

NHS England Midlands - Market Management - Supplier Engagement

NHS Arden and Greater East Midlands Commissioning Support Unit is working on a regional Market Management Strategy for clinical services commissioned by NHS England and NHS Improvement Midlands.

We are keen to speak and engage directly with Clinical Healthcare Market Providers that provide services to the Primary Care; Health and Justice and Public Health sectors. Our objective is to help to develop effective procurement strategies which can break down barriers to participating in competitive procurement processes and increase the chances of contract success. So, we seek market views and input on:

- * How the market and providers can be developed to better meet the NHS England requirements
- * Understand the direction in which the market is heading
- * Find out what issues the market is facing when competing/bidding for opportunities
- * Understand capability and capacity within the market

This is the initial engagement stage and we are looking for organisations to express their interest by providing details on relevant individuals within your organisations to correspond with. If interested, please respond to:

agem.marketmanagement@nhs.net
