Schedule 2 (Specification)

GENERAL INTRODUCTION

The Food Standards Agency is an independent Government department working across England, Wales and Northern Ireland to protect public health and consumers wider interest in food. We make sure food is safe and what it says it is.

The FSA mission and vision are:

- Food is safe
- Food is what it says it is
- Consumers can make informed choices about what to eat
- Consumers have access to an affordable diet, now and in the future

The Agency is committed to openness, transparency and equality of treatment to all suppliers. As well as these principles, for science projects the final project report will be published on the Food Standards Agency website (www.food.gov.uk). For science projects we will encourage contractors to publish their work in peer reviewed scientific publications wherever possible. Also, in line with the Government's Transparency Agenda which aims to encourage more open access to data held by government, the Agency is developing a policy on the release of underpinning data from all of its science- and evidence-gathering projects. Data should be made freely available in an accessible format, as fully and as promptly as possible. Consideration should be given to data management as new contracts are being negotiated. Resource implications for this should be taken into account. The mechanism for publishing underpinning data should allow the widest opportunity for to enable its re-use. Where possible, underpinning data should be included in the final project report. Where data are included in the final report in pdf format, they should also be published separately in a format that can be used for further analysis. Large data sets can be provided separately in an annex to the report, and published, where possible, alongside the final report online. Where it is more appropriate to publish underpinning data in an existing database, archive, repository or other community resource, or for data to be saved in a specialist proprietary format, information will be provided on how the data can be accessed. There will be some circumstances where release of data may need to be restricted or anonymised for reasons of commercial and/or personal sensitivities.

This work is being commissioned under the FSA Area of Research Interest 9: Emerging Challenges and Opportunities. This research programme is intended to support the FSA by ensuring that the FSA understands its current and potential future operating environment, and is able to identify and respond to any challenges and opportunities in fulfilling its mission.

THE SPECIFICATION

Background

The FSA has undertaken a range of horizon scanning and foresight activities in the past, but has recently consolidated this activity within a Strategic Insights Team (SIT) in the Analytics Unit of the Science, Evidence, and Research Directorate (SERD). The SIT acts as an all-source assessment cell, providing situational awareness, and identifying opportunities and challenges from the current and future operating environment to the achievement of the FSA mission. The team works hand in hand with the Strategy Unit and other areas of the FSA to help identify responses and policy options.

We are looking to form a strategic partnership with an organisation or consortium that might provide us with well-evidenced insights and resources to help colleagues in the FSA and otherwise think more about the whole food system.

The food system is a complex web of activities and actors. We are increasingly encouraged to think of food as a system but most of our processes do not yet look at it as such. The legal requirement is for businesses to only need know of one-up-one-down (one supplier up the chain, and one customer down). Incident root cause analysis is often relatively linear and limited. Impact analysis across the system is not immediately thought of by policymakers. The risk of continuing is that we will continue to encounter unforeseen events and unforeseen effects for which we are unprepared to respond.

We would like to build on and translate the increasing body of academic work, particularly the work now emerging from the Global Food Security programme, as well as tap into knowledge from industry and other stakeholders (e.g. GS1, IFST), to develop optimised resources and materials which will help our own decisionmakers think more about food as a system, and that will be useful and used. The intention is to enable better root cause analysis for incidents and other operational issues, better impact modelling for policy, and better situational awareness for strategy.

Meanwhile we are also increasingly asked to provide insights at short notice on emerging risks and opportunities (e.g. on staffing shortages in food) and lose much time in ad hoc procurement of evidence reviews.

Our proposed way to do this better is to develop a strategic partnership with a centre of excellence and support a programme of work with a leading university or consortium already involved in this space, including co-funding, if possible, a GFS/ESRC fellowship as well as co-ordination of input from experts and delivery of rapid evidence reviews.

Overview

Tenders are invited to propose a partnership which meets the requirements below:

Requirements

1. Development and delivery of a toolkit for policymakers working in the food system – this might include accessible digital resources fit for publication and a plan for their adoption, embedding and on-going use, (e.g. a series of workshops, with training for FSA staff to deliver it to others and drawing on the latest evidence on how to optimise insights for policymakers) by 1 January 2022.

2. Delivery of up to five evidence reviews for policymakers, to a standard fit for peer review and publication on a range of topics, for example:
 - Systemic vulnerabilities (by 1 January 2022, detailed brief to be issued)
 - Modelling the impact of trends, policy directions and sudden events on the food system (tbc)
3. Provision of ad hoc policy advice on emerging issues from a food systems perspective, for example provision of up to four short briefings each financial year on specific topics delivered within 4 weeks of initial request, attending up to four meetings per financial year to contribute expertise to FSA thinking.
4. Co-funding of an 18-month post-doctoral ESRC fellowship (October 2021 to March 2023) to explore system vulnerability, risk and resilience, drawing on a broad range of expertise to support delivery of the above, embedded for at least three days a week in the FSA team to ensure knowledge exchange.

Openness:

FSA has values and specific policy on being open and transparent, which includes publishing the full dataset of its research and surveillance studies. Both the lead contractor and their sub-contractors must agree to this openness policy. Any potential issues with this should be highlighted within the proposals.

General Data Protection Regulation (GDPR):

Tenderers should also note that the EU's General Data Protection Regulation (GDPR) was introduced in the UK from the 25th of May 2018. Tenderers are therefore asked to consider what additional measures may need to be taken in order to comply with the new regulatory regime for data protection and to include in their proposals an explanation of how they intend to implement these measures.

In particular, the processor (the lead contractor) must:

- process the personal data only on the documented instructions of the Controller (the FSA);
- comply with security obligations equivalent to those imposed on the Controller (implementing a level of security for the personal data appropriate to the risk);
- ensure that persons authorised to process the personal data have committed themselves to confidentiality or are under an appropriate statutory obligation of confidentiality;
- only appoint Sub-processors (any sub-contractors) with the Controller's prior specific or general written authorisation, and impose the same minimum terms imposed on it on the Sub-processor; and the original Processor will remain liable to the Controller for the Sub-processor's compliance. The Sub-processor must provide sufficient guarantees to implement appropriate technical and organisational measures to demonstrate compliance. In the case of general

written authorisation, Processors must inform Controllers of intended changes in their Sub-processor arrangements;

- make available to the Controller all information necessary to demonstrate compliance with the obligations laid down in Article 28 GDPR and allow for and contribute to audits, including inspections, conducted by the Controller or another auditor mandated by the Controller - and the Processor shall immediately inform the controller if, in its opinion, an instruction infringes GDPR or other EU or member state data protection provisions;
- assist the Controller in carrying out its obligations with regard to requests by data subjects to exercise their rights under chapter III of the GDPR, noting different rights may apply depending on the specific legal basis for the processing activity (and should be clarified by the Controller up-front);
- assist the Controller in ensuring compliance with the obligations to implementing a level of security for the personal data appropriate to the risk, taking into account the nature of processing and the information available to the Processor;
- assist the Controller in ensuring compliance with the obligations to carry out Data Protection Impact Assessments, taking into account the nature of processing and the information available to the Processor; and
- notify the Controller without undue delay after becoming aware of a personal data breach.

At this moment in time, the FSA does not envisage the need to collect any personal data as part of this study.

1: TENDER SUMMARY AND OBJECTIVES

A. TENDER SUMMARY

Please give a brief summary of the proposed work in no more than 400 words.

The UK food system faces multiple challenges. Poor diets are contributing to obesity and related health problems, and unsustainable production is driving biodiversity loss, soil degradation, pollution, water scarcity and climate change in both the UK and overseas. Meanwhile, stresses and shocks including climate change, COVID-19 and EU-exit have highlighted the need for enhanced foresight and greater food system resilience. It is clear that transformational change is needed, but this must balance with complex trade-offs and competing needs and interests across the food system, especially as food is the biggest manufacturing sector in the UK with an annual turnover of £105b. To this end there is a need to better understand the relationships within the food system between the activities and the drivers that influence the people undertaking them, and the outcomes of these activities for health, food safety, environment and enterprise, and feedbacks to the drivers.

To this end, we will couple the latest food system understanding with emerging foresight capability to undertake the new analyses needed to synthesise existing food system and foresight knowledge, distil key messages and derive new insights for policy and practice

on how to enhance food system resilience and safety to shocks and stresses. These will cover issues such as emerging threats and risks, barriers and opportunities for change and synergies. In addition to building on latest research in general, we will undertake food systems mapping (e.g. actor maps, causal loop diagrams, rich pictures), and futures analysis (e.g. scenarios, wind-tunnelling, backcasting) to identify trade-offs and synergies. We will draw on insights from a range of Oxford-led work: new approaches to foresight from the [Foresight4Food](#) programme, new concepts for enhancing food system resilience emerging from the GFS [Resilience of the UK Food System](#) programme and new ideas from the [Food System Impact Valuation Initiative](#). We will also draw on early findings from the GFS [Transforming the UK Food System](#) programme (via GFS project 'FixOurFood' and other York/N8 links). We will also underpin the work by delivering CPD training in food systems thinking, practice and competence based on the Oxford-led [Interdisciplinary Food Systems Teaching and Learning](#) programme.

A consortium comprising the Food Systems Transformation Research Group in ECI Oxford and the [AgriFood](#) Research Group at the University of York Management School (part of N8) will be ideally positioned to provide the optimum combination of skills and networks to deliver the necessary food system toolkits, training, evidence reviews and futures work.

B. OBJECTIVES AND RELEVANCE OF THE PROPOSED WORK TO THE FSA TENDER REQUIREMENT

2: DESCRIPTION OF APPROACH/SCOPE OF WORK

A. APPROACH/SCOPE OF WORK

Please describe how you will meet our specification and summarise how you will deliver your solution. You must explain the approach for the proposed work. Describe and justify the approach, methodology and study design, where applicable, that will be used to

address the specific requirements and realise the objectives outlined above. Where relevant (e.g. for an analytical survey), please also provide details of the sampling plan.

The tender specification calls for three main areas of work:

1. Development and delivery of a toolkit for policymakers working in the food system.
2. Delivery of up to five evidence reviews for policymakers.
3. Provision of ad hoc policy advice on emerging issues from a food systems perspective.

- 1. Development and delivery of a toolkit for policymakers working in the food system.** A toolkit will be developed which includes a range of types of information and approaches.

- 1.1 Drawing on experience from building the [Foresight4Food Resources Portal](#), we will assemble key food system papers and reports and classify them in terms of food system drivers, activities, and outcomes.
- 1.2 We will convene a short set of workshops based on the IFSTAL CPD course materials to introduce food systems concepts and the value of taking a food systems approach to policy formulation. These workshops will provide a chance to discuss current issues with FSA staff and offer 'systems thinking' awareness and competence. We will also train FSA staff in food systems mapping (e.g. actor maps, causal loop diagrams, rich pictures), futures analysis (e.g. scenarios, backcasting), identifying trade-offs and synergies, and predictive modelling.
- 1.3 We will also set-up an innovative 'Systems Surgery' approach where on a regular set time FSA staff can bring a particular food safety systems challenge to a safe surgery space to discuss with this expert group. This will identify then the most appropriate systems approach to tackling the issues presented. The surgeries will also provide an opportunity for the co-production of systems maps and/or complex networks with FSA staff, providing a useful visual aid to the understanding of systemic vulnerabilities.

- 2. Delivery of up to five evidence reviews for policymakers.**

- 2.1 We will deliver up to five evidence reviews. The first on Systemic Vulnerabilities (by 1 January 2022) will draw specifically on outcomes from the 'GFS-Resilience of the UK Food System' Programme (>150 papers have been published already from the Programme). The style will be discussed with FSA staff, but could follow that being developed for the Policy and Practice Briefs series style from that Programme, or the format of the UK Parliament POST series. Other topics will be identified in co-creation with the FSA and we could also suggest topics that emerge during our analyses.

- 3. Provision of ad hoc policy advice on emerging issues from a food systems perspective**

- 3.1 We will promptly prepare ad hoc briefings on emerging issues from a food systems perspective which will give both context and detail. We will integrate our knowledge and experience from the diverse range of projects we coordinate to ensure the issues are discussed in relation to e.g. latest foresight understanding or the broad 'true cost' of food. We have much experience in this area: see [redacted] et al. 2013. Priority research questions for the UK food system. *Food Security* 5, 617-636; and [redacted] 2020. Mapping the UK Food System – a report for the UKRI Transforming UK Food Systems Programme.

We will also aim to raise complementary support for 50% of the Fellowship cost, and meanwhile the Fellow will work 50% on the project to include 1-2 days per week embedded in the FSA team to ensure knowledge exchange. Once secured, the Fellow will assume 100% activity, to include at least 3 days per week with the FSA team. Oxford will provide the primary supervision for the Fellow, in regular consultation with FSA and York. The Fellow will be recruited based on their experience in food system thinking, vulnerability assessment, foresight analysis, stakeholder engagement and policy interactions, and will work closely on all aspects of the work and ensure optimal links to ongoing Oxford and York initiatives.

B. INNOVATION

Please provide details of any aspect of the proposed work which are considered innovative in design and/or application? E.g.

Introduction of new or significant improved products, services, methods, processes, markets and forms of organization.

The principal innovation is the integration of food systems thinking from Oxford and York with the foresight skills in Oxford's Foresight4Food. Already proven to be a powerful combination in the UK and overseas, it will be promoted in the work and in the training workshops. A further novelty is being able to interface the work coming from the GFS Resilience Programme (Oxford lead contribution) with that emerging from the GFS TUKFS Programme (York lead contribution). This will add value to each while providing the latest knowledge base on which to draw and approaches. The 'Systems Surgery' approach is also innovative where in collaboration we identify approaches to food system challenges in a safe space.

3: THE PROJECT PLAN AND DELIVERABLES

A. THE PLAN

Please provide a detailed project plan including the tasks and sub-tasks required to realise the objectives (detailed in Part 1). The tasks should be numbered in the same way as the objectives and should be clearly linked to each of the objectives. Please also attach a flow chart illustrating the proposed plan.

Please see Gantt chart.

B. DELIVERABLES

Please outline the proposed project milestones and deliverables. Please provide a timetable of key dates or significant events for the project (for example fieldwork dates, dates for provision of research materials, draft and final reporting). Deliverables must be linked to the objectives.

Lead organisation: Food Systems Transformation Research Group, University of Oxford

1. GFS 'Coordination of the Resilience of the UK Food System' programme (£15m, 2015-2021). [redacted] led and secured the bid and works with the Pls on the 13 awarded projects (including with Prof Doherty on the 'IKnowFood' project). This has demonstrated vision and leadership in delivering the aims of the overall Programme; involves leading the synthesis of Project outputs to be able to provide Programme-level insights and messages; and working closely with communication experts to prepare and deliver outputs in appropriate formats for a range of audiences.
2. Interdisciplinary Food Systems Teaching and Learning (IFSTAL) Programme (2.5m HEFCE seed grant, 2015-2017; then self-funded since). [redacted] led and secured the HEFCE bid and has since led the programme which has engaged >2000 mainly post-graduate students in UK and overseas, but also a range of professionals interested in learning about food systems dynamics. This has demonstrated the ability to deliver engaging training for a wide range of people including senior policy makers in varied circumstances.
3. Foresight4Food launched in 2018 with £150k from OSF (has now just secured Euro4m from IFAD to include core activities). This project has brought together major international agencies (e.g., UN-FAO, CGIAR, USAID, DfID) to develop an aligned concept for furthering foresight work. [redacted] is the lead Oxford scientist for Foresight4Food and [redacted] is the Oxford rep on the international steering committee. The successful project demonstrates Oxford capability in mobilizing a global community of practice of providers and users of foresight methods through interactive workshops, working across major organisations, and the contribution of [redacted] as Post-Doc researched in delivering synthesised outputs from diverse sources for the F4F web Portal.
4. GFS Project Mapping the UK Food System (£25k from GFS) The work was mainly undertaken by [redacted] under the supervision of [redacted] and delivered during 2020. This required synthesising highly varied information from numerous sources and delivering both a hard copy and interactive web-based reports. The report has been instrumental in crafting the 2nd call from the TUKFS programme.

Partner Organisation: [redacted] (University of York) completed an officially sensitive piece of work for Defra on 'Evaluating Impact of Trade Disruption on Fresh Produce', October 1st to December 4th 2018. Project lead was [redacted] in Defra

[redacted] This project investigated the dependency of the UK on the EU for its supply of fresh fruit and vegetables (FFV) and the potential impacts of EU exit on the FFV sector. We took a food systems approach focused on the key dependencies and risks coupled with how the sector is developing strategies to manage EU exit. Using a mixed methods approach, data was synthesised from both 2017 Horticulture data (ONS, 2018b) and annual Overseas Trade Statistics (HM Revenue & Customs, 2018) to calculate the balance of domestic production, EU and non-EU imports of specific vegetables and fruits for the contemporary UK supply chain. As a result we developed a fine-grained UK import profile of FFV supply from both EU and non-EU sources. We synthesized for the first time a strategic framework for how the UK FFV sector can manage the system vulnerabilities arising from these risks. This work led to [redacted] being seconded into the new Systems Programme team in Defra CSAO Office in April 2018 to help embed systems approaches in Defra.

[redacted] was also one of two lead consultants on Coop Future of Food Strategy (2017-2018). A report outlining their future sustainable food commitments. Coop project lead was [redacted] Doherty, working with 3Keel and the Coop Food policy team led a series of food system workshops with both internal Coop managers and key supply chain stakeholders to identify objectives and themes. This resulted in the production of a new systems strategy for this retailer regarding sourcing, treating people fairly and working with communities. [redacted] has been asked to lead Future of Food 2, which commenced on July 12th, 2021 and will run to January 2022.

Partner Organisation: [redacted] (University of York) completed a piece of work for Royal Academy of Engineering and Lloyds Foundation Engineering X project looking at Safer Complex Systems. The project, which included a case study on food systems supply chain safety, was to develop an initial framework for understanding the safety of complex systems. The framework was developed to assist those working in complex systems to understand the sources of complexity in those systems and their possible consequences for systems safety. He is also Co-I on a project (ActEarly) investigating making interventions to improve children's life chances, which has a number of food systems related projects.

D. SUSTAINABILITY

The Food Standards Agency is committed to improving sustainability in the management of operations. Procurement looks to its suppliers to help achieve this goal. You will need to demonstrate your approach to sustainability, in particular how you will apply it to this project taking into account economic, environmental and social aspects. This will be considered as part of our selection process and you must upload your organisations sustainability policies into the eligibility criteria in Bravo.

Please state what(if any) environmental certification you hold or briefly describe your current Environmental Management System (EMS)

The University of Oxford recognises that sustainability is one of the main challenges facing us, particularly in relation to climate change. The University of Oxford approved a new University Sustainability Strategy in March 2021. The strategy sets two ambitious targets: to achieve net zero carbon and to achieve biodiversity net gain, both by 2035.

E. DISSEMINATION AND EXPLOITATION (Science Projects Only)

Where applicable please indicate how you intend to disseminate the results of this project, including written and verbal communication routes if appropriate. Applicants are advised to think carefully about how their research aligns with the FSA strategy, what is the impact that their research has on public health/ consumers and decide how the results can best be communicated to the relevant and appropriate people and organisations in as cost-effective manner as possible. Please provide as much detail as possible on what will be delivered. Any costs associated with this must be documented in the Financial Template.

The applicant should describe plans for the dissemination of the results for the project team as a whole and for individual participants. Details should include anticipated numbers of publications in refereed journals, articles in trade journals etc., presentations or demonstrations to the scientific community, trade organisations and internal reports or publications. Plans to make any information and/or reports available on the internet with the FSA's permission are also useful, however, this does not remove the requirement for Tenderers to think how best to target the output to relevant groups.

If a final report is part of the requirement, please make sure, as part of the executive summary, that aims and results are clear to the general audience and that the impact of the research on public health/consumers and its alignment to FSA priorities is clearly stated.

Please note that permission to publish or to present findings from work supported by the FSA must be sought in advance from the relevant FSA Project Officer. The financial support of the FSA must also be acknowledged

Please indicate whether any Intellectual Property (IP) may be generated by this project and how this could be exploited. Please be aware the FSA retains all rights to the intellectual property generated by any contract and where appropriate may exploit the IP generated for the benefit of public health.

In this part Applicants should demonstrate the credibility of the partnership for exploitation of the results and explain the partnership's policy in respect of securing patents or granting licenses for the technology (if applicable). It should deal with any possible agreements between the partners to extend their co-operation in the exploitation phase and with relevant agreements with companies, in particular users, external to the partnership

To be discussed and agreed with FSA, but priorities will include

- FSA internal workshops
- Policy briefs
- Meeting with UKRI Transforming Food Systems programme

8. SOCIAL VALUE

Social value has a lasting impact on individuals, communities and the environment. Government has a huge opportunity and responsibility to maximise benefits effectively and comprehensively through its commercial activity. To be effective it is essential that the FSA consider social value at all stages of the procurement life cycle. In order to do this, we are applying the Government Commercial Functions social value model PPN 06/20 Procurement Policy Note - Taking account of social value in the award of government contracts. [The Social Value Quick Reference Table](#) provides a useful summary of the criteria and the reporting metrics for each of the criteria, including examples.

In order to evaluate this, we ask that you answer the following:

A. TACKLING ECONOMIC INEQUALITY: INCREASE SUPPLY CHAIN RESILIENCE AND CAPACITY Provide evidence of how you will support the development of scalable and future-proofed new methods to modernize delivery and increase productivity

Examples that responses could include:

- Understanding of scalable future-proofed new methods to drive greater modernization of delivery and increase productivity.
- Approach to organizational learning and continuous improvement.
- Creation of a design and tendering environment that is conducive to the development of scalable and future-proofed new methods to modernize delivery and increase productivity.

Responses should not exceed 750 words.

The project will increase the capacity within the FSA for systems thinking and systems analysis supported by the 'systems surgery' and co-production of systems maps with FSA staff. Understanding how parts of systems, and whole systems, are dependent on each other can surface otherwise hidden systemic vulnerabilities that could be a cause of systemic failure. Systems approaches are therefore essential, as they provide an intuitive method for understanding the relationships and interdependencies between parts of complex systems. Interdependencies that can then be visualised as systems maps or complex networks.

Post Tender Clarifications

FSA Tender Understanding the Food System
Response to 3 Comments

1. Frequency of project management group meetings. FSA will provide a representative, but is monthly sufficient given the proposed timescales.

We will hold meetings every 2 weeks for the first 3 months of inception phase and then review frequency with a view to either maintaining this frequency subject to further review or moving to monthly.

2. Clarification of elements of spend, in particular in initial [REDACTED], and proposed [REDACTED] for T&S.

The initial [REDACTED] is a pro-rata amount for the first two months based on the overall project costs for the duration.

The T&S total of [REDACTED] was calculated on:

Weekly travel Oxford-London from [REDACTED] to interact with FSA staff

[REDACTED]

Quarterly Team meeting in London/Oxford with FSA staff

[REDACTED]

[REDACTED]

Ad hoc trips for [REDACTED] to visit stakeholders

[REDACTED]

3. Additional detail on co-funding of the Fellowship and mitigation should the funding not be available.

We aim to raise co-funding for the Fellowship by a number of ways:

- Exploring York Impact Acceleration Accounts
- Identifying synergies with other grants where the research effort can also contribute to the FSA project
- Ad hoc applications to funders as Calls emerge

If unsuccessful we will deliver the Project to the best of our ability within the resources available.

29 October 2021

8th November 2021

1. With regards to the final sentence on question 3, could you please clarify what is meant by this? Will you cover the cost or would this mean that you would have to drop the fellowship and re-evaluate deliverables? If it is the latter, please can you provide indication of what this would impact on?

>>> By writing “If unsuccessful we will deliver the Project to the best of our ability within the resources available” we mean that we will continue to deliver quality products as stated in the Call specification by using resources as effectively as possible, and in discussion with FSA. However, given the nature of our Oxford/York collaboration and our respective work foci, we are confident we will be able to identify work on other projects and new project funds that can also contribute to the FSA tasks as needed.

2. The project team would also like to highlight that travel would be unlikely to be to London, more likely to be somewhere more central like Sheffield/Birmingham with majority of meetings handled remotely depending on Covid situation.

>>> This is noted and the travel budget will be used flexibly. Fares Oxford-Birmingham are a little cheaper than Oxford-London, and Oxford-Sheffield a little more expensive. We therefore feel the figures quoted are appropriate on average. We will work within Covid guidelines and hold virtual meetings as required.

Schedule 22 (Insurance Requirements)

1. The insurance you need to have

1.1 The Supplier shall take out and maintain or procure the taking out and maintenance of the insurances as set out in the Annex to this Schedule and any other insurances as may be required by applicable Law (together the “**Insurances**”). The Supplier shall ensure that each of the Insurances is effective no later than

the Start Date in respect of those Insurances set out in the Annex to this Schedule and those required by applicable Law; and

1.2 The Insurances shall be:

1.2.1 maintained in accordance with Good Industry Practice;

1.2.2 (so far as is reasonably practicable) on terms no less favourable than those generally available to a prudent contractor in respect of risks insured in the international insurance market from time to time;

1.2.3 taken out and maintained with insurers of good financial standing and good repute in the international insurance market; and

1.2.4 maintained for at least six (6) years after the End Date.

1.3 The Supplier shall ensure that the public and products liability policy contain an indemnity to principals clause under which the Buyer shall be indemnified in respect of claims made against the Buyer in respect of death or bodily injury or third party property damage arising out of or in connection with the Deliverables and for which the Supplier is legally liable.

2. How to manage the insurance

2.1 Without limiting the other provisions of this Contract, the Supplier shall:

2.1.1 take or procure the taking of all reasonable risk management and risk control measures in relation to Deliverables as it would be reasonable to expect of a prudent contractor acting in accordance with Good Industry Practice, including the investigation and reports of relevant claims to insurers;

2.1.2 promptly notify the insurers in writing of any relevant material fact under any Insurances of which the Supplier is or becomes aware; and

2.1.3 hold all policies in respect of the Insurances and cause any insurance broker effecting the Insurances to hold any insurance slips and other evidence of placing cover representing any of the Insurances to which it is a party.

3. What happens if you aren't insured

- 3.1 The Supplier shall not take any action or fail to take any action or (insofar as is reasonably within its power) permit anything to occur in relation to it which would entitle any insurer to refuse to pay any claim under any of the Insurances.
- 3.2 Where the Supplier has failed to purchase or maintain any of the Insurances in full force and effect, the Buyer may elect (but shall not be obliged) following written notice to the Supplier to purchase the relevant Insurances and recover the reasonable premium and other reasonable costs incurred in connection therewith as a debt due from the Supplier.

4. Evidence of insurance you must provide

- 4.1 The Supplier shall upon the Start Date and within 15 Working Days after the renewal of each of the Insurances, provide evidence, in a form satisfactory to the Buyer, that the Insurances are in force and effect and meet in full the requirements of this Schedule.

5. Making sure you are insured to the required amount

- 5.1 The Supplier shall ensure that any Insurances which are stated to have a minimum limit "in the aggregate" are maintained at all times for the minimum limit of indemnity specified in this Contract and if any claims are made which do not relate to this Contract then the Supplier shall notify the Buyer and provide details of its proposed solution for maintaining the minimum limit of indemnity.

6. Cancelled Insurance

- 6.1 The Supplier shall notify the Buyer in writing at least five (5) Working Days prior to the cancellation, suspension, termination or non-renewal of any of the Insurances.
- 6.2 The Supplier shall ensure that nothing is done which would entitle the relevant insurer to cancel, rescind or suspend any insurance or cover, or to treat any insurance, cover or claim as voided in whole or part. The Supplier shall use all reasonable endeavours to notify the Buyer (subject to third party confidentiality obligations) as soon as practicable when it becomes aware of any relevant fact, circumstance or matter which has caused, or is reasonably likely to provide grounds to, the relevant insurer to give notice to cancel, rescind, suspend or void any insurance, or any cover or claim under any insurance in whole or in part.

7. Insurance claims

- 7.1 The Supplier shall promptly notify to insurers any matter arising from, or in relation to, the Deliverables, or the Contract for which it may be entitled to claim under any of the Insurances. In the event that the Buyer receives a claim relating to or arising out of the Contract or the Deliverables, the Supplier shall co-operate

with the Buyer and assist it in dealing with such claims including without limitation providing information and documentation in a timely manner.

- 7.2 Except where the Buyer is the claimant party, the Supplier shall give the Buyer notice within twenty (20) Working Days after any insurance claim in excess of 10% of the sum required to be insured pursuant to Paragraph 5.1 relating to or arising out of the provision of the Deliverables or this Contract on any of the Insurances or which, but for the application of the applicable policy excess, would be made on any of the Insurances and (if required by the Buyer) full details of the incident giving rise to the claim.
- 7.3 Where any Insurance requires payment of a premium, the Supplier shall be liable for and shall promptly pay such premium.
- 7.4 Where any Insurance is subject to an excess or deductible below which the indemnity from insurers is excluded, the Supplier shall be liable for such excess or deductible. The Supplier shall not be entitled to recover from the Buyer any sum paid by way of excess or deductible under the Insurances whether under the terms of this Contract or otherwise.
