- 5.2 If the Buyer is entitled to terminate the Contract or the Supplier (or its Subcontractor, if relevant) ceases to participate in the NHSPS for whatever other reason, the Buyer may in its sole discretion, and instead of exercising its right to terminate this Contract where relevant, permit the Supplier (or any such Subcontractor, as appropriate) to offer Broadly Comparable Pension Benefits, on such terms as decided by the Buyer. - 1.1.4 cannot be increased except as agreed in writing in accordance with this Schedule.

2 Applicable Pricing Mechanism

- 2.1 Under each Call-Off Contract, the overall Charges estimate shall be provided in the form of a Capped Time and Materials price underpinned by the Call-Off Contract specific rate prices included within Annex 1 of this Schedule.
- 2.2 The pricing mechanisms to be used under this Call-Off Contract shall be confirmed in each Statement of Work and Charges shall be calculated on the basis of the rates and prices specified in Annex 1 which must be no greater than those set out in Framework Schedule 3 (Framework Prices).
- 2.3 The pricing mechanism (Capped Time and Materials, or Fixed Price) applicable for specific Deliverables shall be as stated in the relevant Statement of Work. Such pricing methodology shall be calculated by reference to the rates and prices in Annex 1. The Supplier shall provide pricing using the pricing mechanism(s) required by the Buyer in the relevant Statement of Work(s), but may also propose alternative pricing mechanisms.
- 2.4 Where the Buyer requests a Capped Time and Materials mechanism for a Statement of Work, the Supplier shall separately identify:
 - 2.4.1 the Time and Materials profile for the Statement of Work, as per the rate table in Annex 1; and
 - 2.4.2 the amount of the Cap, alongside clearly identified assumptions, risks, provisions or other breakdowns pertinent to the Cap. The Supplier shall provide an estimate linked to these breakdowns, where requested by the Buyer.

- 2.5 Where the Buyer requests a Fixed Price pricing mechanism for a Statement of Work, the Supplier shall, at the Buyer's request separately identify:
- 2.5.1 prices against individually requested Milestones and Key Milestones, and the associated Delay Payments;
 - 2.5.2 the underlying Time and Materials estimate used to calculate the Fixed Price; and

- 2.6 The Buyer accepts that, having agreed a Fixed Price, once an agreed Key Milestone is successfully Achieved it shall be charged at the Fixed Price, regardless of the actual cost.
- 2.7 The Supplier accepts that, having agreed to a Fixed Price, it is responsible for delivery of each Milestone in terms of the scope of the component Deliverables, meeting the Buyer's acceptance criteria and timescales related to any Milestone (if any). The Supplier accepts that this shall be at the agreed price, regardless of the actual cost to the Supplier.
- 2.8 The Supplier shall maintain time recording records where providing services on a Fixed Price basis. In relation to any Fixed Price, the Buyer is entitled to request the actual time and material costs utilised. The Buyer shall take into account continuous improvement during the course of the Call-Off Contract but shall not otherwise unreasonably withhold agreement to such a request.
- 4.3 Any such agreed changes to Call-Off Contract rates shall take effect on the anniversary of the Call-Off Contract Start Date.

Annex 3 (Expenses Policy)

FOR OUTCOME BASED SUPPLY CONTRACTS

1. The Supplier must adhere to the **overarching principles**, as set out below.
 - **Travel should be for essential business reasons only.** Suppliers shall work to minimise the costs of travel.
 - **Travel should consider environmental impact.** The Buyer has a responsibility to meet obligations to reduce carbon emissions and business travel itself and in its supply chain under the Greening Government Commitment Policy, and therefore does not encourage unnecessary travel. In order to reduce the environmental impact of travel, every attempt should be made to identify options to eliminate the need to travel, for example using new technologies to communicate. Regular travel should always be challenged as part of good practice;
 - The **lowest cost option** for travelling should be the default. Suppliers are encouraged to use public transport wherever possible. Suppliers are also expected to use the most economical means of public transport on every occasion, including travelling outside of peak times where practical. The purchase of advance tickets is expected in all but exceptional cases;
 - **First class** travel is **not permitted and will not be reimbursed**, regardless as to whether the cost of such is lower than alternative options, except when an individual has a disability as set out in the Business Travel and Expenses Procedure;
 - All travel bookings and expense claims for reimbursement must have **clear business justification**.
 - Suppliers shall claim compensation (for late or delayed travel for example), on behalf of the Buyer.
 - The Buyer will only reimburse expenses which are **in excess of the normal commuting and day to day costs** of the individual. Whilst journeys may begin from home, Suppliers will be required to take account of the above when making claims.
2. Reporting and Audit Suppliers are required to maintain a full itemised index of expenses, and detail the named personnel, reference, and work to which is relates, and sufficient evidence to show the principles have been considered and are met in each case, and provide copies on request at any time by the Buyer. Failure to provide the same will mean the expenses may not be recoverable. Suppliers shall maintain such records for review by the Buyer (and its auditors,

HMRC, DHSC and any other central government entity) for the duration of the Call-Off Contract and for a period of 6 years from expiry or termination of the same.

3. Limitations and Exclusions Any reimbursement of expenses is subject to the following exclusions and limits:
 - 3.1. No expenses shall be chargeable for any Deliverables provided on a Fixed Price basis.
 - 3.2. Expenses shall only be chargeable for Deliverables charged on a Capped Time and Materials basis where the Call-Off Contract explicitly specifies both:
 - 3.2.1. that expenses are chargeable; and
 - 3.2.2. the total maximum capped amount for the expenses under the Call Off-Contract.
 - 3.3. If expenses are chargeable, they will only be chargeable up to the stated capped amount. If no capped amount is stated in the Call-Off Contract, then the capped amount shall be interpreted as zero and no expenses shall apply.
 - 3.4. Any claim for reimbursement of expenses must be submitted no later than monthly in arrears.
 - 3.5. No expenses shall be reimbursed for Suppliers working from their normal place of business (in any location) or their home.
 - 3.6. Suppliers shall be required to provide evidence of all expenses incurred on the submission of any invoice for the same. Any claims for expenses must be submitted with evidence (copies of VAT receipts).
4. Unless otherwise explicitly agreed under such Call-Off Contract as a variation of the application of this policy, there is no reimbursement of expenses for travel to any of the Buyer's main offices.

 - 12.2.3 where the Supplier has Sole Responsibility and where the failure to satisfy the Test Success Criteria results, or is likely to result, in the failure (in whole or in part) by the Supplier to meet a Milestone, then without prejudice to the Buyer's other rights and remedies, such failure shall constitute a material Default.
- 12.3 Where the Supplier has Sole Responsibility, the Buyer shall be entitled, without prejudice to any other rights and remedies that it has under this Contract, to recover from the Supplier any reasonable additional costs it may incur as a direct result of further review or re-Testing which is required for the Test Success Criteria for that Deliverable to be satisfied.
- 12.4 The Buyer shall issue a Satisfaction Certificate in respect of a given Milestone as soon as is reasonably practicable following:
- 12.4.1 the issuing by the Buyer of Satisfaction Certificates and/or conditional Satisfaction Certificates in respect of all Deliverables related to that Milestone which are due to be Tested; and

- 12.8 If there is one or more Material Test Issue(s), the Buyer shall refuse to issue a Satisfaction Certificate and, without prejudice to the Buyer's other rights and remedies, such failure shall constitute a material Default should the Supplier hold Sole Responsibility
- 12.9 If there are Test Issues which exceed the Test Issues Threshold but there are no Material Test Issues, the Buyer may at its discretion (without waiving any rights in relation to the other options) choose to issue a Satisfaction Certificate conditional on the remediation of the Test Issues in accordance with an agreed Rectification Plan provided that:
 - 12.9.1 any Rectification Plan shall be agreed before the issue of a conditional Satisfaction Certificate unless the Buyer agrees otherwise (in which case the Tester shall submit a Rectification Plan for approval by the Buyer within 10 Working Days of receipt of the Buyer's report pursuant to Paragraph 11.5); and
 - 12.9.2 where the Buyer issues a conditional Satisfaction Certificate, it may (but shall not be obliged to) revise the failed Milestone Date and any subsequent Milestone Date.

13. RISK

- 13.1 The issue of a Satisfaction Certificate and/or a conditional Satisfaction Certificate shall not:
 - 13.1.1 operate to transfer any risk that the relevant Deliverable or Milestone is complete or will meet and/or satisfy the Buyer's requirements for that Deliverable or Milestone; or
 - 13.1.2 affect the Buyer's right subsequently to reject all or any element of the Deliverables and/or any Milestone to which a Satisfaction Certificate relates.

2. OVERVIEW OF SUPPLIER AND CONTRACT MANAGEMENT

- 2.1 There are five levels of relationship and contract management covered by the various parts of this framework:
 - 2.1.1 **Statement of Work Management (“SOW Management”)** covering how Statements of Work (SOWs) are managed. SOW Management starts with SOWs being created and ends, typically with handover to the next SOW, as a SOW ends (see paragraph 3.1);
 - 2.1.2 **Call-Off Contract Management (“Call-Off Contract Management”)** covering the specific contract management obligations between Supplier and Buyer relating to a specific Call-Off Contract (see paragraph 3.8);
 - 2.1.3 **Buyer/Supplier Management** covering individual relationships between the Buyer and a single Supplier. These relationships are anticipated to develop as an early part of Call-Off competition as Suppliers bid for potential work. These relationships are also anticipated to persist beyond individual Call-Offs for the duration of the Framework (and beyond, assuming Call-Offs extend beyond the formal term of the Framework) (see paragraph 3.31);
 - 2.1.4 **Buyer Specific Framework Management**, involving the Buyer and all Suppliers under the Framework with whom the Buyer has a relationship. This level of relationship is anticipated to evolve as Call-Offs are awarded. This level of relationship is anticipated to persist beyond individual Call-Offs (see paragraph 3.40); and
 - 2.1.5 **Framework Buyer/Supplier Management** covering “user group” topics such as:
 - Innovation;
 - New developments in technologies;
 - Changes in digital services (e.g. the incorporation of SFIA 8 and changes to Digital, Data and Technology roles);
 - Opportunities to improve the operation of the overall framework; and
 - Proposed updates to the framework;
- 2.2 For the avoidance of doubt, by signing any individual Call-Off Contract, suppliers are obliged to meet the terms of this Schedule, as required by the Buyer, for the durations indicated at each level of relationship.
- 2.3 There are a number of key mechanisms for managing this Call-Off Contract set out below. This list is not an exclusive list but is designed to focus on the key principles underpinning each level of management. Also, whilst logically separated below, the Buyer may elect to combine such mechanisms:

Call-Off Schedule 15A (Health Supplier and Contract Management)

OFFICIAL – SENSITIVE – COMMERCIAL

- 2.3.1 **Product Backlog** (Scrum™) or **Prioritised Requirements List** (AgilePM®) (the “**Backlog**”) which, within the context of this Contract, should be considered to be the cornerstone of ongoing operational management. As such it should be considered to be a live contract artefact (see paragraph 4.1);
- 2.3.2 “**Operational Planning Events**” or equivalent, managing the granular level refinement from Commercial Planning/Review Event level (typically at requirement/Increment level down to Scrum Sprint / Timebox (AgilePM) sized task level (to be held at the frequency given at paragraph 3.6);
- 2.3.3 “**Operational Review Events**” or equivalent, which provide the basis for among other things, reviewing achievements out of individual Sprints/Timeboxes, learning lessons from the previous activity and understanding the actual effort used. A summary of this will be fed into the Commercial Planning/Review Events (Scrum Sprints or reporting performance and progress of tasks into the Commercial Planning/Review Events is described below at paragraph 3.7);
- 2.3.4 “**Commercial Planning/Review Events**” (usually combined but may be separate events for planning and review):
- These events will refine and prioritise the main Backlog (at Deliverable Increment/user story level and above) for feeding into the more detailed SOW task level backlog managed under the Operational Planning Events described above. If the Incremental Fixed Price charging mechanism is in use under a SOW, these events will agree the “price” for a Deliverable Increment (backed up by an estimate of effort linked to the Call-Off Rate Card).
 - From a review perspective, the Commercial Planning/Review Event will assess completeness of tasks and map this into acceptance of Deliverables or Deliverable Increments as well as collate actual effort spent. Acceptance certificates may be used to acknowledge completeness. The review will typically lead to invoicing and payment.
 - Whilst the frequency of Operational Planning Events is likely to reflect the operational practices specific to the SOW, Commercial Planning/Review Events will normally be held on a monthly basis.
 - These events are seen at the main focus points for Call-Off Contract Management activities (see paragraph 3.8).
- 2.3.5 **Variation and Change Management** covers minor changes to Statements of Work (“**SOW Variations**”) and more formal changes to the contract (see paragraph 4.2 below);
- 2.3.6 Events such as **Operational Board meetings**, where the programme or project teams may escalate topics for resolution or where material decisions may need to be made. (see paragraph 6.21 below);
- 2.3.7 “**Buyer SM Events**” designed to aggregate Call-Off Contract activity into an overarching view of Supplier performance and provide a means to take a holistic view of the performance and relationship with the Supplier as well as address topics escalated from individual Call-Off Contracts. If the Buyer only has one or two Call-Off Contracts with an individual supplier these events may be combined with Commercial Planning/Review Events, however the intent is to focus at the Supplier level rather than the Call-Off Contract level (see paragraph 3.39 below);

Call-Off Schedule 15A (Health Supplier and Contract Management)

OFFICIAL – SENSITIVE – COMMERCIAL

- 2.3.8 **The “Balanced Scorecard”**, providing the mechanism to visually summarise the status of either the Call-Off and/or Supplier performance. Whilst a large individual Call-Off may warrant a dedicated Balanced Scorecard, within the context of this framework it is anticipated the Balanced Scorecard will operate at the overall Buyer/Supplier level (and this is the assumption underpinning the illustrations making up the rest of this Schedule) (see 4.3 below);
- 2.3.9 **“Collaborative Buyer/Supplier Events”** intended to provide a mechanism to share learning, develop collective improvements, share future plans, and discuss topics which may be forwarded for consideration at the Framework level. (see 3.40 below); and
- 2.3.10 in order to manage the time dimension relevant to the Call-Off Contract the Buyer will require some form of delivery planning. This may be in the form of Gantt charts or project plans, or it may be in the form of agile tools such as roadmaps, Epic boards, Elaboration and/or Sprint Boards, Kanban boards, etc.
- 2.4 Throughout the lifetime of both individual Call-Off Contracts and the framework relationship between the Buyer and Suppliers there are risks. Risk management practices applied at Call-Off Contract level are described further at paragraph 5.
- 2.5 Suppliers should be aware that the Buyer will also undertake ongoing Supplier risk management activities (such as ongoing financial credit rating checks) as part of its Call-Off Contract management processes.

3. SUPPLIER AND CONTRACT MANAGEMENT LEVELS

Statement of Work Management

- 3.1 Other than the first SOWs under a Call-Off Contract, which will be defined by the Buyer, SOWs will generally be developed involving joint exploratory discussions between the Buyer and the Supplier. Generally speaking, inputs to the SOW are likely to include:
 - 3.1.1 some form of road map (the context);
 - 3.1.2 initial views on initial resource profile and technology stack and so on, used to inform the sizing of the SOW;
 - 3.1.3 which Accountability Model (Sole Responsibility, Self-Directed Teams or Rainbow), each as defined in Framework Schedule 1 (Specification); and which pricing mechanism (Fixed Price, Capped Time and Material, or Incremental Fixed Priced); and
 - 3.1.4 an initial Backlog (detailing requirements at an appropriate level of detail), provisional resource profile and technologies.
- 3.2 The operation of the Backlog is described under paragraph 4, however, at operational level it is intended to be the basis for agreeing, accepting and capturing tasks as well as related effort. There shall be a continuous alignment between the main Backlog held at Call-Off Contract level and any SOW Backlog (the Call-Off Contract level Backlog focuses on Deliverable Increments whilst the SOW Backlog level focuses on the more detailed tasks). At SOW level the Backlog should largely be operational and

Call-Off Schedule 15A (Health Supplier and Contract Management)

OFFICIAL – SENSITIVE – COMMERCIAL

should be being refined to a level that can be allocated to the next sprint, timebox or equivalent (aiming to task size).

- 3.3 In addition to the Backlog, there will be information required by the Buyer for the purposes of recording resources (e.g. for controlling access to infrastructure), measuring performance (e.g. burn charts, etc), evidencing delivery (e.g. acceptance certificates) and so on. Annex 1 provides a provisional, non-exclusive, list of information types which may be used by the Buyer to initially specify typical requirements.
- 3.4 Whilst individual SOWs may operate under the Fixed Price or Incremental Fixed Price pricing mechanisms, all Call-Off Contracts shall be underpinned by an agreed set of Supplier Call-Off Rate Cards. Under all circumstances, regardless of pricing model, Suppliers shall maintain an accurate record of actual resource utilisation and to make this available to the Buyer on request.
- 3.5 When capturing effort, the Supplier is required to link such effort to the SOW and to the respective entry on the applicable Call-Off Rate Card as well as include period start and end date and utilised effort (in hours, days or fractions thereof as determined by the Buyer).
- 3.6 Operational Planning Events will be held at a frequency determined by the Buyer. The purpose will be to agree the next iteration of work (e.g. Scrum Sprint) and to refine the Backlog. The principle of ongoing refinement is a key Agile concept.
- 3.7 Operational Review Events will be held at a frequency determined by the Buyer. Typically, these will be at regular intervals (e.g. every month or every Scrum Sprint). Two contractual related purposes of Operational Review Events are to:
 - 3.7.1 identify when tasks are completed and provide evidence to the Commercial Planning/Review Events that work is “done”; and
 - 3.7.2 capture actual effort taken (versus the forecast) as a means of improving future estimates and providing the raw data for invoicing purposes.

Call-Off Contract Management

- 3.8 Within the context of this Call-Off Contract, taking into account the other levels of contract management, the primary purpose of Call-Off Contract Management includes:
 - 3.8.1 establishing and managing the information flows relevant to the Call-Off Contract;
 - 3.8.2 managing the overarching Backlog and ensuring it is continuously refined to reflect the evolving work;
 - 3.8.3 establishing new SOWs, providing oversight of SOWs in progress and ensuring handover between SOWs as appropriate;
 - 3.8.4 acting as the bridge between SOW management (operational) and commercial matters such as raising and managing invoices and payment, and tracking and managing commitment and spend against the overall Call-Off Contract value estimate;
 - 3.8.5 providing oversight of the resources (Supplier Staff, Subcontractors, etc.) required to deliver the Deliverables under the Call-Off Contract;

- 3.8.6 creating and maintaining Implementation Plans (as set out in Call-Off Schedule 13A (Health Implementation Plan and Testing);
 - 3.8.7 co-ordinating with stakeholders and the Operational Board if applicable;
 - 3.8.8 managing overall Call-Off Contract level risks, issues, escalations and commercial matters;
 - 3.8.9 managing formal Variations;
 - 3.8.10 acting as the linkage point into Buyer/Supplier Management;
 - 3.8.11 maintaining and updating the Contract specific Call-Off Rate Card(s);
 - 3.8.12 contributing to the maintenance of programme/project artifacts such as business cases, procurement packages, roadmaps, etc;
 - 3.8.13 ensuring smooth transition and hand-over to the recipient of Deliverables (always the Buyer, but it may also be to another supplier if there is another major phase of work to be undertaken by the other supplier under a separate Call-Off Contract or SOW); and
 - 3.8.14 monitoring Supplier performance against Material KPIs.
- 3.9 Typically, the Buyer shall expect oversight of SOWs to form part of the role of a core team who will persist for the duration of the Call-Off Contract. The Buyer shall consider executing a dedicated SOW (typically a rainbow team, on a Capped Time and Materials basis) for defining and managing Call-Off Contract Management activities. This would be in addition to any specific delivery SOWs. This role is not anticipated to be full time, but rather periodic (e.g. no more than a few days per month). If a single SOW is operating at any given time, the role may to be combined with others.
- 3.10 Whereas SOWs will often be sequential, there is no restriction on the number of SOWs that are able to be effective at any point in time. Likewise it is highlighted that Service Provisions under this framework are not lots. This means a Call-Off Contract may involve more than one Service Provision (with individual SOWs possibly commissioned to deliver distinct services).
- 3.11 The above activities are logically defined under the heading of Call-Off Contract Management for the purposes of this Call-Off Contract however the Buyer may choose to capture the above requirements in a manner of their own choosing.

Establishing and Managing Information Flows

- 3.12 Annex 2 provides an initial list of information which may be requested by the Buyer in connection with Call-Off Contract Management. The Buyer may add to this list at any point in time by notifying the Supplier in writing.
- 3.13 The information set out in Annex 2 shall be expected to be kept up to date by the Supplier at the refresh frequency set out in that Annex. The Supplier is required to maintain tight version control and, where noted, obtain Buyer approval to updates as the work progresses.

Managing the Backlog

- 3.14 The Backlog is a key artifact for Call-Off Contract Management. The Backlog shall track Deliverable Increments as they are refined during the Call-Off Contract Period,

will identify which SOWs cover each Deliverable Increment, will size them (and cost them under either the Fixed Price or Incremental Fixed Price models), will provide the basis for “accepting” them and will track various other information as set out in Annex 4.

- 3.15 Whilst the Buyer may choose to have a single Backlog covering each SOW and the Call-Off Contract, at Call-Off Contract level the Backlog is intended to capture the Deliverable Increments whilst delegating the detailed task-level management down to the SOW Backlog.
- 3.16 Payment under the either the Fixed Price or Incremental Fixed Price pricing mechanism will be based on the price agreed in advance. However, the Supplier will be expected to provide a resource estimate which, when combined with Call-Off Rate Card prices, will provide the transparent basis for the fixed price.
- 3.17 The Buyer may elect to use acceptance certificates for all Deliverable Increments agreed as “done” or only for key Deliverable Increments. Under the Fixed Price or Incremental Fixed Price pricing mechanisms, there shall be a clear linkage between an invoiced amount and the relevant Deliverable Increment.
- 3.18 In all cases there shall be a clear linkage between the Backlog and invoices submitted.
- 3.19 Invoice frequency may not align with Operational Review Events (e.g. invoicing may be monthly but review/planning events every two weeks). Under such circumstances, for clarity of receipting and audit purposes, unless agreed otherwise by the Buyer, work yet to be accepted at the Commercial Planning/Review Event shall be held back to the next appropriate invoice period.

Oversight of Statements of Work

- 3.20 Subsequent to the first SOW, new SOWs will be created and agreed under the concept of Call-Off Contract Management. It is anticipated that the team involved in Call-Off Contract Management shall develop the SOW requirements, work with the Supplier to agree the content of the SOW, and decide on the resourcing and pricing models prior to signing off the SOW.
- 3.21 It is the responsibility of the respective Call-Off Contract Managers to ensure SOWs are within the scope of the overarching Call-Off Contract and that budget is available under the Call-Off Contract.
- 3.22 It is envisaged that minor variations to in-place SOWs will be coordinated under the concept of Call-Off Contract Management

Providing oversight of resourcing

- 3.23 Whilst detailed planning of resource allocation to SOW tasks is handled at SOW Management level, there is an ongoing requirement to understand the total resourcing view and where resourcing is deployed at the Call-Off Contract level.
- 3.24 Under the Rainbow Team Accountability Model, the Buyer may have mandatory induction processes to be followed. The Supplier shall ensure that all such requirements are met where required prior to beginning work under any Call-Off Contract or SOW.
- 3.25 The Supplier is also responsible for ensuring that its staff (directly or indirectly employed) perform any data handover / cleansing obligations where applicable at the

end of a Call-Off Contract. Call-Off Contract Management is accountable for ensuring this is done.

The bridge between SOW Delivery and payment / Call-Off Contract budget management

- 3.26 The Supplier shall, at all times, maintain an audit path linking delivery information together with invoice information.
- 3.27 In an Agile environment, the contract value agreed at Call-Off Contract level is typically a maximum possible value rather than a committed sum. Subject to the terms of this Call-Off Contract, committed charges shall be set out in each SOW.
- 3.28 At all times, the Supplier shall track budgets, forecasts and actuals at purchase order level, SOW level and Call-Off Contract level and shall provide a level of granularity (e.g. monthly) as required by the Buyer.
- 3.29 The Supplier shall update such financial summaries to reflect any changes agreed under the formal Variation process.
- 3.30 The Supplier shall notify the Buyer of any forecast overspend at least 60 days in advance of such an overspend occurring.

Buyer/Supplier Management

- 3.31 Buyer/Supplier Management covers the overall relationship between Buyer and Supplier. If there is only one Call-Off Contract in place between the Buyer and Supplier the below activities may be combined under Call-Off Contract Management. However, Buyer/Supplier Management contains obligations which extend beyond specific Call-Off Contracts as set out below.
- 3.32 Buyer/Supplier Management is considered to formally start on the commencement of the Call-Off Contract. However, it is anticipated that Suppliers start to engage in Buyer/Supplier Management on an informal basis as they first become involved in a Further Competition Procedure.
- 3.33 From the Call-Off Contract Start Date the Supplier shall nominate a Buyer Account Manager and the Buyer shall nominate a Supplier Manager
- 3.34 It is expected, as part of non-Call-Off Contract-specific Supplier engagement, that the Supplier makes efforts to “understand” the Buyer. In order to improve competition and ensure a level playing the Buyer shall support attempts by the Supplier to “understand” the Buyer, without prejudicing any Further Competition Procedure.
- 3.35 It is recommended that, where a Supplier has not previously had a relationship with the Buyer, or specific relevant parts of the Buyer’s business, that “get to know events” are facilitated by the Buyer.
- 3.36 Buyer/Supplier Management is considered to end on the End Date of the last effective Call-Off Contract between the Buyer and Supplier.
- 3.37 Whilst it is recognised that Buyer/Supplier Management may be incorporated within Call-Off Contract Management, there is certain information which may be aggregated up or is pertinent to the relationship with the Supplier. Examples of such information are listed under Annex 3.

- 3.38 On an ongoing basis, the Buyer and Supplier shall collaborate to ensure appropriate prioritisation of resources, focus and continuous improvement across all Call-Off Contracts between the Buyer and the Supplier.
- 3.39 Buyer SM Events, for handling the above matters, shall be held at a frequency determined by the Buyer.

Collaborative Buyer/Supplier Events

- 3.40 Periodically, the Buyer may elect to meet with all Suppliers with whom it has Call-Off Contracts or who are actively participating in Framework business with the Buyer.
- 3.41 Typically such events will be held quarterly, but the frequency shall be determined by the Buyer. Suppliers should make every reasonable effort to participate in, and contribute to, such events.
- 3.42 The purpose of such events will typically be to:
 - 3.42.1 provide the Buyer with the opportunity to share, on an equitable basis, future pipelines of work;
 - 3.42.2 provide the Buyer with the opportunity to share future technology trends from the Buyer's perspective;
 - 3.42.3 provide Suppliers with the opportunity to suggest overall improvements to the way the Framework Contract is working with the Buyer;
 - 3.42.4 share emerging technologies coming out of Supplier activities;
 - 3.42.5 identify where there may be market shortages in skills and discuss mechanisms (training, knowledge sharing, buddying/mentoring, etc.) to address such shortages;
 - 3.42.6 agree proposals for possible changes to be considered by CCS;
 - 3.42.7 discuss opportunities to improve the operation of the overall Framework Contract;
 - 3.42.8 discuss proposed updates to the Framework Contract; and
 - 3.42.9 any other activity which may be proposed by the Buyer.

4. KEY MECHANISMS

- 4.1 Product **Backlog** (Scrum®) or Prioritised Requirements List (AgilePM®) or equivalent:
 - 4.1.1 Typical information to be held in the Backlog may be found in Annex 4;
 - 4.1.2 The Backlog should be considered to be the operational equivalent of a change control log capturing refinements, changes, additions and deletions. The Backlog demonstrates the value delivered (even if only at Deliverable Increment) and provides an indicator on how much change the project/programme has had to absorb;
 - 4.1.3 The Backlog evidences value delivered; and

- 4.1.4 Since the Backlog captures ongoing refinement, Variations should only be required to changes to funding, scope and high level Milestones/timescales.

4.2 Variation and Change Management

- 4.2.1 The term “SOW Variation” is used to describe changes to budget, timescales, and scope at the SOW level. Other than the Buyer ensuring finances are still available and that the scope of the SOW remains inside the Call-Off Contract, such SOW Variations are intended to be managed within the Call-Off Contract. As such extended Buyer governance is not anticipated.

- 4.2.2 The term “Variation”, in this context, is used to describe changes to overall contract value, overall contract milestones and/or term and where overall scope requires to change and such Variations shall follow the procedure set out at Clause 24.

- 4.2.3 The Supplier is required to maintain copies of all Variation and SOW Variation documentation.

4.3 Balanced Scorecard

- 4.3.1 Where the Buyer determines, the Supplier shall work with the Buyer to develop the detail of a Balanced Scorecard.

- 4.3.2 The Buyer shall give notice to the Supplier as to when the Balanced Scorecard shall become effective.

- 4.3.3 The principles outlined in Procurement Policy Note 09/16: Procurement for Growth Balanced Scorecard (or any later replacement) shall apply.

- 4.3.4 The Parties shall refer to the Balanced Scorecard Paper, Annex A: Diagram and Annex B: Strategic Themes and Critical Success Factors associated with Procurement Policy Note 09/16 (or latest equivalents) when formulating a Balanced Scorecard.

- 4.3.5 The Buyer may elect to apply a Balanced Scorecard either per Call-Off Contract or at Supplier level.

- 4.3.6 The frequency of update to the Balanced Scorecard shall be determined by the Buyer (but will generally align with Commercial Planning/Review Events at Call-Off level and/or Buyer SM Events at Supplier level).

- 4.3.7 An example of a Balanced Scorecard may be found in Annex 5.

5. RISK MANAGEMENT

- 5.1 Reference is made to the HM Treasury Green Book supplementary guidance on risk (<https://www.gov.uk/government/publications/green-book-supplementary-guidance-risk>).

- 5.2 In particular, the principles and concepts contained in the Orange Book shall underpin the risk management practices implemented under this Schedule.

- 5.3 Both Parties shall pro-actively manage risks attributed to them under the terms of this Call-Off Contract.

 - 5.5.1 the identification and management of risks;
 - 5.5.2 the identification and management of issues; and

- 5.7 The Supplier will maintain a risk register of the risks relating to the Call-Off Contract which the Buyer and the Supplier have identified.
- 5.8 The Buyer may elect, at any point in time, to conduct ongoing Supplier risk management as follows:
 - 5.8.1 the Buyer may choose to use credit rating checks (such as those offered by Experian and Dun & Bradstreet) to monitor the financial health of the Supplier;
 - 5.8.2 should the Buyer determine that a Supplier could be at financial risk, the Buyer may request financial details (including current unpublished accounts) in order to better understand any risk which could have an impact on the Call-Off Contract;
 - 5.8.3 on request by the Buyer, the Supplier shall provide and work to a financial risk mitigation plan as a means of protecting the interests of the Buyer; and
 - 5.8.4 the Supplier shall take reasonable steps to ensure the financial health of any Subcontractors it engages with. In the event of a potential risk with any Subcontractor the Supplier shall notify the Buyer of such risks and the mitigation actions it is taking to protect the interests of the Buyer.

2. The purpose of the Balanced Scorecard is to promote contract management activity, through measurement of a Supplier’s performance against key performance indicators, which the Buyer and Supplier should agree at the beginning of a Call-Off Contract. The targets and measures listed in the example scorecard (above) are for guidance and should be changed to meet the agreed needs of the Buyer and Supplier.
3. The recommended process for using the Balanced Scorecard is as follows:
- The Buyer and Supplier agree a templated Balanced Scorecard together with a performance management plan, which clearly outlines the responsibilities and actions that will be taken if agreed performance levels are not achieved.
 - On a pre-agreed schedule (e.g. monthly), both the Buyer and the Supplier provide a rating on the Supplier’s performance
 - Following the initial rating, both Parties meet to review the scores and agree an overall final score for each key performance indicator
 - Following agreement of final scores, the process is repeated as per the agreed schedule.

Annex 6: Contract Boards

Call-Off Schedule 20 (Call-Off Specification)

1. Context

The Enabling Products portfolio is responsible for delivering integrated architecture and approach to digital interoperability across the providers of the wider health and care system, including core national products to enable bookings, referrals, and medicines management:

- Digital Medicines;
- Direct Care APIs;
- Booking and Referral Standard;
- Patient and Clinical Pathway Transformation;
- Wayfinder.

The areas of the Enabling Products portfolio that are the focus of the initial scope for this Call-Off Contract are:

- Primary focus: Direct Care APIs (DCAPI);
- Secondary focus: Patient and Clinical Pathway Transformation – Eyecare.

In addition to the above, future work may be identified across the Enabling Products Portfolio as roadmaps continue to be developed in response to evolving business priorities and any digital delivery support requirements will fall under the scope of this contract.

DCAPI

DCAPI or 'GP Connect' allows authorised health and social care workers in a variety of care settings to access their patients' GP records. It replaces current email and postal routes of communication, delivering information in a standard format that can be added to the record at the click of button, thus reducing the effort required by practice staff to update records after consultation outside the practice, reducing data errors from transposing information between formats and ensuring records are updated significantly more quickly. In terms of access, it allows detailed access to real time information.

GP Connect is therefore the fundamental enabler for fast, safe, labour-reducing connectivity across all services in the health and social care environment.

Current live GP Connect products are:

- Access Record: HTML - a snapshot reading of the GP record;
- Access Record: Structured - a product which currently gives access to the full patient record in a way that can be easily digested by the recipient organisation;
- Access Doc – enables reading of documents attached to the record;
- Send Doc – a product which allows documents to be sent to the record;

- Update Record – a product which enables organisations to send information to be stored in the appropriate section of the record (currently through ITK3/MESH, not an API);
- GP Connect Appointment Management – enables organisations to share and manage their appointments to support joined-up patient care (e.g. between 111 and general practices);
- GP Connect National Data Sharing Portal – sets out the data sharing requirements and obligations for the use of GP Connect. This ratifies the safe sharing of clinical information through GP Connect to support direct patient care.

These products are in various states of roll-out, with the Update Record and aspects of the expanded Access Record: Structured products available through the Pharmacy First programme, which is being delivered by four pharmacy suppliers nationwide. We believe this expansion will be a catalyst for change going forward, with more care settings choosing to use our products to read and write to the GP record.

In addition to health and social care staff access the Direct Care APIs (DCAPI) team are working on a Patient Facing Services (PFS) API with the first of New Market Entrant (NME) GP system suppliers. This is for three service aspects (prescriptions, manage demographics and access record), with a further two, appointments and proxy services, to follow. This will operate through the NHS App. Work is planned to develop these five services with all the remaining NMEs.

In addition to the work above, the team has begun work on a 'strategic API' which will, eventually, encompass all these products and bring them up to date using modern FHIR connectivity and API Managed status (APIM). The near-term deliverable is a Proof of Concept which covers the key API activities common to most use cases (medications, consultations, prescriptions and allergies). It is planned that this will become the standard to read/write onto the GP patient record replacing the existing 20+ integrations. Additionally, it has the potential to provide standardised access to the patient record regardless of care setting/system

The DCAPI team will move to a run/maintain mode of operation in the future, to ensure continuous improvement of the products developed.

Patient and Clinical Pathway Transformation - Eyecare

In 2025/26, it is proposed that the NHS England resources continue to support the Integrated Care Systems (ICSs) to transform to the new model of care, at scale, with a focus on evaluation that will support the case for major change and investment in IT (Information Technology). There will be two categories of investment across 9 projects (11 ICSs):

- Category One: support the major transformational change in ICS areas that have already demonstrated significant progress. Funding here would require whole system change to be fully embedded by the end of the financial year. Note this will include Devon and Gloucestershire who did not receive full

accelerator funding last year. In addition, the North Central London project includes activity from North East London and North West London who will be onboarded.

- Category Two: support the accelerator areas that are fully committed to and in the process of transitioning to the new model of care to ensure it is established by the end of the financial year, though may not be across all eyecare activities. Funding here would support ongoing change management and staff costs.

As well as creating the capacity to maintain the pace of transformation, the national and local collaboration will create a partnership platform to address the major barriers to change that have been identified in the testing work to date. Work will continue to focus on the system impact of the data enabled co-ordinated eyecare productivity hub (also known as a single point of access).

Outcomes have been captured and indicate significant efficiencies are possible, though work last year has captured a range of barriers at a local and national level that will need to be addressed to fully realise benefits. There will also be a full economic evaluation of an operational large-scale Pathway, and specific evaluations on the use of NHS England digital products (NHSmail, eRS (Electronic Referral Service) and Wayfinder).

2. Scope

This Call-Off Contract is to support the delivery of key Buyer Outcomes related to requirements within various areas of the NHSE Transformation Directorate Enabling Products Portfolio and its programmes of work which includes DCAPIs.

Building on the work already delivered by the GP Connect programme (now DCAPIs) the initial scope of this Call-Off Contract will include continued iterative improvement of existing GP Connect products and the introduction of additional interoperability Products/Standards to meet new and emerging use cases.

The scope of this Call-Off Contract will include all DCfH services but largely focused on digital definition, build and transition and end to end development services.

- DevOps Services – for example, updates and enhancements to existing GP Connect products such as GP Connect Access Record HTML, Update Record and Send Document APIs
- Digital Definition Services (Extended Discovery) – for example, support for newly identified use cases where Discovery and other work e.g. Alpha, are required to fully define the required solution
- Build and Transition Services – for example, building of new products and tooling that are NHS England owned assets and need to be transitioned, run and maintained by NHS England Operational teams
- End to End Development Services – for example, full delivery of a new Interoperability Standard, from Discovery through to Live implementation

- Data Management (and Similar) Services – management or transformation of data and services. For example, delivery of a centralised cloud-based Document Store for patient clinical documents.
- Data reporting and analysis – analysis and creation of reporting to inform decision making for the future direction of the product (e.g. identification of product usage trends to help prioritisation of new functionality, analysis of API requests to identify potential bugs/integration errors that suppliers can fix).

This Call-Off Contract will also include any transition associated with a handover of in-flight activities from the incumbent suppliers to the new supplier (if supplier is different).

The phases of work required to deliver the agreed scope are flexible with the detailed scope and requirements for each phase only becoming clear on completion of the previous phase. This is typical of Agile working.

To that end, there will be several associated Statements of Work (SOWs) under the Call-Off Contract and within the scope of the budget allocated that the supplier will be required to deliver against to achieve each of the phases needed to meet the overarching scope.

2.1. Geographical Scope

2.1.1. Target Geography

The Target Geography is expected to cover England only, however future requirements do not rule out extending to coverage within the United Kingdom.

2.1.2. Delivery Geography

The delivery geography will include a mix of:

- Working out of the NHS England hub in Leeds city centre (circa 40%)
- Home working (where activities can be successfully completed remotely, circa 60%)
- Occasional travel to / working from (<1%)
 - System Supplier Offices e.g. supplier meeting at EMIS Health head office in Leeds
 - Other NHS Organisation offices e.g. NHS England meeting in Leeds or London offices

End user location e.g. meeting with users at a GP Practice. This geography may change dependant on the requirements of other Enabling Products services requirements.

2.1.3. Organisational Scope

The Enabling Product portfolio sits within the NHS England Transformation Directorate and is currently made up of the following work areas:

- DCAPI – GP Connect allows authorised health and social care workers in a variety of care settings to access their patients' GP records.
- The NHS e-Referral Service (e-RS) – e-RS provides an easy way for patients to choose their hospital and appointments with a specialist. Choices can be made online or via the NHS App, using the telephone, or directly in the GP surgery at the time of referral.
- The Booking and Referral Standard (BaRS) – BaRS is an interoperability standard that enables digital patient journeys or operational processes for patients, healthcare workers and carers. It allows relevant information to be shared quickly, safely and in a format that is useful. It will eventually be available in all care settings.
- Wayfinder – NHS England provides the Wayfinder services that enable people and carers to access additional information about secondary care referrals and their elective care via the NHS App.
- Digital Medicines
- Pathways Eyecare Transformation Programme – will support with initial scope and ongoing support to the CSUs undertaking the IG and Evaluation activities.
- BaRS – primarily resourced through NHSE internal resources.

Note that the e-RS and Wayfinder have a single lead service delivery partner. So while it is not currently anticipated that any requirements will be sourced under this Call-Off Contract, as and when new requirements arise in these areas, NHSE may decide to deliver some, all or none of those requirements through this Call-Off Contract.

2.2. End Users

2.2.1. Target Sectors

Target Sectors details are contained in:	Annex 1
--	---------

2.2.2. Target Users

The target users can be split into several categories:

1. Health care professionals, patients and supplier representatives that are involved with scoping requirements and provide feedback within discovery, alpha, proof of concept, beta, and live development stages
2. GPIT system suppliers (providers) developing against NHS England specifications
3. Other system suppliers (consumers) developing against NHS England specifications
4. Other NHS England programmes that will utilise the products and services to deliver their own programme / project benefits

5. Health care professionals and patients using the products and services as part of their working processes once products have been made live, for example:
 - a. pharmacists using GP Connect Access Record API to access a patients record at a pharmacy, as part of a consultation.
 - b. Pharmacists using GP Connect Update Record to send the outcome of a consultation to a GP practice to allow updates to the record
 - c. 111 operators, clinicians within primary care, other care settings and the independent sector booking appointments on behalf of patients
6. Patients that have their health care impacted by the products and services e.g. better health care outcomes because their care record at their registered GP can be accessed by other care settings using the Direct Care APIs.

2.3. Stakeholders

The following stakeholders will be involved on a regular basis:

- Buyer Programme teams in the Enabling Products Portfolio e.g. Direct Care APIs programme and Digital Care Services programme: permanent NHS England team members including, but not limited to, Programme and project management, Delivery management, Product management and Clinical teams
- Other Buyer teams: Including those that will support delivery and those that delivery will be directly dependent on, examples include Implementation and Business Change, Solution Assurance, Cyber Security, Information Governance, Digital Delivery Centre, NHS Login, NHS Identity
- External suppliers that develop against our specifications: Examples include GPIT Foundation System Suppliers such as EMIS, TPP and Vision as well as 'Consumer' systems such as NHS 111 system suppliers Advanced, IC24 and Cleric
- Primary Care, Getting It Right First Time (GIRFT) Buying teams

All the above already have established relationships and where appropriate governance forums in place for engagement.

Other key stakeholders that will be engaged, but on a less frequent basis include:

- End users: For example, GP Practice staff or NHS 111 system users. Both as part of design and delivery of the products and services and in response to any Live issues.
- Professional bodies e.g. British Medical Association and Royal College of GPs: Whilst not usually part of formal approvals for the scope, they are engaged to provide valuable feedback on proposed products and services
- RNIB – Royal National Institute for the Blind
- National Providers of Eyecare i.e. Specsavers/Vision Express
- Royal College of Optometry
- Department of Health and Social Care: As provider of Direction for Direct Care APIs.

2.4. Timing Scope

This Call-Off Contract is dependent on funding being agreed for the period of its duration, which in turn may be impacted by government, departmental and organisational priorities.

The Standards delivered and the solutions implemented that utilise these Standards will be used for a significant period thereafter (~10+ years). As such they must be designed to be flexible and support iterations to cope with the changing landscape of the NHS and new and emerging use cases and requirements.

2.5. Life-Cycle Scope

This Call-Off Contract is expected to include the following services and the life-cycle scope for each:

- DevOps Services – for example, updates and enhancements to existing Direct Care API products such as GP Connect Access Record HTML, Access Record Structured, Appointments Management and Send Document APIs to meet ongoing business needs. Any activities will need to be transitioned to NHS England Operations team at the latest at the end of the contract
- Digital Definition Services (Extended Discovery) – for example, support for a 'front door' style service where other programmes / projects approach Primary Care with a requirement but need support to help define and even deliver the required standards and solutions
- Build and Transition Services – for example, building of new products and tooling that are NHS England owned assets. The Supplier will be expected to be accountable for ongoing operation, required iteration and improvement until the assets are at a stable enough state to be transitioned to the NHS England Operational team, to occur no later than the end of the contract.
- End to End Development Services – for example, full delivery of a new Interoperability Standard, from definition through to Live implementation. The Supplier will be expected to be accountable for required iteration and improvements until the Standard is at a stable enough state to be transitioned to the NHS England Operational team, to occur no later than the end of the contract.
- Data Management (and Similar) Services – management or transformation of data and services. For example, delivery of a centralised cloud-based Document Store for patient clinical documents.
- Data reporting and analysis – analysis and creation of reporting to inform decision making for the future direction of the product (e.g. identification of product usage trends to help prioritisation of new functionality, analysis of API requests to identify potential bugs/integration errors that suppliers can fix).

As detailed above there will be several associated Statements of Work (SOWs) under the overall Call-Off Contract. Each SOW will contain its own more specific scope and deliverables. Within each SOW more detail will be provided on the expected approach and phases required to deliver the agreed scope with the

detailed scope and requirements for each phase only becoming clear on completion of the previous phase. It is required that delivery will follow GDS principles and other standards e.g. Technical code of practice where required, and the above is typical of working in this Agile way.

Pathways Eyecare has 2 areas within the scope of this specification:

- Evaluation
- Information Governance support within the Optometry sector.

2.6. Technical Scope

2.6.1. Core Technical Capabilities

<p>Technology Capability details are contained in:</p> <p>DCAPI Please see existing GP Connect (now Direct Care APIs) technical specifications for information on existing capabilities: https://digital.nhs.uk/services/gp-connect/develop-gp-connect-services/specifications-for-developers</p> <p>The overall aim of Direct Care APIs is to become the NHS Strategic Platform for digitally connecting health care professionals and citizens with Primary Care information and services across England. This includes, but is not limited to the below Standards and Services which fall within scope of this Call-Off Contract:</p> <ul style="list-style-type: none"> • Read access to patient records, including documents • Write access to patient records, including documents • Booking and management of appointments – via BaRS • Patient facing services • Migration of patient records to new practices • Migration of practices to new Suppliers • Next Generation APIs <p>Several of the above are already in Live but require additional work to iterate and improve on benefits returned, whereas others are in initial stages of Discovery and others are yet to be properly defined.</p> <p>Patient and Clinical Pathways Transformation The Eyecare team works on evaluation activities however continuation of IG activities across the existing framework will be required within the scope of this Call-Off Contract.</p> <p>No changes to technical IT systems are required.</p>	<p>Annex 2</p>

2.6.2. Diagram of the Technical Scope

DCAPIs

Direct Care APIs have implemented an architecture for the existing products developed under the GP Connect programme. The scope of the Call-Off Contract will require the Supplier to maintain and develop the existing products such as GP Connect Access Record HTML, Appointments Management and Send Document APIs. The architectures that support these are detailed in the following diagrams:

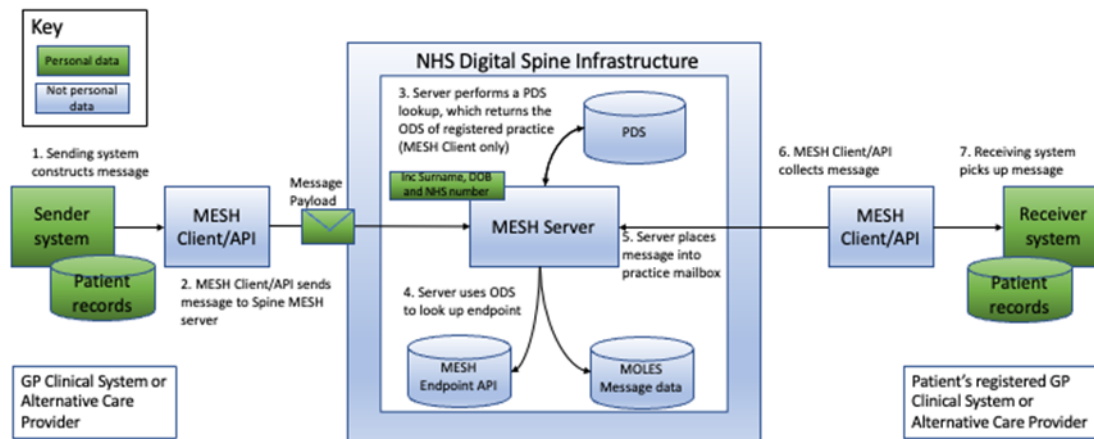

Access Record HTML, Appointment Management and Structured Access

GP Connect – High-Level Architecture – APIs

Send Document APIs

GP Connect – High-Level Architecture - Messaging

Direct Care APIs are looking to move to a new Target Architecture comprising of a Synchronous and an Asynchronous model.

The scope of the activity related to DCAPI within this Call-Off Contract will involve both working within and delivering elements of this Target Architecture, working with other Buyer teams e.g. API Management, Platforms and Supplier teams e.g. EMIS, TPP.

This Target Architecture work will include transitioning existing APIs onto the API management platform in NHS England and then managing the creation of additional products to support streamlining and consolidation of existing within NHS England. The Target Architecture work will improve interoperability by:

- a) simplifying a lot of the technical infrastructure behind the scenes; bringing some of it in-house and reducing the amount of supplier interactions required to become compliant with our APIs
- b) reducing the number of existing APIs which do very similar jobs and require maintaining by NHS England and suppliers
- c) making it easier to develop new products and onboard New Market Entrants. Potential new products include generic Send Document (which opens up more use cases than existing PDF template), Update Record API.

The Target Architecture work will therefore overlap with all five service provisions as the work moves from discovery to design and build, run and maintain and then finally transition. It is estimated that the Target Architecture work will account for around 10% of the support work required for Direct Care APIs within this Call-Off Contract.

As Direct Care APIs is a well-established programme, the technical scope is relatively well understood. However, this Call-Off Contract does include within its

scope delivery of lesser defined requirements where the technical scope is still to be properly understood.

2.6.3. Technical Scope Exclusions

Changes to core NHS Infrastructure or Services such as SPINE and Patient Demographics Service (PDS) are excluded from the technical scope of this Call-Off Contract. Whilst changes may be required to these, the scope of this Call-Off Contract shall only cover the definition of the required changes, working with the relevant Buyer teams, and assurance or testing of the delivered changes; the changes themselves are expected to be delivered by the relevant Buyer team(s).

Similarly, implementation of the defined standards and specifications into Clinical Systems, whether Provider or Consumers, will be completed by the relevant System Supplier team(s) and so are not in scope of this Call-Off Contract.

2.6.4. Interoperability Considerations

As the scope of this Call-Off Contract is Interoperability the details about this are included in other sections of this document.

2.6.5. Technical Constraints

Please see diagrams above in 2.6.1.

The Supplier will be required to operate within existing and emerging NHS England infrastructure and technical requirements, including, but not limited to:

- Patient Demographic Service (PDS)
- Spine Directory of Services (SDS)
- NHS England API Management Layer (NHSD APIM)
- Citizen Identity Service
- MESH
- ITK3
- Existing GP Connect APIs (see [GP Connect specifications for developers - NHS England](#))
- FHIR v3 and v4
- NHS England FHIR UK Core
- GP Clinical Systems
- NHS England Principles, tech radar and engineering and red lines

2.7. Requirements

The high-level requirement is to improve interoperability within Health and Social Care through the definition and delivery of relevant Interoperability Standards.

To meet the above it is expected the following will be required:

- Product, project and delivery skills including leading GDS focussed projects (discovery, alpha, beta, live) as well as supporting delivery for suppliers working to our specifications and to support product roadmap and strategic direction
- Technical skills for the scoping and creation of relevant API products including specification creation, solution design and providing technical support for suppliers working to deliver against the specifications
- Business analyst and user experience skills to ensure products meet business requirements and are delivered using user-centred design techniques
- Software Development skills where things are required to be developed and delivered in house
- DevOps skills where existing live products are required to be iteratively improved in line with user and service needs

Wider interoperability requirements:

- Align products and infrastructure to latest standards and interoperability strategies within NHS England
- Align to Digital Care Services Framework Business Case objectives around Internet First, reducing technical debt and embracing new technologies to deliver better outcomes
- Embrace close working with other programmes within NHS England to ensure best practice around interoperability is shared and encouraged

Pathways Eyecare

At a high level the aim from this Call-Off Contract is to provide the Pathways Eyecare transformation team a baseline of Economic benefits and IG standards to support potential future digital enhancements to current systems which are to be confirmed following the work carried out by the CSUs.

2.8. Business Outcomes

The high-level requirement is to improve interoperability within the NHS through the definition and delivery of relevant Interoperability Standards.

This includes, but is not limited to the below Standards and Services:

- Provide ability for Healthcare Professionals and Citizens to access a patient's record, including documents, across care settings and systems.
- Provide ability for Healthcare Professionals to update a patient's record, across care settings and systems.
- Provide ability for Healthcare Professionals and Citizens across care settings and systems to access, write and manage

documents back to a GP Practice AND/OR a location independent store

- Support migration of documents to a location independent store from existing systems
- Provide ability for Health Care Professionals and Citizens to book and manage appointments across care settings and systems via BaRS
- Support migration of a patient's record when they register at a new practice
- Support Migration of whole practice records/data when a practice switches Clinical System Supplier
- Support other emerging Primary Care interoperability use cases

Information on existing Standards and services delivered by Direct Care APIs is available here: [GP Connect specifications for developers - NHS England](#)

Eyecare Transformation

The main outcome is to support the eventual creation of a single point of access for all Optometry systems. This in turn will improve system interoperability for healthcare professionals and reduce burden for frontline staff.

The IG and Economic benefits will provide the baseline detail required to start to move to the model which is visualised below at a National level.

However this Call-Off Contract will not include any of the technical elements required to create the SPOA at this stage.

3. Deliverables

Initial Product Backlog Item List details are contained in:	Annex 3
---	---------

3.1. Target Operating Model

Primary Care is evolving and the need for interoperability is increasing. A number of different solutions already exist to facilitate interoperability between systems, a number of which have already been delivered by the Direct Care APIs programme. Further deliveries are covered in the scope of this Call-Off Contract.

Direct Care APIs Programme

This Call-Off Contract is expected to relate to support work for the Transformation directorate and Enabling products portfolio with much of the work supporting the DCAPI programme. In addition, there is an expectation resources support other Enabling product areas of work should this be required for example Pathways Transformation, Eyecare.

The estimated split amongst the service provisions for the Direct Care API support work will be:

- DevOps Services – 10%
- Digital Definition Services (Extended Discovery) – 30%
- Build and Transition Services – 15%
- End to End Development Services – 30%
- Data Management (and similar) Services – 15%

3.2. Initial Statement/s of Work (SOW/s)

3.2.1. SOW01

The scope of SOW 1 is primarily for milestones associated with the Direct Care APIs programme of work and covers a number of the core requirements for this Call-Off Contract, including the definition, design and delivery of FHIR based APIs:

Access Record: HTML – enables a read-only webpage view of a patient's GP record

- Supporting the rollout of Access Record: HTML to the wider private provider market, following an initial pilot
- Onboard New Market Entrants (NMEs) to all our current live services to help them gain Foundation Supplier status
- Improvement of emergency codes
- Improve the presentation of the HTML record by creating the HTML output from structured data
- Management of the backlog of requests for feature enhancements

- Management of the move to a run/maintain approach to this product

Access Record: Structured – enables a patient's GP record to be queried in structured manner, returning outputs in a machine-readable format, enabling the recipient to digest this more easily.

- Onboard New Market Entrants (NMEs) to all our current live services to help them gain Foundation Supplier status
- Management of the backlog of requests for feature enhancements
- Management of the move to a run/maintain approach to this product

Update Record – enabling a party in another health care setting to send a structured update to the GP record.

- Delivering the second phase of functionality for updating a GP record. This will include Ambulatory Blood Pressure Measurements (ABPM).
- Developing a strategic approach to how we manage onboarding consumers to the Update Record functionality, versus onboarding to the strategic API solution
- Management of the move to a run/maintain approach to this product
- Manage the delivery of improvements to the Send Document product

Development of a Strategic API solution – enabling parties to both read and write to the GP record through a single API integration:

- Development of API specification to enable functionality for read and write to the GP record
- Publication of specification to enable Suppliers to develop against
- Support assurance and onboarding of Suppliers to the API specifications
- Support Deprecation and decommissioning of existing APIs

National Data Sharing Portal – a service to allow consuming organisations to commit to the legal framework for using GP Connect services:

- Management of the backlog of requests for feature enhancements
- Management of the move to a run/maintain approach to this product

Appointment management and Appointment checker: Management - functionality to allow trusted health care professionals (e.g. 111 operators) to book GP appointments. Checker – functionality to allow users to check that appointment slots are bookable by the right health care professionals:

- Support the transition from using GP Connect services, to the Booking and Referral Standard (BaRS)
- If this transition is not made, support the backlog management of these services
- Management of the move to a run/maintain approach to this product

Patient facing services – a set of new API specifications that allow improved data sharing and integration with the NHS App:

- Uplift the API specification to include core functionality, such as Proxy access
- Onboard the New Market Entrant, Medicus, on to the core functionality, as well as any subsequent uplifts
- Work with the NHS App team to ensure that they can develop against the API, and present information to users in-app where those users have a Supplier GP provided by Medicus (and eventually other New Market Entrants)
- Agree an approach for other New Market Entrants to use these specifications.

Pathways - Eyecare Transformation

The scope of this SOW is to support with any commercial activities linked to the Evaluation of the Eyecare model (which is a single point of access structure for Optometry systems in various care settings to incorporate in regions so any Optometry colleagues can make referrals via e-RS or access Patient data via Direct Care API in one location).

This Model is in trial now across various regions so the Evaluation will give the Programme a set of benefits/economic measures to support a wider rollout of the model.

3.2.2. SOW02

The details of SOW02 (Apr 2026 onward) are yet to be determined, although high level roadmap (Draft and subject to change) can be found below:

Annex 3: Call-Off Schedule 20 – Product Backlog Item List

The following table provides the information which should typically be maintained with the Backlog:

Field	Purpose
Level 1 No	A number to identify level 1 in the Backlog hierarchy. In typical agile terminology this will be an “ Epic ” level reference, where the Epic is a high level (ideally business related) requirement which loosely defines what is needed. In more traditional language it might be described as a goal.
Level 2 No	A number to identify level 2 in the Backlog hierarchy. In typical agile terminology this will be a “User Story” level reference. In more traditional language it might be termed a specific Deliverable or Milestone or SMART (Specific, Measurable, Achievable, Relevant and Timebound) Objective. As time progresses Epics, and more is known about the topic are able to be refined into User Stories. Under the Fixed Price or Fixed priced models of payment, it will usually be at this level that payment will be made on achieving a milestone.
Level 3 No	A number to identify level 3 in the Backlog hierarchy. In the context of this framework this is Deliverable Increment, something which can be delivered over a finite period of time (typically between 1 and 4 weeks), which can be accepted as having been done (often recognised by an acceptance certificate). Once into detailed planning User Stories are further refined into Deliverable Increments (a recognisable contribution to the User Story). Typically it is Deliverable Increments which will command payment within an Fixed Price model, with the Increment being sized and priced close to the point of delivery (but in advance). It is also at this level that actual time and materials should be captured. This is usually the lowest level of granularity to be captured at Call-Off Contract Management level
Level 4 No	A number to identify level 4 in the backlog hierarchy. Usually referred to as a task. Tasks are the individual / team activities which are needed to complete the Increment. This will be the detailed level used for SOW Management and will typically be managed using a tool such as JIRA.
Title	Brief text to describe the Backlog Item
Description	A longer description (or reference to a longer description) to help the reader understand the Backlog Item
Created On	The date the item was created (helpful to understand when the item was first created or added to the backlog – typically as a result of ongoing refinement)
Contract Milestone	Reference to a key contractual milestone
Updated On	The date the item was last updated

Field	Purpose
Status	Live, On Hold, Superseded, or Deleted. The whole concept of agile is that items can come and go as more is learnt. This can even include whole Epics. It's important to capture Deleted and Superseded items because the backlog is used for Operational Change reporting purposes.
Planned Date	Date the item was original due to be completed by
Forecast/Actual Date	Date the item is now forecast to be completed by if not yet completed, or actual date if completed
Fixed Date	Identifies if the delivery date is fixed (and potentially subject to performance credits or liabilities if missed)
Priority	Using something like MoSCoW (Must Have, Should Have, Could Have and Won't Have) which, in combination with dates, helps prioritise items.
Progress	Not Started, In Progress, Completed or Accepted.
Estimated Size	Under Agile this will normally be something like a "T-Shirt Size" (XL, L, M, S, XS or equivalent) or a "Poker Size" (?, 0, ½, 1, 2, 3, 5, 8, 13, 20, 40, 100, ∞)
Fixed Price	Populated once the price is agreed (at the start of the SOW if Fixed Price, on agreement of the Deliverable Increment under Fixed Price).
Actual Cost	To capture the actual cost, regardless of pricing model. This is useful to help improve future estimating
Acceptance Criteria	Used to summarise (or reference) the agreed acceptance criteria for the item.

BACKGROUND

- A. The Buyer is obliged to ensure transparency, fairness, non-discrimination and equal treatment in relation to its procurement process pursuant to the Public Contracts Regulations 2015 (as amended) (the **PCR**). The purpose of this document ("Agreement") is to define the protocols to be followed to prevent, identify and remedy any conflict of interest (whether actual, potential or perceived) in the context of the Further Competition Procedure.
- B. The Buyer is conducting a Further Procurement Procedure for the supply of Digital Capability for Health Deliverables under a Call-Off Contract (the "**Purpose**").
- C. The Buyer has an obligation to deal with conflicts of interest as set out in Regulation 24 (1) of the PCR. The concept of conflict of interest is wide. In the PCR it is described as covering at least *"any situation where relevant staff members have, directly or indirectly, a financial, economic or other personal interest which might be perceived to compromise their impartiality and independence in the context of the procurement procedure"* (Regulation 24(2)). *"Staff members"* refers to staff members of the Buyer or of a procurement service provider acting on behalf of the Buyer who are involved in the conduct of the procurement procedure or may influence the outcome of that procedure. *"Procurement service provider"* refers to a public or private body which offers ancillary purchasing activities on the market.
- D. Pursuant to Regulation 41 of the PCR, the Buyer is under an obligation to ensure that competition is not distorted by the participation of any Framework Contract supplier acting as a bidder in a further competition procedure. Accordingly, the Buyer has

identified that a potential distortion of competition could arise as a consequence of a bidder wishing to submit a Tender for this Further Competition Procedure, where it has also performed services for the Buyer under existing contractual arrangements or as a subcontractor under those same arrangements.

- E. The Parties wish to enter into this Agreement to ensure that a set of management processes, barriers and disciplines are put in place to ensure that conflicts of interest do not arise, and that the Supplier does not obtain an unfair competitive advantage over Other Bidders.
