

## URGENT CLARIFICATION:

Prior to the deadline for the World Beneath Waves Exhibition ITT on Friday 25<sup>th</sup> November the NMRN would like to issue an important clarification regarding the completion of the exhibition date, we wish to communicate this to you now to consider this within your tender response.

The NMRN recognise that the timeframe for completion of the exhibition by 24<sup>th</sup> June 2023 is short and constrained and so are considering whether or not an extension to the programme and a revised opening date of early September would make the project more viable in terms of securing loans and funding. We anticipate not changing the end date of Phase 1, but potentially extending the end date of phase 2 as detailed above. This is currently under consideration, but we anticipate will be determined by the end of this calendar year.

Kind Regards

Procurement Officer (Trainee)
