- (a) identify any risks from climate change and variable weather such as higher temperatures, droughts, flooding, sea and river level rises, coastal and riparian erosion, water scarcity, and loss of water quality which may disrupt and/or affect the supply of the Services; and
 - (b) if such risks have been identified, enhance the resilience of its organisation to enable it to adapt and deal with the effects of such extreme events, including by having the necessary awareness-raising, evaluation, preventive, preparatory, recovery measures

and support systems in place in order to minimise any disruption to the supply of the Services.

D5 Timber

D5.1 For the purposes of this clause D6, the following terms shall have the following meanings:

- (a) “Timber” means any product that contains wood or wood fibre, with the exception of “recycled” materials (see below). Such products range from solid wood to those where the manufacturing processes obscure the wood element (e.g. paper). Timber and wood-derived products supplied or used in performance of the Services that have been recycled or reclaimed are referred to as “recycled” timber, which is defined below. Timber and wood-derived products supplied or used in performance of the Services that are not recycled are referred to as “virgin” timber when the distinction needs to be made for clarity. Short-rotation coppice is exempt from the requirements for timber and wood-derived products and falls under agricultural regulation and supervision rather than forestry.
- (b) “Legal and Sustainable” means production and process methods, also referred to as timber production standards, and in the context of social criteria, contract performance conditions (only), as defined by the document titled “UK Government timber procurement policy: Definition of Legal and Sustainable for timber procurement” (available from the Authority on request and from the CPET website). The edition current on the day the Contract is awarded shall apply.
- (c) “FLEGT” means Forest Law Enforcement, Governance and Trade, and is a reference to the EU scheme to address the problem of illegally logged timber.
- (d) “FLEGT-licensed” means production and process methods, also referred to as timber production standards, and in the context of social criteria, contract performance conditions (only), as defined by a bilateral Voluntary Partnership Agreement (“VPA”) between the European Union and a timber-producing country under the FLEGT scheme, where both Parties have agreed to establish a system under which timber that has been produced in accordance with the relevant laws of the producing country, and other criteria stipulated by the VPA, are licensed for export by the producing country government. This may also include any timber that has been independently verified as meeting all the producing country’s requirements for a FLEGT licence, where a VPA has been signed but the FLEGT licensing system is not fully operational. Evidence from a country that has not signed up to a VPA which demonstrates that all of the requirements equivalent to FLEGT-licensed timber have been met will also be acceptable. CPET will produce further guidance on FLEGT-licensed or equivalent timber in due course.
- (e) “Recycled” means recovered wood that prior to being supplied to the Authority had an end use as a standalone object or as part of a structure. The term “recycled” is used to cover the following categories: pre-consumer recycled wood and wood fibre or industrial by products but excluding sawmill co-products (sawmill co-products are deemed to fall within the category of virgin timber), post-consumer recycled wood and wood fibre, and drift wood. It also covers reclaimed timber which was abandoned or confiscated at least ten years previously. Documentary evidence and independent verification also apply to recycled materials, but will focus on the use to which the timber was previously put rather than the forest source.
- (f) “Short-rotation coppice” means a specific management regime whereby the poles of trees are cut every one to two years and which is aimed at producing biomass for energy. It is exempt from the UK government timber procurement policy requirements and falls under agricultural regulation and supervision rather than forestry. The exemption only refers to short-rotation coppice, and not ‘conventional’ coppice which is forest management and therefore subject to the timber policy.
- (g) “CPET” means the UK Government’s Central Point of Expertise on Timber.

- D5.2 All Timber supplied or used by the Contractor in providing the Services (including all Timber supplied or used by Sub-Contractors) shall comply with Schedule 1 and shall originate from a forest source where management of the forest has full regard for:
- (a) identification, documentation and respect of legal, customary and traditional tenure and use rights related to the forest;
 - (b) mechanisms for resolving grievances and disputes including those relating to tenure and use rights, to forest management practices and to work conditions; and
 - (c) safeguarding the basic labour rights and health and safety of forest workers
- (the "Social Criteria").
- D5.3 If requested by the Authority and not already provided in its Tender, the Contractor shall give the Authority evidence that the Timber supplied or used in providing the Services complies with the requirements of Schedule 1 and with the requirements of the Social Criteria.
- D5.4 The Authority may at any time during the Contract Period and for 6 years after final delivery under the Contract require the Contractor to produce the evidence required for the Authority's inspection within 14 days of the Authority's written request.
- D5.5 The Contractor shall maintain records of all Timber delivered to and accepted by the Authority for 6 years from final delivery under the Contract.
- D5.6 The Authority shall decide whether the evidence submitted to it demonstrates legality and sustainability, or FLEGT-licence or equivalent, and is adequate to satisfy the Authority that the Timber complies with Schedule 1 and complies with the requirements of the Social Criteria. If the Authority is not satisfied, the Contractor shall commission and meet the costs of an "independent verification" and resulting report that will: (a) verify the forest source of the timber or wood; and (b) assess whether the source meets the relevant criteria.
- D5.7 In the Contract, "Independent Verification" means that an evaluation is undertaken and reported by an individual or body whose organisation, systems and procedures conform to ISO Guide 65:1996 (EN 45011:1998) General requirements for bodies operating product certification systems (as amended from time to time) or equivalent, and who is accredited to audit against forest management standards by a body whose organisation, systems and procedures conform to ISO 17011: 2004 General Requirements for Providing Assessment and Accreditation of Conformity Assessment Bodies (as amended from time to time) or equivalent.
- D5.8 The Authority may reject Timber that does not comply with Schedule 1 or with the Social Criteria. If the Authority rejects any Timber the Contractor shall supply alternative Timber which does comply at no additional cost to the Authority and without causing delay to delivery of the Services.

D6 Health and Safety

- D6.1 The Contractor shall perform its obligations under the Contract in accordance with:
- (a) all applicable Law regarding health and safety; and
 - (b) the Authority's health and safety policy while at the Authority's Premises.
- D6.2 Each Party shall notify the other as soon as practicable of any health and safety incidents or material health and safety hazards at the Authority's Premises of which it becomes aware and which relate to or arise in connection with the performance of the Contract. The Contractor shall instruct Staff to adopt any necessary associated safety measures in order to manage any such material health and safety hazards.

F. CONTROL OF THE CONTRACT

F1 Failure to meet Requirements

- F1.1 If the Authority informs the Contractor in writing that the Authority reasonably believes that any part of the Services do not meet the requirements of the Contract or differs in any way from those requirements, and this is not as a result of a default by the Authority, the Contractor shall at its own expense re-schedule and carry out the Services in accordance with the requirements of the Contract within such reasonable time as may be specified by the Authority.

- F1.2 The Authority may by notice to the Contractor reject any of the Goods which fail to conform to the approved sample or fail to meet the Specification. Such notice shall be given within a reasonable time after delivery to the Authority of such Goods. If the Authority rejects any of the Goods pursuant to this clause the Authority may (without prejudice to its other rights and remedies) either:
- (a) have such Goods promptly, free of charge and in any event within 5 Working Days, either repaired by the Contractor or replaced by the Contractor with Goods which conform in all respects with the approved sample or with the Specification and due delivery shall not be deemed to have taken place until such repair or replacement has occurred; or
 - (b) treat the Contract as discharged by the Contractor's breach and obtain a refund (if payment for the Goods has already been made) from the Contractor in respect of the Goods concerned together with payment of any additional expenditure reasonably incurred by the Authority in obtaining other goods in replacement.
- F1.3 The Authority will be deemed to have accepted the Goods if it expressly states the same in writing or fails to reject the Goods in accordance with clause F1.2.
- F1.4 The issue by the Authority of a receipt note for delivery of the Goods shall not constitute any acknowledgement of the condition, quantity or nature of those Goods, or the Authority's acceptance of them.
- F1.5 The Contractor hereby guarantees the Goods against faulty materials or workmanship for such period as may be specified in the Specification or, if no period is specified, for a period of 18 months from the date of delivery. If the Authority shall within such period or within 25 Working Days thereafter give notice to the Contractor of any defect in any of the Goods as may have arisen during such period under proper and normal use, the Contractor shall (without prejudice to any other rights and remedies which the Authority may have) promptly remedy such defects (whether by repair or replacement as the Authority shall elect) free of charge.
- F1.6 Any Goods rejected or returned by the Authority as described in clause F1.2 shall be returned to the Contractor at the Contractor's risk and expense.

F2 Monitoring of Contract Performance

- F2.1 The Contractor shall immediately inform the Authority if any of the Services are not being or are unable to be performed, the reasons for non-performance, any corrective action and the date by which that action will be completed.
- F2.2 At or around 6 Months from the Commencement Date and each anniversary of the Commencement Date thereafter (each being a "Review Date"), the Authority shall carry out a review of the performance of the Contractor ("Checkpoint Review"). Without prejudice to the generality of the foregoing, the Authority may in respect of the period under review consider such items as (but not limited to): the Contractor's delivery of the Services; the Contractor's contribution to innovation in the Authority; whether the Services provide the Authority with best value for money; consideration of any changes which may need to be made to the Services; a review of future requirements in relation to the Services and progress against key milestones.
- F2.3 The Contractor shall provide at its own cost any assistance reasonably required by the Authority to perform such Checkpoint Review including the provision of data and information.
- F2.4 The Authority may produce a report (a "Checkpoint Review Report") of the results of each Checkpoint Review stating any areas of exceptional performance and areas for improvement in the provision of the Services and where there is any shortfall in any aspect of performance reviewed as against the Authority's expectations and the Contractor's obligations under this Contract.
- F2.5 The Authority shall give the Contractor a copy of the Checkpoint Review Report (if applicable). The Authority shall consider any Contractor comments and may produce a revised Checkpoint Review Report.

F2.6 The Contractor shall, within 10 Working Days of receipt of the Checkpoint Review Report (revised as appropriate) provide the Authority with a plan to address resolution of any shortcomings and implementation of improvements identified by the Checkpoint Review Report.

F2.7 Actions required to resolve shortcomings and implement improvements (either as a consequence of the Contractor's failure to meet its obligations under this Contract identified by the Checkpoint Review Report, or those which result from the Contractor's failure to meet the Authority's expectations notified to the Contractor or of which the Contractor ought reasonably to have been aware) shall be implemented at no extra charge to the Authority.

F3 Reporting

F3.1 Unless otherwise authorised in writing by the Authority, the Contractor shall submit an annual report (the "Annual Report") for each Project Year to the Authority in accordance with this clause F3.

F3.2 The Contractor shall provide one hard copy of the Annual Report and one copy on either computer readable disk or e-mail in the format specified by or agreed with the Authority, no later than 4 weeks after the end of each Project Year, or, for work lasting one year or less, no later than 4 weeks after completion of the Services.

F3.3 The Annual Report shall:

- (a) list the scientific objectives set out in the Specification, indicating where amendments have been agreed;
- (b) indicate in non-scientific terms the scientific progress achieved since the Commencement Date or since the last Annual Report; how this relates to the policy objectives as set out in the relevant current statement of policy rationale and programme objectives relating to research and development issued by the Authority in accordance with the Specification, plus any findings of particular interest;
- (c) indicate whether the scientific objectives in the Specification are appropriate for the remainder of the Contract Period, giving reasons for any changes, together with financial, Staff and time implications;
- (d) list the milestones for the relevant Project Year as set out in the Specification, indicating which milestones have been met and whether the remaining milestones appear realistic (subject to clause F4);
- (e) list any outputs, for example, published papers or presentations and identify any opportunities for exploiting any Intellectual Property Rights or technology transfer arising out of the Services and any action taken to protect and exploit such Intellectual Property Rights; and
- (f) comment briefly on any new scientific opportunities which may arise from the Services.

F3.4 Unless Approved, the Contractor shall submit by the completion date of the Services a final report (the "Final Report") consisting of 2 hard copies and one electronic copy on either computer readable disk or by e-mail in a format specified by the Authority. The Final Report shall include the following:

- (a) the Services' code and title as set out in the Specification; the name of the Contractor; the total costs; and the Commencement Date and date of completion of the Services;
- (b) an executive summary of not more than 2 sides of A4 written in a style understandable to the intelligent non-scientist. This should include the main objectives of the Services; the methods and findings of the research; and any other significant events and options for new work; and
- (c) a scientific report.

- F3.5 The scientific report referred to in clause F3.4(c) above shall contain:
- (a) the scientific objectives as set out in the Specification;
 - (b) the extent to which the objectives set out in the Specification have been met;
 - (c) details of methods used and the Results obtained, including statistical analysis where appropriate;
 - (d) a discussion of the Results and their reliability;

 - (f) possible future work; and
 - (g) any action resulting from the research, for example, protection of Intellectual Property Rights and knowledge transfer.
- F3.6 Notwithstanding clause E6 (Publicity, Media and Official Enquiries), the Authority may publish the Final Report on a website. When submitting the Final Report to the Authority the Contractor shall indicate any information contained in the Final Report which it considers to be commercially sensitive or which might otherwise merit non-publication and the Authority shall not disclose such information without first having consulted the Contractor (without prejudice to the Authority's discretion as to whether to publish following such consultation).
- F3.7 The Authority reserves the right to reject any Annual Report or Final Report submitted by the Contractor which is not, in the reasonable opinion of the Authority, satisfactory, either in form or content, having regard to the provisions of this Schedule. If an Annual Report or Final Report is rejected by the Authority, the Contractor shall remedy any deficiencies identified by the Authority and submit a revised version at no additional cost to the Authority or the Co-funders.
- F3.8 The Contractor shall supply any additional reports, including financial reports, in respect of the Services, at such time or times, and in such form, as the Authority may reasonably require. Without prejudice to the generality of the foregoing, the Contractor shall provide to the Authority such information as the Authority may reasonably require regarding commercial exploitation of the Results, including details of any licences granted to third parties in respect of any Intellectual Property Rights in the same. The Contractor shall further keep at its normal place of business detailed accurate and up to date records and accounts showing details of its commercial exploitation of the Results including the sale of products or services which incorporate the Results, Income received, allowable costs deducted and the amount of licensing revenues received by it in respect of the Results in a format sufficient to ascertain that revenue sharing pursuant to the Contract has been properly accounted for and apportioned in accordance with the Contract.
- F3.9 The Contractor shall, subject to reasonable notice, attend all meetings specified in the Contract or otherwise arranged by the Authority for the purpose of discussion of the Services.

F4 Remedies for inadequate performance

- F4.1 If the Authority reasonably believes the Contractor has committed a Material Breach it may, without prejudice to its rights under clause H2 (Termination on Default), do any of the following:
- (a) without terminating the Contract, itself supply or procure the supply of all or part of the Services until such time as the Contractor has demonstrated to the Authority's reasonable satisfaction that the Contractor will be able to supply the Services in accordance with the Specification;
 - (b) without terminating the whole of the Contract, terminate the Contract in respect of part of the Services only (whereupon a corresponding reduction in the Price shall be made) and thereafter itself supply or procure a third party to supply such part of the Services;
 - (c) withhold or reduce payments to the Contractor in such amount as the Authority reasonably deems appropriate in each particular case; and/or

(d) terminate the Contract in accordance with clause H2.

F4.2 Without prejudice to its right under clause C3 (Recovery of Sums Due), the Authority may charge the Contractor for any costs reasonably incurred and any reasonable administration costs in respect of the supply of any part of the Services by the Authority or a third party to the extent that such costs exceed the payment which would otherwise have been payable to the Contractor for such part of the Services.

F4.3 If the Authority reasonably believes the Contractor has failed to supply all or any part of the Services in accordance with the Contract, professional or industry practice which could reasonably be expected of a competent and suitably qualified person, or any legislative or regulatory requirement, the Authority may give the Contractor notice specifying the way in which its performance falls short of the requirements of the Contract or is otherwise unsatisfactory.

F4.4 If the Contractor has been notified of a failure in accordance with clause F4.3 the Authority may:

(a) direct the Contractor to identify and remedy the failure within such time as may be specified by the Authority and to apply all such additional resources as are necessary to remedy that failure at no additional charge to the Authority within the specified timescale; and/or

(b) withhold or reduce payments to the Contractor in such amount as the Authority deems appropriate in each particular case until such failure has been remedied to the satisfaction of the Authority.

F4.5 If the Contractor has been notified of a failure in accordance with clause F4.3, it shall:

(a) use all reasonable endeavours to immediately minimise the impact of such failure to the Authority and to prevent such failure from recurring; and

(b) immediately give the Authority such information as the Authority may request regarding what measures are being taken to comply with the obligations in this clause F4.5 and the progress of those measures until resolved to the satisfaction of the Authority.

F4.6 If, having been notified of any failure, the Contractor fails to remedy it in accordance with clause F4.5 within the time specified by the Authority, the Authority may treat the continuing failure as a Material Breach and may terminate the Contract immediately on notice to the Contractor.

F5 Transfer and Sub-Contracting

F5.1 Except where clauses F5.5 and F5.6 both apply, the Contractor shall not transfer, charge, assign, sub-contract or in any other way dispose of the Contract or any part of it without Approval. All such documents shall be evidenced in writing and shown to the Authority on request. Sub-contracting any part of the Contract shall not relieve the Contractor of any of its obligations or duties under the Contract.

F5.2 The Contractor shall be responsible for the acts and/or omissions of its Sub-Contractors as though they are its own. If it is appropriate, the Contractor shall provide each Sub-Contractor with a copy of the Contract and obtain written confirmation from them that they will provide the Services fully in accordance with the Contract.

F5.3 The Contractor shall ensure that its Sub-Contractors and suppliers retain all records relating to the Services for at least 6 years from the date of their creation and make them available to the Authority on request in accordance with the provisions of clause E10 (Audit). If any Sub-Contractor or supplier does not allow the Authority access to the records then the Authority shall have no obligation to pay any claim or invoice made by the Contractor on the basis of such documents or work carried out by the Sub-Contractor or supplier.

F5.4 If the Authority has consented to the placing of Sub-Contracts, copies of each Sub-Contract shall, at the request of the Authority, be sent by the Contractor to the Authority immediately.

F5.5 Notwithstanding clause F5.1, the Contractor may assign to a third party (the "Assignee") the right to receive payment of the Price or any part thereof due to the Contractor (including any interest which

the Authority incurs under clause C2 (Payment and VAT)). Any assignment under this clause F5.5 shall be subject to:

- (a) reduction of any sums in respect of which the Authority exercises its right of recovery under clause C3 (Recovery of Sums Due);
- (b) all related rights of the Authority under the Contract in relation to the recovery of sums due but unpaid; and
- (c) the Authority receiving notification under both clauses F5.6 and F5.7.

F5.6 If the Contractor assigns the right to receive the Price under clause F5.5, the Contractor or the Assignee shall notify the Authority in writing of the assignment and the date upon which the assignment becomes effective.

F5.7 The Contractor shall ensure that the Assignee notifies the Authority of the Assignee's contact information and bank account details to which the Authority shall make payment.

F5.8 The provisions of clause C2 shall continue to apply in all other respects after the assignment and shall not be amended without Approval.

F5.9 Subject to clause F5.10, the Authority may assign, novate or otherwise dispose of its rights and obligations under the Contract or any part thereof to:

- (a) any Contracting Authority;
- (b) any other body established by the Crown or under statute in order substantially to perform any of the functions that had previously been performed by the Authority; or
- (c) any private sector body which substantially performs the functions of the Authority

provided that any such assignment, novation or other disposal shall not increase the burden of the Contractor's obligations under the Contract.

F5.10 Any change in the legal status of the Authority such that it ceases to be a Contracting Authority shall not, subject to clause F5.11, affect the validity of the Contract and the Contract shall bind and inure to the benefit of any successor body to the Authority.

F5.11 If the rights and obligations under the Contract are assigned, novated or otherwise disposed of pursuant to clause F5.9 to a body which is not a Contracting Authority or if there is a change in the legal status of the Authority such that it ceases to be a Contracting Authority (in the remainder of this clause F5 both such bodies being referred to as the "Transferee"):

- (a) the rights of termination of the Authority in clauses H1 and H2 shall be available to the Contractor in respect of the Transferee; and
- (b) the Transferee shall only be able to assign, novate or otherwise dispose of its rights and obligations under the Contract or any part thereof with the prior consent in writing of the Contractor.

F5.12 The Authority may disclose to any Transferee any Confidential Information of the Contractor which relates to the performance of the Contractor's obligations under the Contract. In such circumstances the Authority shall authorise the Transferee to use such Confidential Information only for purposes relating to the performance of the Contractor's obligations under the Contract and for no other purpose and shall take all reasonable steps to ensure that the Transferee gives a confidentiality undertaking in relation to such Confidential Information.

F5.13 Each Party shall at its own cost and expense carry out, or use all reasonable endeavours to ensure the carrying out of, whatever further actions (including the execution of further documents) the other Party reasonably requires from time to time for the purpose of giving that other Party the full benefit of the provisions of the Contract.

F6 Waiver

- F6.1 The failure of either Party to insist upon strict performance of any provision of the Contract, or the failure of either Party to exercise, or any delay in exercising, any right or remedy shall not constitute a waiver of that right or remedy and shall not cause a diminution of the obligations established by the Contract.
- F6.2 No waiver shall be effective unless it is expressly stated to be a waiver and communicated to the other Party in writing in accordance with clause A4.2 (Notices).
- F6.3 A waiver of any right or remedy arising from a breach of the Contract shall not constitute a waiver of any right or remedy arising from any other or subsequent breach of the Contract.

F7 Variation

- F7.1 Subject to the provisions of this clause F7, the Authority may request a Variation provided that such Variation does not amount to a material change.
- F7.2 The Authority may request a Variation by notifying the Contractor in writing of the Variation and giving the Contractor sufficient information to assess the extent of the Variation and consider whether any change to the Price is required in order to implement the Variation within a reasonable time limit specified by the Authority. If the Contractor accepts the Variation it shall confirm it in writing.
- F7.3 If the Contractor is unable to accept the Variation or where the Parties are unable to agree a change to the Price, the Authority may:
- (a) allow the Contractor to fulfil its obligations under the Contract without the Variation to the Specification; or
 - (b) terminate the Contract immediately except where the Contractor has already delivered all or part of the Services or where the Contractor can show evidence of substantial work being carried out to fulfil the requirements of the Specification; and in such case the Parties shall attempt to agree upon a resolution to the matter. If a resolution cannot be reached, the matter shall be dealt with under the Dispute Resolution procedure detailed in clause I2 (Dispute Resolution).
- F7.4 Any Variation will not take effect unless recorded in a CCN and approved in writing by the Authority.
- F7.5 The provisions of clause F7.4 may be varied in an emergency if it is not practicable to obtain the Authorised Representative's approval within the time necessary to make the Variation in order to address the emergency. In an emergency, Variations may be approved by a different representative of the Authority. However, the Authorised Representative shall have the right to review such a Variation and require a CCN to be entered into on a retrospective basis which may itself vary the emergency Variation.

F8 Severability

- F8.1 If any provision of the Contract which is not of a fundamental nature is held invalid, illegal or unenforceable for any reason by any court of competent jurisdiction, such provision shall be severed and the remainder of the provisions of the Contract shall continue in full force and effect as if the Contract had been executed with the invalid, illegal or unenforceable provision eliminated.

F9 Remedies Cumulative

- F9.1 Except as expressly provided in the Contract all remedies available to either Party for breach of the Contract are cumulative and may be exercised concurrently or separately, and the exercise of any one remedy shall not be deemed an election of such remedy to the exclusion of other remedies.

F10 Entire Agreement

F10.1 The Contract constitutes the entire agreement between the Parties in respect of the matters dealt with therein. The Contract supersedes all prior negotiations between the Parties and all representations and undertakings made by one Party to the other, whether written or oral, except that this clause shall not exclude liability in respect of any fraudulent misrepresentation.

F11 Counterparts

F11.1 The Contract may be executed in counterparts, each of which when executed and delivered shall constitute an original but all counterparts together shall constitute one and the same instrument.

H2 Termination on Default

H2.1 The Authority may terminate the Contract with immediate effect by notice if the Contractor commits a Default and:

- (a) the Contractor has not remedied the Default to the satisfaction of the Authority within 25 Working Days or such other period as may be specified by the Authority, after issue of a notice specifying the Default and requesting it to be remedied;

H2.3 If the Authority fails to pay the Contractor undisputed sums of money when due, the Contractor shall give notice to the Authority of its failure to pay. If the Authority fails to pay such undisputed sums within 90 Working Days of the date of such notice, the Contractor may terminate the Contract in writing with immediate effect, save that such right of termination shall not apply where the failure to pay is due to the Authority exercising its rights under clause C3.1 (Recovery of Sums Due) or to a Force Majeure Event.

H3 Termination on Notice

H3.1 The Authority may terminate the Contract at any time by giving thirty [30] days' notice to the Contractor.

H4 Consequences of Expiry or Termination

H4.1 If the Authority terminates the Contract under clause H2 and makes other arrangements for the supply of the Services the Authority may recover from the Contractor the cost reasonably incurred of making those other arrangements and any additional expenditure incurred by the Authority throughout the remainder of the Contract Period.

H4.2 If Contract is terminated under clause H2 the Authority shall make no further payments to the Contractor (for Services supplied by the Contractor prior to termination and in accordance with the Contract but where the payment has yet to be made by the Authority), until the Authority has established the final cost of making the other arrangements envisaged under this clause.

H4.2 If the Authority terminates the Contract under clause H3 the Authority shall make no further payments to the Contractor except for Services supplied by the Contractor prior to termination and in accordance with the Contract but where the payment has yet to be made by the Authority.

H4.3 Save as otherwise expressly provided in the Contract:

- (a) termination or expiry of the Contract shall be without prejudice to any rights, remedies or obligations accrued under the Contract prior to termination or expiration and nothing in the Contract shall prejudice the right of either Party to recover any amount outstanding at such termination or expiry; and
- (b) termination of the Contract shall not affect the continuing rights, remedies or obligations of the Authority or the Contractor under clauses C2 (Payment and VAT), C3 (Recovery of Sums Due), D1 (Prevention of Fraud and Bribery), E2 (Data Protection Act Compliance), E3 (Official Secrets Acts 1911 to 1989, Section 182 of the Finance Act 1989), E4 (Confidential Information), E5 (Freedom of Information), E8 (Intellectual Property Rights), E10 (Audit), F10 (Remedies Cumulative), G1 (Liability, Indemnity and Insurance), H4 (Consequences of Expiry or Termination), H6 (Recovery upon Termination) and I1 (Governing Law and Jurisdiction).

- H5.2 The Contractor shall immediately inform the Authority of any actual or potential industrial action, whether such action be by its own employees or others, which affects or might affect its ability at any time to perform its obligations under the Contract.
- H5.3 If there is industrial action by the Staff, the Contractor shall seek Approval to its proposals to continue to perform its obligations under the Contract.
- H5.4 If the Contractor's proposals referred to in clause H5.3 are considered insufficient or unacceptable by the Authority acting reasonably, then the Contract may be terminated with immediate effect by the Authority by notice.
- H5.5 If the Contractor is unable to deliver the Services owing to disruption of the Authority's normal business, the Contractor may request a reasonable allowance of time, and, in addition, the Authority will reimburse any additional expense reasonably incurred by the Contractor as a direct result of such disruption.

H6 Recovery upon Termination

- H6.1 On termination of the Contract for any reason, the Contractor shall at its cost:

Their attendance shall be subject to compliance with the Contractor's security procedures, subject to such compliance not being in conflict with the objectives of the visit.
- H7.7 The Contractor shall co-operate fully with the Authority during any handover at the end of the Contract. This co-operation shall include allowing full access to, and providing copies of, all documents, reports, summaries and any other information necessary in order to achieve an effective transition without disruption to routine operational requirements.
- H7.8 Within 10 Working Days of being requested by the Authority, the Contractor shall transfer to the Authority, or any person designated by the Authority, free of charge, all computerised filing, recording, documentation, planning and drawing held on software and utilised in the provision of the Services. The transfer shall be made in a fully indexed and catalogued disk format, to operate on a proprietary software package identical to that used by the Authority.

H8 Exit Management

- H8.1 Upon termination the Contractor shall render reasonable assistance to the Authority to the extent necessary to effect an orderly assumption by a Replacement Contractor in accordance with the following procedure set out in clause H9.

H9 Exit Procedures

- H9.1 Where the Authority requires a continuation of all or any of the Services on expiry or termination of this Contract, either by performing them itself or by engaging a third party to perform them, the Contractor shall co-operate fully with the Authority and any such third party and shall take all reasonable steps to ensure the timely and effective transfer of the Services without disruption to routine operational requirements.
- H9.2 The following commercial approach shall apply to the transfer of the Services if the Contractor:
- (a) does not have to use resources in addition to those normally used to deliver the Services prior to termination or expiry, there shall be no change to the Price; or
 - (b) reasonably incurs additional costs, the Parties shall agree a Variation to the Price based on the Contractor's rates either set out in Schedule 2 or forming the basis for the Price.
- H9.3 When requested to do so by the Authority, the Contractor shall deliver to the Authority details of all licences for software used in the provision of the Services including the software licence agreements.
- H9.4 Within one Month of receiving the software licence information described above, the Authority shall notify the Contractor of the licences it wishes to be transferred, and the Contractor shall provide for the approval of the Authority a plan for licence transfer.

H10 Knowledge Retention

- H10.1 The Contractor shall co-operate fully with the Authority in order to enable an efficient and detailed knowledge transfer from the Contractor to the Authority on the completion or earlier termination of the Contract and in addition, to minimise any disruption to routine operational requirements. To facilitate this transfer, the Contractor shall provide the Authority free of charge with full access to its Staff, and in addition, copies of all documents, reports, summaries and any other information requested by the Authority. The Contractor shall comply with the Authority's request for information no later than 15 Working Days from the date that that request was made.

I DISPUTES AND LAW

I1 Governing Law and Jurisdiction

- I1.1 Subject to the provisions of clause I2 the Contract shall be governed by and interpreted in accordance with English Law and shall be subject to the jurisdiction of the Courts of England and Wales. The submission to such jurisdiction shall not limit the right of the Authority to take proceedings against the Contractor in any other court of competent jurisdiction, and the taking of proceedings in any other court of competent jurisdiction shall not preclude the taking of proceedings in any other jurisdiction whether concurrently or not.

I2 Dispute Resolution

- I2.1 The Parties shall attempt in good faith to negotiate a settlement to any dispute between them arising out of or in connection with the Contract within 20 Working Days of either Party notifying the other of the dispute and such efforts shall involve the escalation of the dispute to the finance director of the Contractor and the commercial director of the Authority.
- I2.2 Nothing in this dispute resolution procedure shall prevent the Parties from seeking from any court of competent jurisdiction an interim order restraining the other Party from doing any act or compelling the other Party to do any act.
- I2.3 If the dispute cannot be resolved by the Parties pursuant to clause I2.1 the Parties shall refer it to mediation pursuant to the procedure set out in clause I2.5 unless: (a) the Authority considers that the dispute is not suitable for resolution by mediation; or (b) the Contractor does not agree to mediation.
- I2.4 The obligations of the Parties under the Contract shall not cease, or be suspended or delayed by the reference of a dispute to mediation (or arbitration) and the Contractor and the Staff shall comply fully with the requirements of the Contract at all times.
- I2.5 The procedure for mediation and consequential provisions relating to mediation are as follows:
- (a) a neutral adviser or mediator (the “Mediator”) shall be chosen by agreement between the Parties or, if they are unable to agree upon a Mediator within 10 Working Days after a request by one Party to the other or if the Mediator agreed upon is unable or unwilling to act, either Party shall within 10 Working Days from the date of the proposal to appoint a Mediator or within 10 Working Days of notice to either Party that he is unable or unwilling to act, apply to the Centre for Effective Dispute Resolution to appoint a Mediator;
 - (b) the Parties shall within 10 Working Days of the appointment of the Mediator meet with him in order to agree a programme for the exchange of all relevant information and the structure to be adopted for negotiations. If appropriate, the Parties may at any stage seek assistance from the Centre for Effective Dispute Resolution to provide guidance on a suitable procedure;
 - (c) unless otherwise agreed, all negotiations connected with the dispute and any settlement agreement relating to it shall be conducted in confidence and without prejudice to the rights of the Parties in any future proceedings;
 - (d) if the Parties reach agreement on the resolution of the dispute, the agreement shall be recorded in writing and shall be binding on the Parties once it is signed by their duly authorised representatives;
 - (e) failing agreement, either of the Parties may invite the Mediator to provide a non-binding but informative written opinion. Such an opinion shall be provided on a without prejudice basis and shall not be used in evidence in any proceedings relating to the Contract without the prior written consent of both Parties; and
 - (f) if the Parties fail to reach agreement in the structured negotiations within 60 Working Days of the Mediator being appointed, or such longer period as may be agreed by the

Parties, then any dispute or difference between them may be referred to the Courts unless the dispute is referred to arbitration pursuant to the procedures set out in clause 12.6.

12.6 Subject to clause 12.2, the Parties shall not institute court proceedings until the procedures set out in clauses 12.1 and 12.3 have been completed save that:

- (a) The Authority may at any time before court proceedings are commenced, serve a notice on the Contractor requiring the dispute to be referred to and resolved by arbitration in accordance with clause 12.7;
- (b) if the Contractor intends to commence court proceedings, it shall serve notice on the Authority of its intentions and the Authority shall have 21 days following receipt of such notice to serve a reply on the Contractor requiring the dispute to be referred to and resolved by arbitration in accordance with clause 12.7; and
- (c) the Contractor may request by notice to the Authority that any dispute be referred and resolved by arbitration in accordance with clause 12.7, to which the Authority may consent as it sees fit.

12.7 If any arbitration proceedings are commenced pursuant to clause 12.6,

- (a) the arbitration shall be governed by the provisions of the Arbitration Act 1996 and the Authority shall give a notice of arbitration to the Contractor (the "Arbitration Notice") stating:
 - (i) that the dispute is referred to arbitration; and
 - (ii) providing details of the issues to be resolved;
- (b) the London Court of International Arbitration ("LCIA") procedural rules in force at the date that the dispute was referred to arbitration in accordance with 12.7(b) shall be applied and are deemed to be incorporated by reference to the Contract and the decision of the arbitrator shall be binding on the Parties in the absence of any material failure to comply with such rules;
- (c) the tribunal shall consist of a sole arbitrator to be agreed by the Parties;
- (d) if the Parties fail to agree the appointment of the arbitrator within 10 days of the Arbitration Notice being issued by the Authority under clause 12.7(a) or if the person appointed is unable or unwilling to act, the arbitrator shall be appointed by the LCIA;

1.8 Brief project description (**maximum 500 words**). This should be a non-technical summary of your proposal, its potential relevance to policy and possible use of results. It should be easily understood by non-specialists. If your proposal is successful, this summary will be published on the Defra website (**Note e** in guidance note).

Defra and its partners are committed to a collaborative approach to safeguarding the health of the nation's trees, woods and forests. Citizen science represents a key dimension of this collaborative approach, and a number of tree health citizen science projects have been developed, many of which have been supported by the Department in its response to the Chalara outbreak in 2011. However, there is now a need to take stock of this portfolio of projects and the data they are producing. In particular, there is a need to understand the relevant data and evidence requirements of contemporary tree health policy, operations and science, to assess to what extent these requirements are being met by citizen science, and to develop a coordinated plan for tree health citizen science. As such, the proposed fellowship has clear links to evidence-based policy and practice and will shape the future delivery of tree health citizen science projects and the use of the data they produce in support of tree health policy, operations and science. The fellowship will achieve the following:

1. Detailed mapping of citizen science-relevant evidence needs across Defra tree health policy, operations and science.

2. Analysis of what data/evidence the current portfolio of tree health citizen science projects is delivering in respect of both Defra policy and operation needs.

3. A gap analysis (i.e. what evidence needs are / are not being met) by reference to policy and operations.

4. Detailed stakeholder analysis of capacity, capability, motivations and enthusiasm so that we can 'match make' potential citizen science groups and individuals with end-user resource requirements within tree health policy, operations and science.

5. The development of a strategic plan and direction for tree health citizen science with the objective of enhancing the support that citizen science provides to policy, operations and science. This may include an 'inventory' of subjects different citizens can helpfully monitor as one example of a contribution to policy and operational needs. The OPAL focus, where appropriate, will enable the fellowship to draw lessons from other relevant environmental citizen science surveys.

1.9 Sub-contractor and/or joint contractor contact details

Only to be completed if there are sub-contractors to be employed on the project or if the project has joint contractors.

For each sub-contractor/joint contractor please insert the name and address of the organisation, contact name, telephone number and e-mail address. Please also specify if they are a sub-contractor or joint contractor. Please list joint contractors first followed by sub-contractors in order of their relative contributions.

■ Section 2 – Evidence

2.1 Background

Outline your understanding of the policy/research context and the key issues/challenges you are proposing to address in this project. Outline previous work on the subject.

Since 2011, Defra has published several policies which recognise the potential for citizen science to play a major role in delivering evidence to support tree health policy, operations and science. These include the Tree Health & Plant Biosecurity Action Plan (October 2011); the Chalara Management Plan (March 2013); the Tree Health & Plant Biosecurity Expert Taskforce Report (May 2013); and, most recently, the Plant Biosecurity Strategy (April 2014) and Tree Health Management Plan (April 2014). In these documents citizen science is recognised for its potentially valuable contribution to raising public awareness of tree health threats and the requisite changes in behaviour to mitigate these threats, to official surveillance and early detection of pest and disease outbreaks, and to the science that underpins efforts to develop resilience and resistance amongst host species and threatened habitats. The Plant Biosecurity Strategy makes a commitment to assess where we can further apply citizen science to add value in the area of plant health policy in general. This is supported by the more general aim stated in 'Making the most of our evidence: a strategy for Defra and its network', which pledges to take "full advantage of citizen science" in all areas of environmental policy.

In 2014 a brief review of citizen science in animal and plant health was conducted by the Defra animal and plant health evidence team. This review provided a high-level summary of the citizen science landscape in tree health and concluded there is scope to broaden the use of citizen science approaches in tree health, to improve the effectiveness of existing citizen science projects, and to design and implement robust systems to improve the quality and utility of citizen science data in the future.

This fellowship will build on existing work, addressing the following issues and challenges:

Lack of coordination across the tree health citizen science projects, resulting in duplication and a lack of clarity for those interested in getting involved;

Lack of an overview of citizen science project data in relation to policy/operational evidence needs

Lack of overview of data quality

Lack of data sharing between citizen science projects

Lack of detailed stakeholder analysis to understand the broader citizen science landscape and 'match' potential participant groups and individuals with end-user (policy, operations and science) data requirements.

The fellowship will also provide outputs useful to address issues identified in the Parliamentary Office of Science and technology (POST Note 476 August 2014 Environmental Citizen Science, namely: (a) quality assurance of data; (b) Data bottlenecks; (c) maintaining volunteer engagement and (d) making the best use of the data.

The findings and summary report of this fellowship should provide practical recommendations that can be implemented by Government to ensure that citizen science projects and the data they generate fulfill their potential usefulness to tree health policy, operations and science. The generic lessons learnt should also be relevant to other environmental issues in Defra's portfolio.

2.2 Objectives

Outline the general aims of the project and specific evidence objectives (measurable and time bound), any interdependence (the extent to which the success of one objective depends on the successful completion of another), and where there is more than one contractor, show clearly the roles of each.

If your application is accepted, these objectives may be included in the agreement between you and the Department. Please, therefore, restrict your entry to the salient points and set these out clearly and concisely.

<p>Aim 1. Detailed mapping of citizen science-relevant evidence needs across tree health policy, operations and science.</p> <p>1.1 Engage with policy officials, operational and research staff within the Defra plant health network (Core Defra, Fera, APHA and Forestry Commission) to establish current and future research questions/evidence needs.</p> <p>1.2 Identify questions / evidence needs that could be addressed by citizen science.</p>
<p>Aim 2. Analysis of what data/evidence the current portfolio of tree health citizen science projects is delivering.</p> <p>2.1 Create an inventory of current tree health citizen science projects that currently exist.</p> <p>2.2 Obtain access to data produced by current tree health citizen projects.</p> <p>2.3 Evaluate data and data quality assurance methods produced/used by each project - data application, resolution, whether generated data are of acceptable quality for official surveillance (quality assurance) etc.</p>
<p>Aim 3. A gap analysis (i.e. what evidence needs are and are not being met).</p> <p>3.1 Map data obtained to current evidence needs that could be addressed by citizen science.</p> <p>3.2 Identify gaps in evidence.</p> <p>3.3. Prioritise evidence gaps as the basis for future development of citizen science.</p>
<p>Aim 4. Detailed stakeholder analysis of capacity, capability, motivations and enthusiasm so that we can to 'match make' potential citizen science groups and individuals with end-user requirements within tree health policy, operations and science.</p> <p>4.1 Detailed stakeholder analysis of traditionally broad stakeholder categories (e.g 'the public', 'land owners', 'industry', 'the sector') to identify target individuals and groups.</p> <p>4.2 Evaluate the extent to which existing projects have engaged the various audiences with the issue of tree health including OPAL's specific outcome for Stronger collaboration between the statutory, voluntary and community sectors.</p> <p>4.3 Analyse capacity, capability and motivations of target stakeholder groups.</p> <p>4.4 Analysis of evidence target stakeholder groups (from school children through to adults with existing specialist knowledge) could provide through citizen science to support research and provide data against evidence needs.</p> <p>4.5 Explore potential barriers that could prevent target groups engaging with tree health citizen science, and how to overcome these barriers.</p>
<p>Aim 5. The development of a strategic plan and direction for tree health citizen science with the objective of enhancing the support that citizen science provides to policy, operations and science.</p> <p>5.1 Match priority evidence needs with specified stakeholder groups, taking into account the analysis of capacity, capability, motivations and enthusiasm</p> <p>5.2 Produce a strategic plan setting out how to deliver priority evidence needs through citizen science, including detailed estimates of resource requirements (funding and staffing), including an 'inventory' of subjects that different citizens can (and cannot) helpfully monitor.</p>

2.3 Approach and methodology

If your application is accepted, the Approaches, Work Plan and Milestones will be included in any contract issued. Please, therefore, restrict your entry to the salient points and set these out clearly and concisely.

2.3a. Approaches and Work Plan

Outline the approaches to be used to achieve the objectives (set out in 2.2) and set out the work plan for the life of the project stating clearly how you intend to proceed (please include a Gantt chart if appropriate). The approaches should be given the same number, and be in the same order, as the objectives and must be clearly cross-referenced to the numbered milestones (see section 2.3c below). Where there is more than one contractor, please show clearly the roles of each.

Where appropriate, please describe the analyses of data you propose to undertake. This should include any **statistical inputs**.

The first part of this project will involve the recruitment of a research fellow. Recruitment will be led by Imperial College, but will be carried out in close collaboration with the Defra Project Officer. This will involve first agreeing a job specification and then preparing recruitment documentation. Applicants will be sifted on the basis of written applications and CVs to judge experience and skills against the requirements of the post. Face-to-face interviews will be used to make the final selection (milestone 1). The Defra Project Officer will be invited to take part in the sift and will also sit on the interview board. We have allowed 3 months for the recruitment process.

The first 2 aims of this project will begin simultaneously once the fellow is in place (the completion of both aims is estimated to take 9 months - months 3-12 of the fellowship). The following methods could be used:

1.1 Interviews/workshops

1.2 Desk study (literature review) / workshop (milestone 3)

2.1 Desk-based study to analyse/evaluate data [with a focus on the OPAL tree health data set] (milestone 2)

2.2 Write out/meetings with project leaders from current portfolio of citizen science projects

2.3 Desk-based study to analyse/evaluate data [with a focus on the OPAL tree health data set] (milestone 4)

Once aims 1 and 2 are complete, aim 3 will commence (aim 3 is estimated to require another 3 months - months 12-15 of the fellowship).

3.1 Desk-based study

3.2 Desk-based study (milestone 5)

3.3 Workshop

Aims 4 and 5 are likely to be undertaken in the second year of the fellowship. Aim 4 should require approximately 3 months (months 15-18). Aim 5 (production of a strategic plan), alongside delivery of a OPAL/Defra conference on citizen science will take the remaining 6 months (months 18-24) (milestone 6).

4.1, 4.2, 4.3, 4.4 Desk-based study (stakeholder analysis) including interviews / workshops (milestone 7)

5.1, 5.2 Desk-based study including interviews / workshops (milestone 8)

2.3b. Will the project require a survey to be carried out (**Note f** in guidance note)? Yes ☐ No ☒

If yes, please give **brief** details about the proposed survey, for example, about the type of survey, its scope and scale.

2.3c. Milestones table (**Note g** in guidance note)

These must relate directly to the Objectives, Approaches and Work Plan.

2.3d Knowledge exchange

Consider the expected outputs which may arise from this project, identify key audiences for the results and outline your plans for knowledge exchange and communications of results. Provide a list of all proposed project outputs, including datasets, publications, presentations or demonstrations, and a brief description of how you anticipate the results will be used and by whom.

Where the project specification has been supplied by Defra, you must include any communication and knowledge exchange requirements set out in that specification. Additionally, Defra invites you to add any proposals of your own to communicate the results.

Please note that should you be successful, you will be required to seek approval from the Defra Project Officer before any press release is published at any time during the project. This may take up to two weeks.

Key project outputs:

- Detailed analysis of citizen science evidence needs (from the perspective of policy, operational and science end-users) - report and workshop presentation
- Inventory of current tree health citizen science projects and an evaluation of the data they produce in terms of application, resolution, scale etc. - report and excel spreadsheet, , including a detailed analysis of the OPAL tree health data set
- Detailed analysis of actual and potential citizen science participants (capacities, capabilities, motivations, enthusiasms, current and potential activities) - report and workshop presentation
- Strategic plan for tree health citizen science based on 'matching' evidence needs with citizen scientist groups and individuals - report and workshop presentation
- Joint organisation of and presentation at OPAL / Defra joint citizen science conference in Spetember 2016.

The key audiences for the outcomes of this fellowship will be Government policy, operations and research customers and non-Government organisations and people that are involved in tree health citizen science projects. Government officials will be able to access the findings of this project by attending project workshops, reading written outputs (reports), reading the strategic plan (final project output) and attending the conference. Informal presentations within Defra to policy officials and evidence specialists may also be appropriate as the work progresses.

2.3e. Quality assurance (**Note h** in guidance note)

- If specified in the competition details, please confirm that this project will be completed in accordance with the measures laid out in the Joint Code of Practice for Research: Yes ☒ No ☐
- If NO, please list the areas of the Code that you feel cannot be met and describe the remedial actions you intend on taking to ensure future compliance. Please indicate the dates by which you expect each of these actions to be complete. If the Joint Code of Practice for Research is not applicable to your project please explain why here.

Quality assurance will be afforded by:

1. Oversight of the fellowship by a steering group containing external experts.
2. Joint supervision by two Imperial staff: one covering line management and operations, the other covering research and academia.
3. Line management according to "Imperial's Expectations" and Personal Review and Development Plan including regular performance review meetings.
4. Regular contact with Defra plant health staff to review performance.

- If the project will be compliant with other Codes of Practice (e.g. the Government Social Research Code) please list these here. Please also state what procedures you operate for Quality Assurance, including formal accreditations.

2.3f. Risks, ethical considerations and health and safety

List the risks which might prevent or delay achievements of the project objectives. There is no such thing as a risk-free project – please complete this section. For each risk include an assessment of the likelihood of the risk occurring, the likely impact/consequences on the project, any steps that will be taken to minimise/avoid the risk and the risk owner.

Where relevant you should highlight any ethical considerations which the project may raise and also highlight any health and safety considerations.

Suitable fellow cannot be recruited (risk) (likelihood = low / impact = high). If a suitable candidate cannot be recruited the project cannot be delivered. Mitigation: The post will be advertised widely, and through existing networks and contacts. If no suitable candidate can be recruited, Imperial College will return project funding to Defra.

Data sharing (risk) (likelihood = medium / impact = high). If the current portfolio of tree health citizen science projects do not agree to share data with the fellow, the analysis of gaps in current data / evidence provision will not be possible. Mitigation: Outline agreement from projects within the Tree Health Citizen Science Network has already been agreed. A steering group made up of members of the network will be set up for this project. Furthermore, once in post, the fellow will begin discussions about data sharing with current citizen science project leads to give the maximum amount of time to be able to overcome difficulties (such as IT systems compatibility, data sharing and data protection issues).

Data protection (ethical consideration) (Likelihood = high / impact = high). Current citizen science projects will be bound by the data protection statements under which they have obtained data from volunteers and participants. These obligations must be respected. Any loss or compromise to the security of personal data could result in serious reputational damage to the lead organisation of that project, to Imperial College, and to Defra. Mitigation: Data provided by individual tree health projects will be cleaned of personal information where possible before delivery to the fellow. Furthermore, the fellow will be bound by a data sharing agreement that will be agreed with each project providing access to data.

■ Section 3 – Resources and Other Requirements

3.1 Project management

You should identify the individual(s) who will have overall management responsibility for the research and/or identify the Project Director, and nominate a representative for day-to-day contact with the Defra Project Officer. You should also describe your organisational approach to project management and how this is implemented.

The fellow will be managed and supervised jointly by the Defra Project Officer and the Imperial College Project Director [REDACTED], who will have overall management responsibility for the fellowship.

The project will be overseen by a steering group that will be co-chaired by the Defra Project Officer and Imperial College Project Director. The group will comprise Government staff (e.g. tree health policy, operations and research), and a select number of Tree Health Citizen Science Network project leads/academics engaged in research into citizen science.
