The parties will use all reasonable endeavours to ensure that the acceptance process takes as little time as possible and in any event no longer than 15 Working Days (or such other period as the parties may agree in writing) from the date of its first submission to the *Project Manager*. If the *Project Manager* does not accept the Security Management Plan following its resubmission, the matter will be resolved in accordance with the Dispute Resolution Procedure. No acceptance to be given by the Project Manager pursuant to this paragraph 1.4.2.2 of this schedule may be unreasonably withheld or delayed. However any failure to accept the Security Management Plan on the grounds that it does not comply with the requirements set out in paragraph 1.4.3.4 shall be deemed to be reasonable.

 - 1.4.4.4 Any change or amendment which the *Contractor* proposes to make to the ISMS or Security Management Plan (as a result of a *Project Manager's* request or change to the *works* or otherwise) shall be subject to the early warning procedure and shall not be implemented until accepted in writing by the *Project Manager*.
- 1.4.5 Testing

- 1.4.5.1 The *Contractor* shall conduct Security Tests of the ISMS on an annual basis or as otherwise agreed by the parties. The date, timing, content and conduct of such Security Tests shall be agreed in advance with the *Project Manager*.
- 1.4.5.2 The *Project Manager* shall be entitled to witness the conduct of the Security Tests. The *Contractor* shall provide the *Project Manager* with the results of such tests (in a form accepted by the *Client* in advance) as soon as practicable after completion of each Security Test.
- 1.4.5.3 Without prejudice to any other right of audit or access granted to the *Client* pursuant to this contract, the *Project Manager* and/or its authorised representatives shall be entitled, at any time and without giving notice to the *Contractor*, to carry out such tests (including penetration tests) as it may deem necessary in relation to the ISMS and the *Contractor*'s compliance with the ISMS and the Security Management Plan. The *Project Manager* may notify the *Contractor* of the results of such tests after completion of each such test. Security Tests shall be designed and implemented so as to minimise the impact on the carrying out of the *works*. If such tests adversely affect the *Contractor*'s ability to carry out the *works* in accordance with the Scope, the *Contractor* shall be granted relief against any resultant underperformance for the period of the tests.
- 1.4.5.4 Where any Security Test carried out pursuant to paragraphs 1.4.5.2 or 1.4.5.3 above reveals any actual or potential Breach of Security, the Contractor shall promptly notify the Project Manager of any changes to the ISMS and to the Security Management Plan (and the implementation thereof) which the Contractor proposes to make in order to correct such failure or weakness. Subject to the Project Manager's acceptance in accordance with paragraph (i), the Contractor shall implement such changes to the ISMS and the Security Management Plan in accordance with the timetable agreed with the Project *Manager* or, otherwise, as soon as reasonably possible. Where the change to the ISMS or Security Management Plan is made to address a non-compliance with the Security Policy or Security Requirements, the change to the ISMS or Security Management Plan is Disallowed Cost.

1.5 Compliance with ISO/IEC 27001

- 1.5.1 Unless otherwise agreed by the parties, the *Contractor* shall obtain independent certification of the ISMS to ISO/IEC 27001 within 12 months of the Contract Date and shall maintain such certification until the Defects Certificate or a termination certificate has been issued.
- 1.5.2 In the event that paragraph 1.5.1 above applies, if certain parts of the ISMS do not conform to Good Industry Practice, or controls as described in

ISO/IEC 27002 are not consistent with the Security Policy, and, as a result, the *Contractor* reasonably believes that it is not compliant with ISO/IEC 27001, the *Contractor* shall promptly notify the *Project Manager* of this and the *Client* in its absolute discretion may waive the requirement for certification in respect of the relevant parts.

- 1.5.3 The *Project Manager* shall be entitled to carry out such regular security audits as may be required and in accordance with Good Industry Practice, in order to ensure that the ISMS maintains compliance with the principles and practices of ISO 27001.
- 1.5.4 If, on the basis of evidence provided by such audits, it is the *Project Manager*'s reasonable opinion that compliance with the principles and practices of ISO/IEC 27001 is not being achieved by the *Contractor*, then the *Project Manager* shall notify the *Contractor* of the same and give the *Contractor* a reasonable time (having regard to the extent and criticality of any non-compliance and any other relevant circumstances) to become compliant with the principles and practices of ISO/IEC 27001. If the *Contractor* does not become compliant within the required time then the *Project Manager* has the right to obtain an independent audit against these standards in whole or in part.
- 1.5.5 If, as a result of any such independent audit as described in paragraph 1.5.4 the *Contractor* is found to be non-compliant with the principles and practices of ISO/IEC 27001 then the *Contractor* shall, at its own expense, undertake those actions required in order to achieve the necessary compliance and shall reimburse in full the costs incurred by the *Client* in obtaining such audit.

1.6 Breach of Security

- 1.6.1 Either party shall give an early warning to the other in accordance with the agreed security incident management process as defined by the ISMS upon becoming aware of any Breach of Security or any potential or attempted Breach of Security.
- 1.6.2 Without prejudice to the security incident management process, upon becoming aware of any of the circumstances referred to in paragraph 1.6.1, the *Contractor* shall:
 - 1.6.2.1 immediately take all reasonable steps necessary to:
 - remedy such breach or protect the integrity of the ISMS against any such potential or attempted breach or threat; and
 - (b) prevent an equivalent breach in the future.

such steps shall include any action or changes reasonably required by the *Project Manager*; and

1.6.2.2 as soon as reasonably practicable provide to the *Project Manager* full details (using such reporting mechanism as defined by the ISMS) of the Breach of Security or the potential or attempted Breach of Security.

4. Constraints on how the Contractor provides the Works

- 1. Use of previous sub-contractors encouraged where possible.
- 2. Adhere to tolerances to and surrounding the Roller Brake Tester in the Inspection building.
 - Before and after the RBT the area needs to be level and flat to at least 14m in either direction. ATF criteria is no slope greater than 5% but would recommend less is best as 5% is quite a slope and still causes issues when brake testing.
 - A roller brake tester (RBT) must be installed so that:
 - It is centrally located in an unobstructed, substantially level area, at least 22.0m long and 4.0m wide
 - 11.0m standing area to the rear of the RBT may extend outside a building provided the ground is substantially level is constructed of acceptable material and the roller brake testing bed plate is installed not less than 1.5m from an entrance or exit.
 - Vehicles are substantially level while being tested (a gradient of not more than 5%).
