NEC4 Engineering and Construction Short Contract

A contract between	The Environment Agency
	Horizon House
	Deanery Road
	Bristol
	BS1 5AH
And	J N Bentley
For	Foss FSA – Land Drainage- Toe Drain
	Contract Forms - Contract Data - The Contractor's Offer and Client's Acceptance - Price List - Scope - Site Information

Contract Data

The <i>Client's</i> Cor	ntract Data	
	The Client is	
Name	Environment Agency	
Address for communications	The Environment Agency, Latera	al, 8 City Walk, Leeds, LS11 9AT
Address for electronic communications		
The works are	Foss FSA Land Drainage - Toe I drainage	Orain to spillway and ancillary
The site is	Foss Flood Storage Area, Nr Strensall, York	
The starting date is	08/08/2025	
The completion date is	16/10/2025	
The delay damages are	£216	Per day
The <i>period</i> for reply is	2	weeks
The defects date is	52	weeks after Completion
The defects correction period is	4	weeks
The assessment day is	the last working day	of each month
The retention is	nil	%

The United Kingdom Housing Grants,	Construction and Regeneration	Act (1996) does apply

The Adjudicator is:

In the event that a first dispute is referred to adjudication, the referring Party at the same time applies to the Institution of Civil Engineers to appoint an *Adjudicator*. The application to the Institution includes a copy of this definition of the *Adjudicator*. The referring Party pays the administrative charge made by the Institution. The person appointed is also *Adjudicator* for later disputes.

Only 6	enter details here if additional condi	itions are requ	iired.		
Z1.0	Sub-contracting				
Z1.1	The Contractor submits the name of each proposed subcontractor to the Client for acceptance. A reason for not accepting the subcontractor is that their appointment will not allow the Contractor to Provide the Works. The Contractor does not appoint a proposed subcontractor until the Client has accepted them.				
Z1.2	Payment to subcontractors and suppliers will be no more than 30 days from receipt of correct invoice.				
Z2.0	Environment Agency as a regulatory authority				
Z2.1	The Environment Agency's position as a regulatory authority and as <i>Client</i> under the contract is separate and distinct. Actions taken in one capacity are deemed not to be taken in the other.				
Z2.2	Where statutory consents must be obtained from the Environment Agency in its capacity as a regulatory authority, the <i>Contractor</i> is responsible for obtaining these and paying fees (unless stated otherwise in the Scope). The <i>Client's</i> acceptance of a tender and the <i>Client's</i> instruction or variation of the works does not constitute statutory approval or consent.				
Z2.3	An action by the Environment Agency as regulatory authority is not in its capacity as <i>Client</i> and is not a compensation event.			acity as <i>Client</i> and is not a	
Z3.0	Confidentiality & Publicity				
Z3.1	The Contractor may publicise the works only with the Client's written agreement.				
Z4.0	Correctness of Site Information				
Z4.1	Site Information about the ground, subsoil, ducts, cables, pipes and structures is provided in good faith by the <i>Client</i> but is not warranted correct. The <i>Contractor</i> checks the correctness of any such Site Information they rely on for the purpose of Providing the Works.				
Z5.0	The Contracts (Rights of Third Parties) Act 1999				
Z5.1	For the purposes of the Contracts (Rights of Third Parties) Act 1999, nothing in this contract confers of purports to confer on a third party any benefit or any right to enforce a term of this contract.				
Z6.0	Design				
Z6.1	Where design is undertaken, it is the normally used by professionals prov			the use of skill and care	
Z6.2	The Contractor designs the parts of	the works which	ch the Scope states they ar	e to design.	
Z6.3	The Contractor designs the parts of the works which the Scope states they are to design. The Contractor submits the particulars of their design as the Scope requires to the Client for acceptance. A reason for not accepting the Contractor's design is that it does not comply with either the Scope or the applicable law.				

The Contractor does not proceed with the relevant work until the Client has accepted this design. Z6.4 The Contractor may submit their design for acceptance in parts if the design of each part can be assessed fully. Z7.0 Change to Compensation Events Z7.1 Delete the text of Clause 60.1(11) and replace by: The works are affected by any one of the following events • War, civil war, rebellion revolution, insurrection, military or usurped power • Strikes, riots and civil commotion not confined to the employees of the Contractor and sub-contractors • Ionising radiation or radioactive contamination from nuclear fuel or nuclear waste resulting from the combustion of nuclear fuel • Radioactive, toxic, explosive or other hazardous properties of an explosive nuclear device • Natural disaster • Fire and explosion • Impact by aircraft or other device or thing dropped from them Z8.0 Framework Agreement Z8.1 The Contractor shall ensure at all times during this contract it complies with all the obligations and conditions of the Framework Agreement made with the Client. Z9.0 Termination Z9.1 Delete the text of Clause 92.3 and replace with: If the Contractor terminates for Reason 1 or 6, the amount due on termination also includes 5% of any excess of a forecast of the amount due at Completion had there been no termination over the amount due on termination assessed as for normal payments. Z10.0 Data Protection Z10.1 The requirements of the Data Protection Schedule shall be incorporated into this contract Z11.0 Liabilities and Insurance Z11.1 Civil data protection claims and regulatory fines for breaches of Data Protection Legislation are excluded from any limit of liability stated. Z12.0 Packaging Z12.1 For contracts containing packages of projects the Client's Contract Data, Scope and Site Information particular to an individual project is contained within its Site-Specific Pack

Z110 Inflation
At the Contract Date the total of the Prices does not include a sum to cover inflation.
The total of the Prices [at the Contract Date] shall be adjusted by a fixed number of Price Adjustments.
The number of Price Adjustments shall be equal to:
The number of months between the Completion Date included at the <i>starting date</i> and the Contract Date.
The proportion of Price Adjustment shall be equal to:
The proportion of Price Adjustment shall be equal to: The total of the Prices at the Contract Date / The number of Price Adjustments

The proportion of Price Adjustment x [80% x Construction Output Price Indices (OPIs) New work output prices: Infrastructure Index 1 – month rate]

The Construction Output Price Indices (OPIs) New work output prices: Infrastructure Index 1 – month rate shall be the value determined by the Office of National Statistics for the applicable month of the amount due assessment

Provided always that the fixed number of Price Adjustments has NOT been exceeded.

The Price Adjustment adjusts the total of the Prices.

If a compensation event under this contract omits original Scope covered by the total of the Prices at the Contract Date the Price Adjustments made under this clause shall be corrected accordingly.

The Contractor's Offer and Client's Acceptance

The Contractor offers to Provide the Works in accordance with these conditions of contract for an amount to be determined in accordance with these conditions of contract. The offered total of the Prices is £196,467.81 Enter the total of the Prices from the Price List. Signed on behalf of the Contractor Name Position Signature 12th August 2025 Date The Client accepts the Contractor's Offer to Provide the Works Signed on behalf of the Client Name **Position** Signature Date 12th August 2025

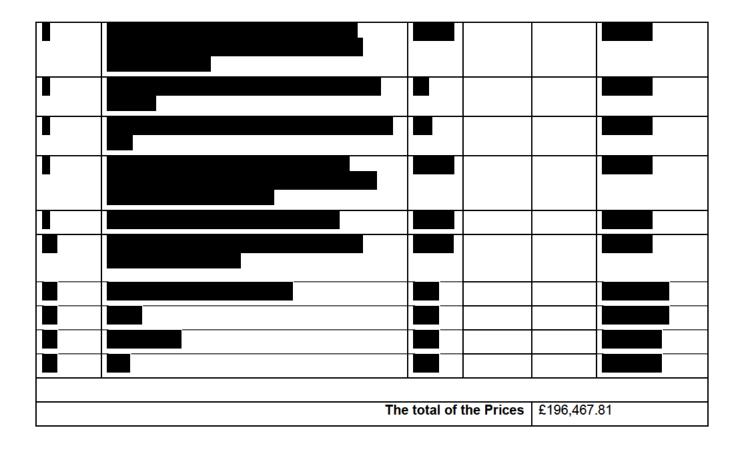

Price List

Entries in the first four columns in this Price List are made either by the Client or the tenderer.

If the *Contractor* is to be paid an amount for the item which is not adjusted if the quantity of work in the item changes, the tenderer enters the amount in the Price Column only: the Unit, Quantity and rate columns being left blank.

If the *Contractor* is to be paid an amount for the item of work which is the rate for the work multiplied by the quantity completed, the tenderer enters the rate which is then multiplied by the expected quantity to produce the Price, which is also entered.

Item Number	Description	Unit	Quantity	Rate	Price
Area 2		sum			
Area 5		sum			

The method and rules used to compile the Price List are

Civil Engineering Standard Method of Measurement 4th edition (CESMM4) as per the Framework Price Workbook.

Scope

1. Description of the works

Background

Following the implementation of Foss Flood Storage Area (FFSA) changes to natural drainage patterns have affected the surrounding land. Issues such as waterlogging, increased surface water runoff, soil erosion, and flooding have been observed.

This project aims to restore and enhance land drainage systems following the completion of the FFSA development scheme through targeted land drainage interventions. The drainage design has been completed by sub consultants Land Drainage Consultancy Limited who will also act as *Client* supervisor during delivery.

These activities are intended to manage surface and subsurface water flow to prevent waterlogging to Environment Agency fencing, improve land usability and support agricultural productivity.

The project has to date and will continue to engage with 2 key stakeholders. The first is the landowner, David Ashbridge, whose land has been impacted by the FFSA works and the second the local Foss Internal Drainage Board (IDB) who have maintenance responsibility for the receiving watercourse. Consent for outfalls has already been obtained from the IDB by the *Client*.

Scope

The *Contractor* shall procure land drainage as per drawings ENV0002212C-WG-DE-00-DR-D-B1303_1-A6-P06-B1303-EA6-LOD6-Land Drainage - Ashbridge North (Area 2) & ENV0002212C-WG-DE-00-DR-D-B1303_2-A6-P06-B1303-EA6-LOD6-Land Drainage - Ashbridge South (Area 5)

Specifically, this includes works in 2 locations named Area 2 (Ashbridge North) and Area 5 (Ashbridge South). The scope for each of these areas is separate.

In Area 2 the Contractor shall undertake:

- Exploratory work to determine levels of existing drains
- Installation 1 No. 200mm GRC Headwall
- Installation of 200mm perforated pipe using trencher with permeable fill to within 300mm of the surface average 1.2m deep
- Removal of arisings from 200mm drain offsite;
- Connection into existing drains using New junctions;
- Installation of 80mm perforated land drains at an average of 800mm deep with permeable fill to within 300mm of the surface
- Removal arisings from 80mm drain offsite;
- The taking down & re-instatement of 140 meters of fencing.

Re-seeding work with permanent grass mixture to all areas will be undertaken by Others

The new drain to be installed via conventional drainage trencher machine and laid at a depth that ensures all existing land drains can be positively intercepted.

All existing land drains containing less than 66% silt to be connected into new drain via purpose made junctions. The minimum grade on new drains is to be 0.1%.

In Area 5 the Contractor shall undertake:

- Exploratory work to determine levels of existing drains;
- Installation of 225mm 'twin-wall' pipe from collection chamber to outfall;
- Installation of 80mm drainage pipe c/w drainage stone brought to within 300mm of the surface;
- Installation 1.2m diameter concrete inspection chamber c/w silt trap & 40 ton rated cast lid
- Installation of 225mm 'twin-wall' unperforated pipe;
- Installation of 2No. 225mm outfall headwalls;
- Installation of 2No. 80mm GRC outfall headwalls with 2m solid pipe;
- Installation of 2No. 600mm inspection chambers;
- Spreading of Inert spoil from arisings to low points in area.

Re-seeding work with permanent grass mixture to all areas will be undertaken by Others

The *Contractor* shall consider the use of washed recycled 40mm stone in all required areas. Sample to be approved by *Client* appointed drainage supervisor.

The Contractor compound shall be located as per Figure 1 below and the Client will arrange any notice of entry and access to or across third party land

Figure 1

Scope Assumptions;-

- 1) All waste and arisings that require removal from site (Area 2 only) are classified as inert
- The works will not be delayed or affected by any ecology or environmental constraint. The Client will appoint ecological watching brief if required
- 3) There are no underground services that require protection or diversion to facilitate the works
- 4) The Contractor will be required to produce Health & Safety File, and provide marked up construction drawings at completion, for Others to produce digital As Built versions. There is no requirement for Carbon reporting.
- 5) The headwalls installation can take place without any temporary works to stop or divert flows
- 6) The existing ground conditions are suitable and there is no requirement for trench support (for land

drainage and ditch support), breaking hard ground or dewatering

- 7) The existing fencing is suitable for reuse and does not need to be replaced
- 8) The Client has secured the necessary IDB consent for the works
- 9) The stockpile location, prior to loading for removal from site, will be no more than 200 metres from the working areas
- 10) There is no requirement to connect existing land drains into the new drains if the existing is more than 66% full of silt

2. Drawings

Drawing Number	Revision	Title
1	P06	ENV0002212C-WG-DE-00-DR-D-B1303_1-A6-P06-B1303-EA6-LOD6- Land Drainage - Ashbridge North
2	P06	ENV0002212C-WG-DE-00-DR-D-B1303_2-A6-P06-B1303-EA6-LOD6- Land Drainage - Ashbridge South

3. Specifications

Title	Date or Revision	Tick if publicly available
As per specifications outlined in drawings 1 and 2 in section 2		

4. Constraints on how the Contractor Provides the Works

4.1 Deeds and Access

The *Contractor* is to provide the *works* in accordance with the Asset OMR Framework Deed of Agreement and Schedules including the Technical Specifications.

Doc No 249_18_SD15

The administration of the contract is to be carried out using the *Client's* contract management tools. All contractual communications are to be sent through the *Client's* contract management tools (FastDraft).

The Contractor's site Operatives / personnel (including Subcontractors) prior to carrying out the works shall either be:

- a. Formally site inducted to the site. Or:
- b. If not site inducted, escorted onto and around the site once they arrive.
- c. Under no circumstance, howsoever arising shall the *Contractor's* site operatives enter the *site* until one of the above criteria is fully discharged.

Access to the site shall be taken through the landowners private access track by agreement with the landowner. Formal Notice of Intended Entry will be served by the Agency Estates department.

The Contractor shall Provide the Works in accordance with their accepted Framework Sustainability Plan.

The *Contractor* may only use the *site* for the purposes in connection with the *works*. *Site* activities shall be planned to comply with the recommendations noted within the latest version of the Environmental Action Plan.

The Contractor shall comply with the latest revision of the Environment Agency's Safety, Health, Environment and Wellbeing (SHEW) Code of Practice (CoP) V7 April 2025.

All design and construction activities must adhere to the latest version of the *Client's* Minimum Technical Requirements (MTRs). Where there is conflict between MTRs and the Scope, the Scope takes precedent, but the *Contractor* shall notify the *Client*.

4.2 Use of Site

At the end of each working shift, the *Contractor* shall leave the *site* safe, tidy and without any risk to others. The *Contractor* shall be responsible for the security of the *site* and ensure that no unauthorised person gains access to any part of the *site*.

The *Contractor* shall undertake full pre and post condition surveys of the land and areas of work and share this with the *Client* project manager

The *Contractor* shall be wholly responsible for the security of the *site*, passage of vehicles, personnel/pedestrians and security of neighbouring properties which may be affected by the *works*, including personnel, Equipment, Plant and Materials used in the delivery of the *works*.

The *Contractor* shall establish the construction *site* and compound boundaries immediately upon taking possession and take all necessary steps to clearly identify the construction *site*, preventing access to the *site* by unauthorised persons or trespassers. This includes all inductions and supervision of the *site* at all times during the *works*.

All temporary barriers, fences and hoardings erected as part of the *works* shall be appropriately designed, kept secure, regularly inspected, and maintained throughout the duration of the project.

The *Contractor* shall keep the public informed of the *works* and of the dangers present on the *site* through appropriate notices, signages and other communication methods as the *Client* deems necessary.

The *Contractor* shall consider the security of neighbouring properties and shall not leave unattended any items or conditions which would provide, or assist, access to neighbouring properties

4.3 Protection of the Works

The *Contractor* shall protect the *works*, Equipment, Plant and Materials, liable to damage either by the weather or by the methods employed for undertaking the *works*.

The Contractor shall ensure that any damage caused by the works is remediated to an equal or better condition following the works, at the Contractor's cost.

The Contractor is responsible for preventing damage to existing structures during the works.

4.4 Traffic management

The Contractor shall ensure the adoption of factors identified in the CLOCS standard (https://www.clocs.org.uk/resources/clocs_practice_note_for_designers.pdf) to ensure the safety of construction vehicle journeys as part of the design including

- a. zero collisions between construction vehicles and the community
- b. improved air quality and reduced emissions
- c. fewer vehicle journeys
- d. reduced reputational risk

Traffic Management Plans (TMP) must be developed for all projects. These should include movements of waterborne plant and equipment.

The TMP should identify the specific controls related to highway activities, people/plant interface at the point of work and the prevention of drowning when using water borne plant and vessels. Consideration must also be given to the precautions required to protect pedestrians, including designated walkways on *site* and in the compound area. All deliveries including those out of hours (e.g. tidal constraints) need to be appropriately supervised.

The TMP should be referenced in the Construction Phase Plan prior to commencement of work on *site*, be displayed on *site* during construction and referenced in the *site* induction. It should be regularly reviewed and updated whenever vehicle routes or movement conditions change. All associated operatives must be briefed on the content of the updated TMP and records maintained of the briefing.

4.5 Known Services

4.6 Notice of intended Entry

The works are subject to the issue of a Notice of Intended Entry submitted by the Environment Agency Estates department on behalf of the project.

4.7 Working times

The Contractor will be permitted to work between 7.30am and 6.00pm on weekdays (Monday to Friday)

The Contractor may work on a Saturday by agreement with the Client Project Manager

4.8 Client Appointed Supervisor

The Contractor shall deliver the works under the supervision of the Client appointed designer and supervisor of the works.

5. Requirements for the programme

The *Contractor* submits his programme with the *Contractor*'s Offer for acceptance. The *Contractor* shows on each programme which they submits for acceptance (in form of Gantt chart showing the critical path, proposed order and timing to undertake the works and proposed plant and labour resources) the following:

- (a) Period required for mobilisation/ planning & post contract award
- (b) starting date
- (c) Each of the activities listed within the Price List
- (d) Any key third party interfaces: lead in periods for materials and sub-contractors; time required to obtain consents/waste permits; stated constraints; *Contractor's* risks.
- (e) Completion date

Further to the requirements of ECC Clause 31 the *Contractor* shall provide a written explanation of changes to each programme activity, sufficient to enable the *Client* to understand the cause and impacts.

The *Contractor* shall submit to the *Client* a list of planned activities every week during construction. The list of activities shall be submitted on Friday of the preceding week. Any out of regular hours work must be clearly indicated to allow planning of appropriate attendance by the *Client*.

The *Contractor* shall ensure through planning and programming of the *works* to minimise the risk of damage to the existing structures and assets during construction of the *works*.

6. Services and other things provided by the Client

Item	Date by which it will be provided
Access to the Site	15/06/2025
A suitable area for the compound agreed with the landowner	15/06/2025
Land Drainage supervision	15/06/2025
