Annex 3 – Products technical specifications.

<u>Item # 1: Non-Rebreathing Oxygen</u> <u>Therapy Mask:</u>

The non-rebreathing mask must provide a high concentration of oxygen and the reservoir bag allows for adequate oxygen to be available to meet the unpredicted patient's breathing pattern and tidal volume. This item will be used by Paramedic and Accident and Emergency departments

Minimum Specifications:

- Delivery of 99% to 100% Oxygen Concentration
- High Concentration at a Flow Rate of 15 LPM
- Flexible Plastic Mask with Elastic Head Strap
- Incorporated Oxygen Reservoir Bag
- Oxygen Tubing Supplied and Pre-Connected
- Latex Free for patient safety

Item # 2: Blizzard Transport blanket

The blizzard transport blanket must be a high-performance insulating survival blanket attached to a carry litter for rapid evacuation. The Blizzard Transport must come with a 3 layers option and should include 8 handles for easy lift and contain an oxygenated Heat pads to aid warming process for casualties with hypothermia

<u>Item # 3: Body bags heavy duty Adult</u> <u>with 6 carry handles</u>

Standard Adult Size with 6 Carry Handles-Black. Standard sized adult $91 \, \text{cm} \times 228 \, \text{cm}$ (36" x 90") body bag

Minimum Specifications:

- 0.3mm (12mil) heavy duty strength PVC material.
- Rigorous 136kg (300lb) static lift testing.
- 6 carry handles designed to evenly disperse patient weight.

A zip system on the body bag should also facilitate a patient with envelope "curved" style zippers, allowing for even easier opening and closing of the bag. Each body bag must also contain 3 toe tags to help identify the decease.

Item # 4: CPR manikin Resusci Anne® QCPR

High-quality CPR for training purposes.

CPR

- Quality CPR feedback (with feedback device)
- Mouth-to-mouth ventilations
- Ventilations with face shield, pocket mask, and BVM

Airway

- Realistic chest rise/fall with ventilations
- Sellick maneuver
- Positive pressure ventilation
- Airway occlusion
- Supraglotic airway (with optional Airway Head)

Pulses

• Manual Carotid pulses

Defibrillation

- Train using a live defibrillator (with ShockLink™)
- Detect Pad Placement (with optional AED Skin, plus Laerdal AED Trainer or ShockLink)

General

- Interchangeable pupils (with optional Airway Head)
- IV initiation and fluid administration (with optional IV Arm)
- Rescue/Trauma Simulation (with optional Trauma Limbs or Rescue Limbs)
- Latex free
- Wired and wireless feedback device options
- Bluetooth Low Energy
- Rechargeable battery (up to 34 hours operation time per charge)

<u>Item # 5: Double Folding Stretcher with</u> <u>Carry Bag - Orange</u>

Must fold lengthways and widthways for the most compact storage. Strong locking mechanism. Durable and hard-wearing Measurement (open): 208cm x 54.5cm x 13cm - (closed): 104cm x 17cm x 9cm - Must include non-slip handgrips and rough terrain feet, cross bars to add patient comfort and support. With high visibility colouring, the carrying bag must be included.

Item # 6: Lifepak 15 Defib/Monitor (complete kit)

This Defilbrilator/Monitor must come with SpO2, NIBP, 12 lead ECG, CO2, Trend & Bluetooth, and must be specified with the following features:

Data Management

- Advisory & Manual Defibrillation
- ADAPTIV Biphasic Technology up to 360J
- Dual-Mode Colour LCD Screen with SunVue
- 12-lead including 100mm Printer, Glasgow STEMI Interpretive Software, Pacing & CPR

Metronome

- NIBP
- SpO2 Masimo SET
- Oridion Microstream EtCO2

With the Lifepak 15 monitor should be included the 'Long' Ship Kit & and 2x 5.7v amp Li-lon battery.

The complete kit should also contain:

- 12-lead ECG cable including IEC 8ft trunk cable and 4-wire limb leads & IEC 6-wire precordial leads
- Adult reusable BP cuff & coiled hose
- Masimo RC Patient Cable 12ft
- QUIK-COMBO therapy cable
- 2 sets Adult QUIK-COMBO electrodes
- QUIK-COMBO Test Load
- 2 rolls of 100mm paper

- LIFEPAK 15 Operator manual English /Ukraine
- LIFEPAK 15 DVD

Also included must be:

- Masimo M-LNCS Reusable Sp02 sensor
- Carry Case & Shoulder Strap
- Top and rear pouch
- Power Cable
- AC Power adaptor
- Extension cable 160cm

<u>Item # 7: Portable lighting unit for</u> Remote Area

With two light heads and a multi-stage charger, the portable lightning unit must be equipped with a telescopic handle and rugged wheels for ease of transport.

- Telescoping dual LED light heads
- Housed in a Pelican protector case
- Up to 6,000 lumens of variable LED light
- Silent operation
- Cool operating temperatures
- No exhaust

Item # 8: Manikin

Male model manikin should be based on a 50-year-old (approx.) Weight 30-40Kg

Ethnicity - Different ethnicity options must be available

Step wise airway management with mouth, open nostrils, upper airway, and lungs enabling bag/valve/mask, oropharyngeal airway, nasopharyngeal airway, supraglottic airway and ET tube intubation.

- Intraosseous insertions in bilateral humeral head and tibia
- CPR compatible
- Needle decompression insertion
- Hand punched hair
- Closed eyelids with manual opening
- Transport body stretcher/bag with wheels

Item # 9: Mass Casualty Treatment pack.

The Mass Casualty Treatment Pack will be used in any major incident scenario and must contain essential medical equipment to treat up to 1 mixed priority patients.

Illustrative picture:

Dimensions:

Size: 62.cm x 68.cm x 44.cm Weight (Full Pack) 41.5kg <u>Detailed specifications:</u>

The Mass Casualty Treatment pack must be supplied packed. Each Mass Casualty Treatment pack must contain separated pouches with the following consumables and quantities:

Advanced Airway / Breathing Pouch 1 of 2 (big blue)

Adult laryngoscope handle	1
20 ml syringe	1
Aquagel sachet	3
Macintosh blade size 4	1
Adult catheter mount	1
I-Gel Size 4	1
Adult filter	1
Easycap	1
Adult Magill forceps	1
Yankeur suction catheter	1

<u>Item # 10: Mass casualty oxygen delivery system</u>

Multi-patient oxygen delivery system to be used to administer, regulate, and supplement oxygen to a subject to increase the arterial oxygenation.

Illustrative picture:

<u>Item # 11: Mass casualty stackable stretchers</u>

The Stackable Stretcher must be constructed of durable, lightweight aluminium, for conveniently and quickly deploys onto the rescue scene to accommodate multiple victims. It needs to conveniently stacks onto itself to provide the most compact storage available. The heavy-duty vinyl-coated nylon cover should be durable, fire-retardant, and stain resistant to blood and bodily fluids.

Specifications: Length: 186cm Width: 48cm Height: 18cm Unit Weight: 3 kg

Loading Capacity: 170 kg

Net Weight: 5 kg Gross Weight: 11kg

<u>Item # 12: Medical gloves, non-sterile, powder free, nitrile, small</u>

- Latex free
- Powder free
- Non sterile
- Beaded cuff
- Ambidextrous
- Textured surface
- High tensile strength
- Optimum sensitivity
- Single use only
- Quality: AQL 1.5
- Medical grade nitrile
- CE marked
- Conform to BS EN455

<u>Item # 13: Medical gloves, non-sterile, powder free, nitrile, medium</u>

- Latex free
- Powder free
- Non sterile
- Beaded cuff
- Ambidextrous
- Textured surface
- High tensile strength
- Optimum sensitivity
- Single use only
- Quality: AQL 1.5
- Medical grade nitrile
- CE marked
- Conform to BS EN455

<u>Item # 14: Medical gloves, non-sterile, powder free, nitrile, large</u>

- Latex free
- Powder free
- Non sterile
- Beaded cuff
- Ambidextrous
- Textured surface
- High tensile strength
- Optimum sensitivity
- Single use only
- Quality: AQL 1.5
- Medical grade nitrile
- CE marked
- Conform to BS EN455

<u>Item # 15: Medical gloves, non-sterile, powder free, nitrile, extra-large</u>

- Latex free
- Powder free
- Non sterile
- Beaded cuff
- AmbidextrousTextured surface
- High tensile strength
- Optimum sensitivity
- Single use only
- Quality: AQL 1.5
- Medical grade nitrile
- CE marked
- Conform to BS EN455

Item # 16: Rapid deployment inflatable tents medical (with heating)

Required Features:

- Inflation/Deflation valves for cylinder & pump inflation
- Over pressure valve
- Vehicle flaps
- 2 x Windows with fly mesh and covers
- 2 Doors (connectable)
- Service Port for external accessories and cables
- Stainless Steel 'D' Rings to central beam to allow for accessories to be suspended
- Guy Ropes & Stakes
- Operating instructions
- Repair kit
- Storage bag
- 12 Months Manufacturer's Warranty

In additional, the tent must be provided with the following additional features:

- 110 volt or lithium-lon rechargeable lighting
- Compact 230v or 110v Fan heater with thermostat
- Stainless Steel 'D' Rings to the central beam to allow for accessories or medical equipment to be suspended
- 1 x Lateral, removable, room divider
- 2 x Oversized windows with fly mesh and covers to allow for increase light
- 1 x Large full front door to allow for an ambulance to utilise the shelter and access for stretchers and wheel chairs
- 1 x Pedestrian door

 Large Vehicle flaps on the corner of the shelter to allow additional stability in adverse weather or to secure the shelter in areas where pegs and guy ropes cannot be used

Item # 17: Training Manikin, adult, 70kg

Training manikin made for emergency rescue training purposes. Made of waterproof and highly abrasion resistant polyester.

Detailed specifications:

- Loop stitched into waistband and shoulders
- All seams should be double stitched and reinforced in all stress points
- Double thickness material to cuffs
- Padded with flame retardant foam
- Clip-on for protective boots
- Weight: 70 Kg
- Lifelike flexibility

<u>Item # 18: Mass Casualty cube Chemical,</u> <u>Biological Radiological Nuclear Explosive</u> (CBRNE) pack.

The CBRN Treatment Pack should be designed for challenging CBRN major incident, and to treat up to 1 P1/P2 patient

Illustrative picture:

Detailed specifications: Size: 57.cm x 66.cm x 4.cm Weight (Full Pack) 32.5 kg

The CBRNE Treatment Pack must be supplied packed. Each CBRNE treatment pack must contain separated pouches with the following consumables and quantities:

Item # 19: Trauma Pack

The Trauma Pack should be packed with essential equipment as a contingency for medical and trauma management. The pack should contain medical equipment and consumables for initial medical management including items for major trauma, hostile attack, or natural disasters.

Illustrative picture:

Detailed specifications:

Dimensions:

Size: 60cm x 33cm x 25cm

Weight 4.8kg

The Trauma pack must be supplied packed. Each pack must be easy to access, in a noticeable red bag, and contains the following equipment and quantities:

Tourniquet 4
Blast dressing 4
Olea dressing 4
Haemostatic 2
Shears/scut 2
Chest Seal 4
Oropharengel OP airway 3
Nasopharyngeal various sizes 0
Trauma pack (bag) 1

Item # 20: Medical Backpack

The Medical Pack should contain medical equipment and consumables for initial medical management including items for major trauma, hostile attack, or natural disasters.

Illustrative picture:

The Medical Pack (SESU) pack must be supplied packed. Each backpack must be easy to access and with 2 front pockets compatible with the POS system, and contains the following equipment and quantities:

PAX BAG I-FT2 (or equivalent)	1
Oropharyngeal various sizes	6
Nasopharyngeal various sizes	4
igel various sizes	4
Endotracheal tubes various sizes	4
Surgical airway (complete kit)	2
Suction (hand held manual vacuum	1
