The Made Smarter Review was an industry-led review exploring how UK manufacturing can maximise benefits from increasing adoption of digital technology through a strong industry and government partnership. The Review was recognised as transformational in the 2017 Industrial Strategy and a commitment was given to work with industry to consider how to progress the recommendations. Consequently, the Made Smarter Commission,

now co-chaired by the Minister of State for Industry, and Brian Holliday, Managing Director of Siemens UK Digital, was established in 2018. Its purpose is to provide leadership for

the future of UK manufacturing, underpinned by digitalisation and to give overall governance for the Made Smarter initiative with a specific focus on small and medium- sized manufacturing and engineering businesses.

Made Smarter¹ is the UK's national industrial digitalisation initiative designed to put the UK at the forefront of the Fourth Industrial Revolution. It is a Government and Industry partnership focused on boosting manufacturing sector growth, productivity, and competitiveness.

Made Smarter Adoption programme

A core part of the Made Smarter programme¹ is the adoption of Industrial Digital Technologies (IDTs) amongst manufacturing and engineering SMEs. The Made Smarter Adoption programme works to support the uptake of digital technologies in SMEs, including Data and Systems Integration and The Industrial Internet of Things (Sensors).

The Made Smarter Review² proposed that through the faster development and adoption of such technologies³ UK industrial productivity could increase by at least 25%, add £455bn GVA, create 175,000 jobs and reduce CO2 by 4.5%.

The Made Smarter adoption programme is identified as a priority within the BEIS Outcome Delivery Plan, contributing to Innovation, Enterprise and Net Zero success outcomes. It is

positioned within the Innovation Strategy as a best practice model for technology diffusion and adoption. Furthermore, it is also positioned within the Levelling Up White paper as a vital programme for manufacturing competitiveness and growth in regions in need of levelling up and is identified as best practice for digital adoption within the DCMS Digital Strategy.

A pilot project was started in 2018 in the North-West supported by £20m of Government investment. A process and impact evaluation was carried out by an independent evaluator from October 2018 to March 2021. The evaluation used a range of methods including a counterfactual impact assessment, beneficiary surveys, and case studies and interviews with a range of stakeholders.

In April 2021 the programme was extended to SMEs in the North-East, Yorkshire and Humber, and the West Midlands regions, and the programme received an additional £24m investment in the Autumn Budget and Spending Review 2021. This brought the total funding to £32m for the 1-year extension period and three-year programme (financial years 2021/22 to 2024/25). In 2022 a fifth region, the East Midlands, joined the programme.

In the summer/autumn of 2022, a small research project was completed by an external contractor which revised the existing logic model, through desk research and a small beneficiary survey, and provided recommendations to BEIS on future monitoring and evaluation. **It should be noted that for the forthcoming evaluation BEIS does not have a preference towards any supplier and the contract is open to bids from any supplier.**

The Made Smarter Adoption programme aims to capture the benefits outlined in the Made Smarter Review by boosting manufacturing SME productivity, growth and efficiency by overcoming key barriers to IDT adoption: low level of awareness of IDTs; difficulties in

accessing funding to invest in IDT solutions; and shortages in know-how and skills including weaknesses in leadership and management.

The programme comprises of:

- 1) intensive, expert adviser-led support,
- 2) digital road mapping,
- 3) match-funded grants of up to £20k to purchase specialist services and equipment,
- 4) a tailored leadership programme and,
- 5) Digital internships until the end the end of October 2022.

All aspects of the programme will need evaluating.

Aims and Objectives of the Project

Aims and Objectives

Made Smarter Adoption programme aims

The overarching aim of the Made Smarter Adoption programme is to increase the growth, productivity, and efficiency of manufacturing SMEs. This will be achieved by overcoming the barriers to IDT adoption set out in the Made Smarter Review.

The below table sets out the specific objectives of the programme which have been taken from the Made Smarter Business case and the Theory of Change/ Logic Model developed by BEIS and a past contractor (the logic model will be shared with the successful bidder).

Objective	Outputs	Outcomes/ Impacts
Tackle the information barriers that SMEs face to adopt industrial digital technology	Support over 3,000 manufacturing SMEs over 3 years in identified regions (c.2.5% of England's SME manufacturing base) <u>through an initial diagnostic</u> to increase their awareness of the growth, productivity, and efficiency benefits of IDT	Increased awareness and understanding of IDTs by SME manufacturers in participating regions by 2025 to increase productivity and growth.

Provide expert impartial advice to SME manufacturers to enable them to identify the most impactful IDT solutions	Provide intensive support and advice through digital road-mapping to help some 957 manufacturing SMEs over three years plan for use of IDT to grow and increase their productivity.	<p>More SME manufacturers in participating regions starting digital journeys by 2025, 15% firms go on to develop an IDT project and access further support.</p> <p>In the short term, this will lead to increased Digital Readiness Levels of firms in supported regions and in the longer term to higher manufacturing productivity and an increase in GVA of up to £315m.</p>
Tackle the financial barriers manufacturing SMEs face to investing in IDTs	Up to 473 firms to receive matched grants over 3 years of c£20k to invest in IDT solutions	<p>Match private sector investment of £32m.</p> <p>Support will increase firm level productivity in up to 75% of intensively supported businesses.</p>

Support knowledge transfer and upskilling in IDT to SMEs	Workforce and skills advice delivered to 983 firms over three years.	Up to 2,200 permanent jobs and 459 new IDT projects created.
Address barriers to access and investment in IDT skills and training	An IDT skills adviser in each region to ensure that technology advice is accompanied by high quality skills advice.	<p>The programme will lead to upskilling up to 4,000 manufacturing workers to take advantage of IDT.</p> <p>This will result in increased numbers of manufacturing SMEs accessing skills</p>

		institutions and a commensurate amplification of their reach.
Provide a seamless Business Support offer to Manufacturing SMEs	Align with and leverage other productivity support available- Help to Grow, Be the Business and Productivity through People.	This will result in increased numbers of manufacturing SMEs accessing these institutions and a commensurate amplification of their reach.
Help SME manufacturers reduce CO2 emissions, contributing to Net Zero.	Aim to support firms receiving an intervention to capture and track the benefits of IDT in increasing their resource efficiency and thereby reducing emissions. A more joined up regional support ecosystem that driving more towards accessing innovation support.

Evaluation aims

The aim of this project is to evaluate both the delivery of the programme and the short- and medium-term impacts of the programme. **The project aims to assess how successful the scheme has been in achieving its policy objectives as outlined above.**

The findings from the **process evaluation** will be used to assess whether Made Smarter is being implemented as intended, is reaching its target groups, and is achieving its intended outputs.

Evidence and conclusions from the **impact evaluation** will be used to inform the development of the Made Smarter Adoption programme beyond the end of the current spending review period and support decisions regarding the future of the programme.

The evaluation has five key aims:

- 1) To understand how to improve delivery, learning lessons from the support activity delivered across the regions; the focus should be on all elements of the Programme's offer.
- 2) To measure the outputs, outcomes, and early impacts of the programme (including those related to awareness, adoption and implementation of IDTs, increased skills, and energy/resource reductions) as well as medium terms impacts in the North- West (including productivity gains, increase in GVA, and employment growth in participating firms); again, the focus should be on all strands of Made Smarter Adoption programme.
- 3) To understand which parts of the programme are most effective, in terms of both their delivery and impacts, and why.
- 4) To generate evidence to inform future programme design and funding.
- 5) To ensure effective data collection to enable longer-term impact evaluation and, where necessary, to work with the supported regions to ensure their data collection practices will enable a robust evaluation.

Suggested Methodology

Total number of participants on programme:

It is anticipated that around 3,000 business will receive support from Made Smarter from 2019 to the end of the evaluation contract.

Total number of Interviews (survey):	~5,000 survey responses in total. It is anticipated that the total number of responses will be derived from surveys with multiple survey waves over the life course of the project (see page 21).
Total number of Interviews (qualitative):	Approximately 20 – 60 depending on evaluation design
Total number of Case Studies:	Approximately 10-20 depending on evaluation design
Any other specific requirements	A theory-based evaluation scoping/set up phase will be required, along with data analysis, reporting and project management. The above numbers are indicative numbers depending on the evaluation approach and timing proposed. Contractors should suggest and justify their sample sizes based on what is realistic within the budget, and what they think will deliver a high- quality evaluation.

Evaluation Approach

A suggested methodology is outlined below in order to highlight the range of methods that BEIS believe are appropriate and feasible to meet the aims set out above. **However, BEIS would welcome bids which propose different, or additional, methodologies.**

All bids will be judged on individual merit, rather than the extent to which they align with this approach, so we encourage bidders to be creative. Bidders should note that we expect the scale of their proposed evaluation bids to be the similar to that which we have proposed. We encourage bidders to submit clarification questions where necessary. We will accept bids from both individual suppliers and consortia. **Notwithstanding the above, it is expected that bidders demonstrate a good understanding of IDTs and manufacturing SMEs in their submissions.**

In their response, bidders will need to be mindful of the different groups within the programme. Overall, there are three main groups:

1. Firms supported by the North West Pilot from 2019-2021.
2. Firms supported in 2021-2022.
3. Firms supported during the life of this contract from 2022-2025.

Crucially, for the impact evaluation, for those who partook in the programme most recently a focus on the initial impacts would be expected, whereas for those supported in 2019-2021 focus on the medium-term impact of the programme would be expected. Due to the length of the programme some aspects have already been evaluated, and as such, bidders will not need to comment on these. The below table outlines how this ITT supports past work.

Process evaluation	No work required	No work required	Process evaluation as described below
Impact evaluation	Impact evaluation as described below	Impact evaluation as described below	Impact evaluation as described below

1. Process Evaluation

A core aim of the evaluation is to understand how successful the Made Smarter Adoption programme implementation has been, and how it has been experienced by stakeholders. The process evaluation will be required to gather evidence on the types of businesses that participated in the Programme and why (including understanding of barriers to earlier use of integrated digital technology in their business), the journey of businesses from submitting an initial enquiry to receiving support, the role of Advisors in this journey, business's experiences following receiving support, and lastly, stakeholders'

interpretations of the Programme (e.g., delivery partners; other manufacturing and business support programmes; regional and local manufacturing businesses; relevant

trade bodies; funders in government; and innovation facilities). The process evaluation will

also need to engage with those who were not successful in their application to understand why they applied and their thoughts on the applicant journey. The process evaluation will

be able to draw upon past work by other contractors, and BEIS will share all prior reports with the successful bidder.

It will be important for the process evaluation to reflect and comment on the differences in how the Made Smarter Adoption programme is implemented between regions.

In the table below we outline the initial process evaluation questions, though we anticipate these will be refined in the inception phase with the successful bidder.

Evaluation Question	Sub- question
1. How successful has the recruitment and application process of the scheme been?	a) What has been the experience of the administration of the scheme by applicants? Has it created any unnecessary burden or barriers?
	b) What problems have applicants faced during the application process?
	c) How has the programme interacted with other productivity support available, such as Help to Grow?
	d) How aware are manufacturing SMEs of the Made Smarter Adoption programme?
1. How successful has the delivery and implementation of the initial diagnostic been?	a) Have decisions about which applications to support been made using a clear, fair, and effective process?
2. How well do processes appear to support the delivery of intended outputs, outcomes and impacts of the programme?	a) How successful has the delivery and implementation of the intensive, expert adviser-led support been?
	b) How successful has the delivery and implementation of the digital road mapping training been?
	c) How successful has the delivery and implementation of the technology grants been?
	d) How successful has the delivery and implementation of the leadership programme been?

3. What are the strengths and weaknesses between the different delivery approaches regions have taken in the rollout of the programme?	
4. What are the key lessons learned and recommendations for process-related changes in delivering the programme?	
5. How does the process for receiving support from Made Smarter compare to other UK and international programmes focused on promoting IDTs within SMEs?	a) Are there any improvements to the process that could be incorporated from other offers into Made Smarter?

We anticipate that to develop the evidence for the process evaluation, a mixture of quantitative and qualitative data collection methods will be used, including surveys, analysis of management information, interviews, and case studies.

Surveys should target both beneficiaries and unsuccessful applicants (non-beneficiaries) and must cover all areas of programme activity (i.e., digital road mapping / advice and support, grants, and the leadership and management training – as well as recruitment and application processes). It is expected that the supplier will host and administer the survey.

Similarly, qualitative methods, such as interviews and case studies, should cover all aspects of programme activity, and must have a suitable geographical spread and represent a range of manufacturing industries. The exact sample of participants will be agreed with by BEIS prior to data collection beginning.

To support the process evaluation, we also suggest that interviews be held with stakeholders, including programme delivery partners and Made Smarter Advisers to explore issues related to programme management/delivery, plus areas-for-improvement/ lessons-for-rollout. We would also expect wider stakeholder engagement to gather data on awareness of Made Smarter and how best to position it for SMEs.

We are interested in using the process evaluation to assess whether there are changes in programme implementation and/or experiences over time. As such, the process evaluation will run throughout the evaluation, with findings presented in both the mid- project report and end of project final report. The final report will be required to bring together the findings from each wave and draw out any key differences or changes in

programme implementation.

Data collection for both the process and impact evaluation are discussed in further detail below.

2. Impact Evaluation

The Made Smarter impact evaluation must provide evidence of the success, or otherwise, of the programme in delivering its planned outputs, outcomes, and early impacts – as well as the medium-term impacts in the North-West region.

The evaluation must also lay the foundations for evaluating the longer-term impacts of the programme in all participating regions.

It is expected that, in addressing the below evaluation questions, bidders will explore the individual contribution of all parts of the programme. While grants are a key part of the programme BEIS is keen to understand the impact of other facets of the programme in bringing about positive change and how separate parts of the Made Smarter offer interact with each other.

Improving productivity is a key aim of the programme and so it will be essential that bidders devise and build on previous robust approaches to measuring productivity impacts of all the different elements (singly and in combination) of the offer over time, including any early indicators of productivity improvements. Successful bidders should also consider how they will use proxy measures to assess productivity improvements (e.g., adoption of new leadership and management practices). **Any approach must be able to distinguish between changes to productivity at the firm level and productivity at the regional level.**

It is anticipated that a range of techniques be used to answer these impact questions:

- A counterfactual evaluation using econometric techniques will be required to provide an objective perspective on the additionality and impact of the Made Smarter programme.

- A value for money assessment will be required. Specifically, this assessment will be used to evaluate the benefit of the programme to GVA, turnover, and productivity of the supported firms.
- The evaluation should contain a light-touch theory-based element, collecting evidence to assess the Theory of Change.

In the table below we outline the initial impact evaluation questions, though we anticipate these will be refined in the inception phase with the successful bidder.

Evaluation Question	Sub-question
Has Made Smarter led to an increase in GVA in supported businesses?	Do GVA increases differ between regions and/ or between business types?
	Do GVA gains differ depending on the type of technology a business implements or where it is applied within their business?
Has Made Smarter led to an increase in turnover in supported businesses?	Do turnover increases differ between regions and/ or between business types?
	Do turnover gains differ depending on the type of technology a business implements or where it is applied within their business?
Has Made Smarter led to an employment uplift in supported businesses?	Do employment uplift differ between regions and/ or between business types?
	Do employment gains differ depending on the type of technology a business implements or where it is applied within their business?
Has Made Smarter led to productivity growth⁴ in supported businesses?	Does productivity growth differ between regions and/ or between business types?
	Does productivity gains differ depending on the type of technology a business implements or where it is applied within their business?

⁴ The exact definition, and measures, of productivity will be agreed with the successful bidder as part of the Inception phase.

Has Made Smarter increased skills in supported firms?	Do the increases in skills differ between regions and/ or between business types?
How have digital interns contributed to the growth of a business in terms of skills, productivity, GVA, and turnover?	Do the impacts from digital interns differ between business types?
Has Made Smarter led to supported firms having success selling into new markets or increased exporting of goods?	
Has Made Smarter led to a resource efficiency uplift and/ or a CO2 reduction in supported businesses?	
Has Made Smarter led to the development of Low Carbon jobs in supported firms?	
Has innovation in supported businesses increased?	
Has Made Smarter led to an increase in referrals to other national programmes including Help to Grow as well as adjacent regional offers?	
Which parts of the Made Smarter offer and in which combination is the most important for delivering benefits to productivity?	Are there any parts of the programme that have a negligible impact? And why?
How do the impacts arising from the programme compare to similar UK and international work?	Do comparator offers suggest ways of increasing the impact of Made Smarter?

Counterfactual Analysis

The successful bidder is expected to develop a counterfactual analysis using similar but not supported businesses for comparison to business that are supported. While the Theory of Change analysis will support BEIS's understanding of how and why impacts occurred, the Counterfactual Analysis will help BEIS understand the size and significance of change brought about by the programme. The analysis should use econometric analysis to develop a control group against which the impact of the programme can be assessed. It is anticipated that the analysis will be undertaken at a regional level, with at least 80% of beneficiary businesses matched to the control group. However, we realise that such regional analysis will depend on uptake within regions and therefore the number of unsupported manufacturing SMEs in each region and the final analysis will be agreed upon in discussions with the successful bidder. As well as traditional significance testing, bidders are encouraged to comment on the use of effect sizes and Bayesian analysis to facilitate a greater understanding of the data. For clarity, alternative approaches to designing the counterfactual analysis are welcome, but BEIS would expect it to meet the scale of the analysis outlined here.

Crucially for this analysis bidders will need to undertake several analyses, one on firms supported by the North West Pilot from 2019-2021, one on firms supported in 2021-2022, and a third analysis on firms who joined in 2022-2025. The specific cut off point for inclusion of 2022-2025 firms will be discussed with BEIS during the inception phase.

The suggestion to use both Counterfactual Analysis and a Theory-based impact evaluation is to enable the triangulation of findings. The Counterfactual Analysis will quantify the impact of the Programme, whereas the Theory-based impact evaluation will enable BEIS to understand how the impacts have taken place and by what mechanisms.

Value for Money Assessment

The assessment should use the Theory of Change established for the Made Smarter Adoption Programme as the basis for working through the cause and effect of the programme and how it operates on the ground. In addition, the objectives (such as GVA, turnover, and productivity) of the programme will need to be analysed to determine how and to what extent they are being achieved in the context of the Theory of Change.

It is expected that a Benefit Cost Ratio (BCR) will be produced for the programme overall. The calculation of this will use the survey evidence provided by beneficiaries and will consider recognised methods and measures of additionality. Such an assessment will need to calculate additionality based on the gross self-reported impacts from the FY21/22 survey that will already have been completed as part of a previous evaluation contract. **Ideally this assessment would illustrate beneficiary-level examples of cost against returns.**

The calculation will also use the counterfactual impact assessment using econometric methods and employing a control/comparison group. It is possible a central and 'best range' for the BCR could be produced using these methods. The assessment will also need to consider non-quantifiable benefits and cost, such as diversity and inclusion impacts and any changes in resource use where quantification is not clear. The most appropriate method used to best bring these into the overall analysis of value for money will need to be consistent with the guidance as set out in the Government's Green Book and Magenta Book on appraisal and evaluation respectively.

Crucially for this analysis bidders will need to undertake several analyses, one on firms supported by the North West Pilot from 2019-2021, one on firms supported in 2021-2022, and a third analysis on firms who joined in 2022-2025. The specific cut off

point for inclusion of 2022-2025 firms will be discussed with BEIS during the inception phase.

Theory-based impact evaluation

To develop evidence for the mechanisms by which the programme can lead to impact (the 'how' and the 'why') BEIS suggests a light-touch theory-based assessment to be undertaken.

While the evaluation budget may not stretch to a full contribution analysis (or other rigorous theory-based approach), we would ask bidders to consider what lighter touch approaches could help us understand how and why the programme is leading to any observed impacts. Importantly, where possible, such an evaluation will need to seek to understand the individual contribution of the separate offers within the programme and the differential impacts of the programme on different business types and sizes.

As a minimum, we would expect contractors to use and develop the existing Theory of Change model, which BEIS has developed, and conduct case studies (or other qualitative work) with businesses that have received Made Smarter support. The existing Theory of Change/ Logic Model can be used as a starting point, which will be shared with the successful bidder.

3. Suggested data collection methods (to support both process and impact evaluation)

To support the process and impact evaluations, a mixture of quantitative and qualitative data collection methods should be used, including surveys, analysis of management information, interviews, and case studies. To reiterate, unless stated, these methods are suggestions and BEIS welcomes alternative ideas and approaches.

Beneficiary Surveys

It is expected that two rounds of surveys are undertaken one in September 2023 (covering April 2022 to March 2023) and the other in September 2024 (covering April 2023 to March

2024). It is anticipated that the beneficiary survey captures circa 35% of businesses involved in the programme in each region.

Bidders should note that as this survey is already running this part of the evaluation is fixed and therefore submissions must include this survey in their workplan. The survey captures feedback on the effectiveness of processes from businesses perspective and on the support, they receive as well as actual/ anticipated impact on turnover/ employment/ productivity.

The survey contains 60 questions, though not all are applicable to all businesses, and takes around 30 minutes to complete. In the past the survey has been a telephone survey; however, BEIS appreciates the high burden of this approach and is open to the survey being conducted online using a survey platform, such as Qualtrics, with an appropriate number of telephone chasers. Where an online approach is suggested, BEIS expects the questions to be very similar to the existing telephone survey but does suggest that the questions be cognitively tested with 10 business to assess their appropriateness for the new methodology.

Non-Beneficiary Surveys

We also suggest that a survey will be conducted with businesses that have engaged with Made Smarter but have not received any support from the programme. Questions in this survey are likely to be similar to those in the beneficiary survey but also include questions to understand any issues they have experienced with the programme. As uptake of this survey is likely to be low it is suggested that the survey is substantially qualitative to

gather detailed feedback from participants. The survey will be conducted at the same time as the beneficiary surveys. BEIS is welcome to bidders suggesting delivery methods likely to boost completion rates. BEIS and its partner organisations will be able to provide contact details for firms (e.g., email addresses and telephone numbers). It is expected that the supplier will host and administer the survey.

‘Pulse Check’ Surveys

In addition to the two rounds of surveys described above it is suggested that shorter online-only ‘pulse check’ surveys are run at regular intervals to gather data to support the process evaluation. Questions in these surveys should link into the process evaluation questions described. BEIS expects each round of the survey to capture ~10% of businesses involved

in the programme in each region. It is expected that the supplier will host and administer the survey.

Monitoring Data

BEIS has been working with the existing four regions who are part of the Made Smarter Adoption programme to achieve improvements to the monitoring of the performance of the programme and monitoring data is now delivered to BEIS on a quarterly basis. Such data will be made available to the successful bidder, and it is expected it will be used in their evaluation. Monitoring data is not collected for non-beneficiaries.

The current data covers the following areas:

1. Digital Readiness Levels (DRL) of SMEs engaged.
2. Business Characteristics of SMEs engaged.
3. Supply chain information about the of SMEs engaged.
4. Resource use of SMEs engaged, including via smart meter data.
5. Diversity and Inclusion (D&I) of SMEs engaged.
6. Export behavior of SMEs engaged.

More ad hoc monthly data is also produced by the regions and this data will also be shared with the successful bidder. **We would also invite suppliers to consider how additional data could support the monitoring of the impacts of the programme, for example how web scraping from beneficiary websites and data analytics (such as google analytics) could be used as a proxy for productivity and growth gains.**

BEIS would also expect bidders to suggest how they could make use of existing business databases, such as Fame, to help assess the impact of Made Smarter.

Analytical Case Studies

To support both the process and impact evaluation, we suggest that a number of case studies are undertaken. These should be linked to the Theory of Change to help build our

understanding of how and why any impacts are occurring as a result of Made Smarter. Case studies should have a suitable geographical spread and represent a range of manufacturing industries. BEIS would assist the evaluation partner in identifying and contacting suitable businesses/stakeholders.

Stakeholder interviews

To support the process evaluation, it is anticipated that three rounds of interviews will be undertaken (the exact sample of participants will be agreed with BEIS prior to data collection beginning). With one round at the start of the project, one at the mid-point to inform the mid-project report, and the final round to support the final report. Subjects for the interviews could include delivery teams, advisers, funders, accountable body representatives, chairs of regional steering groups, SRO, intermediaries, and trade associations. Interviews will need to explore issues related to

Desk based research

To support the comparison of the programme to comparator offers it is anticipated that a literature review will need to be undertaken to compare and contrast both the processes of, and impact arising from, the Made Smarter programme against UK and international programmes promoting IDTs within SMEs. It is anticipated that the outputs from the research will be included in the final report.

<u>Protected characteristics</u>	

As part of the evaluation BEIS expects that data collection methods will also include collection of the protected characteristics of Made Smarter clients, in line with the Equality Act 2010. Such data is important as it will provide insights as to whether Made Smarter is helping to promote and provide access to opportunities for all and confirm that the processes of the programme do not disadvantage any particular individuals.

Data Collection and Analysis Considerations

Bidders should set out full details of all their preferred methods of analysis for any data and insight collected, as well as any analysis of existing data. Bidders should explain how these will be used to answer the evaluation questions.

For both qualitative and quantitative data collection and analysis, it is expected (where relevant) that the proposed methodologies will be sufficiently detailed to give a clear understanding of how data collection and analysis will be approached, including an outline of any techniques that bidders expect to use. At a minimum, where relevant, the following areas should be considered:

Sampling robustness - including sample sizes, sampling strategies and the achievement of adequate responses. In addition, for quantitative data collection confidence intervals and weighting approaches should be outlined;

- Sample recruitment – bidders are expected to propose which roles within organisations will be asked to participate in interviews and the survey, as well as sampling designs and how they plan to obtain contact details and obtain and
- maintain engagement with participants;
- Development of data collection instruments and fieldwork materials (e.g., interview/topic guides) – bidders are expected to explain how data collection instructions and fieldwork materials will be developed and, where relevant, piloted. As part of this, BEIS expects to have the opportunity to review and sign off any instruments and fieldwork resources;
- Data capture – for qualitative data collection, BEIS expects all interviews will be recorded where consent is granted. In addition, a sample of anonymised interview transcripts for BEIS quality assurance purposes will be required. BEIS would also expect there to be opportunity during data collection to review and revise the topic guide if required, on the basis of initial interviews;
- Data processing and cleaning – for quantitative data collection, including handling missing values, non-response and managing outliers;
- Analysis of qualitative data – including how themes will be identified and developed, whether analysis will be undertaken within and/or across cases, and
- how the analysis will be managed across organisations and individuals, if applicable;

- Quantitative data analytical approach and outputs – including use of descriptive or inferential analysis, and how an appropriate approach to the analysis will be identified and developed.
- Quality assurance undertaken within the data collection and analysis process should be explained and any quantitative data analysis is expected to be in line
- with HMG's Aqua book.

In explaining their approaches to analysis, bidders should illustrate how these will ensure a credible and impartial outcome and set out any limitations or bias. Bidders will need to demonstrate that they will meet BEIS standards for quality assurance, which are outlined below.

Additional Research

We also suggest leaving ~£20,000 unallocated, to cover any expanding research activities in light of policy questions that come up over the duration of the evaluation. This will allow the evaluation to be agile and ready to respond to emerging questions as they arise. Details of such research are difficult to predict but could for example include additional interviews. These will be given with as much notice as possible, and dates for completion will be agreed between BEIS and the successful bidder. It is expected that the successful bidder will be as flexible as possible with regards to these additional research activities

and should be able to mobilise a team to begin work within two weeks. BEIS will endeavour to be reasonable in its requests.

Covid-19 and other contextual Factors

Please consider how you will try to assess the impact of Covid-19 and other macro or contextual factors which might affect programme take up and outcomes.

Key Challenges to Consider

This evaluation will face several challenges which the evaluator will need to address in the evaluation framework and plan, including in the selection and justification of appropriate methodologies for later stages of the evaluation. Challenges include:

- Imperfect evidence base - while management information and other evidence will be made available to support the evaluation, it is likely there will be gaps or deficiencies in areas of the evidence base relevant for answering the evaluation questions and further research will be required. The evaluator will need to use their experience and judgements to fill these gaps. The successful bidder will have

access to a review of monitoring and evaluation data from an external contractor to aid their understanding of the data landscape.

- Data sharing – while BEIS will endeavour to provide the contractor with access to relevant data, we acknowledge that resolving data sharing agreement issues can prove challenging.
- The potential for sample exhaustion, particularly from businesses receiving Made Smarter support, given the small sample sizes. Sample exhaustion may also be impacted by business receiving support from other Government funded
- programmes and taking part in the evaluations for these separate projects. No past evaluation has been undertaken with non-beneficiaries and so engagement of
- these business is unknown but could be limited.
- Staggered rollout of the programme – as detailed in above different regions have received support at different times, with the programme launching in the North- West region in 2018 and in 2020 for the other regions. It is anticipated that data from the North-West may point to evidence of medium-term impacts, whereas in the newer regions data may only indicate short-term impacts with medium term impacts being less clear. It will be important for these differences in maturity between regions to be reflected in the evaluation. Specifically, bidders need to comment on how they will ensure that different phases of Made Smarter inform each other in terms of ongoing monitoring and evaluation e.g., what do the long- term impacts of the North West pilot project tell us about the expected impact, and thus data collection approach, for regions with more recent support.
- Differences in regional delivery. The Made Smarter regions have tailored the delivery of the programme to their own needs. While this is likely to lead to an enhanced delivery within regions it may be that data collection is not standardised between regions, potentially reducing the ability to access comparable impact metrics.

Proposed Timelines

The table below shows the proposed timelines. This is only a guideline. We expect bids to include a detailed suggested project timeline mapping out sampling, data collection, analysis and reporting, with indicative timeframes and lengths for each research activity. These should include risk mitigations and buffer time where appropriate to ensure delivery of each research output is on time. Final timelines will be agreed during the project inception phase, and we expect this will inform an invoice schedule, with research milestones acting as payment points.

BREAK CLAUSE

A review point will be built into the contract after submission of the mid-project review report on the 31st March 2024 to allow BEIS to manage the contract. BEIS reserves the right to revise or terminate the contract at this point for any reason.

Project Management

The successful contractor will be expected to identify one named point of contact through whom all enquiries can be filtered. A BEIS project manager will be assigned to the project and will be the central point of contact.

Where a consortium or sub-contractors are in place, BEIS expects that they are included in meetings, workshops, and review points where relevant to ensure their full engagement in

the project. This will only be occasionally, and BEIS does not expect that this will be a matter of routine. Overall, BEIS ultimately expects the lead contractor to be responsible for the management of subcontractors, including ensuring they understand BEIS' requirements. BEIS does not expect to take any role in the management of subcontractors. It is

expected that the lead contractor takes an active role in oversight of all workstreams and bears the overall responsibility for the delivery of the evaluation activities and outputs.

The frequency of project updates is likely to vary throughout the course of the project in line with the nature of the activities at the time. It should be expected that weekly Microsoft Teams calls will be required between the contractor and the BEIS project manager. The contractor will be required to provide weekly written updates on project progress and outstanding actions for both the contractor and BEIS.

On occasion, BEIS may request that contractors attend other ad hoc meetings outside of the regular project update and output development meetings mentioned thus far. Bidders should account for a small number of hours in this respect.

It is expected that the contractor will keep a project tracker up to date, which will include an invoice schedule and overview of the budget for each research stream. Though this is for the contractor's own purposes, BEIS expects it to be easy to follow so that BEIS can effectively monitor progress.

Following the review of each of the two published reports (see below for details) BEIS and the contractor will meet to discuss their general feedback, and for the contractor to clarify any queries on BEIS comments.

Quality Assurance

All research and outputs are required to meet standards set out in the Magenta Book⁵, the BEIS Monitoring and Evaluation Framework⁶, The BEIS Business Support Evaluation

⁵ <https://www.gov.uk/government/publications/the-magenta-book>

⁶ <https://www.gov.uk/government/publications/beis-monitoring-and-evaluation-framework>

Framework⁷, the Government Social Research code⁸, the Market Research Society Code of Conduct⁹ and the HM Treasury Green book¹⁰.

All bids should state the quality assurance (QA) processes that will be applied to different activities and outputs. In assessing the Approach (Methodology) question, BEIS will look favourably on bids providing evidence of high QA standards. Where necessary, deliverables that provide evidence of QA should be specified. Sign-off for quality assurance must be done by someone of sufficient seniority within the lead contractor organisation to be able to take responsibility for the work done. This extends to work produced by subcontractors. Acceptance of the work by BEIS will take this into consideration. BEIS will ultimately hold the lead contractor accountable for all work produced, including that of subcontractors. The lead contractor should ensure they have the resources available to assure the quality of work produced by subcontractors. BEIS expects work will be submitted to us by the lead contractor in all instances and that they will receive feedback from us. BEIS reserves the right to refuse to sign off outputs which do not meet the required standard specified in this invitation to tender and/or the contractor's QA plan. QA should cover all aspects of the project undertaken by the contractor, including data collection, data analysis and reporting.

To demonstrate an effective process to produce high quality reporting, the contractor/s must ensure that QA is done by individuals who were not directly involved in that particular research or analysis.

Bidders should note that BEIS may appoint its own peer reviewer(s) to QA publishable outputs. Consideration should be given to how the external peer reviewer(s) will be included in the QA process. A BEIS appointed peer reviewer will not be expected to provide detailed quality assurance, their role will be focused on higher level peer review. Such peer review will only be used on documents that will be published.

⁷ <https://www.gov.uk/government/publications/business-support-evaluation-framework>

⁸ <https://www.gov.uk/government/publications/the-government-social-research-code-people-and-products>

⁹ <https://www.mrs.org.uk/standards/code-of-conduct>

¹⁰ <https://www.gov.uk/government/publications/the-green-book-appraisal-and-evaluation-in-central-government>

Where complex or innovative methods are proposed, bidders should specify how additional quality assurance will be provided. Where necessary, this should include the use of external experts.

Outputs will be subject to BEIS internal approvals, the more substantive the output the longer the approval time required. Interim published reports will require two rounds of review, with a final review for internal sign-off, and the final report will require three rounds of review, as well as a final review for internal sign-off. These should be factored into the timelines. In the case of quantitative analysis, BEIS may seek to recreate the analysis submitted to us by the contractor. We will query any discrepancies between our results and the contractor's results. The contractor should be prepared to provide BEIS with a

raw, cleaned data in .xlsx (Excel) format, and copies of their code to aid BEIS in their QA, if applicable.

The successful bidder will be responsible for any work supplied by subcontractors. For primary research, the contractor should be willing to facilitate BEIS research staff to attend interviews as part of the quality assurance process.

Performance

We will manage contractor performance with a yearly informal performance review to exchange feedback. If there is ongoing poor performance (lots of unacceptable outputs, not attending meetings, unresponsiveness, etc.), we will schedule a formal performance review the contractor is expected to attend and offer an explanation. If we are not happy with the explanation, we will agree a performance improvement plan. If poor performance continues, we will follow the dispute process as set out in the terms and conditions.

Ethics

We expect that the contractor will follow the GSR ethical principles as laid out in the professional guidance¹¹. These are that:

- Research should meet a clear user need and public benefit.
- Research should be based on sound research methods and protect against bias in the interpretation of findings.

¹¹ See here:

https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/1000708/2021-GSR_Ethics_Guidance_v3.pdf

- Research should adhere to data protection regulations and the secure handling of personal data.
- Participation in research should be based on specific and informed consent.
- Research should enable participation of the groups it seeks to represent.
- Participation in research should be conducted in a manner that minimises personal and social harm.

The successful bidder will consider the above principles clearly and show evidence of how they have mitigated risks relating to these, in each stage of the research design.

Access to Data

We can facilitate access for the successful bidder to management information and programme documentation. Bidders should highlight any specific data requirements and assumptions about access to this information in their proposal.

Data Security and GDPR

The successful bidder will need to handle personal data, including protected characteristics of participants. All research and outputs must meet GDPR requirements. Bidders should state whether they have sufficient privacy policies in place to satisfy GDPR regulation. BEIS will be the data controller of all data collected and deliverables produced as part of the contract. Contractors will have responsibility for ensuring that they and any subcontractor who processes or handles information on behalf of the Department is conducted securely. The sorts of issues which must be addressed satisfactorily and described in contractors' bids include:

- procedures for storing both physical and system data
- data back-up procedures
- procedures for the destruction of physical and system data
- how data is protected
- data encryption software used
- use of laptops and electronic removable media
- details of person/s responsible for data security
- policies for unauthorised staff access or misuse of confidential/personal data
- policies for staff awareness and training of Data Protection Act

- physical security of premises
- how research respondents will be made aware of all potential uses of their data

Risk Log

Any risks associated with the evaluation should be discussed and compiled into a single risk log across the whole evaluation. The risk log should include severity ratings and suggestions for mitigations where possible. This should be a working document throughout the evaluation with both the contractor and BEIS providing input regularly. However, it is expected that the contractor will ultimately hold responsibility for the log and update it as and when needed.

Social value

In line with the [Social Value model](#), suppliers are expected to demonstrate how their bid can help tackle economic inequality. Specifically, all bids will be judged by their inclusion of effective measures to deliver the following benefits throughout the contract:

1. Create employment and training opportunities particularly for those who face barriers to employment and/or who are located in deprived areas, and for people in industries with known skills shortages or in high growth sectors.
2. Support educational attainment relevant to the contract, including training schemes that address skills gaps and result in recognised qualifications.

When submitting your bid please outline the commitment your organisation will make to ensure Social Value is delivered. Please include:

- a 'Method Statement', stating how you will achieve Social Value and how your commitment meets the Award Criteria, and;
- a timed project plan and process, including how you will implement your commitment and by when. Also, how you will monitor, measure and report on your commitments/the impact of your proposals. You should include but not be limited to:
 - timed action plan
 - use of metrics
 - tools/processes used to gather data
 - reporting
 - feedback and improvement
 - transparency

To demonstrate commitment to the above Social Value benefits responses should include details of measuring and reporting on the following metrics:

- Number of full-time equivalent (FTE) employment opportunities created under the contract.
- Number of apprenticeship opportunities (Level 2, 3, and 4+) created or retained under the contract.
- Number of training opportunities (Level 2, 3, and 4+) created or retained under the contract, other than apprentices.

- Number of people-hours of learning interventions delivered under the contract.

Deliverables

Outputs

Below is a table of outputs expected over the lifetime of the evaluation. It is worth noting that the significant work is to be completed early in the evaluation. Additional deliverables may be suggested provided that the required deliverables listed below will also be delivered. Details within each of the deliverables should align with the specifics of the methodology proposed in your bid.

To deliver the aims of the evaluation and ensure that the evidence has the maximum impact, it is necessary that evidence and deliverables are made available to BEIS on an ongoing basis.

Output	Final output completion date(s)
Project Initiation Document	No later than 5 weeks after start of contract.
Research materials	Due dates to be discussed with BEIS and outlined in the Project Initiation Document.
Quarterly Reports	1 July 2023, 1 October 2023, 1 January 2024, 1 July 2024, 1 October 2024, 1 January 2025.
Mid-project report	29 March 2024.(Break clause)
End of project report	15 March 2025.
PowerPoint presentations	Submission due on the same dates as the Mid-project and End of project reports. Presentation to BEIS due two days after (or nearest working day) after submission.

Project Initiation Document (PID)

Once the contract has been set up, an inception phase will be required in which the details of the project should be agreed upon. A Project Initiation Document (PID) will be delivered as the output of this phase. A review of the proposed evaluation questions should take place to ensure that they remain appropriate for the agreed evaluation approach and methodology and that the questions still meet the aims of the project. The final set of evaluation questions will be agreed with BEIS and set out in the inception report. The PID will be required before fieldwork can begin. The PID should also include:

Evaluation Plan

The PID should include a detailed evaluation plan with the agreed methodology, timescales and deliverables that will be provided by the supplier. The evaluation plan should set out in detail how the sampling will be delivered for each of the agreed data collection methods of the project. It is expected that this plan also outlines timelines for each stage of research projects including scoping period, data collection, analysis, reporting, and redrafting. BEIS will review these to ensure that these fit our evidence needs, and to add advice on BEIS availability for reviews and steering.

Invoicing schedule

BEIS will require the supplier to provide an invoicing schedule, outlining a breakdown of the invoice amounts and expected dates. This will first need to be provided as part of the PID but it will be expected that the supplier will keep this updated throughout the evaluation should there be any changes.

Gantt chart

To complement the timings and deliverables agreed in the PID, a detailed Gantt chart should be provided. It is expected that the supplier will keep this updated throughout the evaluation should there be any changes.

Risk log

Any risks associated with the evaluation should be discussed during the inception phase and compiled into the risk log that is delivered alongside the PID. The risk log should include severity ratings and planned mitigations. This should be a working document throughout the evaluation with both the supplier and BEIS providing input. However, it is expected that the supplier will ultimately hold responsibility for the log and update it as and when needed.

The PID and associated outputs will not be published.

Fieldwork materials

The below materials will be required to be signed off by BEIS ahead of fieldwork commencing:

- Made Smarter stakeholder process interview topic guide.
- Process evaluation case studies topic guide.
- Process evaluation business surveys and interviews.
- Impact evaluation beneficiary survey.
- Impact evaluation non-beneficiary survey.
- Impact evaluation case studies topic guide.
- All recruitment materials (e.g., consent forms, welcome emails).

It should be expected that each deliverable will go through at least one round of comments from BEIS and redrafting before sign off.

Cognitive testing results

Outputs from the cognitive testing of survey design and questions, if required, should be provided to support BEIS decision making.

Evaluation outputs

BEIS expects the supplier to produce quality assured, accessible reports. The reports should be written for a non-technical audience. Reports should be produced in MS Word, unless otherwise stated and delivered to a publishable standard¹² and meet UK government accessibility requirements¹³. Notwithstanding that, if bidders submit an alternative to the suggested format, we expect a similar quantity of outputs. In all instances, they should be high quality, appropriate for the audience and concise. We encourage bidders to be creative in coming up with new and interesting ideas for outputs that will be engaging for policy colleagues. In all cases we expect the below outputs.

Quarterly Reports

Subject to discussions in the inception phase it is expected that the supplier submits quarterly report that summaries:

- Programme management issues.
- Monitoring data, e.g., type/ number of Programme services including analysis of monthly and quarterly monitoring data.
- Case studies, where appropriate.
- Research findings, where appropriate.
- Six monthly feedback from Advisors and Stakeholders on programme progress.

These reports will be for internal use only and will not be published. These should be of a high standard and written to be understood by a policy audience. We expect all results included in the reports to have been subject to substantive quality assurance. The reports will be expected to include a detailed technical (methodological) annex with enough detail for research to be replicable. These annexes will be compiled in a separate document to the main research report. BEIS will typically expect two drafts of these reports. However, in the event BEIS deems the quality of submitted work to be insufficient owing to data issues or poor drafting, we will be at liberty to request additional drafts and would not expect to incur additional charges for this. BEIS will endeavor to be as clear as possible about our expectations in regards the quality of reports and be reasonable in our requests for additional drafts. As an annex to these reports, it is expected that supplies will create a 7-

¹² <https://www.gov.uk/government/publications/government-social-research-publication-protocols>

¹³ <https://www.gov.uk/guidance/publishing-accessible-documents>

10 slide PowerPoint dashboard presenting headline findings and key statistics from the research, in an easy-to-digest format to be shared with BEIS colleagues, including graphs, charts, and graphics to illustrate results where appropriate. The dashboard should make clear any changes in data where appropriate. The reports will not be required in the quarters that overlap with the delivery of either the mid-project or end of project reports.

Mid-project report

An interim report will be due in the middle of the evaluation to summarise all known findings and impacts. The report should provide evidence that will address the evaluation questions and both the process and impact evaluation aspects of the project. It is anticipated that the report will separate out findings related to the process evaluation from those on impacts. The report should contain a high-level summary for policymakers. This report must be of a publishable standard. The report will also need to draw out conclusions on the success of the Made Smarter programme so far, and also comment on expected impacts of support for business in the 2022 – 2025 phase of the programme. It is also anticipated that this report will include interim findings from the counterfactual and value for money assessment.

The Methodology section must include enough detail to be replicable. A full technical report including details of sampling approach, sample profiles, fieldwork protocols and materials, response rates, and analysis will be required to be published alongside the interim report. We expect all results included in the reports to have been subject to substantive quality assurance. Reports should use the BEIS Microsoft Word reporting template and follow BEIS accessibility guidelines. BEIS is not prescriptive to the length of the report but expect that it covers all findings and work undertaken to date in sufficient detail. It should be assumed that report drafting will go through three versions, with two rounds of comments from BEIS and a third “final draft” for internal sign-off. BEIS will appoint external academics from the BEIS Evaluation Peer Review Group to review the report. The evaluator will be expected to make reasonable adjustments to their reports based on the reviewer’s feedback. In the event BEIS deems the quality of submitted work to be insufficient owing to data issues or poor drafting, we will be at liberty to request additional drafts and would not expect to incur additional charges for this. BEIS will endeavor to be as clear as possible about our expectations in regards the quality of reports and be reasonable in our requests for additional drafts.

End of project report

The report should present findings from all known evidence gathered during the evaluation. A comprehensive review of the impacts of the Made Smarter programme will be required. The report should provide evidence that will address all the evaluation questions and both the process and impact evaluation aspects of the project. Evidence and conclusions should be presented as to whether, and how far, the programme has achieved its stated objectives

and also comment on expected impacts of support for business in the 2022 – 2025 phase of the programme. It is anticipated that the report will separate out findings related to process and impact elements of the evaluation. The purpose of this report is to synthesise all of the evidence collected for the evaluation period, for both accountability and wider learning needs. A high-level summary for policymakers will also be required. A full technical report including details of sampling approach, sample profiles, fieldwork protocols and materials, response rates, analysis will be required to be published alongside the final report.

The report will be subject to the same standards and reporting requirements as the Mid-project review report but will go through four review cycles (three review rounds and a fourth “final draft” for internal sign-off). BEIS will appoint external academics from the BEIS Evaluation Peer Review Group to review the report. The evaluator will be expected to make reasonable adjustments to their reports based on the reviewer’s feedback. As with the Mid-project review report, in the event BEIS deems the quality of submitted work to be insufficient owing to data issues or poor drafting, we will be at liberty to request additional drafts and would not expect to incur additional charges for this. BEIS will be reasonable in our requests for extra drafts.

Draft Structure

For the mid-project and end of project reports, BEIS will review the draft structure of the report to iron out any differing expectations before the full report drafting begins. BEIS expects to only review this draft once. However, in the event BEIS deems the quality of the amended draft to be insufficient owing to comments not being picked up, we will be at

liberty to request additional drafts and would not expect to incur additional charges for this. BEIS will be reasonable in our requests for extra drafts.

PowerPoint presentations

The mid-project and end of project reports will both be accompanied by a PowerPoint presentation. The slide pack should present a summary of the findings from the report

which should be presented to BEIS colleagues either face-to-face or virtually via Microsoft Teams. Presentations should last around 1 hour and include a Q&A/discussion section. Presentations will not be published. It is expected that the supplier will also present the slide to the Made Smarter Commission which includes senior industry representatives and Government Ministers.

Analytical outputs

For each both the mid-project and end of project reports, the following specific outputs are also required:

- Full set of tables, with cross breaks and derived variables agreed in advance. Cross breaks are likely to include the key variables used for sampling and stratification of the data, as well as by key demographics. Individual wave tables will be required as well as tables combining data from different waves into one overarching data set. Tables should be provided to BEIS in Excel format and follow GSS guidance on accessibility¹⁴.
- Excel data file (in .xlsx format) cleaned and clearly labelled, including agreed derived variables, including a dataset suitable for possible publication in the UK data archive.

Order Schedule 3 (Continuous Improvement)

1. Buyer's Rights

- 1.1 The Buyer and the Supplier recognise that, where specified in DPS Schedule 4 (DPS Management), the Buyer may give CCS the right to enforce the Buyer's rights under this Schedule.

2. Supplier's Obligations

- 2.1 The Supplier must, throughout the Contract Period, identify new or potential improvements to the provision of the Deliverables with a view to reducing the Buyer's costs (including the Charges) and/or improving the quality and efficiency of the Deliverables and their supply to the Buyer.
- 2.2 The Supplier must adopt a policy of continuous improvement in relation to the Deliverables, which must include regular reviews with the Buyer of the Deliverables and the way it provides them, with a view to reducing the Buyer's costs (including the Charges) and/or improving the quality and efficiency of the Deliverables. The Supplier and the Buyer must provide each other with any information relevant to meeting this objective.
- 2.3 In addition to Paragraph 2.1, the Supplier shall produce at the start of each Contract Year a plan for improving the provision of Deliverables and/or reducing the Charges (without adversely affecting the performance of this Contract) during that Contract Year ("**Continuous Improvement Plan**") for the Buyer's Approval. The Continuous Improvement Plan must include, as a minimum, proposals:
 - 2.3.1 identifying the emergence of relevant new and evolving technologies;
 - 2.3.2 changes in business processes of the Supplier or the Buyer and ways of working that would provide cost savings and/or enhanced benefits to the Buyer (such as methods of interaction, supply chain efficiencies, reduction in energy consumption and methods of sale);
 - 2.3.3 new or potential improvements to the provision of the Deliverables including the quality, responsiveness, procedures, benchmarking methods, likely performance mechanisms and customer support services in relation to the Deliverables; and
 - 2.3.4 measuring and reducing the sustainability impacts of the Supplier's operations and supply-chains relating to the Deliverables, and identifying opportunities to assist the Buyer in meeting their sustainability objectives.
- 2.4 The initial Continuous Improvement Plan for the first (1st) Contract Year shall be submitted by the Supplier to the Buyer for Approval within one hundred (100) Working Days of the first Order or six (6) Months following the Start Date, whichever is earlier.

Order Schedule 3 (Continuous Improvement)

Order Ref:

Crown Copyright 2021

- 2.5 The Buyer shall notify the Supplier of its Approval or rejection of the proposed Continuous Improvement Plan or any updates to it within twenty (20) Working Days of receipt. If it is rejected then the Supplier shall, within ten (10) Working Days of receipt of notice of rejection, submit a revised Continuous Improvement Plan reflecting the changes required. Once Approved, it becomes the Continuous Improvement Plan for the purposes of this Contract.
- 2.6 The Supplier must provide sufficient information with each suggested improvement to enable a decision on whether to implement it. The Supplier shall provide any further information as requested.
- 2.7 If the Buyer wishes to incorporate any improvement into this Contract, it must request a Variation in accordance with the Variation Procedure and the Supplier must implement such Variation at no additional cost to the Buyer or CCS.
- 2.8 Once the first Continuous Improvement Plan has been Approved in accordance with Paragraph 2.5:
 - 2.8.1 the Supplier shall use all reasonable endeavours to implement any agreed deliverables in accordance with the Continuous Improvement Plan; and
 - 2.8.2 the Parties agree to meet as soon as reasonably possible following the start of each quarter (or as otherwise agreed between the Parties) to review the Supplier's progress against the Continuous Improvement Plan.
- 2.9 The Supplier shall update the Continuous Improvement Plan as and when required but at least once every Contract Year (after the first (1st) Contract Year) in accordance with the procedure and timescales set out in Paragraph 2.3.
- 2.10 All costs relating to the compilation or updating of the Continuous Improvement Plan and the costs arising from any improvement made pursuant to it and the costs of implementing any improvement, shall have no effect on and are included in the Charges.
- 2.11 Should the Supplier's costs in providing the Deliverables to the Buyer be reduced as a result of any changes implemented, all of the cost savings shall be passed on to the Buyer by way of a consequential and immediate reduction in the Charges for the Deliverables.
- 2.12 At any time during the Contract Period of the Order Contract, the Supplier may make a proposal for gainshare. If the Buyer deems gainshare to be applicable then the Supplier shall update the Continuous Improvement Plan so as to include details of the way in which the proposal shall be implemented in accordance with an agreed gainshare ratio.

If the Supplier does not do this it will pay the Buyer's costs including repair or re-supply by a third party.

3.3 Services clauses

- 3.3.1 Late Delivery of the Services will be a Default of an Order Contract.
- 3.3.2 The Supplier must co-operate with the Buyer and third party suppliers on all aspects connected with the Delivery of the Services and ensure that Supplier Staff comply with any reasonable instructions.
- 3.3.3 The Supplier must at its own risk and expense provide all Supplier Equipment required to Deliver the Services.
- 3.3.4 The Supplier must allocate sufficient resources and appropriate expertise to each Contract.
- 3.3.5 The Supplier must take all reasonable care to ensure performance does not disrupt the Buyer's operations, employees or other contractors.

3.3.6 The Supplier must ensure all Services, and anything used to Deliver the Services, are of good quality and free from defects.

3.3.7 The Buyer is entitled to withhold payment for partially or undelivered Services, but doing so does not stop it from using its other rights under the Contract.

4. Pricing and payments

4.1 In exchange for the Deliverables, the Supplier must invoice the Buyer for the Charges in the Order Form.

4.2 CCS must invoice the Supplier for the Management Levy and the Supplier must pay it using the process in DPS Schedule 5 (Management Levy and Information).

4.3 All Charges and the Management Levy:

- (a) exclude VAT, which is payable on provision of a valid VAT invoice; and (b)
- include all costs connected with the Supply of Deliverables.

4.4 The Buyer must pay the Supplier the Charges within 30 days of receipt by the Buyer of a valid, undisputed invoice, in cleared funds using the payment method and details stated in the Order Form.

4.5 A Supplier invoice is only valid if it:

- (a) includes all appropriate references including the Contract reference number and other details reasonably requested by the Buyer;
- (b) includes a detailed breakdown of Delivered Deliverables and Milestone(s) (if any); and
- (c) does not include any Management Levy (the Supplier must not charge the Buyer in any way for the Management Levy).

4.6 The Buyer must accept and process for payment an undisputed Electronic Invoice received from the Supplier.

4.7 The Buyer may retain or set-off payment of any amount owed to it by the Supplier if notice and reasons are provided.

4.8 The Supplier must ensure that all Subcontractors are paid, in full, within 30 days of receipt of a valid, undisputed invoice. If this does not happen, CCS or the Buyer can publish the details of the late payment or non-payment.

4.9 If CCS or the Buyer can get more favourable commercial terms for the supply at cost of any materials, goods or services used by the Supplier to provide the Deliverables, then CCS or the Buyer may require

the Supplier to replace its existing commercial terms with the more favourable terms offered for the relevant items.

4.10 If CCS or the Buyer uses Clause 4.9 then the DPS Pricing (and where applicable, the Charges) must be reduced by an agreed amount by using the Variation Procedure.

4.11 The Supplier has no right of set-off, counterclaim, discount or abatement unless they are ordered to do so by a court.

5. The buyer's obligations to the supplier

5.1 If Supplier Non-Performance arises from an Authority Cause:

- (a) neither CCS or the Buyer can terminate a Contract under Clause 10.4.1;
- (b) the Supplier is entitled to reasonable and proven additional expenses and to relief from liability and Deduction under this Contract;
- (c) the Supplier is entitled to additional time needed to make the Delivery; and (d) the Supplier cannot suspend the ongoing supply of Deliverables.

5.2 Clause 5.1 only applies if the Supplier:

- (a) gives notice to the Party responsible for the Authority Cause within 10 Working Days of becoming aware;
- (b) demonstrates that the Supplier Non-Performance would not have occurred but for the Authority Cause; and
- (c) mitigated the impact of the Authority Cause.

6. Record keeping and reporting

6.1 The Supplier must attend Progress Meetings with the Buyer and provide Progress Reports when specified in the Order Form.

6.2 The Supplier must keep and maintain full and accurate records and accounts on everything to do with the Contract:

- (a) during the Contract Period;
- (b) for 7 years after the End Date; and (c) in accordance with UK GDPR, including but not limited to the records and accounts stated in the definition of Audit in Joint Schedule 1.

6.3 The Relevant Authority or an Auditor can Audit the Supplier.

6.4 During an Audit, the Supplier must:

- (a) allow the Relevant Authority or any Auditor access to their premises to verify all contract accounts and records of everything to do with the Contract and provide copies for an Audit; and
- (b) provide information to the Relevant Authority or to the Auditor and reasonable co-operation at their request.

6.5 Where the Audit of the Supplier is carried out by an Auditor, the Auditor shall be entitled to share any information obtained during the Audit with the Relevant Authority.

6.6 If the Supplier is not providing any of the Deliverables, or is unable to provide them, it must immediately:

- (a) tell the Relevant Authority and give reasons;
- (b) propose corrective action; and
- (c) provide a deadline for completing the corrective action.

6.7 The Supplier must provide CCS with a Self Audit Certificate supported by an audit report at the end of each Contract Year. The report must contain:

- (a) the methodology of the review;
- (b) the sampling techniques applied; (c) details of any issues; and (d) any remedial action taken.

6.8 The Self Audit Certificate must be completed and signed by an auditor or senior member of the Supplier's management team that is qualified in either a relevant audit or financial discipline.

7. Supplier staff

7.1 The Supplier Staff involved in the performance of each Contract must:

- (a) be appropriately trained and qualified;
- (b) be vetted using Good Industry Practice and the Security Policy; and
- (c) comply with all conduct requirements when on the Buyer's Premises.

7.2 Where a Buyer decides one of the Supplier's Staff is not suitable to work on a contract, the Supplier must replace them with a suitably qualified alternative.

7.3 If requested, the Supplier must replace any person whose acts or omissions have caused the Supplier to breach Clause 27.

- 7.4 The Supplier must provide a list of Supplier Staff needing to access the Buyer's Premises and say why access is required.
- 7.5 The Supplier indemnifies CCS and the Buyer against all claims brought by any person employed by the Supplier caused by an act or omission of the Supplier or any Supplier Staff.

8. Rights and protection

8.1 The Supplier warrants and represents that:

- (a) it has full capacity and authority to enter into and to perform each Contract;
- (b) each Contract is executed by its authorised representative;
- (c) it is a legally valid and existing organisation incorporated in the place it was formed;
- (d) there are no known legal or regulatory actions or investigations before any court, administrative body or arbitration tribunal pending or threatened against it or its Affiliates that might affect its ability to perform each Contract;
- (e) it maintains all necessary rights, authorisations, licences and consents to perform its obligations under each Contract;
- (f) it does not have any contractual obligations which are likely to have a material adverse effect on its ability to perform each Contract;
- (g) it is not impacted by an Insolvency Event; and (h) it will comply with each Order Contract.

8.2 The warranties and representations in Clauses 2.10 and 8.1 are repeated each time the Supplier provides Deliverables under the Contract.

8.3 The Supplier indemnifies both CCS and every Buyer against each of the following:

- (a) wilful misconduct of the Supplier, Subcontractor and Supplier Staff that impacts the Contract; and (b) non-payment by the Supplier of any Tax or National Insurance.

8.4 All claims indemnified under this Contract must use Clause 26.

8.5 The description of any provision of this Contract as a warranty does not prevent CCS or a Buyer from exercising any termination right that it may have for breach of that clause by the Supplier.

8.6 If the Supplier becomes aware of a representation or warranty that becomes untrue or misleading, it must immediately notify CCS and every Buyer.

8.7 All third party warranties and indemnities covering the Deliverables must be assigned for the Buyer's benefit by the Supplier.

9. Intellectual Property Rights (IPRs)

- 9.1 Each Party keeps ownership of its own Existing IPRs. The Supplier gives the Buyer a non-exclusive, perpetual, royalty-free, irrevocable, transferable worldwide licence to use, change and sub-license the Supplier's Existing IPR to enable it to both:
- (a) receive and use the Deliverables; and
 - (b) make use of the deliverables provided by a Replacement Supplier.
- 9.2 Any New IPR created under a Contract is owned by the Buyer. The Buyer gives the Supplier a licence to use any Existing IPRs and New IPRs for the purpose of fulfilling its obligations during the Contract Period.
- 9.3 Where a Party acquires ownership of IPRs incorrectly under this Contract it must do everything reasonably necessary to complete a transfer assigning them in writing to the other Party on request and at its own cost.
- 9.4 Neither Party has the right to use the other Party's IPRs, including any use of the other Party's names, logos or trademarks, except as provided in Clause 9 or otherwise agreed in writing.
- 9.5 If there is an IPR Claim, the Supplier indemnifies CCS and each Buyer against all losses, damages, costs or expenses (including professional fees and fines) incurred as a result.
- 9.6 If an IPR Claim is made or anticipated the Supplier must at its own expense and the Buyer's sole option, either:
- (a) obtain for CCS and the Buyer the rights in Clause 9.1 and 9.2 without infringing any third party IPR; or
 - (b) replace or modify the relevant item with substitutes that do not infringe IPR without adversely affecting the functionality or performance of the Deliverables.
- 9.7 In spite of any other provisions of a Contract and for the avoidance of doubt, award of a Contract by the Buyer and placement of any contract task under it does not constitute an authorisation by the Crown under Sections 55 and 56 of the Patents Act 1977 or Section 12 of the Registered Designs Act 1949. The Supplier acknowledges that any authorisation by the Buyer under its statutory powers must be expressly provided in writing, with reference to the acts authorised and the specific IPR involved.

10. Ending the contract or any subcontract

10.1 Contract Period

- 10.1.1 The Contract takes effect on the Start Date and ends on the End Date or earlier if required by Law.

10.1.2 The Relevant Authority can extend the Contract for the Extension Period by giving the Supplier no less than 3 Months' written notice before the Contract expires.

10.2 Ending the contract without a reason

10.2.1 CCS has the right to terminate the DPS Contract at any time without reason by giving the Supplier at least 30 days' notice.

10.2.2 Each Buyer has the right to terminate their Order Contract at any time without reason by giving the Supplier not less than 90 days' written notice.

10.3 Rectification plan process

10.3.1 If there is a Default, the Relevant Authority may, without limiting its other rights, request that the Supplier provide a Rectification Plan.

10.3.2 When the Relevant Authority receives a requested Rectification Plan it can either:

- (a) reject the Rectification Plan or revised Rectification Plan, giving reasons; or
- (b) accept the Rectification Plan or revised Rectification Plan (without limiting its rights) and the Supplier must immediately start work on the actions in the Rectification Plan at its own cost, unless agreed otherwise by the Parties.

10.3.3 Where the Rectification Plan or revised Rectification Plan is rejected, the Relevant Authority:

- (a) must give reasonable grounds for its decision; and
- (b) may request that the Supplier provides a revised Rectification Plan within 5 Working Days.

10.3.4 If the Relevant Authority rejects any Rectification Plan, including any revised Rectification Plan, the Relevant Authority does not have to request a revised Rectification Plan before exercising its right to terminate its Contract under Clause 10.4.3(a).

10.4 When CCS or the buyer can end a contract

10.4.1 If any of the following events happen, the Relevant Authority has the right to immediately terminate its Contract by issuing a Termination Notice to the Supplier:

- (a) there is a Supplier Insolvency Event;
- (b) there is a Default that is not corrected in line with an accepted Rectification Plan;
- (c) the Supplier does not provide a Rectification Plan within 10 days of the request;
- (d) there is any material Default of the Contract;
- (e) there is any material Default of any Joint Controller Agreement relating to any Contract;

Core Terms - DPS

- (f) there is a Default of Clauses 2.10, 9, 14, 15, 27, 32 or DPS Schedule 9 (Cyber Essentials) (where applicable) relating to any Contract;
- (g) there is a consistent repeated failure to meet the Performance Indicators in DPS Schedule 4 (DPS Management);
- (h) there is a Change of Control of the Supplier which is not pre-approved by the Relevant Authority in writing;
- (i) if the Relevant Authority discovers that the Supplier was in one of the situations in 57 (1) or 57(2) of the Regulations at the time the Contract was awarded; or
- (j) the Supplier or its Affiliates embarrass or bring CCS or the Buyer into disrepute or diminish the public trust in them.

10.4.2 CCS may terminate the DPS Contract if a Buyer terminates an Order Contract for any of the reasons listed in Clause 10.4.1.

10.4.3 If any of the following non-fault based events happen, the Relevant Authority has the right to immediately terminate its Contract by issuing a Termination Notice to the Supplier:

- (a) the Relevant Authority rejects a Rectification Plan;
- (b) there is a Variation which cannot be agreed using Clause 24 (Changing the contract) or resolved using Clause 34 (Resolving disputes);
- (c) if there is a declaration of ineffectiveness in respect of any Variation; or (d) any of the events in 73 (1) (a) or (c) of the Regulations happen.

10.5 When the supplier can end the contract

The Supplier can issue a Reminder Notice if the Buyer does not pay an undisputed invoice on time. The Supplier can terminate an Order Contract if the Buyer fails to pay an undisputed invoiced sum due and worth over 10% of the annual Contract Value within 30 days of the date of the Reminder Notice.

10.6 What happens if the contract ends

10.6.1 Where a Party terminates a Contract under any of Clauses 10.2.1, 10.2.2, 10.4.1, 10.4.2, 10.4.3, 10.5 or 20.2 or a Contract expires all of the following apply:

- (a) The Buyer's payment obligations under the terminated Contract stop immediately.
- (b) Accumulated rights of the Parties are not affected.
- (c) The Supplier must promptly repay to the Buyer any and all Charges the Buyer has paid in advance in respect of Deliverables not provided by the Supplier as at the End Date.
- (d) The Supplier must promptly delete or return the Government Data except where required to retain copies by Law.
- (e) The Supplier must promptly return any of CCS or the Buyer's property provided under the terminated Contract.

Core Terms - DPS

- (f) The Supplier must, at no cost to CCS or the Buyer, co-operate fully in the handover and reprocurement (including to a Replacement Supplier).

10.6.2 In addition to the consequences of termination listed in Clause 10.6.1, where the Relevant Authority terminates a Contract under Clause 10.4.1 the Supplier is also responsible for the Relevant Authority's reasonable costs of procuring Replacement Deliverables for the rest of the Contract Period.

10.6.3 In addition to the consequences of termination listed in Clause 10.6.1, if either the Relevant Authority terminates a Contract under Clause 10.2.1 or 10.2.2 or a Supplier terminates an Order Contract under Clause 10.5:

- (a) the Buyer must promptly pay all outstanding Charges incurred to the Supplier; and
- (b) the Buyer must pay the Supplier reasonable committed and unavoidable Losses as long as the Supplier provides a fully itemised and costed schedule with evidence - the maximum value of this payment is limited to the total sum payable to the Supplier if the Contract had not been terminated.

10.6.4 In addition to the consequences of termination listed in Clause 10.6.1, where a Party terminates under Clause 20.2 each Party must cover its own Losses.

10.6.5 The following Clauses survive the termination or expiry of each Contract: 3.2.10, 4.2, 6, 7.5, 9, 11, 12.2, 14, 15, 16, 17, 18, 31.3, 34, 35 and any Clauses and Schedules which are expressly or by implication intended to continue.

10.7 Partially ending and suspending the contract

10.7.1 Where CCS has the right to terminate the DPS Contract it can suspend the Supplier's ability to accept Orders (for any period) and the Supplier cannot enter into any new Order Contracts during this period. If this happens, the Supplier must still meet its obligations under any existing Order Contracts that have already been signed.

10.7.2 Where CCS has the right to terminate a DPS Contract it is entitled to terminate all or part of it.

10.7.3 Where the Buyer has the right to terminate an Order Contract it can terminate or suspend (for any period), all or part of it. If the Buyer suspends a Contract it can provide the Deliverables itself or buy them from a third party.

10.7.4 The Relevant Authority can only partially terminate or suspend a Contract if the remaining parts of that Contract can still be used to effectively deliver the intended purpose.

10.7.5 The Parties must agree any necessary Variation required by Clause 10.7 using the Variation Procedure, but the Supplier may not either:

- (a) reject the Variation; or
- (b) increase the Charges, except where the right to partial termination is under Clause 10.2.

10.7.6 The Buyer can still use other rights available, or subsequently available to it if it acts on its rights under Clause 10.7.

10.8 When subcontracts can be ended

At the Buyer's request, the Supplier must terminate any Subcontracts in any of the following events:

- (a) there is a Change of Control of a Subcontractor which is not pre-approved by the Relevant Authority in writing;
- (b) the acts or omissions of the Subcontractor have caused or materially contributed to a right of termination under Clause 10.4; or
- (c) a Subcontractor or its Affiliates embarrasses or brings into disrepute or diminishes the public trust in the Relevant Authority.

11. How much you can be held responsible for

11.1 Each Party's total aggregate liability in each Contract Year under this DPS Contract (whether in tort, contract or otherwise) is no more than £1,000,000.

11.2 Each Party's total aggregate liability in each Contract Year under each Order Contract (whether in tort, contract or otherwise) is no more than one hundred and twenty five percent (125%) of the Estimated Yearly Charges unless specified in the Order Form.

11.3 No Party is liable to the other for:

- (a) any indirect Losses; or
- (b) Loss of profits, turnover, savings, business opportunities or damage to goodwill (in each case whether direct or indirect).

- 11.5 In spite of Clauses 11.1 and 11.2, the Supplier does not limit or exclude its liability for any indemnity given under Clauses 7.5, 8.3(b), 9.5, 31.3 or Order Schedule 2 (Staff Transfer) of a Contract.
- 11.6 In spite of Clauses 11.1, 11.2 but subject to Clauses 11.3 and 11.4, the Supplier's aggregate liability in each and any Contract Year under each Contract under Clause 14.8 shall in no event exceed the Data Protection Liability Cap.
- 11.7 Each Party must use all reasonable endeavours to mitigate any Loss or damage which it suffers under or in connection with each Contract, including any indemnities.
- 11.8 When calculating the Supplier's liability under Clause 11.1 or 11.2 the following items will not be taken into consideration:
- (a) Deductions; and
 - (b) any items specified in Clauses 11.5 or 11.6.
- 11.9 If more than one Supplier is party to a Contract, each Supplier Party is jointly and severally liable for their obligations under that Contract.

- 12.1 The Supplier must use reasonable endeavours to comply with the provisions of Joint Schedule 5 (Corporate Social Responsibility).
- 12.2 To the extent that it arises as a result of a Default by the Supplier, the Supplier indemnifies the Relevant Authority against any fine or penalty incurred by the Relevant Authority pursuant to Law and any costs incurred by the Relevant Authority in defending any proceedings which result in such fine or penalty.
- 12.3 The Supplier must appoint a Compliance Officer who must be responsible for ensuring that the Supplier complies with Law, Clause 12.1 and Clauses 27 to 32.

13. Insurance

The Supplier must, at its own cost, obtain and maintain the Required Insurances in Joint Schedule 3 (Insurance Requirements) and any Additional Insurances in the Order Form.

14. Data protection

- 14.1 The Supplier must process Personal Data and ensure that Supplier Staff process Personal Data only in accordance with Joint Schedule 11 (Processing Data).
- 14.2 The Supplier must not remove any ownership or security notices in or relating to the Government Data.

- 14.3 The Supplier must make accessible back-ups of all Government Data, stored in an agreed off-site location and send the Buyer copies every 6 Months.
- 14.4 The Supplier must ensure that any Supplier system holding any Government Data, including back-up data, is a secure system that complies with the Security Policy and any applicable Security Management Plan.
- 14.5 If at any time the Supplier suspects or has reason to believe that the Government Data provided under a Contract is corrupted, lost or sufficiently degraded, then the Supplier must notify the Relevant Authority and immediately suggest remedial action.
- 14.6 If the Government Data is corrupted, lost or sufficiently degraded so as to be unusable the Relevant Authority may either or both:
- (a) tell the Supplier to restore or get restored Government Data as soon as practical but no later than 5 Working Days from the date that the Relevant Authority receives notice, or the Supplier finds out about the issue, whichever is earlier; and/or
 - (b) restore the Government Data itself or using a third party.
- 14.7 The Supplier must pay each Party's reasonable costs of complying with Clause 14.6 unless CCS or the Buyer is at fault.
- 14.8 The Supplier:
- (a) must provide the Relevant Authority with all Government Data in an agreed open format within 10 Working Days of a written request;
 - (b) must have documented processes to guarantee prompt availability of Government Data if the Supplier stops trading;
 - (c) must securely destroy all Storage Media that has held Government Data at the end of life of that media using Good Industry Practice;

 - (e) indemnifies CCS and each Buyer against any and all Losses incurred if the Supplier breaches Clause 14 and any Data Protection Legislation.

15. What you must keep confidential

15.1 Each Party must:

- (a) keep all Confidential Information it receives confidential and secure;

Core Terms - DPS

- (b) except as expressly set out in the Contract at Clauses 15.2 to 15.4 or elsewhere in the Contract, not disclose, use or exploit the Disclosing Party's Confidential Information without the Disclosing Party's prior written consent; and
- (c) immediately notify the Disclosing Party if it suspects unauthorised access, copying, use or disclosure of the Confidential Information.

15.2 In spite of Clause 15.1, a Party may disclose Confidential Information which it receives from the Disclosing Party in any of the following instances:

- (a) where disclosure is required by applicable Law or by a court with the relevant jurisdiction if, to the extent not prohibited by Law, the Recipient Party notifies the Disclosing Party of the full circumstances, the affected Confidential Information and extent of the disclosure;
- (b) if the Recipient Party already had the information without obligation of confidentiality before it was disclosed by the Disclosing Party;
- (c) if the information was given to it by a third party without obligation of confidentiality;
- (d) if the information was in the public domain at the time of the disclosure;
- (e) if the information was independently developed without access to the Disclosing Party's Confidential Information;
- (f) on a confidential basis, to its auditors;
- (g) on a confidential basis, to its professional advisers on a need-to-know basis; or
- (h) to the Serious Fraud Office where the Recipient Party has reasonable grounds to believe that the Disclosing Party is involved in activity that may be a criminal offence under the Bribery Act 2010.

15.3 In spite of Clause 15.1, the Supplier may disclose Confidential Information on a confidential basis to Supplier Staff on a need-to-know basis to allow the Supplier to meet its obligations under the Contract. The Supplier Staff must enter into a direct confidentiality agreement with the Relevant Authority at its request.

15.4 In spite of Clause 15.1, CCS or the Buyer may disclose Confidential Information in any of the following cases:

- (a) on a confidential basis to the employees, agents, consultants and contractors of CCS or the Buyer;
- (b) on a confidential basis to any other Central Government Body, any successor body to a Central Government Body or any company that CCS or the Buyer transfers or proposes to transfer all or any part of its business to;
- (c) if CCS or the Buyer (acting reasonably) considers disclosure necessary or appropriate to carry out its public functions;
- (d) where requested by Parliament; or (e) under Clauses 4.7 and 16.

- 15.5 For the purposes of Clauses 15.2 to 15.4 references to disclosure on a confidential basis means disclosure under a confidentiality agreement or arrangement including terms as strict as those required in Clause 15.
- 15.6 Transparency Information is not Confidential Information.
- 15.7 The Supplier must not make any press announcement or publicise the Contracts or any part of them in any way, without the prior written consent of the Relevant Authority and must take all reasonable steps to ensure that Supplier Staff do not either.

16. When you can share information

- 16.1 The Supplier must tell the Relevant Authority within 48 hours if it receives a Request For Information.
- 16.2 Within five (5) Working Days of the Buyer's request the Supplier must give CCS and each Buyer full cooperation and information needed so the Buyer can:
- (a) publish the Transparency Information;
 - (b) comply with any Freedom of Information Act (FOIA) request; and/or (c) comply with any Environmental Information Regulations (EIR) request.
- 16.3 The Relevant Authority may talk to the Supplier to help it decide whether to publish information under Clause 16. However, the extent, content and format of the disclosure is the Relevant Authority's decision in its absolute discretion.

17. Invalid parts of the contract

If any part of a Contract is prohibited by Law or judged by a court to be unlawful, void or unenforceable, it must be read as if it was removed from that Contract as much as required and rendered ineffective as far as possible without affecting the rest of the Contract, whether it is valid or enforceable.

18. No other terms apply

The provisions incorporated into each Contract are the entire agreement between the Parties. The Contract replaces all previous statements, agreements and any course of dealings made between the Parties, whether written or oral, in relation to its subject matter. No other provisions apply.

19. Other people's rights in a contract

No third parties may use the Contracts (Rights of Third Parties) Act 1999 (CRTPA) to enforce any term of the Contract unless stated (referring to CRTPA) in the Contract. This does not affect third party rights and remedies that exist independently from CRTPA.

20. Circumstances beyond your control

20.1 Any Party affected by a Force Majeure Event is excused from performing its obligations under a Contract while the inability to perform continues, if it both:

- (a) provides a Force Majeure Notice to the other Party; and
- (b) uses all reasonable measures practical to reduce the impact of the Force Majeure Event.

20.2 Either Party can partially or fully terminate the affected Contract if the provision of the Deliverables is materially affected by a Force Majeure Event which lasts for 90 days continuously.

21. Relationships created by the contract

No Contract creates a partnership, joint venture or employment relationship. The Supplier must represent themselves accordingly and ensure others do so.

22. Giving up contract rights

A partial or full waiver or relaxation of the terms of a Contract is only valid if it is stated to be a waiver in writing to the other Party.

23. Transferring responsibilities

23.1 The Supplier cannot assign, novate or transfer a Contract or any part of a Contract without the Relevant Authority's written consent.

23.2 The Relevant Authority can assign, novate or transfer its Contract or any part of it to any Central Government Body, public or private sector body which performs the functions of the Relevant Authority.

23.3 When CCS or the Buyer uses its rights under Clause 23.2 the Supplier must enter into a novation agreement in the form that CCS or the Buyer specifies.

23.4 The Supplier can terminate a Contract novated under Clause 23.2 to a private sector body that is experiencing an Insolvency Event.

23.5 The Supplier remains responsible for all acts and omissions of the Supplier Staff as if they were its own.

23.6 If CCS or the Buyer asks the Supplier for details about Subcontractors, the Supplier must provide details of Subcontractors at all levels of the supply chain including:

- (a) their name;
- (b) the scope of their appointment; and
- (c) the duration of their appointment.

24. Changing the contract

24.1 Either Party can request a Variation which is only effective if agreed in writing and signed by both Parties.

24.2 The Supplier must provide an Impact Assessment either:

- (a) with the Variation Form, where the Supplier requests the Variation; or
- (b) within the time limits included in a Variation Form requested by CCS or the Buyer.

24.3 If the Variation cannot be agreed or resolved by the Parties, CCS or the Buyer can either:

- (a) agree that the Contract continues without the Variation; or
- (b) terminate the affected Contract, unless in the case of an Order Contract, the Supplier has already provided part or all of the provision of the Deliverables, or where the Supplier can show evidence of substantial work being carried out to provide them; or
- (c) refer the Dispute to be resolved using Clause 34 (Resolving Disputes).

24.4 CCS and the Buyer are not required to accept a Variation request made by the Supplier.

24.5 If there is a General Change in Law, the Supplier must bear the risk of the change and is not entitled to ask for an increase to the DPS Pricing or the Charges.

24.6 If there is a Specific Change in Law or one is likely to happen during the Contract Period the Supplier must give CCS and the Buyer notice of the likely effects of the changes as soon as reasonably practical. They must also say if they think any Variation is needed either to the Deliverables, DPS Pricing or a Contract and provide evidence:

- (a) that the Supplier has kept costs as low as possible, including in Subcontractor costs; and
- (b) of how it has affected the Supplier's costs.

24.7 Any change in the DPS Pricing or relief from the Supplier's obligations because of a Specific Change in Law must be implemented using Clauses 24.1 to 24.4.

24.8 For 101(5) of the Regulations, if the Court declares any Variation ineffective, the Parties agree that their mutual rights and obligations will be regulated by the terms of the Contract as they existed immediately prior to that Variation and as if the Parties had never entered into that Variation.

25. How to communicate about the contract

- 25.1 All notices under the Contract must be in writing and are considered effective on the Working Day of delivery as long as they are delivered before 5:00pm on a Working Day. Otherwise the notice is effective on the next Working Day. An email is effective at 9:00am on the first Working Day after sending unless an error message is received.
- 25.2 Notices to CCS must be sent to the CCS Authorised Representative's address or email address indicated on the Platform.
