SCHEDULE 3: INSURANCE REQUIREMENTS

1.OBLIGATION TO MAINTAIN INSURANCES

The Supplier shall ensure that each of the Insurances is effective no later than the Commencement Date.
- 1.2 The Insurances shall be maintained in accordance with Good Industry Practice and (so far as is reasonably practicable) on terms no less favourable than those generally available to a prudent Contractor in respect of risks insured in the international insurance market from time to time.
- 1.3 The Insurances shall be taken out and maintained with insurers who are of good financial standing and of good repute in the international insurance market.
- 1.4 The Supplier shall ensure that the public and products liability policy shall contain an indemnity to principals clause under which DFID shall be indemnified in respect of claims made against DFID in respect of death or bodily injury or third party property damage arising out of or in connection with the Services and for which the Supplier is legally liable.

2.GENERAL OBLIGATIONS

- 2.1 Without limiting the other provisions of this Contract, the Supplier shall:
 - 2.1.1 take or procure the taking of all reasonable risk management and risk control measures in relation to the Services as it would be reasonable to expect of a prudent Contractor acting in accordance with Good Industry Practice, including the investigation and reports of relevant claims to insurers;
 - 2.1.2 promptly notify the insurers in writing of any relevant material fact under any Insurances of which the Supplier is or becomes aware; and
 - 2.1.3 hold all policies in respect of the Insurances and cause any insurance broker effecting the Insurances to hold any insurance slips and other evidence of placing cover representing any of the Insurances to which it is a party.

3.FAILURE TO INSURE

- 3.1 The Supplier shall not take any action or fail to take any action or (insofar as is reasonably within its power) permit anything to occur in relation to it which would entitle any insurer to refuse to pay any claim under any of the Insurances.
- 3.2 Where the Supplier has failed to purchase any of the Insurances or maintain any of the Insurances in full force and effect, DFID may elect (but shall not be obliged) following written notice to the Supplier to purchase the relevant Insurances, and DFID shall be entitled to recover the reasonable premium and other reasonable costs incurred in connection therewith as a debt due from the Supplier.

4.EVIDENCE OF POLICIES

- 4.1 The Supplier shall upon the Commencement Date and within 15 Working Days after the renewal of each of the Insurances, provide evidence, in a form satisfactory to DFID, that the Insurances are in force and effect and meet in full the requirements of this Framework Schedule 2. Receipt of such evidence by DFID shall not in itself constitute acceptance by DFID or relieve the Supplier of any of its liabilities and obligations under this Agreement.

5.AGGREGATE LIMIT OF INDEMNITY

- 5.1 Where the minimum limit of indemnity required in relation to any of the Insurances is specified as being "in the aggregate":
 - 5.1.1 if a claim or claims which do not relate to this Contract are notified to the insurers which, given the nature of the allegations and/or the quantum claimed by the third party(ies), is likely to result in a claim or claims being paid by the insurers which could reduce the level of cover available below that minimum, the Supplier shall immediately submit to DFID:
 - (a) details of the policy concerned; and

- (b) its proposed solution for maintaining the minimum limit of indemnity specified; and

5.1.2 if and to the extent that the level of insurance cover available falls below that minimum because a claim or claims which do not relate to this Contract are paid by insurers, the Supplier shall:

- (a) ensure that the insurance cover is reinstated to maintain at all times the minimum limit of indemnity specified for claims relating to this Contract; or
- (b) if the Supplier is or has reason to believe that it will be unable to ensure that insurance cover is reinstated to maintain at all times the minimum limit of indemnity specified, immediately submit to DFID full details of the policy concerned and its proposed solution for maintaining the minimum limit of indemnity specified.

6.CANCELLATION

6.1 The Supplier shall notify DFID in writing at least five (5) Working Days prior to the cancellation, suspension, termination or non-renewal of any of the Insurances.

7.2 Except where DFID is the claimant party, the Supplier shall give DFID notice within twenty (20) Working Days after any insurance claim in excess of [REDACTED] relating to or arising out of the provision of the Services or this Contract on any of the Insurances or which, but for the application of the applicable policy excess, would be made on any of the Insurances and (if required by DFID) full details of the incident giving rise to the claim.

7.3 Where any Insurance requires payment of a premium, the Supplier shall be liable for and shall promptly pay such premium.

7.4 Where any Insurance is subject to an excess or deductible below which the indemnity from insurers is excluded, the Supplier shall be liable for such excess or deductible. DFID Supply Partner Code of Conduct

Principles

DFID aims to create an inclusive culture of best practice with the delivery partners with whom it engages and which receive UK taxpayers' funds. All Supply Partners should adhere to the overarching principles of the Supply Partner Code of Conduct (hereafter "the Code").

Overarching Principles for Supply Partners

- ✓ **Act responsibly and with integrity**
- ✓ **Be transparent and accountable**
- ✓ **Seek to improve value for money**
- ✓ **Demonstrate commitment to poverty reduction and DFID priorities¹**
- ✓ **Demonstrate commitment to wider HMG priorities²**

DFID Supply Partner responsibilities

Supply Partners and their subcontractors (delivery chain partners) should ensure they have read and understood the Code and their required compliance level and seek clarification from DFID where necessary. In particular, it is important that the Supply Partners and their subcontractors (delivery chain partners) understand any risks and have systems in place to manage them. The 3 compliance levels are:

Compliance Level 1 - Supply Partners with an individual contract value of £1m or above, or two or more contracts/grants with DFID with a combined value of £5m or above;

Compliance Level 2 - Supply Partners with an individual contract value below £1m, or two or more contracts /grants with DFID with a value of less than £5m;

Compliance Level 3 - Supply Partners with an individual Contract value, or component of a Contract/Grant, with a value below the EU contracting threshold. At this level Supply Partners are required to adhere to the overarching Code principles and recognise, mitigate and manage risks. These Supply Partners will not be monitored against the contractual KPIs.

Scope

This Code forms part of DFID's standard contractual terms and conditions and full compliance and annual verification via a signed declaration, to be found at Annex 1b, is mandatory for contracted Supply Partners.

¹ <https://www.gov.uk/government/organisations/department-for-international-development/about#priorities>

² <https://www.gov.uk/government/organisations/hm-treasury/about#priorities>

Adherence to the Code at the appropriate level is also a requirement for DFID direct and delivery chain Supply Partners in receipt of funding. DFID will monitor Supply Partners in six priority areas as set out below using a set of Key Performance Indicators (KPIs) as referenced in Annex 1a and 1b.

1. Value for Money and Governance

Key Performance Indicators KPI 1 a - c

Value for Money and financial transparency is an essential requirement of all DFID commissioned work. All Supply Partners must seek to maximise development results, whilst driving cost efficiency, throughout the life of commissioned programmes. This includes budgeting and pricing realistically and appropriately to reflect delivery requirements and levels of risk over the life of the programme. It also includes managing uncertainty and change to protect value in the often challenging environments that we work in.

Supply Partners must demonstrate that they are pursuing continuous improvement and applying stringent financial management and governance to reduce waste and improve efficiency in their internal operations and within the delivery chain. DFID expects Supply Partners to demonstrate openness and honesty and to be realistic about capacity and capability at all times, accepting accountability and responsibility for performance along the full delivery chain, in both every-day and exceptional circumstances.

Specific requirements include:

- ✓ Provision of relevant VfM and governance policies and a description of how these are put into practice to meet DFID requirements (e.g. Codes on fraud and corruption, due diligence);
- ✓ A transparent, open book approach, which enables scrutiny of value for money;
- ✓ Strict adherence to all UK and in-country government tax requirements;
- ✓ Processes for timely identification and resolution of issues and for sharing lessons learned which might be requested by DFID at any time.

2. Ethical Behaviour

Key Performance Indicators KPI 2 a- f

DFID Supply Partners and their delivery chain partners act on behalf of the UK government and interact globally with country governments, other aid donors and their delivery partners, many stakeholders including citizens and directly and indirectly with aid beneficiaries. These interactions must therefore meet the highest standards of ethical and professional behaviour in order to uphold the reputation of the UK government.

Arrangements and relationships entered into, whether with or on behalf of DFID, must be free from bias, conflict of interest or the undue influence of others. Particular care must be taken by Supply Partner and delivery chain staff who:

- a) are directly involved in the management of a programme or procurement of services; or
- b) who engage with i) frontline DFID staff ii) other deliverers of aid iii) beneficiaries (of aid)

Where those in a) and b) could be susceptible to undue negative or detrimental influence.

Supply Partners and their delivery chain partners must declare to DFID where there may be instances or allegations of previous unethical behaviour by an existing or potential staff member or where there is a known or suspected conflict of interest. Where a potential or existing staff member has been employed by DFID or the Crown in the preceding two years Supply Partners and their delivery chain partner must provide proof of compliance with the HMG approval requirements under the Business Appointment Rules.

Supply Partners and their delivery chain partners must have the following policies and procedures in place:

- ✓ Development and proof of application and embedding of a Staff Recruitment, Management and Retention policy (which must address circumstances where there may be potential or actual conflict of interest and embedding of a Whistleblowing Policy)
- ✓ Ongoing monitoring of potential or existing personal, business or professional conflict of interest and their mitigation and management
- ✓ Ethical training for every staff member and staff updates in ethical working practices suitable to the development sector (e.g. UN Global Compact principles) including awareness of modern day slavery and human rights abuses
- ✓ Procedures setting out how, staff involved in DFID funded business, can immediately report all suspicions or allegations of aid diversion, fraud, money laundering or counter terrorism finance to the DFID Counter Fraud and Whistleblowing Unit (CFWU) at reportingconcerns@dfid.gov.uk or on +44(0)1355 843747.

3. Transparency and Delivery Chain Management

Key Performance Indicators KPI 3 a – f

DFID requires full delivery chain transparency from all Supply Partners. All direct Supply Partners and their delivery chain partners must adhere to wider HMG policy initiatives including the support and capacity building of micro, small and medium sized enterprises (MSMEs), prompt payment, adherence to human rights and modern slavery policies and support for economic growth in developing countries.

DFID recognises the critical value that downstream delivery partners contribute. Direct Supply Partners must engage their delivery chain partners in a manner that is consistent with DFID's treatment of its direct Supply Partners. This includes, but is not limited to: appropriate pricing of services; fiduciary and financial risk management processes; applying transparent and responsive measures where delivery chain partners underperform against the KPI areas; taking a zero tolerance approach to tax evasion, corruption, bribery and fraud in subsequent service delivery or in partnership agreements. Direct Supply Partners must cascade the principles of the Code throughout their delivery chain to ensure DFID ethical behaviour standards are embedded and maintained.

Specific requirements for direct Supply Partners include:

- ✓ Provide assurance to DFID that the policies and practices of their delivery chain Supply Partners and affiliates comply with the Code;
- ✓ Maintaining and sharing with DFID up-to-date and accurate records of all downstream partners in receipt of DFID funds and/or DFID funded inventory or assets. This should map how funds flow from them to end beneficiaries and identify risks and potential risks along the delivery chain;
- ✓ Ensuring delivery chain partner employees are expressly notified of the DFID 'reporting concerns' mail box³ found on DFID's external website and of the circumstances in which this should be used;
- ✓ Publication of DFID funding data in accordance with the International Aid Transparency Initiative (IATI)⁴
- ✓ Supply Partners shall adhere to HMG prompt payment policy and not use restrictive exclusivity agreements with sub-partners.

³ <https://www.gov.uk/government/organisations/department-for-international-development/about#reporting-fraud>

⁴ <http://www.aidtransparency.net/>

4. Environmental issues

Key Performance Indicators KPI 4 a – b

DFID Supply Partners must be committed to high environmental standards, recognising that DFID's activities may change the way people use and rely on the environment, or may affect or be affected by environmental conditions. Supply Partners must demonstrate they have taken sufficient steps to protect the local environment and community they work in, and to identify environmental risks that are imminent, significant or could cause harm or reputational damage to DFID.

Commitment to environmental sustainability may be demonstrated by:

- ✓ Formal environmental safeguard policies in place;
- ✓ Publication of environmental performance reports on a regular basis
- ✓ Membership or signature of relevant environmental Codes, both directly and within the delivery chain such as conventions, standards or certification bodies (e.g. the Extractive Industries Transparency Initiative⁵).

5. Terrorism and Security

Key Performance Indicators KPI 5 a – d

DFID Supply Partners must implement due diligence processes to provide assurance that UK Government funding is not used in any way that contravenes the provisions of the Terrorism Act 2000, and any subsequent regulations pursuant to this Act.

DFID Supply Partners must maintain high levels of data security in accordance with the Data Protection Act 1998 and any subsequent regulations pursuant to this Act, or new Act and with the General Data Protection Regulation (Directive 95/46/EC).

Specific requirements:

- ✓ Development and proof of application and embedding of a comprehensive Terrorism and Security Policy
- ✓ Development and proof of application and embedding of personal data processing processes within a Data Protection Policy
- ✓ DFID Supply Partners must safeguard the integrity and security of their IT and mobile communications systems in line with the HMG Cyber Essentials Scheme⁶. Award of the Cyber Essentials or Cyber Essential Plus badges would provide organisational evidence of meeting the UK Government-endorsed standard;
- ✓ All DFID Supply Partners who manage aid programmes with a digital element must adhere to the global Principles for Digital Development⁷, which sets out best practice in technology-enabled programmes
- ✓ Ensure that DFID funding is not linked to terrorist offences, terrorist activities or financing.

6. Safeguarding, Social Responsibility and Human Rights

Key Performance Indicators: KPI 6 a – d

Safeguarding, social responsibility and respect for human rights are central to DFID's expectations of its Supply Partners. Supply Partners must ensure that robust procedures are adopted and maintained to eliminate the risk of poor human rights practices within complex delivery chain environments funded by DFID. These practices include

⁵ <https://eiti.org/>

⁶ <https://www.gov.uk/government/publications/cyber-essentials-scheme-overview>

⁷ <http://digitalprinciples.org/>

sexual exploitation, abuse and harassment; all forms of child abuse and inequality or discrimination on the basis of race, gender, age, religion, sexuality, culture or disability. Supply Partners must place an emphasis on the control of these and further unethical and illegal employment practices, such as modern day slavery, forced and child labour and other forms of exploitative and unethical treatment of workers and aid recipients. DFID will expect a particular emphasis on the management of these issues in high risk fragile and conflict affected states (FCAS), with a focus on ensuring remedy and redress if things go wrong.

Specific requirements:

- ✓ Development and proof of application and embedding of a Safeguarding Policy;
- ✓ Delivery of Social Responsibility, Human Rights and Safeguarding training throughout the delivery chain;
- ✓ Compliance level 1 Supply Partners must be fully signed up to the UN Global Compact⁸;
- ✓ Practices in line with the International Labour Organisation (ILO) 138⁹ and the Ethical Trading Initiative (ETI) Base Code¹⁰ are to be encouraged throughout the delivery chain;
- ✓ Policies to embed good practice in line with the UN Global Compact Guiding Principles 1 & 2 on business and human rights throughout the delivery chain are required, as detailed in Annex 2;
- ✓ Compliance level 1 Supply Partners to submit a Statement of Compliance outlining how the organisation's business activities help to develop local markets and institutions and further how they contribute to social and environmental sustainability, whilst complying with international principles on Safeguarding and Human Rights labour and ethical employment, social inclusion and environmental protection;
- ✓ Overarching consideration given to building local capacity and promoting the involvement of people whose lives are affected by business decisions.

UN Global Compact – Human Rights

Principle 1: businesses should support and respect the protection of internationally proclaimed Human Rights

Principle 2: businesses should ensure they are not complicit in Human Rights abuse

Organisations should do this by giving attention to vulnerable groups including women, children, people with disabilities, indigenous groups, migrant workers and older people.

Organisations should comply with all laws, honouring international standards and giving particular consideration to high risk areas with weak governance.

Examples of how suppliers and partners should do this are set out below:

In the workplace

- by providing safe and healthy working conditions
- by guaranteeing freedom of association
- by ensuring non-discrimination in personnel practices
- by ensuring that they do not use directly or indirectly forced labour or child labour
- by providing access to basic health, education and housing for the workers and their families, if these are not provided elsewhere
- by having an affirmative action programme to hire victims of domestic violence
- by making reasonable accommodations for all employees' religious observance and practices

In the community

- by preventing the forcible displacement of individuals, groups or communities
- by working to protect the economic livelihood of local communities
- by contributing to the public debate. Companies interact with all levels of government in the countries where they operate. They therefore have the right and responsibility to express their views on matters that affect their operations, employees, customers and the communities of which they are a part
- through differential pricing or small product packages create new markets that also enable the poor to gain access to goods and services that they otherwise could not afford
- by fostering opportunities for girls to be educated to empower them and also helps a company to have a broader and more skilled pool of workers in the future, and
- perhaps most importantly, a successful business which provides decent work, produces quality goods or services that improve lives, especially for the poor or other vulnerable groups, is an important contribution to sustainable development, including human rights
- If companies use security services to protect their operations, they must ensure that existing international guidelines and standards for the use of force are respected

1 INTRODUCTION

DFID Mozambique is engaging a Service Provider (SP) to implement the 5-year and 5 month '**BRILHO – Energy Africa Mozambique**' programme. This includes the four key components set out in **Section 4**, the Monitoring and Evaluation (M&E), and Communications Strategies for the programme. These Terms of Reference (ToR) should be read in conjunction with the **BRILHO Business Case**, which gives a full explanation of the programme.

2 OBJECTIVES

The key objectives of BRILHO are to:

1. increase energy access through innovative private sector provision of, and investment in, off-grid clean energy.
2. build a market of off-grid energy companies (across the three target technologies) able to operate on a sustainable basis. The private sector companies should ultimately have the potential to attract new sources of finance and exponentially grow their businesses to provide cheaper cleaner energy solutions to millions more off-grid Mozambicans.
3. build the supporting environment for successful off-grid energy companies including support to logistics and mobile money partners, skills training and increasing rural awareness of off-grid energy solutions.
4. support Government of Mozambique (GoM) to develop an off-grid strategy, policy and regulatory environment that embeds the market approach into government systems. This will give clarity and confidence to the off-grid market and investors, including for micro- and mini-grid companies, and will include appropriate certification, licencing and electricity tariff requirements.

Specific targets will be identified during inception, but the market facilitated by the programme could lead to the following estimated programme achievements:

- a) 750 thousand people benefitting from Improved Cooking Stoves (ICS).
- b) 750 thousand people benefitting from Solar Home Systems (SHS) or mini-grids for domestic use.
- c) 15,000 businesses supplied with productive energy.
- d) £20m of additional private funding mobilised for BRILHO interventions.

The following minimum requirements of these terms of reference will not be subject to negotiation:

- The supplier must provide support sufficient to meet the key objectives set out as below:
 - o Ensuring that off-grid energy products are available at the same time as education is given and demand activated.
 - o £20m of additional private funding mobilised for BRILHO interventions.
 - o 750 thousand people benefitting from Improved Cooking Stoves (ICS).
 - o 750 thousand people benefitting from Solar Home Systems (SHS) or mini-grids for domestic use.
 - o 15,000 businesses supplied with productive energy.

3 PROGRAMME RECIPIENTS

The principal recipient of these services will be DFID Mozambique (who will manage and supervise the Service Provider's work) as well as the public and private stakeholders within the renewable energy industry in Mozambique. The ultimate beneficiaries of the programme will be poor households and micro, small and medium enterprises in rural Mozambique, including marginalised groups, women and girls.

The other stakeholders relevant for the BRILHO programme include Government of Mozambique (GoM) institutions responsible for supporting the off-grid energy market (MIREME, FUNAE, EdM, ARENE and MITADER¹), and Improved Cooking Stoves (ICS) and off-grid energy enterprises² (SHS up to mini-grid providers) that have the realistic ambition of growing their operations to scale in Mozambique.

4 SCOPE OF WORK

The SP will deliver the four inter-related components of BRILHO that together provide holistic support to off-grid energy companies and address the key market barriers. The supplier will develop the proposed approach in detail during the five-month Inception Phase. Required Inception Phase deliverables and suggested Implementation Phase deliverables are outlined in **Section 5 – Deliverables**.

Component 1: Market Development Fund and Technical Assistance.

This is the major component of BRILHO and involves providing grants, together with technical assistance, to new businesses, seeding innovation and supporting early stage market work.

Market Development Fund (MDF): finance will be made available in a range of potential forms to address the specific needs of emerging Mozambican businesses or foreign businesses looking to expand into Mozambique. BRILHO will offer holistic support to private sector companies and the GoM to tackle the significant market barriers in Mozambique (as tentatively identified in the BRILHO Business Case and laid out in **APPENDIX A**). Funding is intended to cover setup costs (grants) and working capital as well as offer temporary risk guarantees, such as customer payment guarantees and exchange rate risk hedging. The Market Development Fund also intends to support private sector companies that are not able to access commercial or other forms of finance for their early-stage proof of concept and start-up, and/or may require business skills support. The supplier will identify these private sector companies which BRILHO will provide support, and also will manage these grantees.

The Market Development Fund will have a number of key features:

- **Technology** – provide finance to companies in each of the targeted technology areas: ICS, Solar Home System (SHS), mini-grids including for productive energy. The exact split of the three technology areas will be defined during the inception phase.
- **Innovation** – will allow the Fund to support innovative technologies and business models as long as they show potential to meet BRILHO's objectives and deliver at scale. This is particularly important in the productive energy space where proven business models do not currently exist in Mozambique, but technology is changing rapidly and new products and business models are continually being tested. Likewise, with the deteriorating macro-

² 'Enterprises' can refer to private sector companies or organisations, such as NGOs, who's core business aligns with BRILHO's objectives of building a thriving off-grid energy market that will ultimately delivery energy at scale.

economic situation and potentially reduced ability to pay, proven payment models of companies working in other East African countries may need to be adjusted to work in Mozambique.

- Supply Chain – where critical supply chain partners (e.g. logistics, mobile money) do not operate at the level required, additional funding may be made available to support the partner businesses, typically as part of the core business' proposal.
- Flexibility – while matched funding will be required from grantees to demonstrate their commitment, the exact level will not be stipulated up front. The macro-economic and political situation in Mozambique is uncertain and the level of DFID funding required to attract businesses with high potential is unknown, and will need to be tested on the market.
- Scope – the programme has a national scope. However, consideration will be needed on whether additional incentives are required, and can be sustainably implemented, to reach poorer, marginalised people and harder to reach geographical areas.
- Livelihoods – increasingly productive off-grid energy companies are looking to complement their programmes with livelihoods support. This has a double benefit of a) ensuring recipients of productive energy are able to use it to increase their personal income and b) the energy providers are able to collect additional revenue (through increased sale of energy and livelihoods appliances) which improves the commercial sustainability of their business models. BRILHO will look for opportunities to link energy and livelihoods work, including in agriculture, e.g. solar irrigation.

While the MDF will be flexible, its final design will be completed during the programme's inception phase. While the whole programme is open to co-funding from others, the MDF particularly will be open to receiving additional external resources. The MDF will tackle barriers to women's participation in off-grid energy markets as entrepreneurs, employees and consumers. The MDF must consider and prevent against negative impacts, for example by ensuring that the interventions it supports do not result in poor households being misled into contracts or becoming over-indebted.

APPENDIX B contains an overview of the suggested BRILHO management structure for managing the MDF and other programme components. It includes detail on additional grantee funding considerations including use of standardised criteria.

Technical Assistance (TA): will be provided to support: i) companies applying to the MDF to help improve their business propositions and develop a competitive pool of companies applying to the Fund; and ii) successful grantees during the implementation of their projects. Key areas of technical assistance required to break down market entry barriers include but are not limited to:

- Business knowledge – assistance to navigate the Mozambican legal and regulatory system, including incorporation of a business, correct licensing, labour laws, customs procedures, etc.
- Business development – support to help build business skills, business models and project preparation, including sharing of detailed knowledge of the off-grid market.
- Partner linkages – facilitate connection between supply chain partners, e.g. mobile money providers and logistics companies.
- M&E – support to monitor and assess the impact of BRILHO funded interventions, for example measuring the number of jobs created in businesses supported with productive energy.

The TA facility will also explore opportunities to link Mozambican companies and entrepreneurs, which are too small to be eligible for the MDF, with larger companies or cooperatives that can be supported.

Component 2: Demand Activation.

A potential barrier for private sector companies is engagement with dispersed rural customers with little base understanding of the energy products being promoted. Demand activation includes engagement of rural customers including education of the benefits of clean off-grid energy solutions as well as practical instructions in the use of mobile money and PAYG systems.

This activity will utilise the comparative advantages of GoM support (most likely FUNAE and/or MITADER) and their relationships with rural communities to facilitate private sector engagement with potential consumers in an efficient and collaborative manner.

The demand activation will be done in tandem with Component 1. Companies supported by the MDF and TA will be incorporated into the demand activation activities to ensure products are available at the same time as education is given and demand is activated.

Component 3: Research and Dissemination.

BRILHO will support core market intelligence and will research a number of key complementary areas such as: improving the policy and regulatory environment; quality standards and control; and models and approaches that most impact on the poor, women and girls. Mozambique is threatened by three potential crises (debt, drought and conflict) and so a specific area of research will explore options focusing on Energy for Resilience (E4R) – the results will be fed directly into the rest of the programming to improve applicability of interventions for Mozambicans caught in one or more crisis. This component will also look to strengthen Mozambique's own capacity to deliver off-grid energy related research, including potential support to the solar and biomass labs at Eduardo Mondlane University. Resources will be made available to disseminate research findings to audiences at the national and international level as appropriate.

Component 4: Policy Reform and Institutional Strengthening.

This will involve working with the key GoM institutions responsible for off-grid energy to help deliver programme objectives over the next 5 years and after BRILHO has finished. FUNAE (Energy Fund, responsible for rural energy) is expected to be the primary partner, with support also going to other relevant institutions including: MIREME (Ministry of Mineral Resources and Energy); EdM (Energia de Mocambique, the state utility); ARENE (Autoridade Reguladora de Energia, new independent energy regulator); and MITADER (Ministry for Land, Environment and rural development).

The Energy Africa Compact was signed on 1 December 2017 by the Government of Mozambique, DFID, and other development partners to support the expansion of solar markets in Mozambique. The Compact identified key priority policy actions, identified potential areas for coordinated donor support and developed an action plan. The Service Provider will support DFID and MIREME to implement the Compact, while supporting FUNAE and EdM's active engagement on policy reforms and institutional capacity.

5 DELIVERABLES

BRILHO will use an adaptive, flexible approach which means that the programme and its implementation will evolve over time by responding to changing priorities, lessons learned and changes in the Mozambican context.

Detailed reporting requirements are outlined in Appendix B.

The supplier should clearly demonstrate that their proposed interventions are based on evidence and experience (e.g. drawing on similar types of interventions) and indicate why their proposed approach will be effective. This should include: a Theory of Change for how the interventions will lead to anticipated results; the risks associated with the interventions and how the risks will be mitigated. Where there is limited evidence for the proposed interventions, assumptions should be clearly presented and what further work could be undertaken to verify assumptions if appropriate.

The following minimum requirements of these terms of reference will not be subject to negotiation:

- o Reporting as per relevant section within Volume 3 – Terms of Reference

Outputs for the separate ***Inception*** and ***Implementation*** phases are as follows:

Inception Phase

The SP will develop the full programme documents and strategies for implementation of BRILHO, including:

- Preparation of the ***Market Development Fund (MDF) Operations Manual*** that will cover the main criteria according to which MDF awards will be made and the procedure for approval of applications;
- Development of the ***BRILHO Programme Strategy*** including:
 - o strategies for delivering all four components;
 - o a detailed gender analysis of programme interventions and identification of strategies to reduce gender inequality and increase energy-related opportunities for women and girls.
 - o Year 1 plan detailing activities, budget, results, and draft plans/numbers for subsequent years;
 - o Operational Policies for the effective management and running of the Programme including risks and controls;
 - o governance arrangements and establishment of the BRILHO Steering and Investment Committees. This should include a clear timetable and ToRs;
 - o a light touch assessment of options for geographical prioritisation of interventions, answering questions including exploration of the value of/need for geographical prioritisation as well as potential options to do so.
 - o a procurement strategy outlining how the SP will procure TA for the fund, research, etc. with different values and what the approval levels will look like.
 - o M&E and Results Framework/Strategy including specific, relevant Value for Money (VfM) indicators for use during the Implementation Phase;
 - o an agreed payment profile for the Implementation Phase; including an agreed list of Contract Management KPIs and frequency of reporting;
 - o an agreed reporting format and reporting schedule for the programme, as appropriate;

The following minimum requirements of these terms of reference will not be subject to negotiation:

- The supplier must demonstrate an approach that will identify potential private sector interventions in the inception phase that could be supported by the BRILHO market development fund early in the programme, including the proposed criteria used to identify these.

Implementation Phase

The SP will use the documentation listed above to run the four BRILHO components and the M&E and communications strategies. All procurement activity required to support delivery of these components should be robustly and fairly conducted ensuring best value for money is achieved. While precise Implementation Phase deliverables will be determined during the Inception Phase, The SP must propose activities along the lines of the indicative implementation activities set out in the Section 4.

The full programme implementation will be subject to satisfactory completion of the inception phase. Further amendments to the ToR may be made at this stage once all required approvals have been received. The contract will be issued for the full five year period of the programme, but subject to acceptance of deliverables, satisfactory performance of the service provider and agreement to the service provider's outputs from the inception phase. This will be assessed at the end of the inception phase. If DFID decides not to proceed to the implementation phase, the contract will be terminated at no cost to DFID.

In the event that DFID decides to proceed to the implementation phase, a contract amendment will be issued to include details of the services to be provided in the form of updated Terms of Reference and any amendments to detailed costs. Any revisions to the budget for the implementation phase will be assessed to ensure that it still provides the most economically advantageous offer. If not satisfied with the quality of services, DFID reserves the right to re-tender the implementation phase and select an alternative service provider to implement the BRILHO Programme.

The key formal outputs from the implementation phase are:

- Annual business plans and budgets to be delivered 2 months before the start of the next financial year to allow adequate time for consultation and feedback amongst DFID and key stakeholders.
- Quarterly financial, progress reports and funding requisitions to be delivered to DFID and key stakeholders to assess progress and recommend adjustments and corrective measures, and also to ensure conditions are met for disbursements. Funds will be disbursed quarterly basis and will be based on activity and cash flow reports and projections.

Additional formal outputs from the implementation phase may be determined as part of the inception phase. The targets agreed in the revised programme logical framework, VfM indicators, work plans and strategies agreed during the annual business planning process will form the basis upon which performance will be monitored and tracked.

Communications Strategy

The SP is required to develop a suitable communications strategy during the inception phase to outline and justify the use of all relevant communication channels (i.e. internet, events, meetings, etc.) relevant to successfully raising the profile of the programme and its participants.

Monitoring & Evaluation (M&E)

The SP will develop an **M&E Strategy** by reviewing all programme components, and designing appropriate monitoring mechanisms and reporting requirements for all key activities in each component, i.e. against outputs and the Logframe. A draft logframe is provided with the **BRILHO Business Case APPENDIX 1**. The logframe sets out targets for outputs and outcomes against which progress will be measured. The indicators in the logframe will be refined by the SP during the inception phase and reviewed on an annual basis. Log-Frame amendments will be jointly agreed as part of Annual Reviews.

Programme monitoring will include disaggregating relevant indicators, such as people's increased access to energy and numbers of jobs created, to track the effects on women and girls. Gender and youth analysis and engagement will be encouraged by programme implementing partners – to promote a proactive approach to ensuring women and young people benefit from the services and jobs created, and are given voice and choice in development of policies, regulations and of the market approach. Where possible, all data collected will therefore be disaggregated by gender, poverty quintile and location.

6 TIMING AND BUDGET

The contract period is made up of two key phases;

- I. A 5 month Inception phase; and
- II. A 5 year Implementation phase.

Upon successful completion of the inception phase, commencement of the implementation phase will be agreed between DFID and the SP.

7 FINANCING MECHANISM

The maximum contract value for the SP requirement is **£22.8 million**.

The Service Provider will be responsible for financial administration of allocated funds. The Service Provider will advance resources which will be reimbursed by DFID. The Service Provider will be responsible for monitoring and forecasting of all spending and be fully accountable to DFID for all expenditure. In case there is an identified misappropriation of funds, or there is no sufficient evidence of funds being used, DFID may not process the reimbursement.

Break-points

There will be 2 formal break points in the contract, at the end of the inception phase and mid-way through the contract.

The contract will be issued for the full duration of the programme. Due to the flexible and adaptive nature of the programme the Contract must have adequate provision for variation to adapt to changes that occur during the life of the Programme. DFID shall, as a condition of proceeding from

one phase to the next, have the right to request changes to the Contract, including the Services, the Terms of Reference and the Contract Price to reflect lessons learned, or changes in circumstances, policies or objectives relating to or affecting the Programme, this may involve scaling up or down of the programme.

The Implementation Phase will only proceed following the successful completion of the Inception Phase. Continuation to Implementation is subject to DFID approval of the Inception Phase deliverables and the SP and DFID agreeing on both technical and commercial aspects of Implementation.

There will be an independent Mid-Term Review where the Implementation Phase contract may be terminated if SP delivery is deemed unsatisfactory. The final decisions on successful progress at each of the break points are solely based upon the opinion and judgement of DFID.

Payment Profile

It is expected that payments for all fees and expenses for the Inception Phase will be on a milestone basis that will be proposed by the supplier and thereafter jointly agreed with DFID.

Payments made during the Implementation Phase, will be based on a combination of milestones and Log-Frame based outputs, resulting in the final awarded contract being a hybrid model. The supplier will be expected to profile the percentage payment associated with the achievement of both contract outputs and milestones to support DFID's Payment by Results aspirations. The payment profile will be reviewed and agreed annually. DFID expects to pay the management fees based on output milestones and project expenses and MDF to be paid in arrears at actual cost.

Payments made during the Inception Phase will be based on the following deliverables:

- (i) Pre-inception Report (20%), outlining a clear plan and methodology for mobilising the team and undertaking the inception phase.
- (ii) A Mid-Point Report (30%), providing a summary of stakeholder meetings, currently active and involved in the renewable solar energy space.
- (iii) A Inception Report finalized (50%) including:
 - a. the operation manual depicting the implementation arrangements and reporting, grant manual, financial management, VfM, Anti-corruption, Gender
 - b. 5-year BRILHO strategy, M&E Framework defined.
 - c. Year-1 Work Plan, including KPIs and Payment Schedule.
 - d. A pipeline of initial investments for the "Market Development Fund" should be analysed, evaluated and proposed.

8 SKILLS AND COMPETENCIES

The SP is expected to put together a team/consortium with appropriate technical expertise including in programme management to successfully achieve the programme objectives.

The SP will set up an appropriate physical hub in Mozambique from which SP staff will operate the BRILHO programme components outlined. The SP will, where appropriate, also draw from international expertise.

On December 1st 2016, a new regulation came into effect providing the mechanisms and procedures to apply to the hiring of Foreign Citizens in Mozambique. It is important that the supplier is aware of the implications of this regulation.

Programme Management and Coordination

APPENDIX B contains an overview of the suggested BRILHO management structure for managing the MDF and other programme components. This includes the creation of a Steering Committee (SC), responsible for agreeing strategic direction, and an Investment Committee (IC), responsible for approving funding decisions.

Key management and coordination requirements include:

- The SP must be able to work legally in Mozambique and will be responsible for obtaining work permits for any international staff and consultants they may wish to employ.
- The SP, including leadership and staff, should demonstrate experience of working in Mozambique, or in similar socio-economic environments.
- Management of the Programme will need to satisfy DFID's accounting and procurement requirements and functions on a timely basis with a strong focus on VfM.
- The SP will be required to provide a secretariat function for the Steering Committee calling and co-ordinating regular meetings and ensuring concise records of key decisions are kept.
- The SP will need to provide necessary support to DFID Annual Reviews (ARs), the on-going independent evaluation, the independent Mid-Term Review (MTR) and a final Programme Completion Review (PCR) through logistical, accommodation and operational advice.
- The SP will need to ensure high quality systems to protect information, and protect facilities and ensure personal security.
- The SP will also need to maintain a duty of care for its employees based on regular risk assessments with clear risk mitigation measures in place and demonstrate this to DFID. In turn, the SP should ensure grantees have effectively considered risk and duty of care for their employees, as the SP is ultimately responsible for the duty of care of grantee employees.
- The SP is required to successfully facilitate coordination and cohesion with DFID's and other donors' activities in similar areas, leveraging DFID's role as co-chair of Mozambique's Energy Sector Working Group and lead of the Off-Grid Sub-group. The SP will also support development of a private sector focal group to facilitate engagement between the private sector and GoM.

Skills, Knowledge and Expertise

One of the critical success criteria for BRILHO will be the appointment of a strong Programme Director. Other key criteria include:

- The SP must have the organisational flexibility to retain a core staff, and recruit appropriate specialist capacity as it is required. This is vital given the range of tasks involved and differences between the three technical areas of focus – ICS, SMS and Mini-grids.
- Staff within the SP should have:
 - o strong skills in programme management and grant administration; financial control and management; renewable energy technical expertise, including the products and business models across the three technical areas of focus; market systems development; policy and regulatory frame-work experience; TA for government; SME financing; brokering partnerships; girls and women's economic empowerment; and business development services for MSEs. Much of this expertise will be made available through short-term inputs.

- o strong track record in gender and social inclusion and experience of integrating these into market development interventions.
- o good strategic programme design and implementation skills.
- Leadership and staff within the SP will need to demonstrate appropriate skills, authority and understanding of the context and political economy of Mozambique.
- Strong M&E and communications staff capability are required.
- Fluency in spoken and written English and Portuguese.

Where specific team members are proposed but subsequently changed, they must be substituted by a person of equivalent quality or better and not without prior consultation and agreement with DFID.

The following minimum requirements of these terms of reference will not be subject to negotiation:

- The supplier must demonstrate that the proposed team is able to communicate effectively with relevant stakeholders, such as Government of Mozambique particularly in Portuguese where required.

9 BACKGROUND

The level of electricity access across Mozambique is very low, even by Sub-Saharan Africa (SSA) levels. Only 27% of the population of 28m has access to electricity, which forces 20m Mozambicans to use alternative forms of energy, such as wood, charcoal, kerosene and disposable batteries.

Access to electricity is mainly focused in urban areas, leaving the majority rural population without access. 55% of the urban population are connected to the grid compared with less than 5% of Mozambique's rural population. The transmission system does not cover all areas of the country. By the end of 2014, the distribution network had reached all 128 district administrative centres, but the system has large gaps.

Global Goal 7 recognises that everyone has the right to affordable, reliable, sustainable and modern energy and that there needs to be an increasing share of renewable energy. The UK-led **Energy Africa campaign** aims to help African governments realise this commitment and ensure universal energy access by 2030. The campaign recognises that, to supply the vast number of off-grid households required, private sector companies, with the innovation and investment they bring, are a vital part of the solution. The Energy Africa campaign is therefore built on the signing of **compacts** (formal agreements) between country governments and UKaid and other donor partners, to agree how a) governments will help improve the business environment for companies providing off-grid energy, and b) the UK and other donors will co-ordinate support to help the companies grow and operate at scale. DFID's Mozambique office (DFID-Moz) is in the process of working with the Government of Mozambique (GoM) to develop the Mozambique Compact. BRILHO is the UK's commitment to this Energy Africa Compact in Mozambique and is intended to be matched by practical government support to the off-grid private sector.

While the Energy Africa campaign focuses primarily on support to solar home system (SHS) companies, an assessment of the energy need, potential for market support and areas a DFID programme could add value, identified three inter-connected areas of energy need in Mozambique. BRILHO therefore targets support to companies working in the following three areas:

- **Domestic Cooking:** 75% of urban/peri-urban households rely on wood and charcoal for cooking and for rural households, almost 98% of use wood and 2% use charcoal. **Improved Cook Stoves (ICS)** offer at least 40% improved efficiency over conventional stoves offering significant cost savings as well as health and environmental benefits. **LPG stoves** have low usage costs and low pollution, so are another option that could be considered.
- **Domestic Energy:** universal access requires households have at least SE4ALL Tier 1 energy, including access to improved lighting and communication. **Solar Home Systems (SHS)**, particularly when linked to PayAsYouGo mobile money payments, are recognised as a quality affordable solution that can be provided to large number of relatively poor households quickly.
- **Energy for Businesses:** rural economic growth cannot happen without energy. The private sector is developing a range of innovative solutions that are able to provide varying levels of energy to rural businesses from **single-business systems** (larger SHS-type systems) able to run a fridge or TV, through to small DC and larger grid-equivalent AC **green mini-grids (GMG)**.

BRILHO will offer holistic support to private sector companies and the GoM to tackle the significant market barriers in Mozambique (as tentatively identified in the BRILHO Business Case and laid out in **APPENDIX A**). In tackling these barriers, BRILHO aims to help provide a stable business environment with i) clarity and certainty of government support and policies, and ii) direct incentives and support to companies to encourage innovation and expansion.

DFID, through the Gender Equality Act (2014), is committed to reducing gender inequality through all its work. All aspects of BRILHO will reflect this commitment and emphasise benefits to women as well as men. Women and girls are often the most affected by inefficient cooking and constrained in their opportunities by lack of light and power – with direct implications for movement at night, personal safety, education and economic activities. This programme aims to contribute to women's economic empowerment by ensuring that women and men can equally benefit from new entrepreneurial and job opportunities both linked to expanding off-grid energy businesses and new rural businesses using newly available productive energy. Women face gender-specific barriers to entering the market, which need to be addressed.

10 SECURITY AND DUTY OF CARE

The SP is responsible for the safety and well-being of their Personnel and Third Parties affected by their activities under this contract, including appropriate security arrangements. They will also be responsible for the provision of suitable security arrangements for their domestic and business property.

APPENDIX A. BARRIERS TO THE MARKET FOR OFF-GRID ENERGY PROVISION

Along with wider Energy Africa analyses, DFID Mozambique has commissioned a number of studies³ to help understand the barriers to providing improved off-grid energy in rural areas. The principal barriers identified include:

- **Lack of access to affordable finance (short and medium term):** small retailers, micro-entrepreneurs and SMEs lack access to start-up grants and commercially available working capital to stock portable solar lights and improved cook-stoves, and more significant finance is required for mini-grid investments.
- **Fiscal barriers and regulation:** in particular, high import costs, as high as 30-40%⁴, are repeatedly cited as major concerns for building an economically sustainable business model⁵.
- **Lack of Mozambican awareness, as well as business understanding and knowledge of opportunities:** new businesses require better general and sector specific business capabilities. Being a Lusophone country, Mozambique's language, legal system and, to some degree, business culture differ from other Anglophone Eastern and Southern African countries where off-grid firms may have prior experience. Foreign companies lack basic market information upon which to build a business case for entering Mozambique.
- **Limited mobile phone coverage and mobile money take-up in rural areas:** new 'pay as you go' (PAYG) financing mechanisms are key to engaging with the rural poor when encouraging them to buy quality energy solutions. However, PAYG solutions typically depend on uptake and usage of mobile money. Mozambique's leading mobile money provider, MPESA, only has 800,000 active subscribers and although it's experiencing high MPESA growth, it's predominantly in urban areas.
- **Limited infrastructure, logistics and supply chain partners:** Depending on the size of the system, SHS and ICS kits fits into a shoe-box sized package. These kits would need to be freely transported around the Mozambique. Formal distribution networks are not widely available while informal distribution channels are often not recognised or difficult to make use of by entrepreneurs.
- **Low market demand, awareness and rural purchasing power:** Even in urban areas, EdM has found that heavily subsidised grid-connection fees of \$120 and \$30, for 'ordinary' and 'social' customers respectively, are not always affordable and act as a barrier to new grid-connections. Deposits for SHS are typically in the region of \$30, which may preclude the poorest sections of society. As mentioned above, with rural poor spending only in the region of \$100 per year on energy and phone charging, affordability is a key consideration.

As well as the above, experience collected for DFID mini-grid programmes⁶ has identified a number of other barriers that are also applicable in Mozambique, with a number specific to green mini-grid (GMG) development, including:

- **Inadequate regulation, policy gaps or uncertainty:** grid expansion and timing is often cited as a potential issue for investors, but there is a degree of government clarity on geographical grid-expansion plans⁷. More significant issue are i) current laws that prevent

³ In particular, MKOPA, the African leaders in the provision of SHS, are undertaking a market appraisal in Mozambique. South South North consultants were commissioned to do a scoping study for this energy programme in late 2015.

⁴ Experience of EnDev partners in Mozambique when import agent fees and 'facilitation' fees are added.

⁵ The elimination of VAT and tariffs for solar panels in Tanzania led to the reduction of PV costs by half and, according to a number of distributors, served as a major stimulus for increased sales" - IFC (2010) Solar Lighting for the Base of the Pyramid - Overview of an Emerging Market.

⁶ A DFID-led consultation from November 2012 to date and two studies, one regional and one focussing on Kenya and Tanzania, have drawn together evidence and experience from more than 100 firms and agencies on the barriers and opportunities to GMGs scale up

⁷ The government is producing a map of substations for the electric grid and power generation with the intention to connect every household within a 50km radius⁷. Gaps on the map will provide a clear picture, and therefore planning security for private actors, about

companies from generating and selling energy across public (i.e. property) boundaries), and linked to this ii) the politically charged issue of tariffs and the ability to set them at cost-recovery levels, especially given that EdM finds rural connection costs roughly four times that of urban connection⁸.

- **Lack of proven commercial business models in Mozambique** – in spite of emerging private sector success stories elsewhere in Africa, there is as yet no evidence of the ability of renewable energy service providers in Mozambique to produce reliable cash flows to support further investment and private sector leverage.
- **Capacity issues (including lack of skills), project preparation and lack of standardization** – with regulatory, resource and financial situations varying between off-grid projects, types and countries, most renewable energy projects are currently bespoke. This creates a cost barrier and magnifies capacity constraints.

which parts of the country will not be serviced by the grid in the foreseeable future. The World Bank is also commissioning a national electrification strategy which will give a clearer idea of government actions being taken with regard to urban and rural electrification.

⁸ Connection costs between \$385-\$580 per connection for ordinary requests to US\$1,400-\$2,100 per rural connection (based on estimates from World Bank staff experts – Energy Sector Policy Note, 2016).

APPENDIX B. MARKET DEVELOPMENT FUND STRUCTURE AND MANAGEMENT

The SP will need to design the structure of the MDF and then manage it responsibly selecting strategic interventions based on an agreed set of criteria and principles.

Governance Structure

The BRILHO management structure is designed to ensure local participation and ownership, whilst ensuring that ultimate authority over programme implementation is retained by DFID. The final configuration of the management structure will be confirmed during the inception phase. A suggested overview of how the management structure could look is shown below.

Suggested overview of BRILHO management structure.

A **Steering Committee (SC)** of DFID, renewable energy experts, GoM and private providers, will be established and meet annually to monitor progress on, and provide advice to, the programme. This includes help to ensure that BRILHO is well connected to, and informed by, other related programmes and initiatives including those of DFID and other donors.

An **Investment Committee (IC)** comprising DFID, co-financing partners and private sector strategists on renewable energy will meet quarterly to discuss and take investment decisions on Expressions of Interest (EoI) and full proposals submitted to the MDF through open competition.

The SC will be responsible for agreeing strategic direction and the IC for approving funding decisions. However, DFID withholds the right to use a final veto on strategic programme decision including priorities and funding. This veto will be used only in instances when all other means to reach consensus have been exhausted.

Financial management and Institutional Capacity

The SP will need to ensure that potential short-listed grantees are thoroughly reviewed and capacity assessed - these assessments should include a thorough financial assessment (robust and reliable financial internal control systems, annual accounts where appropriate and legal status) and governance structures (institutional arrangements, strategic planning, human resource management, etc.).

The SP must ensure due diligence requirements are met in vetting of potential grantees. The SP will be required to advise selected grantees on financial accounting, reporting, procurement, and other compliance practices associated with the Programme. The SP will review work plans and financial reporting and accounting systems of grantees to ensure activities are implemented on a timely and cost-effective basis in compliance with financial accountability requirements.

Award of funds to Off-Grid Enterprises (Grantees)

BRILHO MDF grantees should be selected to receive funding against standardised criteria. The criteria will be detailed in the MDF Operations Manual prepared during the inception phase. It will be the job of the SP to define (in consultation with DFID and the Steering Committee) the assessment criteria for different grant and loan types. The separate Investment Committee comprising PS and non-state off-grid energy experts will advise on MDF proposals.

The SP will conduct an organisational assessment of each grantee. The organisational assessment will also determine the details of the grant that the grantee is eligible to receive. The design of selection processes should consider and include but not be limited to:

- Identification of criteria against which all proposals will be assessed for different grant types;
- Provide DFID Mozambique and the Investment Committee (IC) with a report detailing funding recommendations and brief analysis of proposals received ahead of the IC meetings.
- Convening an IC forum to review all received proposals from calls and the SP's technical appraisal, due diligence checks and final recommendations.
- Designing the voting/decision-making procedure to be agreed by DFID Mozambique for the IC to approve funds to grantees where DFID Mozambique retains a final veto on any proposal if all other consensus efforts fail;
- Acknowledge receipt, log and file received proposals and accompanying documents, checking that proposals adhere to the prescribed length and format.
- Maintain database of all enquiries, proposals and subsequent correspondence.
- Undertake a full and comprehensive technical appraisal of all serious proposals and manage a quality control process to ensure consistency of recommendations - this includes a comprehensive review of the budgets and the proposal's ability to articulate how actions and inputs lead to the desired objectives/ outcomes.
- Recommend TA that is considered necessary to assist grantees to submit fully compliant proposals.
- Provide feedback to all rejected applicants within six weeks of decision - the SP must be able to produce rejection letters which are worded sensitively, in plain English or Portuguese and can be used constructively by the applicant to improve future applications.
- Prepare and provide the DFID Lead Energy Adviser and Programme Officer with pre-funding letters to successful organisations, listing issues to be resolved before funding can be finally agreed.

The selection criteria determined for the Programme should be appropriate for each technology focus area (ICS, SHS, GMG). Where the Investment Committee makes a determination – after conducting an organisational assessment – that an organisation is aligned with the objectives of the Programme, but does not meet all of the required criteria, a decision to fund may be made based on condition that the organisation agree to address those areas in which it is deficient. Such decisions to fund organisations despite identified weaknesses may be particularly relevant where it is necessary to expand funding to regions or groups that have typically been excluded from funding through donor programmes or in areas with a limited number of active IPs.
