Schedule 1 – Services

(Proposal printed in full for final contract)

[REDACTED]

Schedule 1- Annex A: Outcomes and Delivery Management Process

Scope

The service will be delivered iteratively following a Scaled Agile process.

The Scope of the Programme will be recorded in the Product Road Map which will be delivered in phases of Private and Public Beta releases.

The Product Roadmap phasing and release plans will be published and made available for sprint planning.

Delivery teams will work on an outcomes basis.

Outcomes will be agreed collaboratively between the Buyer and Supplier to cover a period of between six-twelve weeks (outcome delivery period), and then executed in two-week iterations or sprints in a programme increment cadence.

Process

Expected outcomes, dependencies, key success criteria will be agreed and documented at the start of each outcome period and revalidated at the start of each sprint.

High level estimates (t-shirt sizing) of effort to achieve and estimated cost and acceptance criteria will be agreed at the start of each sprint and captured with the associated Sprint plans held in a suitable repository (eg Jira).

Quality standards will be as is defined in the GDS Services Manual or as varied collaboratively as required.

Each story or ticket will be assigned a Buyer Owner responsible for its approval and closure, shown in table 1 below:

Table 1	Buyer Owner
Expected Outcomes, Key Success Criteria and Dependencies	Technical Delivery Lead
Sprint Deliverables	Assigned Technical Architect
Outcome cost to achieve planned outcomes	PTTP PMO

The Sprint deliverables will be defined within the Planned Sprint Outcomes – Sprint Goals and Dependencies, which may be changed and adjusted subject to Buyer Owner approval.

Stories and tickets created shall be the acceptance criteria for sprint completion and approvals. Stories and tickets will be approved as they are completed.

Any issues in completing a story and doing so in line with its estimate will be raised with the technical delivery lead in advance of the showcase, to allow time for a collaborative solution to be reached. “Sign Off” will be deemed to have happened at showcase for each sprint.

Change Control

It is expected with an agile process that there will be an amount of discovery and exploration in each sprint. Sprint review meetings will be used to check progress on stories, tickets and collaborative decisions made.

For any Sprint that completes less than 90% of planned deliverables a change request should be raised for approval by the Buyer PMO Outcome

Deliverables

Deliverables will be as agreed at the outset of each outcome period and as agreed and delivered within each Sprint, to be demonstrated at showcases.

The format of the deliverables will be as agreed between the Buyer and Supplier during the sprints.

Approvals and Completion

Buyer approvals must be in place and documented by Buyer PMO to allow “formal” Sprint completion. Buyer approvals will not be unduly withheld and in any case, will be provided by the end of the business day of the relevant sprint showcase.

On completion of the outcome delivery period (six-twelve weeks as agreed), Buyer PMO will review the relevant documentation and will provide approvals to close the Sprint OR request specific actions and additional works to remedy, as required.

These works will be planned collaboratively with the support of MoJ resources, as necessary.
The Supplier will invoice for services monthly in arrears. In the month following the works, a service delivery review will be held to confirm works are completed and approve invoices.
