All opportunities for licensing and the creation of spin-out companies are pursued by STFC exclusively through STFC Innovations Ltd. Responsibility for all individual research contracts remains with STFC.

STFC Technologies and Intellectual Property

STFC holds a wealth of Intellectual Property (IP) generated from the know-how of over 2,000 engineers and scientists which is crucial to the design, build and operation of the UK National Laboratories. This IP exists in the form of patents, industrial designs and copyright in our papers, processes and software, developed through research done at our world leading, large scale experimental facilities based across three sites in the UK;

- ISIS, a pulsed neutron and muon source.
- Central Laser facility (CLF), which houses lasers that range from advanced, compact tuneable lasers which can pinpoint individual particles, to high power laser installations that recreate the conditions inside stars.
- RAL Space, which at the forefront of UK Space Research, carries out an exciting range of space research, technology development and has had significant involvement in over 200 space missions.
- Diamond Light Source, which is the UK's national Synchrotron Facility.
- Scientific Computing Department (SCD) at Daresbury, which provides large scale High Performance Computing facilities and houses leading experts in the fields of computational chemistry, materials science, band theory, computational biology, data services, peta-scale storage, etc.
- Accelerator Science and Technology Centre (ASTeC) at Daresbury, which has specialist knowledge and skills in the design and building of accelerators and is a much sought after group by the Academia and industry alike.

- The UK Astronomy Technology Centre at Edinburgh, which is the national centre for astronomical technology, where we design and build instruments for many of the world's major telescopes.

STFC, being one of the seven research councils, has a duty to exploit its IP for the economic benefit of the UK, either by enabling scientists to carry out experiments at our facilities, commercial licensing, or both. This Technology Portal profiles STFC's patented technologies that are available for commercial licensing.

STFC Innovations Ltd. (SIL), a wholly owned STFC subsidiary, is responsible for the management and commercialisation of the IP in line with the organisation's vision to maximise impact for the UK.

In order to manage the intellectual property created, STFC has an IP policy see <https://stfc.ukri.org/files/stfc-intellectual-property-rights/> . The STFC IP Policy is designed to be fair and to meet our obligations. The policy clarifies who will own Intellectual property through any interactions with STFC.

Scope

STFC's patent portfolio is made up of patents from the three main sites:

- Daresbury Laboratory (DL) near Warrington
- UK Astronomy Technology Centre (UK ATC) in Edinburgh
- Rutherford Appleton Laboratory (RAL), Didcot, Oxfordshire.

A large percentage of the patent caseloads emanate from Rutherford Appleton Laboratory (RAL).

Total number of patent families :	65
Total number of patent (countries) [live patents:	240
Total number of granted patent (countries)	171
Total number of patent pending (countries)	69
Number of new patent families	5
Average number of filings per year	3 to 10

The majority of patents are in the field of Physics and Engineering. Other fields of interest are Chemistry and occasionally Biotech.

The central aspect of STFC Innovations Ltd.'s IP process is to ensure that the correct protection is put in place for each of our opportunities. These may result in a patent or, as appropriate, another protection is more valid on a basis of cost, relevance or defensibility. STFC Innovations Ltd. takes a holistic approach to managing and exploiting STFC's intellectual property and know-how; and develops strategies for the management and

exploitation to optimise the commercialisation and return on potential business opportunities.

STFC Innovations Ltd. manages provision of the services on a project-by-project basis. This necessitates advice both on the telephone, in writing (letter, fax or e-mail) and face to face with appropriate follow-up. The level of advice and support, which STFC Innovations Ltd. requires, may change substantially as work is more often concentrated in one-off cases which may arise from time to time. The cost between these activities should be sensibly balanced.

STFC Innovations Ltd. requires access to services and advice offered by patent agents/attorneys on a range of issues and questions that arise in the course of STFC Innovations Ltd.'s business activities and the management and exploitation of STFC's intellectual property. From time to time STFC may provide IP advice and service across the wider UKRI group, and manage the drafting and filing of patents on their behalf. Under this new agreement the wider UKRI group will have access to this contract to conduct IP requirements that have been detailed in the above scope.

Specifically, majority of services would include some or all of the below;

Patent drafting: STFC employees submit invention disclosures, some of which are assessed to be suitable for patenting. Patent Attorneys are involved at this stage to meet with the inventors, scope out the invention and draft patent specifications around said invention in a manner that suits STFC commercial aspirations with the invention.

Patent Prosecution: Attorney(s) will file the final approved specification at a national or regional patent office as instructed by STFC IP Manager. The attorney will then ensure all required formalities are met and deadlines monitored. Attorneys may be expected to provide advice on territories and prosecution routes to ensure patenting strategy matches STFC Innovations commercial strategies. Attorneys will, as they see fit, use foreign associate firms to prosecute applications in territories where they are not qualified to represent STFC- UKRI.

Patent/ trademark Maintenance: Attorney firms may be expected to provide in-house renewals/ maintenance process for STFC patents. Ideally, a system wherein, communications about upcoming renewals are provided and approval sought is envisaged.

The requirement has been divided into two LOTS. Bidders are allowed and encouraged to apply to both LOTS, as separate applications. There are no restrictions in having one bidder being successful for both LOTS. However, the bidders are informed that both applications will be considered entirely separately, on the merits of each application.

LOT 1: Southern England and Wales	To provide services in line with the specification for UKRI sites, primarily Rutherford Appleton Laboratory (RAL).
LOT 2: Northern England and	To provide services in line with the specification for

Scotland	UKRI sites, primarily Daresbury Laboratory (DL) and UK Astronomy Technology Centre (UK ATC).

Award Scoring criteria – LOT 2

Evaluation Justification Statement

In consideration of this particular requirement the Contracting Authority has decided to evaluate Potential Providers by adopting the weightings/scoring mechanism detailed within this RFP. The Contracting Authority considers these weightings to be in line with existing best practice for a requirement of this type.

Questionnaire	Q No.	Question subject	Maximum Marks
Price	AW5.2	Price	20%
Quality	PROJ1.2	Understanding of the Environment	5%
Quality	PROJ1.3	Project Team and Capability to Deliver	30%
Quality	PROJ1.4	Methodology	30%
Quality	PROJ1.5	Performance Mananagement	15%

Award Evaluation of criteria

Non-Price elements

Each question will be judged on a score from 0 to 100, which shall be subjected to a multiplier to reflect the percentage of the evaluation criteria allocated to that question.

Where an evaluation criterion is worth 20% then the 0-100 score achieved will be multiplied by 20%.

Example if a Bidder scores 60 from the available 100 points this will equate to 12% by using the following calculation:

$$\text{Score} = \{\text{weighting percentage}\} \times \{\text{bidder's score}\} = 20\% \times 60 = 12$$

The same logic will be applied to groups of questions which equate to a single evaluation

criterion.

The 0-100 score shall be based on (unless otherwise stated within the question):

0	The Question is not answered, or the response is completely unacceptable.
10	Extremely poor response – they have completely missed the point of the question.
20	Very poor response and not wholly acceptable. Requires major revision to the response to make it acceptable. Only partially answers the requirement, with major deficiencies and little relevant detail proposed.
40	Poor response only partially satisfying the question requirements with deficiencies apparent. Some useful evidence provided but response falls well short of expectations. Low probability of being a capable supplier.
60	Response is acceptable but remains basic and could have been expanded upon. Response is sufficient but does not inspire.
80	Good response which describes their capabilities in detail which provides high levels of assurance consistent with a quality provider. The response includes a full description of techniques and measurements currently employed.
100	Response is exceptional and clearly demonstrates they are capable of meeting the requirement. No significant weaknesses noted. The response is compelling in its description of techniques and measurements currently employed, providing full assurance consistent with a quality provider.

All questions will be scored based on the above mechanism unless expressly stated in the question. Where there is a difference in scoring between evaluators for an individual question, a moderation meeting will be held to discuss the response and agree a consensus score. Where an agreement cannot be reached on a consensus score of an individual question, the question will be scored using the average (mean) of all the evaluators' scores. Please be aware that there may be multiple evaluators. If so, their individual scores will be averaged (mean) to determine your final score as follows:

Example

Evaluator 1 scored your bid as 60
Evaluator 2 scored your bid as 60
Evaluator 3 scored your bid as 40
Evaluator 4 scored your bid as 40
Your final score will $(60+60+40+40) \div 4 = 50$

Price elements will be judged on the following criteria.

The lowest price for a response which meets the pass criteria shall score 100.

All other bids shall be scored on a pro rata basis in relation to the lowest price. The score is then subject to a multiplier to reflect the percentage value of the price criterion.

For example - Bid 1 £100,000 scores 100.

Bid 2 £120,000 differential of £20,000 or 20% remove 20% from price scores 80

Bid 3 £150,000 differential £50,000 remove 50% from price scores 50.

Bid 4 £175,000 differential £75,000 remove 75% from price scores 25.

Bid 5 £200,000 differential £100,000 remove 100% from price scores 0.

Bid 6 £300,000 differential £200,000 remove 100% from price scores 0.

Where the scoring criterion is worth 50% then the 0-100 score achieved will be multiplied by 50

In the example if a supplier scores 80 from the available 100 points this will equate to 40% by using the following calculation: Score/Total Points multiplied by 50 (80/100 x 50 = 40)

The lowest score possible is 0 even if the price submitted is more than 100% greater than the lowest price.

5.5. Evaluation process

5.5.1 The evaluation process will feature some, if not all, the following phases

Stage	Summary of activity
Receipt and Opening	<ul style="list-style-type: none"> RFP logged upon opening in alignment with UK SBS's procurement procedures. Any RFP Bid received after the closing date will be rejected unless circumstances attributed to the Contracting Authority or the e-sourcing tool beyond the bidder control are responsible for late submission.
