S 100.5	<i>The Client</i> will instruct surveys to be undertaken via individual Task Orders, an example Task Order is included in <b>Annex 17</b> . The Task Order will state the general requirements for the survey, the technical details of what is required and includes the schedule of agreed rates. The technical details relate to specific requirements in CS 551. Where CS 551 contains options or additional items the technical details state which are required for the particular survey. To aid the survey specifier, some items are indicated as the default option, however, tenderers should be aware that the default items will not always be selected, and item pricing should allow for non-default items being required.
S 101 Service objectives	
S 101.1	The survey information provided by the <i>Contractor</i> will be used by the <i>Client</i> for a range of purposes, including asset management and improved asset knowledge, and for the development and design of network maintenance and improvement schemes.

S 101.2	The contract is designed to be flexible and allow for direct issuing of work. Task Orders can be used in several ways, from instructing single, unplanned surveys to a long-term programme of work.
S 101.3	Appointing one <i>Contractor</i> to cover each region gives certainty of work and builds collaborative relationships between <i>Client</i> and <i>Contractor</i> . Responsiveness is improved by the simpler, faster issuing of Task Orders and earlier engagement with the <i>Contractor</i> .
S 101.4	The contract seeks to improve data quality by working closely with the <i>Contractor</i> , both to ensure that the data provided is accurate and to explore innovative approaches to delivering surveys through the life of the contract.
<b>S 102 Description of the service</b>

S 102.2	The primary purpose of these surveys is to determine the nature and condition of the drainage asset.

S 102.3	Task Orders can be issued as urgent single surveys or multiple surveys from a plan or programme. Timings from the issue of Task Orders to surveys taking place will be dependent on the availability of roadspace and the urgency of the work.
