The Supplier shall ensure that each of the Insurances is effective no later than:
  - 1.1.1 the DPS Start Date in respect of those Insurances set out in the Annex to this Schedule and those required by applicable Law; and
  - 1.1.2 the Order Contract Effective Date in respect of the Additional Insurances.
- 1.2 The Insurances shall be:
  - 1.2.1 maintained in accordance with Good Industry Practice;
  - 1.2.2 (so far as is reasonably practicable) on terms no less favourable than those generally available to a prudent contractor in respect of risks insured in the international insurance market from time to time;

  - 1.2.4 maintained for at least six (6) years after the End Date.

### **2. How to manage the insurance**

- 2.1 Without limiting the other provisions of this Contract, the Supplier shall:
  - 2.1.1 take or procure the taking of all reasonable risk management and risk control measures in relation to Deliverables as it would be reasonable to expect of a prudent contractor acting in accordance with Good Industry Practice, including the investigation and reports of relevant claims to insurers;

- 3.2 Where the Supplier has failed to purchase or maintain any of the Insurances in full force and effect, the Relevant Authority may elect (but shall not be obliged) following written notice to the Supplier to purchase the relevant Insurances and recover the reasonable premium and other reasonable costs incurred in connection therewith as a debt due from the Supplier.

**4. Evidence of insurance you must provide**

- 4.1 The Supplier shall upon the Start Date and within 15 Working Days after the renewal of each of the Insurances, provide evidence, in a form satisfactory to the Relevant Authority, that the Insurances are in force and effect and meet in full the requirements of this Schedule.

The Supplier shall use all reasonable endeavours to notify the Relevant Authority (subject to third party confidentiality obligations) as soon as practicable when it becomes aware of any relevant fact, circumstance or matter which has caused, or is reasonably likely to provide grounds to, the relevant insurer to give notice to cancel, rescind, suspend or void any insurance, or any cover or claim under any insurance in whole or in part.

## Part C: No Staff Transfer on the Start Date

# Order Schedule 20 (Order Specification)

## Introduction and Summary of requirements

There is a significant skills gap in the oil and upstream gas sectors when it comes to the cyber security of operational technology (OT). [In a survey of energy professionals](#), 38% cited a lack of in-house cyber security skills as the top challenge when trying to enhance OT security. DESNZ are looking to understand and address this issue with the sector.

This work will focus on the oil and upstream gas sectors, and will review the specific skills requirements from an IT/OT perspective, and seek to deepen understanding of the gaps that exist across this sector. The output of this work will feed into other projects taking place to map skills requirements across the energy sector. The framework should outline critical roles in an organisation and identify a minimum baseline for skills requirements, mapping existing training offers to these roles and highlighting any recommendations for improvement or new training that could be developed. This framework will be a tool for industry to assess their staff cohort and determine what OT/IT skills they need.

We will provide the successful bidder with a contact list of cyber security professionals across the oil and upstream gas sector to engage with as part of the identification of needs stage. The oil and upstream gas sectors will be the focus for this work, however both general and sector-specific challenges, gaps and requirements should be drawn out with a particular focus on OT roles that require cyber knowledge.

## Background

Industry engagement, inspections and observations from the Health & Safety Executive, and internal analysis have identified this skills deficiency as a significant impediment to improving the cyber security across the sector.

A clear cyber skills framework specifically for OT roles would support organisations to upskill new and existing staff. To develop the product, it will be necessary to understand the problem, existing offers and training gaps and ensure the framework is tailored to meet the needs of industry.

While the project initially will be targeting the downstream oil and upstream oil and gas sectors, the specific needs and requirements that are unique to these sectors should be identified and drawn out. The end product will provide a detailed overview of the targeted sector, which can be used to feed in the sector-specific cyber skill needs and requirements of the oil and upstream gas sectors.

This project will need to deepen our understanding of the current cyber skills gap, informed by industry's view of the requirements and challenges. The programme will also need to

review the current offer of both NCSC accredited and non-accredited training and evaluate these courses against the needs and expectations of the industry.

Finally, the project should develop a framework of critical roles and OT/IT skill requirements. It should also deliver a set of recommendations to address the gaps through improvements to training offers or new training where nothing suitable exists. The training package identified, along with recommendations of training to fill the gaps, will need to have a specific focus on the downstream oil and upstream oil and gas sectors with a strong anchoring around the sectors' critical OT roles, to ensure it can be used by a variety of organisations to meet their individual needs. The recommendations and outputs of this work will be shared with the National Cyber Security Centre as part of a wider cross-government workstream.

This framework (comprising of existing training collated and informed by the recommendations of further training) can then be used by organisations to plan and map training courses for their staff, both new and current, in order to fill any knowledge or expertise gaps across the organisation.

## Aims and Objectives

1. To undertake a comprehensive review of the cyber skills gap in oil and upstream gas sectors, engaging with the relevant industry stakeholders to understand the needs and demands that currently exist. This could combine open-source research and direct industry engagement.
2. To identify and evaluate the current cyber security training modules/courses with a specific focus on OT and IT targeted training, testing their suitability against the requirements of industry.
3. To develop an initial skills framework using the information gathered in part 1 and 2, which sets out critical roles in an organisation matched to the training available for necessary skills.
4. To make recommendations on how to improve the skills framework e.g., by updating current training offers or designing new training courses.
5. To deliver a report summarising the above work and conclusions.

## Methodology

We expect bidders to engage with industry stakeholders, regulators and the National Cyber Security Centre, whose contact details will be provided by DESNZ, either on a 1-2-1 basis or as part of a group forum operating in the oil and upstream gas subsectors. DESNZ will discuss the appropriate research methodology with the winning bidder but there are no formal methodology requirements as long as key programme objectives and outcomes have been met.

A report will form the final product which should summarise training modules and courses available, and where industry, as well as the bidder's own research, has identified any gaps. Wherever possible this should also provide recommendations on how the relevant gap could be addressed or applied to the DESNZ framework.

## Outputs Required

Key outputs:

- Interim presentation to DESNZ on the gaps in the training offering based on industry feedback.
- Final report submitted to DESNZ. This should include:
  - Executive summary of the key findings.
  - A summary of engagement data on what industry think are the key problems in relation to cyber skills. This should include general issues as well as issues specific to the relevant sector.
  - Detailed review of existing cyber security training, this should be based on evidence of industry engagement and open research. This should also summarise what each course covers and what industry's reflections of the course have been (where applicable).
  - Gap analysis of what industry need to address the skills gap but is not currently available.
  - An initial skills framework based on key roles in an organisation.
  - Recommendations on what should be included as part of a skills framework.
- Summary PowerPoint presentation that can be used by DESNZ at future industry engagement events.
- Final presentation to DESNZ of the overall findings of the project to give a view of the current gaps and how they might inform our skills framework.
- Handover to DESNZ, including recommendations for further areas of work to address skills.
- Please note: This information may be shared with other lead departments and agencies so that the methodology could be replicated in other sectors.

## Ownership and Publication

DESNZ standard terms and conditions require that DESNZ retain the Intellectual Property (IP) from all models and software paid for by DESNZ.

## Quality Assurance

An initial kick off meeting will be required with DESNZ to agree the basis for engagement. Fortnightly meetings to track progress and understand the risks and issues, as well as other key milestones such as the interim presentation and early review of the draft report. The chosen supplier should present and keep up to date a risk management plan.

## Timeline

Indicative timeline:

- Project initiation: January 2024
- Project expected duration 6-8 weeks.
- Initial kick off meeting will be required with DESNZ to agree the basis for engagement.
- Fortnightly meetings to track progress and understand the risks and issues. These can be held virtually.
- Early review of emerging findings and draft summary report (Deadline to be agreed at kick off meeting).
- A workshop to review the final report prior to completion.
- Final presentation to DESNZ and NCSC of the findings, with summary PowerPoint presentation for industry.
- Final project meeting with DESNZ.

The Supplier can terminate an Order Contract if the Buyer fails to pay an undisputed invoiced sum due and worth over 10% of the annual Contract Value within 30 days of the date of the Reminder Notice.

10.6.2 If a Supplier terminates an Order Contract under Clause 10.6.1:

10.8.5 The Parties must agree any necessary Variation required by Clause 10.8 using the Variation Procedure, but the Supplier may not either:

- reject the Variation
- increase the Charges, except where the right to partial termination is under Clause 10.3
