Schedule 1 - Services

1. Executive Summary

1.1. We have identified a short to medium term gap in both capability and capacity to support the delivery of CQC's strategic change portfolio which covers a range of transformation initiatives including, but not limited to the Registration, Monitor, Inspect & Rate and Digital programmes. We are seeking approval to bring in professional services to support the effective agile delivery of this portfolio, ensuring products and services are delivered on time and within budget and all anticipated benefits are realised. Fundamentally, the requirement splits down into two primary components, the first is to support CQC in establishing the methods and practice needed to deliver change well and the second element is focussed on providing the necessary capacity and capability to deliver the change commitments up to the point that internal restructures complete.

Background

1.2. Over the course of the last twelve months CQC has focussed on creating some of the foundations needed to realise the ambitions set out in the 'Shaping our Future' strategy 2016-21. This work has generated:

- A Target Operating Model Roadmap which sets out the nature and sequence of change that CQC needs to make over the next three years in order to deliver the strategy.
- Digital and Intelligence Priorities that respond to and enable this change, with a budget of £X million to support delivery over the next 3 years.
- A Governance Model that encompasses a portfolio level board (Strategic Change Committee) that is responsible for overseeing effective delivery of the integrated roadmap, coupled with a series of programme boards that are each designed to be accountable for the delivery of constituent strands of roadmap activity. The programme boards include:
 - Registration
 - Monitor
 - Inspect & Rate
 - Digital (To be established)

CQC also has a Resources Committee (RC) that is responsible for ensuring that changes represent value for money and that workforce and people implications are adequately managed.

- 1.3. What this work has demonstrated is the scale and ambition of change that is required to deliver the strategy and that we are in fact embarking on a significant and complex transformation programme.
- 1.4. Such a programme will necessitate new ways thinking and working across the organisation. This will include how we design changes in the future, thinking about them as user focussed products and services, whilst also recognising that we will need to deliver such changes in a more agile and incremental way focussing on delivering value early on.
- 1.5. We are part way through two major restructures to secure the capacity and capability in the Digital and Strategic Planning and Change functions to align to new ways of working and deliver this programme well. However, this transformation is already underway and we find ourselves in the position whereby until roles are recruited to, we lack the necessary resources to drive effective management, oversight and delivery of the transformation programme as a whole.
- 1.6. As a result we find ourselves in a position where:
- We have no consistent way of monitoring and controlling programme and project performance across the portfolio.

- We lack standardised project management methods across the organisation, including a set of standards that are appropriate for agile delivery, this has made it difficult for us to adopt agile delivery within a project and programme setting.
- Project managers leverage various tools for tracking projects and tend to focus on the delivery of milestones as opposed to measuring progress against objectives.
- Costs, benefits and outcomes are tracked inconsistently at various levels of detail with no clear lines of accountability or delegated authority. In addition benefits and outcomes are often ill defined at the outset and do not translate through into delivery.

1.7. Without robust and consistent practices in place there is a risk that we will deliver changes that exceed budget and timescale tolerances and deliver little if any benefit to CQC.

1.8. As such we are seeking to procure professional services to support us in a designing, establishing and operating a single PMO function for a period of 6-12 months until internal resources are recruited and embedded in the Strategic Planning & Change function. The support requirements would specifically cover three phases; 1) Conceptual Design 2) Practical Management & Training 3) Transition & Handover.

2. The Requirement

Phase 1: Conceptual Design

Design and embed an Enterprise PMO model that provides;

- **Change Framework**– create a framework with clear lines of accountability built around the delivery of benefits and outcomes whereby decisions are taken by the right people with the right information at the right time and that this integrates with our existing governance model.
- **Transparent Reporting** – create metric and reporting practices that culminate to provide a single source of the truth and enable effective decision making. We require meaningful and accurate information that allows us to establish progress and value delivered at a project, programme and portfolio level.
- **Reusable Methods and Practice** – we have a diverse portfolio of change that is heavily geared towards digital transformation but we have no consistent and repeatable methods or tools to aid project delivery. We require support to create and embed a blended approach which takes elements of best practice from MSP and agile scrum.

Phase 2: Practical Management & Training

In addition to the resources that are required to deliver the Conceptual Design requirements, we will need resources to be able to operate and manage the outputs in live until all internal roles are recruited to and embedded (6 months – however, to note there are some internal resources in place that external resources will need to work effectively alongside during this period. A **significant element** of this requirement will be to not only provide capacity, but to undertake skills transfer and build capability in a new and continuously forming internal team. We anticipate the resource requirements at a minimum to include the following roles but will need the facility to be able to call on additional expertise following the outputs generated under the Conceptual Design phase should we need to:

- **Programme Director** – We have identified a new and additional requirement for a Programme Director to drive and oversee delivery of a critical strategic programme (Registration). This programme is a fundamental enabler of CQC's wider transformation agenda but is currently failing to make material delivery progress. We will require this resource early within the contract start date.
- **Portfolio Manager** - facilitate the development and on-going management of an optimised portfolio that is aligned to the delivery of strategic objectives and outcomes, ensuring senior

management decisions lead to the fulfilment of strategic objectives through delivery of programmes and projects.

- **Reporting Role** – provides a reporting service, collates base data and generates reports to multiple audiences through aggregated data.
- **Benefits Role** - provides a benefit realisation support service to SRO's, programmes and project teams.
- **Coaching & Assurance role** - Upskills current team members and any new recruits in methods and practice, supports and quality assures at critical points across the delivery cycle.
- **Programme Manager** - To further scope, plan and deliver current known priority programme (Monitor).
- **Senior Project Manager** - Provide planning and delivery support to a series of linked projects within an existing programme (Inspect & Rate).

Phase 3: Transition & Handover

We recognise that it will take time to recruit individuals to permanent positions within the PMO function and embed them to be able to operate effectively within the team. As such we require a clear transition plan which sets out a robust strategy for skills transfer, handover and exit as highlighted under Phase 2.

Skills and Knowledge Transfer

A core aim of this activity is to upskill CQC's new staff and forming PMO in effective change management and delivery so that individuals possess the necessary knowledge and skills required to deliver a significant transformation programme over the next three years

Knowledge transfer from the contractor to CQC should take place at regular intervals through the development of the required outputs, exact frequency to be determined.
