Background

The **Defence Digital Foundry** is a new alliance of digital teams in the MoD. The Foundry will deliver digital services that help people in defence get things done - from the warfighter to the back office - and also deliver enabling tools and platforms that help other digital teams to deliver their services faster and better. Together with the digital teams of the Royal Navy, British Army and Royal Air Force and from other teams in MoD, the Foundry will pioneer new ways to exploit Defence's data, including Artificial Intelligence and other game-changing technologies, to ensure the UK keeps up with our allies and stays ahead of threats in an era of persistent competition and disruptive technology.

The **Defence Data Analytics Platform (DDAP)** provides a loosely coupled, secure and scalable multi-tenant platform, designed to provide MOD personnel with access to data, analytical software and powerful computational resources that can be scaled to meet demand, enabling MOD personnel to gain insights and make decisions based on accurate, joined up data using state of the art tools and techniques.
