Performance of the service and deliverables:	This Call-Off Contract will include the following implementation plan, exit and offboarding plans and milestones : <u>Set-Up</u> • There will be no set up costs attached to this contract as per Schedule 2-Call Off Contract Charges. <u>Helpdesk Support</u> • Agento Digital operate a helpdesk service to support clients via email and phone under a SLA, guaranteeing an initial response within a business day, and ensuring requests from different members of the client team can be tracked and reported against their support time allocation. Our helpdesk typically covers answering questions, management information reports, providing ad-hoc guidance on how to use the cloud solution, dealing with non-bug related issues, coaching and performance fine-tuning. <u>Offboarding.</u> • The offboarding plan will be agreed between both parties in written form on 30/06/2020 or if termination without cause is activated as per the Call-Off Contract Terms. Availability & Service Level Agreement Agento Digital aim for their hosting platform to be available 100% of the time (excluding scheduled maintenance): that is to say that other than during scheduled maintenance, the intranet should be accessible from a properly-configured machine successfully connected to the internet. Agento Digital's approach to minimising and mitigating the impact of these issues is as follows: 1. Scheduled maintenance and updates: all our clients are asked to commit to the maintenance element of our support package as a minimum. This helps ensure that the WordPress installation is running well and that updates (which we apply manually and verify with care) are handled out of normal business hours (9.30am-5.30pm Mon-Fri) where possible to minimise disruption 2. Active monitoring: where we provide hosting, we establish two level monitoring and 24/7 alerting to the support team: both from the server itself and from external monitoring services which access the intranets on a regular schedule to test for issues. That means we usually know about issues before or as they are occurring and initiate our investigation usually within minutes. 3. Financial recompense: in unusual situations where an intranet that we
---	--

	host (with fully functional DNS/proxy configuration where applicable) is measured by our providers to be unreachable from the internet for more than 1 hour (outside a scheduled maintenance window), we will provide a refund on request of the hosting element of fees due that month at a rate of 10% per 1 hour of unavailability, up to the limit of hosting fees due that month. Our terms for this offer mirror those provided by Bytemark to us under the contract we have with them for managed hosting services (https://www.bytemark.co.uk/support/terms/sla/). Please note, this offer applies to clients who have signed agreements in place with us and are up to date with payment of invoices at the time of any incident. During business hours, issues should be reported to Agento Digital in the first instance via our helpdesk and we will undertake a first line diagnosis and raise a ticket with Bytemark if needed. For emergency out of hours infrastructure support, you'll be able to raise tickets directly with Bytemark. We respond to tickets submitted via our helpdesk within 1 working day (within 8 working hours for those marked as 'urgent' and reasonably requiring more urgent action, e.g. because they affect major site functionality or availability). We will provide a refund on request of the helpdesk element of fees due that month at a rate of 5% per ticket which is not responded to within these timeframes, up to the limit of helpdesk fees due that month. Please note, response times refer to review, assignment and/or initial investigation of tickets logged via the support helpdesk. Many tickets will be fully resolved within these timeframes but resolution can be dependent on complexity, input or feedback from your team, and a range of other factors outside our control. In practice, as a committed team managing a relatively small number of client servers (currently approximately 12) we generally respond to issues more rapidly, and to urgent issues within minutes or hours. There is also the option to contact Bytemark directly 24/7 via their support channels in the event of server outages, but we ask you to raise tickets through our helpdesk in the first instance.
