

Clarification Log for RFI008 ARLE

Clarification Question #	Received Date	Questions	Reply Date	Answers
1	05/03/2021	An RFI has been issued requesting information on electromagnetic catapult and arrestor gear. We would not want to be excluded from future work by failing to respond to the RFI, if that is a requirement. Can you please give us some guidance on this?	05/03/2021	This is a market scan and not part of a formal bidding process, so not responding will not prejudice any future formal competition.
