its obligations under the Agreement, and that the Agreement is executed by its duly authorised representative.

## Annex 3 – Specification

### Maternity Safety Programme

#### **Scoping specification: Annual incidence and rates of brain injuries to monitor progress against the maternity national ambition**

##### **Purpose**

1. DHSC are looking to build on previous work which produced a working definition for 'brain injury occurring during and soon after birth' as part of the National Maternity Ambition. DHSC would like to track progress towards the National Maternity Ambition and ensure we meet the Government ambition to halve the rate of brain injuries by 2030, with a 20% reduction by 2020.
2. To monitor progress, DHSC would like to see annual or more frequent data using the National Neonatal Research Database (NNRD) to improve understanding of brain injury incidence and causes to strengthen further policy development.

##### **Background**

3. In 2015, the Secretary of State for Health announced a National Maternity Ambition to reduce the rate of stillbirths, neonatal deaths and brain injuries occurring during or soon after birth by 50% by 2030 (and 20% by 2020).
4. A lack of consensus around what counts as brain injury and limited data sources meant that DHSC commissioned a piece of work to define 'brain injury occurring during or soon after birth' and using the NNRD established a baseline for 2010 and annual rates up to 2015.

##### **Research Aims**

5. A further piece of work is now needed to establish continuous monitoring of incidence and rates of brain injury using the defined working definition in order to track progress towards the ambition and ensure learning in the NHS.
6. DHSC is looking to acquire frequent data extracts to fully understand trends in brain injuries both nationally and on a local level. There are three key research aims:

ANNUAL INCIDENCE AND RATES OF BRAIN INJURIES TO MONITOR PROGRESS  
AGAINST THE NATIONAL MATERNITY AMBITION  
Short Form Agreement for Services

---

- a. The incidence and rate of brain injury figures nationally (using the working definition developed in the previous research). These figures should include a breakdown according to term and preterm babies and pre/post exclusions, consistent with the baseline and annual rates calculated previously.
- b. The incidence and rate of brain injury by NHS provider organisation or the most suitable local breakdown possible as well as the incidence and rate of brain injury by condition. Given the volume of incidences of brain injury, suppliers should consider the most appropriate way of presenting figures.
- c. A report that pulls together the figures into one report and provides an annual national figure for the incidence and rate of brain injury.

**Research Tasks**

<b>Task</b>	<b>Detail</b>
1. 2016 and 2017 annual national figures for the incidence and rate for brain injury using the working definition developed in the previous research	Produce annual national figures for incidence and rate for brain injury for 2016 and 2017 using the established working definition: <ul style="list-style-type: none"> <li>• Incidence and rate of babies with brain injury using working definition;</li> <li>• Incidence and rate of babies with brain injury using exclusions;</li> <li>• Incidence and rate of term babies with brain injury;</li> <li>• Incidence and rate of pre-term babies with brain injury.</li> </ul>
2. Local level analysis	Provide a breakdown of the 2016 and 2017 national figures of incidence and rate of brain injury by NHS provider organisation level or most appropriate agreed local level.
3. Analysis of Condition	Provide a breakdown of the 2016 and 2017 national figures of incidence and rate of brain injury by condition.
4. Report	Deliver a report including: <ul style="list-style-type: none"> <li>• Provide an annual (calendar year) update of brain injury incidence and rate;</li> <li>• Drawing together the local level and condition analysis.</li> </ul>

**Research Outputs**

ANNUAL INCIDENCE AND RATES OF BRAIN INJURIES TO MONITOR PROGRESS  
AGAINST THE NATIONAL MATERNITY AMBITION  
Short Form Agreement for Services

---

7. We envisage the following outputs from the research:
- a. 2016 and 2017 figures of incidence and rate of brain injury national and local breakdown;
  - b. 2016 and 2017 incidence and rates of brain injury by NHS provider level or suitable local breakdown;
  - c. 2016 and 2017 incidence and rates of brain injury by condition;
  - d. A report covering the brain injury incidence and rate at a national and local level, including detailed analysis of condition to improve understanding and learning for brain injury for the NHS.

**Delivery Timeline**

8. To begin work Winter 2018.
