THE SPECIFICATION, INCLUDING PROJECT TIMETABLE AND EVALUATION OF TENDERS

GENERAL INTRODUCTION

The Food Standards Agency is an independent Government department working across England, Wales and Northern Ireland to protect public health and consumers wider interest in food. We make sure food is safe and what it says it is.

The Agency is committed to openness, transparency and equality of treatment to all suppliers. As well as these principles, for science projects the final project report will be published on the Food Standards Agency website (www.food.gov.uk). For science projects we will encourage contractors to publish their work in peer reviewed scientific publications wherever possible. Also, in line with the Government's Transparency Agenda which aims to encourage more open access to data held by government, the Agency is developing a policy on the release of underpinning data from all of its science and evidence-gathering projects. Data should be made freely available in an accessible format, as fully and as promptly as possible.

Consideration should be given to data management as new contracts are being negotiated. Resource implications for this should be taken into account. The mechanism for publishing underpinning data should allow the widest opportunity for to enable its re-use. Where possible, underpinning data should be included in the final project report. Where data are included in the final report in pdf format, they should also be published separately in a format that can be used for further analysis. Large data sets can be provided separately in an annex to the report, and published, where possible, alongside the final report online Where it is more appropriate to publish underpinning data in an existing database, archive, repository or other community resource, or for data to be saved in a specialist proprietary format, information will be provided on how the data can be accessed. There will be some circumstances where release of data may need to be restricted or anonymized for reasons of commercial and/or personal sensitivities.

A. THE SPECIFICATION

Key Tender Request

“To establish the current evidence base (and thus evidence gaps) relevant to Priority Research Questions identified during a Priority Setting Exercise on Research into Food Hypersensitivity.”

Tenders are invited to conduct a review to evaluate the current evidence base regarding Priority Research Questions listed in Annex 1.

Background

The FSA is reviewing its strategy on commissioning research into food hypersensitivity (FHS), to ensure it has access to the best available science and evidence to support the delivery of appropriate

and effective actions to ensure food safety and consumer choice. The FSA has an established policy team and science-led research programme on FHS (food allergy and intolerance).

The FSA Board set the direction for the Executive to develop “a comprehensive strategic framework, for FHS, for discussion with the Board in autumn 2019. This will include a review of the evidence base and the development of appropriate outcome measures through which to judge progress.”

In May 2019, the FSA Science Council was asked by the FSA Board to

- Consider and advise on future research priorities and direction in respect to food hypersensitivity.
- Conduct a review of the science and evidence base for addressing food hypersensitivity, and the part the FSA and others should play in enhancing knowledge.

The FSA Science Council is an independent expert committee of the Food Standards Agency, comprising a Chair and seven members. It provides high-level, expert strategic insight, challenge and advice to the FSA's Chief Scientific Adviser and to the Board and executive of the FSA on the FSA's use of science to deliver FSA objectives. Its purpose is to help ensure that the FSA identifies, sources, integrates and uses the best scientific evidence and expertise from all relevant disciplines to inform and evaluate its work.

As part of this review, the Science Council has undertaken a Priority Research Exercise in conjunction with multiple stakeholders and consumer representatives, using adapted James Lind Alliance methodology (Priority Setting Exercise). This will feed into a horizon scan activity in early 2021.

This research will also support the delivery of the FSA Strategic Plan 2015-20¹ and priorities in the FSA Science and Evidence Strategy² by understanding views and priorities of consumers, businesses and enforcement partners around FHS. Building a research portfolio that is guided by these priorities, learns lessons from the past and empowers clearer decision making and understanding of what the future holds.

The Priority Setting Exercise (PSE)

The Science Council and FSA developed a Priority Setting Exercise (PSE) process inspired by the James Lind Alliance Priority Setting Partnership methodology. The PSE was comprised of 3 stages:

1. Public Survey: “Improving life for people with Food Hypersensitivity” was launched on 20th February and was communicated to over 250 organisations via social media channels, targeting the general public, food businesses, patient groups/charities, healthcare sector, academia, local authorities and professional bodies. The survey asked respondents to help identify knowledge gaps relating to food hypersensitivity in the following 5 theme areas: Eating out, Pre-packed food, Handling and understanding food, Changes in how we interact with food, improving what we know about food allergy and intolerances (food hypersensitivity). Over 300 responses were received when the survey closed on 26th March.
2. Ipsos MORI were commissioned to analyse the responses received, following which the working group streamlined responses into 15 research themes.

² <http://www.food.gov.uk/science/sci-gov/scistrat>

3. These 15 themes were prioritised during a 2-day workshop in September. A range of stakeholders representing food businesses, patient groups, healthcare and academia, local authorities and the FSA were present.

The outputs from the workshop have been formulated into several research questions which appear in Annex 1.

The Project Specification

Research Aim

“To establish the current evidence base (and thus evidence gaps) relevant to Priority Research Questions identified during a Priority Setting Exercise on Research into Food Hypersensitivity.”

Tenders are invited to conduct a review of the literature to evaluate the current evidence base regarding Priority Research Questions listed in Annex 1.

- We expect the contractor to review the available literature to establish the evidence base for each of the questions identified in Annex 1. This will allow the FSA to understand where the existing evidence gaps remain, to support decisions as to what research should be funded by the FSA and other funding bodies in the future.
- The output should be a report that gives an overview of the current evidence base for the research questions in Annex 1. This will be fully referenced.
- Usually reports require two rounds of substantive comments by FSA officials (and any other parties involved in the project as appropriate) and a final round to finalise minor outstanding comments. Unless otherwise agreed, the project manager will co-ordinate comments and provide them to the contractor and all responses will be recorded. The final report will be subject to external peer review, following which further amendments may be required. Contractors should agree the timetable for reporting and publication with the project officer but should note that FSA normally expect two weeks to provide a co-ordinated response per round of substantive comments. Please confirm in your proposal how you will meet FSA's requirements for reporting.

Approach

- The successful contractor will be expected to consult key internal FSA stakeholders on the scope of the review before initiation.
- The contractor will be adopting a comprehensive search strategy considering peer reviewed articles, grey literature, relevant government reports (e.g. FSA published studies, Scientific Advisory Committee reports, etc.), European and International literature (e.g. the European Food Safety Authority's Scientific Opinions, World Health Organisation reports) from 1996 through to finalising the reporting of this project.

- The proposal should map all the databases and key search terms to be used. Finalised terms will be agreed prior to project initiation.
- Input from external experts will also be expected to identify research that is ongoing but may not show up in published. Communication with external experts will be facilitated through the FSA Secretariat.
- It is expected that the review would take 3-6 months to complete, with an interim deliverable in January 2021 outlining the presence or absence of evidence for each question, and the quality of that evidence.
- We understand that a full systematic review of the literature would take too long to be delivered in the timeframe for this project. However, we want the review to provide an understanding of the volume and characteristics of evidence available on the research questions in Annex 1.
- Therefore, contractors are to conduct a review of the literature consistent with this requirement, for example a rapid evidence assessment or quick scoping review³ or equivalent approach. The applicant must clearly set out how the approach they propose will meet the requirements of this tender.

Timings

Suggested research components and reporting timescales are as follows:

TABLE 2. REPORTING TIMESCALE	
Action	Timing
Project Start	2 nd December 2020
Output 1: Interim report	29 th January 2021
Output 2: Agreed final report	26 th April 2021

Since the interim report will feed into a horizon scan activity in Spring 2021, the interim deliverable must be completed by the end of January and is non-negotiable.

Personnel

Details of all key personnel who will be working on this project must be given (including a CV of their experience). Should any element of this project be subcontracted, this must also be stated in proposals with details of subcontracted companies, their key personnel and working arrangements with subcontractors. Tenderers should demonstrate previous experience of successful delivery of similar projects.

The tenderer will be required to appoint a Contract Manager (generally the named Principal Investigator) who will be fully accountable for the delivery of the project against the contract. They will be required to liaise closely with the Agency's nominated project officer.

³ Which are summarised in [The Production of Quick Scoping Reviews and Rapid Evidence Assessments: A How to Guide - December 2015](#)

Data issues

Tenderers are asked to respond to each of these sections in relation to this project, this information is in addition to that submitted for the framework. In doing so FSA would like to draw attention to the Framework Standard Terms and Conditions on data security and the commissioning authority's role as the 'data controller' and the contractor's role as the 'data processor'.

Dataset for analysis

The Agency requires a fully documented non-anonymised dataset which it can use for its own analysis and research purposes. We will also require sufficient documentation (including syntax of main and derived variables) to allow Agency analysts and external researchers to replicate analysis included in the outputs. The dataset will require encrypted identifiers for each record, with a separate file to link these to names and contact details – which would be held securely by the Agency. Tenderers must set out what documentation they would provide to accompany the dataset.

Data security

Please refer to the Framework Standard Terms and Conditions on data security and outline in your tender any specific issues related to this project. The successful tenderer will be asked to complete a Data Security Questionnaire which will be reviewed by the FSA data security team and will form part of the contract.

Data permissions and referencing

Contractors are responsible for ensuring that all necessary permissions are acquired for the use of data, visuals, or other materials throughout the life of the project that are subject to copyright law, and that the materials are used in accordance with the permissions that have been secured. Contractors are also responsible for ensuring suitable referencing of materials in all project outputs including project data.

Ethics

Tenderers are asked to identify the ethical concerns for this project and how these issues would be addressed.

Cost

The proposal must identify all anticipated costs of conducting the work, providing a cost breakdown of staff involvement and days dedicated to the project for each staff member, and all other associated overheads and expenses.

Examples of the costs which should be included in the cost breakdown, in addition to the main analysis, include:

- The charge for presentations and meetings
- Costs for delivering workshops/interviews
- A breakdown for any proposed sub-contractor involvement (if relevant)

Costs should be provided exclusive of VAT and should clearly state whether VAT will be charged.

Payments will be made against key milestones and a 20% retention will be held against delivery of the final report. A proposed payment schedule is required, please use the template provided.

Quality

As required on a project by project base i.e. UKAS accreditation, ISO 9001 etc.

Quality management considerations should be given as to whether any particular standards need to be met.

Please list all specific requirements and insert any specific links

Examples of standards can be found at:

<http://www.iso.org/iso/home/standards.htm>

If the project includes any mathematical modelling, the quality assurance considerations need to include how the work will meet the standards in the Aqua Book:

- (a) comply with any Freedom of Information Act (FOIA) request;
 - (b) comply with any Environmental Information Regulations (EIR) request.
- 16.3 The Buyer may talk to the Supplier to help it decide whether to publish information under clause 16. However, the extent, content and format of the disclosure is the Buyer's decision, which does not need to be reasonable.

17. Invalid parts of the contract

If any part of the Contract is prohibited by Law or judged by a court to be unlawful, void or unenforceable, it must be read as if it was removed from that Contract as much as required and rendered ineffective as far as possible without affecting the rest of the Contract, whether it's valid or enforceable.

18. No other terms apply

The provisions incorporated into the Contract are the entire agreement between the Parties. The Contract replaces all previous statements and agreements whether written or oral. No other provisions apply.

19. Other people's rights in a contract

No third parties may use the Contracts (Rights of Third Parties) Act (CRTPA) to enforce any term of the Contract unless stated (referring to CRTPA) in the Contract. This does not affect third party rights and remedies that exist independently from CRTPA.

20. Circumstances beyond your control

- 20.1 Any Party affected by a Force Majeure Event is excused from performing its obligations under the Contract while the inability to perform continues, if it both:

- (a) provides written notice to the other Party;
- (b) uses all reasonable measures practical to reduce the impact of the Force Majeure Event.

20.2 Either party can partially or fully terminate the Contract if the provision of the Deliverables is materially affected by a Force Majeure Event which lasts for 90 days continuously.

20.3 Where a Party terminates under clause 20.2:

- (a) each party must cover its own losses;
- (b) clause 11.5(b) to 11.5(g) applies.

21. Relationships created by the contract

The Contract does not create a partnership, joint venture or employment relationship. The Supplier must represent themselves accordingly and ensure others do so.

22. Giving up contract rights

A partial or full waiver or relaxation of the terms of the Contract is only valid if it is stated to be a waiver in writing to the other Party.

23. Transferring responsibilities

23.1 The Supplier cannot assign the Contract without the Buyer's written consent.

23.2 The Buyer can assign, novate or transfer its Contract or any part of it to any Crown Body, public or private sector body which performs the functions of the Buyer.

23.3 When the Buyer uses its rights under clause 23.2 the Supplier must enter into a novation agreement in the form that the Buyer specifies.

23.4 The Supplier can terminate the Contract novated under clause 23.2 to a private sector body that is experiencing an Insolvency Event.

23.5 The Supplier remains responsible for all acts and omissions of the Supplier Staff as if they were its own.

26. Preventing fraud, bribery and corruption

- 26.1 The Supplier shall not:
- (a) commit any criminal offence referred to in the Regulations 57(1) and 57(2);
 - (b) offer, give, or agree to give anything, to any person (whether working for or engaged by the Buyer or any other public body) an inducement or reward for doing, refraining from doing, or for having done or refrained from doing, any act in relation to the obtaining or execution of the Contract or any other public function or for showing or refraining from showing favour or disfavour to any person in relation to the Contract or any other public function.
- 26.2 The Supplier shall take all reasonable steps (including creating, maintaining and enforcing adequate policies, procedures and records), in accordance with good industry practice, to prevent any matters referred to in clause 26.1 and any fraud by the Staff and the Supplier (including its shareholders, members and directors) in connection with the Contract and shall notify the Buyer immediately if it has reason to suspect that any such matters have occurred or is occurring or is likely to occur.
- 26.3 If the Supplier or the Staff engages in conduct prohibited by clause 26.1 or commits fraud in relation to the Contract or any other contract with the Crown (including the Buyer) the Buyer may:
- (a) terminate the Contract and recover from the Supplier the amount of any loss suffered by the Buyer resulting from the termination, including the cost reasonably incurred by the Buyer of making other arrangements for the supply of the Deliverables and any additional expenditure incurred by the Buyer throughout the remainder of the Contract; or
 - (b) recover in full from the Supplier any other loss sustained by the Buyer in consequence of any breach of this clause.

27. Equality, diversity and human rights

 - (b) any other requirements and instructions which the Buyer reasonably imposes related to equality Law.

- 27.2 The Supplier must take all necessary steps, and inform the Buyer of the steps taken, to prevent anything that is considered to be unlawful discrimination by any court or tribunal, or the Equality and Human Rights Commission (or any successor organisation) when working on the Contract.

- 28.1 The Supplier must perform its obligations meeting the requirements of:
- (a) all applicable law regarding health and safety;

The Buyer cannot terminate the Contract where the Supplier has not paid a minor tax or social security contribution.
- 30.2 Where the Supplier or any Supplier Staff are liable to be taxed or to pay National Insurance contributions in the UK relating to payment received under the Off Contract, the Supplier must both:

- (d) the Buyer may supply any information they receive from the Worker to HMRC for revenue collection and management.

31. Conflict of interest

- 31.1 The Supplier must take action to ensure that neither the Supplier nor the Supplier Staff are placed in the position of an actual or potential conflict between the financial or personal duties of the Supplier or the Supplier Staff and the duties owed to the Buyer under the Contract, in the reasonable opinion of the Buyer.
- 31.2 The Supplier must promptly notify and provide details to the Buyer if a conflict of interest happens or is expected to happen.

Even if court proceedings have started, the Parties must do everything necessary to ensure that the court proceedings are stayed in favour of any arbitration proceedings if they are started under clause 33.4.
