CEMAR
Revision 2

</div>

What is CEMAR?

CEMAR is a web-based solution for contract management and reporting. CEMAR has been developed to cover the NEC3 workflow. CEMAR covers core procedures and has specifically designed and tailored workflows which may be used for:

1. Early warnings;

2. Compensation events;

3. Instructions;

4. General communications.

5. Proposed instructions;

6. Request for proposals, claims and variations;

7. Programme submission and acceptance; and

8. Payment application, assessment and certification (if applicable to the Project).

What will CEMAR be used for, for the purposes of the New Glen Parva Prison?

Refer to WI285 – IT Software.

What is required?

1. The *Employer* has procured CEMAR which will be used by the *Employer* to administer this contract;

2. A tiered access security structure;

3. An ability to be transparent and be fully auditable, with demonstrable resilience;

4. An allowance for the training of necessary personnel in the use of the system is to be made in accordance with WI285 – IT Software; and

5. The intent is to have the CEMAR platform configured and fully operational at operational at day 1 of the Project (CEMAR has advised that the platform can be set up in 48 hours).
