- F1.2 At or around 6 Months from the Commencement Date and each anniversary of the Commencement Date thereafter (each being a "Review Date"), the Authority shall carry out a review of the performance of the Contractor ("Checkpoint Review"). Without

prejudice to the generality of the foregoing, the Authority may in respect of the period under review consider such items as (but not limited to): the Contractor's delivery of the Services; the Contractor's contribution to innovation in the Authority; whether the Services provide the Authority with best value for money; consideration of any changes which may need to be made to the Services; a review of future requirements in relation to the Services and progress against key milestones.

- F1.3 The Contractor shall provide at its own cost any assistance reasonably required by the Authority to perform such Checkpoint Review including the provision of data and information.
- F1.4 The Authority may produce a report (a "**Checkpoint Review Report**") of the results of each Checkpoint Review stating any areas of exceptional performance and areas for improvement in the provision of the Services and where there is any shortfall in any aspect of performance reviewed as against the Authority's expectations and the Contractor's obligations under this Contract.
- F1.5 The Authority shall give the Contractor a copy of the Checkpoint Review Report (if applicable). The Authority shall consider any Contractor comments and may produce a revised Checkpoint Review Report.

F3 Remedies for inadequate performance

- F3.1 If the Authority reasonably believes the Contractor has committed a Material Breach it may, without prejudice to its rights under clause H2 (Termination on Default), do any of the following:
- (a) without terminating the Contract, itself supply or procure the supply of all or part of the Services until such time as the Contractor has demonstrated to the Authority's reasonable satisfaction that the Contractor will be able to supply the Services in accordance with the Specification;
 - (b) without terminating the whole of the Contract, terminate the Contract in respect of part of the Services only (whereupon a corresponding reduction in the Price shall be made) and thereafter itself supply or procure a third party to supply such part of the Services;
 - (a) withhold or reduce payments to the Contractor in such amount as the Authority reasonably deems appropriate in each particular case; and/or
 - (a) terminate the Contract in accordance with clause H2.
- F3.2 Without prejudice to its right under clause C3 (Recovery of Sums Due), the Authority may charge the Contractor for any costs reasonably incurred and any reasonable

administration costs in respect of the supply of any part of the Services by the Authority or a third party to the extent that such costs exceed the payment which would otherwise have been payable to the Contractor for such part of the Services.

F3.3 If the Authority reasonably believes the Contractor has failed to supply all or any part of the Services in accordance with the Contract, professional or industry practice which could reasonably be expected of a competent and suitably qualified person, or any legislative or regulatory requirement, the Authority may give the Contractor notice specifying the way in which its performance falls short of the requirements of the Contract or is otherwise unsatisfactory.

F3.4 If the Contractor has been notified of a failure in accordance with clause F3.3 the Authority may:

- (a) direct the Contractor to identify and remedy the failure within such time as may be specified by the Authority and to apply all such additional resources as are necessary to remedy that failure at no additional charge to the Authority within the specified timescale; and/or
- (b) withhold or reduce payments to the Contractor in such amount as the Authority deems appropriate in each particular case until such failure has been remedied to the satisfaction of the Authority.

F3.5 If the Contractor has been notified of a failure in accordance with clause F3.3, it shall:

- (a) use all reasonable endeavours to immediately minimise the impact of such failure to the Authority and to prevent such failure from recurring; and
- (b) immediately give the Authority such information as the Authority may request regarding what measures are being taken to comply with the obligations in this clause F3.5 and the progress of those measures until resolved to the satisfaction of the Authority.

F3.6 If, having been notified of any failure, the Contractor fails to remedy it in accordance with clause F3.5 within the time specified by the Authority, the Authority may treat the continuing failure as a Material Breach and may terminate the Contract immediately on notice to the Contractor.

F4 Transfer and Sub-Contracting

F4.1 Except where clauses F4.5 and F4.6 both apply, the Contractor shall not transfer, novate, charge, assign, sub-contract or in any other way dispose of the Contract or any part of it without Approval. All such documents shall be evidenced in writing and shown to the Authority on request. Sub-contracting any part of the Contract shall not relieve the Contractor of any of its obligations or duties under the Contract.

F4.2 The Contractor shall be responsible for the acts and/or omissions of its Sub-Contractors as though they are its own. If it is appropriate, the Contractor shall provide each Sub-Contractor with a copy of the Contract and obtain written confirmation from them that they will provide the Services fully in accordance with the Contract.

F4.3 The Contractor shall ensure that its Sub-Contractors and suppliers retain all records relating to the Services for at least 6 years from the date of their creation and make them available to the Authority on request in accordance with the provisions of clause E9 (Audit). If any Sub-Contractor or supplier does not allow the Authority access to the records then the Authority shall have no obligation to pay any claim or invoice made by

the Contractor on the basis of such documents or work carried out by the Sub-Contractor or supplier.

F4.4 If the Authority has consented to the placing of Sub-Contracts, the Contractor shall:

(a) impose obligations on its Sub-Contractor on the same terms as those imposed on it pursuant to this Contract and shall procure that the Sub-Contractor complies with such terms; and

(b) provide a copy at no charge to the Authority, of any Sub-Contract, on receipt of a request for such by the Authority.

F4.5 Notwithstanding clause F4.1, the Contractor may assign to a third party (the "Assignee") the right to receive payment of the Price or any part thereof due to the Contractor (including any interest which the Authority incurs under clause C2 (Payment and VAT)). Any assignment under this clause F4.5 shall be subject to:

(a) reduction of any sums in respect of which the Authority exercises its right of recovery under clause C3 (Recovery of Sums Due);

(b) all related rights of the Authority under the Contract in relation to the recovery of sums due but unpaid; and

(c) the Authority receiving notification under both clauses F4.6 and F4.7.

F4.6 If the Contractor assigns the right to receive the Price under clause F4.5, the Contractor or the Assignee shall notify the Authority in writing of the assignment and the date upon which the assignment becomes effective.

F4.7 The Contractor shall ensure that the Assignee notifies the Authority of the Assignee's contact information and bank account details to which the Authority shall make payment at least [5] Working Days prior to submission of the relevant invoice.

F4.8 The provisions of clause C2 shall continue to apply in all other respects after the assignment and shall not be amended without Approval of the Authority.

F4.9 Subject to clause F4.10, the Authority may assign, novate or otherwise dispose of its rights and obligations under the Contract or any part thereof to:

(a) any Contracting Authority;

(b) any other body established by the Crown or under statute in order substantially to perform any of the functions that had previously been performed by the Authority; or

(c) any private sector body which substantially performs the functions of the Authority

provided that any such assignment, novation or other disposal shall not increase the burden of the Contractor's obligations under the Contract.

F4.10 Any change in the legal status of the Authority such that it ceases to be a Contracting Authority shall not, subject to clause F4.11, affect the validity of the Contract and the Contract shall bind and inure to the benefit of any successor body to the Authority.

F4.11 If the rights and obligations under the Contract are assigned, novated or otherwise disposed of pursuant to clause F4.9 to a body which is not a Contracting Authority or if

there is a change in the legal status of the Authority such that it ceases to be a Contracting Authority (in the remainder of this clause both such bodies being referred to as the "Transferee"):

- (a) the rights of termination of the Authority in clauses H1 and H2 shall be available to the Contractor in respect of the Transferee;
 - (b) shall be available to the Contractor in the event of respectively, the bankruptcy or insolvency, or Default of the Transferee; and
 - (b) the Transferee shall only be able to assign, novate or otherwise dispose of its rights and obligations under the Contract or any part thereof with the prior consent in writing of the Contractor.
- F4.12 The Authority may disclose to any Transferee any Confidential Information of the Contractor which relates to the performance of the Contractor's obligations under the Contract. In such circumstances the Authority shall authorise the Transferee to use such Confidential Information only for purposes relating to the performance of the Contractor's obligations under the Contract and for no other purpose and shall take all reasonable steps to ensure that the Transferee gives a confidentiality undertaking in relation to such Confidential Information.
- F4.13 Each Party shall at its own cost and expense carry out, or use all reasonable endeavours to ensure the carrying out of, whatever further actions (including the execution of further documents) the other Party reasonably requires from time to time for the purpose of giving that other Party the full benefit of the provisions of the Contract.
- F4.14 The Authority shall be entitled to novate the Contract to any other body which substantially performs any of the functions that previously had been performed by the Authority.
- F4.15 Provided that the Authority has given prior written consent, the Contractor shall be entitled to novate the Contract where:
- (a) the specific change in contractor was provided for in the procurement process for the award of this Contract;
 - (b) there has been a universal or partial succession into the position of the Contractor, following a corporate restructuring, including takeover, merger, acquisition or insolvency, by another economic operator that meets the criteria for qualitative selection applied in the procurement process for the award of this Contract.

F5 Waiver

- F5.1 The failure of either Party to insist upon strict performance of any provision of the Contract, or the failure of either Party to exercise, or any delay in exercising, any right or remedy shall not constitute a waiver of that right or remedy and shall not cause a diminution of the obligations established by the Contract.
- F5.2 No waiver shall be effective unless it is expressly stated to be a waiver and communicated to the other Party in writing in accordance with clause A4 (Notices and Communications).
- F5.3 A waiver of any right or remedy arising from a breach of the Contract shall not constitute a waiver of any right or remedy arising from any other or subsequent breach of the Contract.

F6 Variation

- F6.1 If, after the Commencement Date, the Authority's requirements change, the Authority may request a Variation subject to the terms of this clause F6.
- F6.2 The Authority may request a Variation by notifying the Contractor in writing of the Variation and giving the Contractor sufficient information to assess the extent of the Variation and consider whether any change to the Price is required in order to implement the Variation within a reasonable time limit specified by the Authority. If the Contractor accepts the Variation it shall confirm it in writing.
- F6.3 If the Contractor is unable to accept the Variation or where the Parties are unable to agree a change to the Price, the Authority may:
- (a) allow the Contractor to fulfil its obligations under the Contract without the Variation to the Specification; or
 - (b) terminate the Contract immediately except where the Contractor has already delivered all or part of the Services or where the Contractor can show evidence of substantial work being carried out to fulfil the requirements of the Specification; and in such case the Parties shall attempt to agree upon a resolution to the matter. If a resolution cannot be reached, the matter shall be dealt with under the Dispute Resolution procedure detailed in clause I2 (Dispute Resolution).
- F6.4 Any Variation will not take effect unless recorded in a Change of Control Notice as attached hereto in Schedule 4 and approved in writing by the Authority.
- F6.5 The provisions of clause F6.4 may be varied in an emergency if it is not practicable to obtain the Authorised Representative's approval within the time necessary to make the Variation in order to address the emergency. In an emergency, Variations may be approved by a different representative of the Authority. However, the Authorised Representative shall have the right to review such a Variation and require a Change of Control Notice to be entered into on a retrospective basis which may itself vary the emergency Variation.

F7 Severability

- F7.1 If any provision of the Contract which is not of a fundamental nature is held invalid, illegal or unenforceable for any reason by any court of competent jurisdiction, such provision shall be severed and the remainder of the provisions of the Contract shall continue in full force and effect as if the Contract had been executed with the invalid, illegal or unenforceable provision eliminated.

F8 Remedies Cumulative

- F8.1 Except as expressly provided in the Contract all remedies available to either Party for breach of the Contract are cumulative and may be exercised concurrently or separately, and the exercise of any one remedy shall not be deemed an election of such remedy to the exclusion of other remedies.

F9 Entire Agreement

- F9.1 The Contract constitutes the entire agreement between the Parties in respect of the matters dealt with therein. The Contract supersedes all prior negotiations between the Parties and all representations and undertakings made by one Party to the other, whether

written or oral, except that this clause shall not exclude liability in respect of any fraudulent misrepresentation.

F9.2 In the event of, and only to the extent of, any conflict between the clauses of the Contract, any document referred to in those clauses and the Schedules, the conflict shall be resolved in accordance with the following order of precedence:

- (a) the clauses of the Contract;
- (b) the Schedules; and
- (c) any other document referred to in the clauses of the Contract.

F10 Counterparts

SCHEDULE 1 - SPECIFICATION

During the research phase, the supplier will be required to deliver two areas of work.

- 1) **Develop a set of principles that can be used to assess how good health and social care providers are at developing and implementing innovations (with a particular focus on technology)**
 - a. This would involve a literature review of existing evidence, policy and practice about the development and implementation of (technological) innovation in health and social care.
 - b. It would also involve engaging with (technological) innovators, health and social care providers, commissioners, people who use health and social care services, academics, CQC, regulators and other relevant bodies, to understand their views and gather their input.
 - c. The outputs should include a) the literature review in the form of a written report, b) a written description of the characteristics (including leadership and processes) of good development and implementation of technological innovation in health and social care and c) a written set of principles that could form the basis of future CQC assessments of how good providers are at innovation.

- 2) **Develop options and recommendations for “regulatory sandboxing”***:
 - a. This would involve a literature review of existing evidence, policy and practice about the use of “regulatory sandboxing”, setting out the different ways in which this concept is applied in the regulation of different sectors in the UK and globally.
 - b. It would also involve engaging with (technological) innovators, health and social care providers, commissioners, people who use health and social care services, academics, CQC, regulators and other relevant bodies, , to understand their views and practice and gather their input.
 - c. The outputs should include a) the literature review in the form of a written report, b) a written report including a fully scoped set of options for CQC to establish a regulatory sandboxing function, including costs and benefits of each option, and c) a written recommendation about which form of regulatory sandboxing, if any, CQC should test, including costs and benefits.

In addition, the supplier will plan and deliver a workshop or discussion session with CQC after the above outputs have been produced. The purpose of this workshop / discussion session is to support the transfer of knowledge and understanding to CQC.

***Regulatory sandboxing** is when a regulator creates an environment where the testing of a new innovation can take place under scrutiny from the regulator, potentially facilitated by temporary or permanent changes to regulatory requirements or enforcement. This allows a time-limited proof of concept (or demonstrator of regulatory need and risk), which can

allow innovators to test and evolve a new product or service, and regulators to refine how they would approach this using their frameworks.

This work must be delivered to CQC in line with this specification, no later than four months after the start of the contract.

The outcome of the work will be that CQC can take and test a) the principles and b) a regulatory sandboxing methodology with health and social care providers, people who work in health and social care, innovators, people who use health and social care services, CQC staff, academics and other relevant partners, in order to inform the development of our approach to regulating the use of technological innovation in health and social care.

The supplier must work closely with CQC, particularly the project team, including colleagues in Policy & Strategy, Registration, Legal, Engagement, and Finance. Their main points of contact will be the Programme Lead and the Head of Strategy.

The supplier must adhere to the requirements stipulated by our grant-funder, including providing any information requested by the funder, and ensuring accurate and prompt recording of fees, so CQC can invoice the funder promptly, quarterly in arrears. Full details of the funder's requirements can be provided on request.

The supplier must be available for regular email contact (approx. three to five times per week) and regular telephone or face-to-face conversations (approx. once a fortnight) with a named contact at CQC, to discuss progress. More frequent contact may be necessary in the first and final month of the contract. The purpose of this engagement is to achieve ongoing dialogue and productive working relationships between the supplier and CQC, to monitor and support progress and quality.

SCHEDULE 2 – TENDER RESPONSE

Catalyze is a management consultancy, originally a spin-off from the London School of Economics, which applies the latest techniques in decision sciences so that organisations can evaluate their current performance, co-produce a vision for the future and co-develop a practical plan to deliver that vision. We work with clients across sectors which ensures that we bring in the learning from a wide variety of client engagements.

Health Science Network has agreed to partner with us to provide specific research expertise and access to the extensive contacts of 15 Academic Health Science Networks around England.

As specialists in Decision Science, Catalyze have vast experience in teasing out the factors that matter in determining value. Through workshops with stakeholders, we develop “criteria in context” based on expert engagement, facilitation and first-rate background research. This includes experts by experience. In this case the “criteria in context” will be the set of principles that can be used to assess the quality of innovation developed and deployed by a health and social care provider.

Wessex AHSN will draw on its experience of working with innovators (from industry, health and social care, academia and other sectors), in research and evaluation and in adoption and spread to provide advice and expertise to this programme of work.

Catalyze is expert in the generation of pragmatic options. In the context of CQC and innovation, we can call on a wide and representative network of innovators, providers, commissioners, regulators and other stakeholders to develop options and then evaluate those options based on a value-for-money basis (where value is understood in the widest appropriate terms for this context.)

We recognise that there is a perception (among some innovators, some providers and some other stakeholders) that regulation stifles innovation. Some of this perception may be misconceived, but it is vital to properly consider the possibility of missed opportunity both for public wellbeing and to ensure that the UK remains a world leader in effective

health innovation. At the same time, we recognise the importance of maintaining public and professional confidence in CQC's regulatory role.

Why are we so keen to work with you on this project? There are 6 essential features of our proposal:

1. Our values are rooted in providing value for patients and end-users. We continually challenge ourselves and our clients in the NHS and health sector more widely to ensure the "line of sight" to improved patient care and maximising public wellbeing.
2. Our proposal fundamentally gets to grips with the challenge: we understand the frustration of innovators and we also appreciate the need for public to have confidence in the services available.
3. Our proposal demonstrates a quality and depth of engagement with innovators, commissioners, implementers, and end-users (both patients and citizens who are currently enjoying good health).
4. Our proposal demonstrates a robust and compelling framework for the research and engagement based on best practice in research.
5. Our proposal will apply a process based on Decision Science that is inclusive, open and democratic to develop principles for evaluating innovation and pragmatic options for regulatory sandboxing stratified by context and purpose.

Sometimes innovation is high-tech and cutting edge, but innovation may be very simple and highly effective. It may require a subtle range of regulatory sandboxing options to incorporate all types of innovation.

6. The reports we deliver will be easy to comprehend but thorough and evidence-based. The product set we envisage will include
 - a. a "maturity matrix" that CQC can use as the basis for evaluation of innovation
 - b. a cost benefit analysis of the options for regulatory sandboxing with recommendations for preferred options which are "appropriate for specific context" (rather than "one size fits all")

Expertise

Catalyze is a management consultancy, originally a spin-off from the London School of Economics, which applies the latest techniques in decision sciences so that organisations can evaluate their current performance, co-produce a vision for the future and co-develop a practical plan to deliver that vision. We work with clients across sectors which ensures that we bring in the learning from a wide variety of client engagements. Our team is led by [REDACTED] and we are delighted that the Wessex Academic Health

Science Network has agreed to partner with us to provide specific research expertise and access to the extensive contacts of 15 Academic Health Science Networks around

England.

Wessex AHSN delivery team brings together programme managers and evaluators with operational and leadership experience in the NHS, social care, industry, academia and other sectors. WAHSN have engaged with CQC in two recent programmes in Hampshire related to nutrition care in the care home sector and evaluation of an innovative health and social care discharge to assess unit. The WAHSN research portfolio includes multiple evaluations of new care models and innovative technologies across health and care, latterly of 3 New Care Model Vanguards numbering over 30 independent evaluations.

We know that implementation of innovations can be hard to achieve – there are many examples of partially implemented innovations across the health and care system, and there are many barriers to spread and adoption (e.g. recent reports by the Kings Fund, Nuffield Trust, Health Foundation) for example). Wessex AHSN works in partnership with the Centre for Implementation Science, University of Southampton, to evaluate and inform implementation of innovation. Through our networks of contacts and in house expertise, we have the ability to undertake adoption reviews with local organisations to understand how an organisation identifies, debates and adopts new innovations in support of your specification.

Mobilisation and Planning.

We will mobilise early in January to agree the parameters and expectations for this work and to establish governance, accountability and regular reporting.

In the development of the detailed project plan, we will undertake stakeholder mapping to describe the key people that will need to be engaged to understand their views on the development and implementation of innovation, and regulatory sandboxing. The plan, which we will produce within three weeks, will provide details of the research terms for the two literature reviews and it will also set out dates for the facilitated workshops we see as being key to the co-production of both the set of principles for assessing innovation and also for the appraisal of alternative options for regulatory sandboxing.

It is critical to identify and engage with a suitably representative range of stakeholders.
Wessex

AHSN is a member led organisation involving commissioners, provider trusts and universities. It

actively cultivates networks for innovation development and implementation. Core to the

AHSN's license with NHS England and the Office for Life Sciences is the requirement for all AHSNs to enable the spread and adoption of innovation. Wessex AHSN is one of 15 regional membership networks and has links with all of the Networks that can be drawn upon in this research work. The strategic priorities for WAHSN match well to the requirements for this project:

- Roll out and spread nationally of the locally identified innovations
- Uptake of the Innovation and Technology Tariff products
- Roll out of Innovation and Technology Payment endorsed products

WAHSN recognises the need to support innovation from both the "supply side" and "demand side", i.e. those creating innovations (e.g. innovators, SME's, clinicians, academics etc.) and organisations adopting innovation (e.g. acute hospitals).

Lots of the innovators in the AHSN network already test their innovations in a standard sandbox environment, so as part of this work we would use these existing relationships to gain a broad spectrum of insight on the topic of regulatory sandboxing.

There are two main deliverables:

- Firstly, to develop a set of principles that can be used to assess how well health and social care providers are achieving the development and implementation of innovation;
- Secondly, to develop options and recommendations for regulatory sandboxing.

We will develop these deliverables through two parallel and related workstreams.

Workstream 1: Developing Principles for Innovation

The first of these deliverables matches perfectly to the Catalyze Decision Sciences method. We prepare the evidence base to inform a stakeholder workshop where we create debate around the elements of value grounded in pragmatic experience.

The literature reviews and the stakeholder interviews which lead to the facilitated stakeholder workshop will be driven by Catalyze and guided by Wessex AHSN. Stakeholder interviews will be carried out in person, by telephone or by skype.

In the preparatory phase we will identify and produce an evidence review on the development and implementation of (technological) innovation in health and social care through a synthesis of 2 sources of evidence:

1. A rapid evidence review of published evidence
2. A wider review of best practice from our networks

Rapid reviews are a form of evidence synthesis that provide more timely information for decision making compared with standard systematic reviews. This type of review can be undertaken within your timeframe to enable delivery of the draft output by 10 April 2019. Whilst literature sources are necessarily limited by the time constraints associated with this method, we will provide a transparent process, providing a list of databases searched, search terms, data extraction template, and quality assessment criteria. Using the EBSCO platform via the University of Southampton library, academic literature will be sought on MEDLINE, EMBASE, CINAHL Web of Science, Wiley online library and NIHR Innovation Observatory on the areas of enquiry. Other published reports (e.g. Health Foundation) will support this part of the review. We will also have regard to any preliminary research already undertaken by CQC and your guidance on appropriate literature sources. Reporting of the academic literature will be guided by a recognised framework, PRISMA. We may also use the CASP (Critical Appraisal Skills Programme) tool to critically appraise specific forms of evidence in the literature.

Through experience, we know that some of the best evidence isn't published in peer reviewed journals and would use the extensive networks of Wessex AHSN and our own team to identify and understand these. Wessex AHSN can provide access to its network of 15 AHSNs which is a good source of information on evidence, policy and practice in the development and implementation of innovation from those working closely with industry, NHS, social care and academia. Wessex AHSN is also a regular contributor to the FutureNHS Collaboration Platform that regularly shares information about adoption and spread of innovation.

The workshop itself will be facilitated by Catalyze. We will work with CQC to ensure that a good selection of stakeholder representatives are able to contribute. In the workshop we co-create a "value tree" to show how the principles emerge from the evidence base and

following that we develop assessment approaches based on the value tree which, for each element of value, describes a scale from “rudimentary” to “exemplary”.

Preparatory work

- Evidence Review
- Stakeholder Interviews

Stories to Value

- To co-create the “value criteria” in the context of innovation

Grouping and Sensemaking

- To refine and group the “value criteria” into the “value tree for innovation”

Assessment Approaches

- To provide short working definitions for the value criteria
- To co-create examples (both rudimentary and exemplary) and to use these end points to develop an assessment scale.

Following the workshop, we develop a maturity matrix based on the assessment approaches. This maturity matrix will be tested and refined with some stakeholders and via review from the Wessex AHSN. Along with the evidence review, this maturity matrix is a product from this first area of work.

This method is inclusive and evidence based. The Decision Sciences method takes complex problems and breaks them down to meaningful constituent parts and, working with stakeholders, we build consensus through facilitated engagement as we reassemble the constituent parts. Our method involves making sure that people are informed by the most comprehensive evidence base, as they engage in debating specific points of importance grounded in pragmatism to determine the relative importance of all relevant factors.

A good set of principles should:

- Be aligned to strategic priorities and objectives
- Be specific, meaningful and easy to understand
- Be complete
- Be concise - requisite in number, non-overlapping
- Differentiate in a way that matters
- Support evaluation through the assessment of relative levels of attainment

Second Workstream: Regulatory Sandboxing

For the second workstream the Wessex AHSN will also provide guidance on search terms, publications for review and, crucially, the non-peer reviewed literature that is relevant to the topic. This second literature review will also be driven by Catalyze, following the same principles as the first one, but it will look to domains other than health (including but not limited to fintech and the energy sector) and also to other jurisdictions for examples. Ofgem's work in regulatory sandboxing is particularly interesting and may prove to be more closely aligned to a health and care context. We will draw out the parallels across sectors and across jurisdictions to articulate the potential hurdles for application in healthcare (along with possible ways to address the hurdles). This is why cross-sector international expertise is so valuable: Catalyze is vastly experienced in developing the understanding of what works elsewhere (and why) and how that might be applied in a different context.

Catalyze is a company that works with domain experts to develop options and to explore the relative merits of those options. The core application of decision sciences is in the appraisal of options – especially including the non-financial non-measurable benefits alongside the costs.

We will develop regulatory sandboxing options with expert stakeholder input for CQC to review. This will be in advance of an options appraisal workshop involving stakeholder representatives where the options with their associated costs and benefits will be tested and ranked according to the principles that were developed in the first workstream. Where possible the stakeholders involved in the options appraisal workshop will be the same as those involved in the interviews.

Please note that the two workshops we propose are the best way to engage stakeholders and they provide a robustness and democratic accountability to the process. We expect that the workshops will involve up to 20 people and they will be held at a venue to be provided by the CQC. There is a major benefit to the CQC in hosting stakeholders at such a workshop and it is very much aligned with the strategic priority of encouraging innovation.

The deliverables will comprise:

1. The Evidence Base Review for Development and Implementation of Innovation
2. A description of the decision science method to generate the principles for innovation
3. A "Maturity Matrix" showing how the principles can be used for the assessment of innovation
4. The Evidence Base Review for Regulatory Sandboxing
5. A Description of Method for the generation of Regulatory Sandboxing

Options

6. An Options Appraisal with preferred options for Regulatory Sandboxing
7. A Summary Presentation of the project to be used at a workshop with CQC for a discussion of findings and knowledge transfer.

Item 3 will be in Excel. The other items will be in pdf format based on standard Microsoft Office tools.

We are happy to attach a recent report which was warmly received by the Healthy

London Partnership which demonstrates the Decision Science Method applied to generate principles to determine the "system value" offered by alternative Primary

Care Mental Health Models within the context of an economic evaluation. This includes a description of the "value tree" for the context of Primary Care Mental

Health and how this is then developed into a "maturity matrix" which is then used as part of an assessment of the alternative models of care. (See pp 62-70 in the file

Example 1. Economic Evaluation PCMH 2018)

The Maturity Matrix will be a tool that CQC could deploy very easily to evaluate the strength of innovation development within a health and care organisation. It will have a number of dimensions (each dimension corresponding to a principle from the first workshop) and a rating system within each of those dimensions.

The HLP report also includes a cost-benefit appraisal of each care model. We would apply this cost-benefit method to the options generated for regulatory sandboxing.

We also attach a shorter report where a similar method was used to generate templates for the evaluation of winter pressure schemes for Lincolnshire STP. Co-producing a

concept of “value in context” and then developing an evaluation template is readily applicable in this CQC context. (Please see the file Example 2.

1. INTRODUCTION

This Schedule 8 covers:

- 1.1 principles of security for the Contractor System, derived from HMG Security Policy Framework, including without limitation principles of physical and information security;

1.2 wider aspects of security relating to the Services;

1.3 the creation of the Security Plan;

1.4 audit and testing of the Security Plan; and

1.5 breaches of security.

2. PRINCIPLES OF SECURITY

2.1 The Contractor acknowledges that the Authority places great emphasis on confidentiality, integrity and availability of information and consequently on the security of the Premises and the security for the Contractor System. The Contractor also acknowledges the confidentiality of Authority Data.

2.2 The Contractor shall be responsible for the security of the Contractor System and shall at all times provide a level of security which:

2.2.1 is in accordance with Good Industry Practice and Law;

2.2.2 complies with HMG Security Policy Framework; and

2.2.3 meets any specific security threats to the Contractor System.

2.3 Without limiting paragraph 2.2, the Contractor shall at all times ensure that the level of security employed in the provision of the Services is appropriate to maintain the following at acceptable risk levels (to be defined by the Authority):

2.3.1 loss of integrity of Authority Data;

2.3.2 loss of confidentiality of Authority Data;

- 3.3 Prior to the Commencement Date the Contractor will deliver to the Authority for approval the final Security Plan which will be based on the draft Security Plan set out herein.
- 3.4 If the Security Plan is approved by the Authority, it will be adopted immediately. If the Security Plan is not approved by the Authority the Contractor shall amend it within 10 Working Days of a notice of non-approval from the Authority and re-submit to the Authority for approval. The Parties will use all reasonable endeavours to ensure that the approval process takes as little time as possible and in any event no longer than 15 Working Days (or such other period as the Parties may agree in writing) from the date of its first submission to the Authority. If the Authority does not approve the Security Plan following its resubmission, the matter will be resolved in accordance with clause 19 (Dispute Resolution). No approval to be given by the Authority pursuant to this paragraph 3.4 may be unreasonably withheld or delayed. However any failure to approve the Security Plan on the grounds that it does not comply with the requirements set out in paragraphs 3.1 to 3.4 shall be deemed to be reasonable.
- 3.5 The Security Plan will set out the security measures to be implemented and maintained by the Contractor in relation to all aspects of the Services and all processes associated with the delivery of the Services and shall at all times comply with and specify security measures and procedures which are sufficient to ensure that the Services comply with:

- 3.7 If there is any inconsistency in the provisions of the above standards, guidance and policies, the Contractor should notify the Authorised Representative of such inconsistency immediately upon becoming aware of the same, and the Authorised Representative shall, as soon as practicable, advise the Contractor which provision the Contractor shall be required to comply with.
- 3.8 The Security Plan will be structured in accordance with ISO/IEC27002 and ISO/IEC27001 or other equivalent policy or procedure, cross-referencing if necessary to other schedules of the Contract which cover specific areas included within that standard.

The Authority may notify the Contractor of the results of such tests after completion of each such test. Security Tests shall be designed and implemented so as to minimise the impact on the delivery of the Services.
- 5.3 Where any Security Test carried out pursuant to paragraphs 5.1 or 5.2 reveals any actual or potential security failure or weaknesses, the Contractor shall promptly notify the Authority of any changes to the Security Plan (and the implementation thereof) which the Contractor proposes to make in order to correct such failure or weakness. Subject to Approval in accordance with paragraph 4.3, the Contractor shall implement such changes to the Security Plan in accordance with the timetable agreed with the Authority or, otherwise, as soon as reasonably possible.  - 6.2.4 investigate the incident and produce a detailed report for the Authority within 5 working days of the discovery of the incident.
- 6.3 Such steps shall include any action or changes reasonably required by the Authority. If such action is taken in response to a breach that is determined by the Authority acting reasonably not to be covered by the obligations of the Contractor under the Contract, then the Contractor shall be entitled to refer the matter to the variation procedure set out in the Contract.
- 6.4 The Contractor shall as soon as reasonably practicable provide to the Authority full details (using such reporting mechanism as may be specified by the Authority from time to time) of such actual, potential or attempted breach and of the steps taken in respect thereof.

7. CONTRACT EXIT – SECURITY REQUIREMENTS

In accordance with clause H7 of the Contract, on termination of the Contract, either via early termination or completion of the Contract then the Contractor will either return all data to the Authority or provide a certificate of secure destruction using an industry and Authority approved method.
