Section 4 – Specification and about this procurement

1. Introduction

The Biotechnology and Biological Sciences Research Council (BBSRC), EPSRC and Innovate UK supported a significant programme of investment in industrial biotechnology and bioenergy through the Industrial Biotechnology [\(IB\) Catalyst](#) as well as the [Networks in Industrial Biotechnology and Bioenergy \(NIBBs\)](#).

UKRI-BBSRC, on behalf of all other funding partners involved, would like to invite tenders for a co-ordinator/s who will play a key role in supporting the monitoring of the IB Catalyst Translation awards and the coordination of activities relating to the BBSRC NIBB into wider UK IB activities.

The IB Catalyst was established in 2014 to support the development of research outcomes into new industrial biotechnology processes and products. The IB Catalyst and BBSRC NIBB Coordinator will be actively involved in monitoring project progress through attending project meetings and is also responsible for reporting issues and significant outcomes to BBSRC. As part of the monitoring of the IB Catalyst Translation awards the coordinator(s) will enable better industrial engagement and sustainability beyond the lifetime of the grant towards more robust commercial impact from the research.

The second phase of the BBSRC NIBB will be tasked with building on the momentum and achievements so far whilst considering how to move the area of industrial biotechnology and bioenergy (IBBE) towards realisation of biotechnological solutions for UK-based manufacturing, by utilising the excellent UK science base.

The majority of research projects funded by the BBSRC NIBB Phase I are situated around Technology Readiness Level (TRL) 1-2. It is anticipated the next phase of the Networks should be looking to move activities more towards TRL 3-4 where possible.

The BBSRC NIBB Phase II activities should coordinate with other relevant research programmes such as the Supergen Bioenergy Hub, SPF Greenhouse Gas Demonstrator project, ISCF Decarbonising Industrial Clusters, ISCF Smart Sustainable Plastic Packaging and the Future Biomanufacturing Research Hub. The role of the Coordinator will be to support the BBSRC NIBB in linking in to these other research programmes to maximise the application of the expertise within the Networks to address these common challenges and that other programmes can make best use of the BBSRC NIBB activities and expertise.

2. Aims

We invite tenders for a co-ordinator(s) to undertake the following:

- Ensure the impact of the UKRI-BBSRC investments through the IB Catalyst and the BBSRC NIBB phase II are maximised through supporting the translation of research towards commercialisation and the relevant UK activities in IB are coordinated linking expertise.
- Gather evidence of impact and support the dissemination of outputs of these investments.

- Provide UKRI-BBSRC independent strategic advice in the context of UK biomanufacturing.

3. Objectives

Monitor the progress of UKRI - BBSRC investments through the IB Catalyst Translation and BBSRC NIBB II awards.

Disseminate the outputs of these investments.

Link together expertise by coordinating UKRI funded activities relevant to UK biomanufacturing and clean growth.

Support the progression of research up TRLs by encouraging and enabling industrial engagement and supporting the development of collaborative research projects.

Gather evidence to better understand how bioscience is being used in UK manufacturing and how UKRI-BBSRC funded research is contributing to innovation in the IBBE area and provide an understanding with respect to an international context.

OUTPUTS

UKRI-BBSRC receives up to date formal report every 6 months on the progress of UKRI-BBSRC investments and impact on UK biomanufacturing. The format and delivery method of reports will be agreed with the supplier in the initial implementation meeting

BBSRC NIBB II funded projects progress the research further along the TRLs.

Improved national coordination of activities and investments in this area

Better engagement between the research community with policy makers and regulators

Case studies to demonstrate the impact of funded work through the IB Catalyst and NIBB mechanisms

A progress report to provide input to future strategy and the design and implementation of future funding programmes.

Providing strategic advice to UKRI-BBSRC to support next steps for supporting research and innovation towards clean growth.

An event jointly delivered with UKRI-BBSRC to showcase the outputs of the IB Catalyst translation awards and other relevant investments.

4. Background to the Requirement

IB Catalyst

£76M was awarded through the Industrial Biotechnology Catalyst by funders (BBSRC, EPSRC, IUK) to 82 projects over four funding rounds between 2014 and 2016. Awards were made across 5 streams from Early Stage Translation to Late Stage Experimental and have been monitored either through Innovate UK monitoring processes or in the case of the 15 Translational awards through the IB Catalyst Coordinator. As a condition of awarded grants the project leaders are required to complete an annual report outlining progress against work packages and any significant outcomes. The Translation awards will all be completed by early 2022 and therefore a key objective of the IB Catalyst coordinator will be to ensure the successful dissemination of the outputs from the IB Catalyst projects.

Further information on the IB Catalyst Translation awards can be found at <https://bbsrc.ukri.org/documents/ib-catalysts-funded-grants-pdf/>

BBSRC NIBB

The BBSRC NIBB foster collaborations between academia, industry, policy makers and National Government Organisations (NGOs) in order to find new approaches to tackle research challenges, translate research and deliver key benefits in IBBE.

In 2014, BBSRC invested £18M (including £1M from EPSRC) in the first phase of Networks in Industrial Biotechnology and Bioenergy (BBSRC NIBB). The 13 Networks worked across the boundaries of biology, chemistry and engineering with participation from other disciplines strongly encouraged. There are currently over 6000 members of which 996 come from industry. Overall there were 625 proof of concept and business interaction vouchers awarded involving 269 industrial partners.

In 2018, a further £11M (including £1.1M from EPSRC) was approved for a second phase of networking activity in IBBE which was committed to fund six Phase II networks. The Phase II Networks will be tasked with building on the success of Phase I activities whilst also moving their areas of research further towards translation and higher TRLs. Each phase II Network has a particular focus area, mainly within the UK, but with interest to build international links.

The BBSRC NIBB in phase II aim to achieve the following outcomes based on successful networking during 2019-2024:

- Key science areas generate a range of novel and exciting science and technology relevant to IBBE, maintaining momentum from Phase I.
- The majority of research projects funded by BBSRC NIBB Phase 1 were around Technology Readiness Level (TRL) 1-2. It is anticipated the next phase of the Networks should move some of these projects towards TRL 3-4 where possible.
- Further high quality collaboration with demonstrable follow-on funding across multiple sponsors
- Greater and fuller industrial engagement, especially with companies engaged with biotechnology for the first time, leading to biotechnological solutions to key manufacturing problems
- Growth in international profile of the UK and UK as international partner of choice for

collaboration.

- Companies make inward investment to the UK for the purposes of R&D, followed by manufacturing, leading to new jobs, further employment and UK economic growth
- UK becomes international locus for revolutionising chemicals industry, establishing the circular bioeconomy (for C emission reduction) and for efficient biopharmaceuticals manufacture (biologics, vaccines)
- Impact of the BBSRC NIBB and their leaders can be clearly defined, demonstrated and linked to the Networks

Further information on the BBSRC NIBB Phase II can be found at

<https://bbsrc.ukri.org/research/programmes-networks/research-networks/nibb/>

Award Scoring criteria

Evaluation Justification Statement

In consideration of this particular requirement the Contracting Authority has decided to evaluate Potential Providers by adopting the weightings/scoring mechanism detailed within this RFP. The Contracting Authority considers these weightings to be in line with existing best practice for a requirement of this type.

Questionnaire	Q No.	Question subject	Maximum Marks
Price	AW5.2	Price	20%
Quality	PROJ1.1	Understanding	5%
Quality	PROJ1.2	Project Plan and Timescales	10%
Quality	PROJ1.3	Risk Management	5%
Quality	PROJ1.4	Methodology	30%
Quality	PROJ1.5	Project Team and Capability to Deliver	10%
Quality	PROJ1.7	Interview	20%

Award Evaluation of criteria

Non-Price elements

Each question will be judged on a score from 0 to 100, which shall be subjected to a multiplier to reflect the percentage of the evaluation criteria allocated to that question.

Where an evaluation criterion is worth 20% then the 0-100 score achieved will be multiplied by 20%.

Example if a Bidder scores 60 from the available 100 points this will equate to 12% by using the following calculation:

$$\text{Score} = \{\text{weighting percentage}\} \times \{\text{bidder's score}\} = 20\% \times 60 = 12$$

The same logic will be applied to groups of questions which equate to a single evaluation criterion.

The 0-100 score shall be based on (unless otherwise stated within the question):

0	The Question is not answered, or the response is completely unacceptable.
10	Extremely poor response – they have completely missed the point of the question.
20	Very poor response and not wholly acceptable. Requires major revision to the response to make it acceptable. Only partially answers the requirement, with major deficiencies and little relevant detail proposed.
40	Poor response only partially satisfying the selection question requirements with deficiencies apparent. Some useful evidence provided but response falls well short of expectations. Low probability of being a capable supplier.
60	Response is acceptable but remains basic and could have been expanded upon.

	Response is sufficient but does not inspire.
80	Good response which describes their capabilities in detail which provides high levels of assurance consistent with a quality provider. The response includes a full description of techniques and measurements currently employed.
100	Response is exceptional and clearly demonstrates they are capable of meeting the requirement. No significant weaknesses noted. The response is compelling in its description of techniques and measurements currently employed, providing full assurance consistent with a quality provider.

All questions will be scored based on the above mechanism. Please be aware that there may be multiple evaluators. If so, their individual scores will be averaged (mean) to determine your final score as follows:

Example

Evaluator 1 scored your bid as 60
 Evaluator 2 scored your bid as 40
 Evaluator 3 scored your bid as 80
 Evaluator 4 scored your bid as 60
 Your final score will $(60+40+80+60) \div 4 = 60$

Price elements will be judged on the following criteria.

The lowest price for a response which meets the pass criteria shall score 100.

All other bids shall be scored on a pro rata basis in relation to the lowest price. The score is then subject to a multiplier to reflect the percentage value of the price criterion.

For example - Bid 1 £100,000 scores 100.

Bid 2 £120,000 differential of £20,000 or 20% remove 20% from price scores 80

Bid 3 £150,000 differential £50,000 remove 50% from price scores 50.

Bid 4 £175,000 differential £75,000 remove 75% from price scores 25.

Bid 5 £200,000 differential £100,000 remove 100% from price scores 0.

Bid 6 £300,000 differential £200,000 remove 100% from price scores 0.

Where the scoring criterion is worth 50% then the 0-100 score achieved will be multiplied by 50

In the example if a supplier scores 80 from the available 100 points this will equate to 40% by using the following calculation: $\text{Score/Total Points} \times 50$ ($80/100 \times 50 = 40$)

The lowest score possible is 0 even if the price submitted is more than 100% greater than the lowest price.

5.5. Evaluation process

5.5.1 The evaluation process will feature some, if not all, the following phases

Stage	Summary of activity
Receipt and Opening	<ul style="list-style-type: none"> RFP logged upon opening in alignment with UK SBS's procurement procedures. Any RFP Bid received after the closing date will be rejected unless circumstances attributed to the Contracting Authority or the e-sourcing tool beyond the bidder control are responsible for late submission.
Compliance check	<ul style="list-style-type: none"> Check all Mandatory requirements are acceptable to the Contracting Authority.

	<ul style="list-style-type: none"> Unacceptable Bids maybe subject to clarification by the Contracting Authority or rejection of the Bid.
