

## **Auctioneer Services Rfl Aims/Objectives**

As part of a market engagement process, HMRC is seeking information, via their eSourcing portal, which will allow us to make an informed choice about how to proceed with this requirement. In particular, we would like to establish:

- The number of companies in the market currently able to offer this service provision;
- The number of SMEs capable of fulfilling this service provision in a single lot or regional lot;
- The thoughts of prospective bidders on the proposed structure for lotting this framework requirement;
- What innovative methods of best practice prospective suppliers may recommend for the day-to-day running of this service provision.

Interested parties who would like to part in this market engagement exercise will need to register on the SAP/Ariba system following which you will be invited to an eSourcing event which will allow you to provide the information across the eSourcing portal. Once you have registered you will not have to register again for any subsequent competitive tender but you will have to notify us that you intend to take part. Interested parties who do not respond to this PIN will still be able to take part in any future competitive tender.
