Note concerning the provision of a Site Waste Management Plan

June 2021

It will be the responsibility of the applicant and principal contractor to ensure that a site waste management plan is in place before construction begins and to ensure that it is enforced.

A SWMP will be prepared, updated and implemented in accordance with the Site Waste Management Plans Regulations 2008.

The applicant suggests that an appropriate planning condition is the way forward so that a project and site-specific SWMP can be prepared when a principal contractor has been appointed.
