## Straight upright

This simple design fits in perfectly with the clean lines and contours of a building.

The straight upright system is particularly suitable for protection at access points and demarking walkways.
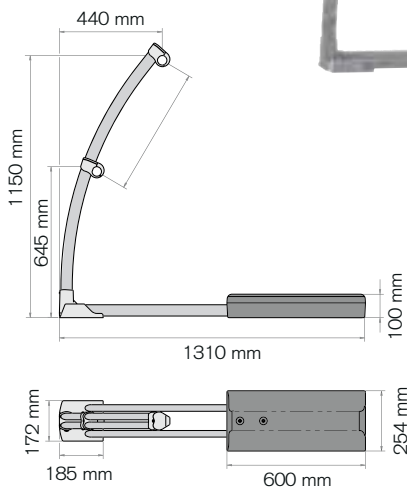

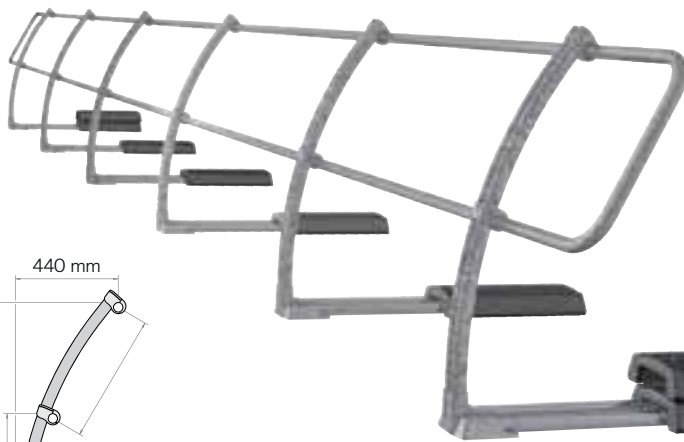

Straight upright system with:

1) Slab mounting plate

2) Wall mounting plate

3) Z-type mounting plate

4) Parapet mounting plate

Curved upright

Whilst providing the primary function of collective protection, the curved upright system compliments the design of a building.

This solution also keeps people further from the roof edge, providing a greater level of safety.
