The renewal of your Nuix contract is an ideal time to evaluate your investment in Nuix and ensure you are getting the most out of your Nuix tools and implementation. It is also important to assess how Nuix can help you more effectively tackle your most challenging data concerns and maximize the value that our products can provide.

To ensure we meet your evolving business requirements, we would like to work closely with you during your contract renewal to:

- » Better understand how you are using Nuix in your business
- » Evaluate any changes to your business requirements
- » Update you about our current solutions and expertise.

I look forward to working together with you to make sure you have the right Nuix solutions in place to ensure your continued success. At Nuix, it's important to each and every one of us to continue to meet all of our customers' business needs with the highest-quality solutions and support available.

To help make your renewal process as smooth and efficient as possible, I've provided some options over the following pages based on your current Nuix deployment. Please do not hesitate to reach out to me directly with any questions you might have.

Please be sure to place your renewal order soon to avoid any interruption in service.

Thank you,

## Expand Your Capabilities

Based on Care Quality Commissions' current investment, there are a number of options available to grow your Nuix capabilities and take advantage of our powerful technology. Below is an example of some of these options. If you would like to discuss any of these solutions, please let me know and I'll be happy to go over how each of them can help you to conquer your unique data challenges.

## What's New with Nuix

### Nuix Partners with MSAB for Mobile Phone Investigations

Nuix and MSAB, a pioneer in mobile device forensic examination, have joined forces to focus on harmonizing the Nuix digital investigation platform with MSAB's suite of market-leading mobile forensics solutions.

### Nuix in the Cloud

The configurability & automation of cloud complements the level of control available in Nuix. We are combining the worker-side scripting functions of Nuix with cloud machine learning, enabling us to assess masses of data for known characteristics in hours, not days. We have explored the benefits of Elasticsearch with Nuix in AWS and found that our ingestion rates were increasing 300% (that's not a typo!).

### Nuix for GDPR

The May 25, 2018 deadline for compliance with the EU General Data Protection Regulation (GDPR) is quickly approaching, and all organizations that retain personal information of any EU individuals must take action in order to comply.
