Notes

The survey is being oriented to Ordnance Survey (OS) National Grid (OSNGR83), using industry Standard Network RTM GPS equipment utilizing the OS Active Network (OS Net). A true OSNGR83 coordinate has been established on site using the OSN15 (transformation) & OSN51 (grid) models. The survey OSNGR83 points were taken to this point, and a further one (true OSNGR83 point established to produce a true OS becoming a pseudo OS point) has been applied therefore the survey coordinates are shown on a pseudo OS grid.
