is made against the Authority for actual or alleged infringement of a third party's intellectual property arising out of, or in connection with, the supply or use of the Deliverables (an "**IPR Claim**"), then the Supplier indemnifies the Authority against all losses, damages, costs or expenses (including professional fees and fines) incurred as a result of the IPR Claim.

10.6 If an IPR Claim is made or anticipated the Supplier must at its own expense and the Authority's sole option, either:

(a) obtain for the Authority the rights in clauses 10.1 and 10.2 without infringing any third party intellectual property rights;
