Joint Schedule 3 (Insurance Requirements)

1 The insurance the Supplier needs to have.

- 1.1 The Supplier shall take out and maintain or procure the taking out and maintenance of the insurances as set out in the Annex to this Schedule, any additional insurances required under a Call-Off Contract (specified in the applicable Order Form) ("Additional Insurances") and any other insurances as may be required by applicable Law (together the "Insurances"). The Supplier shall ensure that each of the Insurances is effective no later than:
 - 1.1.1 the Framework Start Date in respect of those Insurances set out in the Annex to this Schedule and those required by applicable Law; and
 - 1.1.2 the Call-Off Contract Effective Date in respect of the Additional Insurances.
- 1.2 The Insurances shall be:
 - 1.2.1 maintained in accordance with Good Industry Practice;
 - 1.2.2 (so far as is reasonably practicable) on terms no less favourable than those generally available to a prudent contractor in respect of risks insured in the international insurance market from time to time;
 - 1.2.3 taken out and maintained with insurers of good financial standing and good repute in the international insurance market; and
 - 1.2.4 maintained for the Contract Period and for at least six (6) years after the End Date.
- 1.3 The Supplier shall ensure that the public and products liability policy contain an indemnity to principal's clause under which the Relevant Authority shall be indemnified in respect of claims made against the Relevant Authority in respect of death or bodily injury or third party property damage arising out of or in connection with the Deliverables and for which the Supplier is legally liable.

2 How to manage the insurance

- 2.1 Without limiting the other provisions of this Contract, the Supplier shall:
 - 2.1.1 take or procure the taking of all reasonable risk management and risk control measures in relation to Deliverables as it would be reasonable to expect of a prudent contractor acting in accordance with Good Industry Practice, including the investigation and reports of relevant claims to insurers;
 - 2.1.2 promptly notify the insurers in writing of any relevant material fact under any Insurances of which the Supplier is or becomes aware; and
 - 2.1.3 hold all policies in respect of the Insurances and cause any insurance broker effecting the Insurances to hold any insurance slips and other evidence of placing cover representing any of the Insurances to which it is a party.

3 What happens if the Supplier is not insured.

- 3.1 The Supplier shall not take any action or fail to take any action or (insofar as is reasonably within its power) permit anything to occur in relation to it which would entitle any insurer to refuse to pay any claim under any of the Insurances.
- 3.2 Where the Supplier has failed to purchase or maintain any of the Insurances in full force and effect, the Relevant Authority may elect (but shall not be obliged) following

Framework Schedule 6 (Order Form Template, Statement of Work Template and Call-Off Schedules)

written notice to the Supplier to purchase the relevant Insurances and recover the reasonable premium and other reasonable costs incurred in connection therewith as a debt due from the Supplier.

4 Evidence of insurance to be provided.

- 4.1 The Supplier shall upon the Start Date and within 15 Working Days after the renewal of each of the Insurances, provide evidence, in a form satisfactory to the Relevant Authority, that the Insurances are in force and effect and meet in full the requirements of this Schedule.

5 Required amount of insurance

- 5.1 The Supplier shall ensure that any Insurances which are stated to have a minimum limit "in the aggregate" are maintained at all times for the minimum limit of indemnity specified in this Contract and if any claims are made which do not relate to this Contract, then the Supplier shall notify the Relevant Authority and provide details of its proposed solution for maintaining the minimum limit of indemnity.

- 6.1 The Supplier shall notify the Relevant Authority in writing at least five (5) Working Days prior to the cancellation, suspension, termination, or non-renewal of any of the Insurances.
- 6.2 The Supplier shall ensure that nothing is done which would entitle the relevant insurer to cancel, rescind or suspend any insurance or cover, or to treat any insurance, cover or claim as voided in whole or part. The Supplier shall use all reasonable endeavours to notify the Relevant Authority (subject to third party confidentiality obligations) as soon as practicable when it becomes aware of any relevant fact, circumstance or matter which has caused, or is reasonably likely to provide grounds to, the relevant insurer to give notice to cancel, rescind, suspend, or void any insurance, or any cover or claim under any insurance in whole or in part.

7 Insurance claims

- 7.1 The Supplier shall promptly notify to insurers any matter arising from, or in relation to, the Deliverables, or each Contract for which it may be entitled to claim under any of the Insurances. In the event that the Relevant Authority receives a claim relating to or arising out of a Contract or the Deliverables, the Supplier shall co-operate with the Relevant Authority and assist it in dealing with such claims including without limitation providing information and documentation in a timely manner.
- 7.2 Except where the Relevant Authority is the claimant party, the Supplier shall give the Relevant Authority notice within twenty (20) Working Days after any insurance claim in excess of 10% of the sum required to be insured pursuant to Paragraph 5.1 relating to or arising out of the provision of the Deliverables or this Contract on any of the Insurances or which, but for the application of the applicable policy excess, would be made on any of the Insurances and (if required by the Relevant Authority) full details of the incident giving rise to the claim.
- 7.3 Where any Insurance requires payment of a premium, the Supplier shall be liable for and shall promptly pay such premium.
- 7.4 Where any Insurance is subject to an excess or deductible below which the indemnity from insurers is excluded, the Supplier shall be liable for such excess or deductible. The Supplier shall not be entitled to recover from the Relevant Authority any sum paid

- Implemented specific data delivery methods e.g. planning for high variance between test and production data and establishing data governance, enabling provable data quality and security. This resulted in FDS going from discovery to live in 8 months.

Question 3

Over the last three years have evidence of capability in managing delivery focused user centred design services that meet specific quality standards (e.g. GDS standards and ITIL) through the delivery lifecycle. **(10%)**

Supplier Response (Max 750 Characters including spaces)

HMCTS (2020-present) delivery of Apply for Probate service to GDS Service Standard:

Discovery: Stakeholder workshops (HMCTS staff, solicitors) and user research interviews (probate users) to understand user needs & pain points & researched accessibility needs.

Alpha: Co-design workshops with HMCTS staff and solicitors to prototype user journeys. User-tested prototype journeys to refine solution designs.

Beta: Agile sprint development to deliver service to users. Moderated/unmoderated usability & accessibility testing, third party accessibility audit to iterate service design.

Live: ITIL-based service model to provide live-support, maintain availability and continually improve the service based on user analytics insights and feedback from data.

Question 4

Proven expertise in Agile delivery methodologies, delivering at pace and in creating robust user stories for development teams in support of behaviour driven development . **(10%)**

Supplier Response (Max 750 Characters including spaces)

BEIS (2020) To deliver the Shared Parental Leave service at pace within 14 weeks, we:

- Took a user-centred agile scrum approach: small empowered team, self-organisation, daily stand-ups, story-writing, backlog refinement, two-week cadence, and continuous delivery.

- Used rapid prototyping to validate user needs and highlight risks/dependencies early, enabling mitigation planning.

To support BDD, we:

- Broke down the eligibility and planning journeys into individual steps & sub-steps.

- Ensured robust user stories by applying "five whys" reviews and using "given-when-then" acceptance criteria, co-drafted between user-researchers, developers and testers.

This resulted in the successful beta assessment - the service has now been used by 50,000+ users.

Question 5

Evidence of capabilities in delivery management and technical business analysis for delivering new data platforms on cloud, covering ingestion, transformation, validation, cleansing, matching and storage in a complex data environment. **(10%)**

Supplier Response (Max 750 Characters including spaces)

HMCTS (2020) Development of a new, cloud-based Strategic Data Platform on Azure to create a Data Lake in a complex multi-layer environment of 30+ data-sources.

We structured delivery through iterative sprints, utilising rapid prototypes and a Data Governance Framework (DGF), while our technical business analysts and data engineers designed a repeatable technical business analysis exercise to catalogue each data-source capturing transformation, validation and matching rules.

We ingested the data sources using Data Factory/Synapse to orchestrate Databricks components which validated and cleansed the data, whilst Azure Data Flow components carried out transformation, matching and storage. The MVP (10 data sources) was delivered in just 5 months.

Question 6

Evidence of capability in delivering into an immature data development lifecycle and working collaboratively with a multi-disciplinary team of architects and engineers to accelerate rapid delivery without creating technical debt. **(10%)**

Supplier Response (Max 750 Characters including spaces)

BDUK(2020-21) required a data platform to support broadband subsidy funding. Their existing data development lifecycle was very immature. Our team (data engineers, architect, delivery lead) worked collaboratively with BDUK teams to introduce a cloud-first, Infrastructure-as-Code approach and introduced agile ways of working to bring about rapid delivery, without incurring technical debt. We mapped out data journeys and dependencies, using data prototypes to validate assumptions quickly, identify issues early, and automated QA testing.

We co-designed a data framework, resolving inefficient queries, improving data quality and reducing data redundancy. We raised data lifecycle maturity levels enabling BDUK to meet deadlines for subsidy funding.

Question 7

Evidence of providing resourcing for Agile teams delivering Data projects at pace and reactive to changing demand able to work to short lead times in filling roles. **(10%)**

Supplier Response (Max 750 Characters including spaces)

Solirius has rapidly delivered high-quality agile data teams, reactive to changing demand at short notice for DfE, ESFA, DCMS and HMCTS.

Our resourcing process is based on:

- Dedicated account management team who plan ahead and identify changing requirements via weekly/monthly client meetings.

- In-house resourcing team, matching consultants with relevant experience from our 400+ consultants (50+ consultants in data practice) and 1200+ trusted-associate network.
- Our own recruitment capability for additional resources.
- Tailored onboarding process for clients.

For ESFA Project Titan we deployed an agile data-engineering team within 4 weeks and for HMCTS Data Analytics Service, we deployed an agile data team (12 consultants) within 4 weeks.

Question 8

Evidence of the rapid placement of skilled resources to the standard required by the roles, who are able to meet the planned deliverables and contractual obligations without slippage or creating risks to delivery. **(10%)**

Supplier Response (Max 750 Characters including spaces)

ESFA Funding Service(2021-22): Our dedicated account managers engaged with service teams to understand project deliverables and SoW contractual obligations. Using ESFA specific role descriptions and working with our in-house resourcing team we proactively identified the most suitable individuals (using technical/cultural-fit interviews) from our permanent consultants and trusted associates, successfully deploying 8 multi-disciplinary agile teams. During delivery, our delivery/account management team assessed individual consultant performance, and sought feedback from clients.

Delivery velocity was tracked against plan with continuous risks assessment/management and reporting, enabling successful delivery of a complex financial data platform.

Question 9

Evidence of providing Programme Management to large complex data programmes including risk management (identifying, mitigation and escalation), dependency management, stakeholder engagement, budget management, and adhering and reporting into governance processes. **(10%)**

Supplier Response (Max 750 Characters including spaces)

HMCTS (2021-23) we provided programme management for the MI and Reporting Data Programme, developing 6 complex data services. Our programme/delivery managers and PMO team:

- Managed stakeholder engagement through service specific and RACI backed comms plans
- Identified risks, assumptions, dependencies through weekly project updates, SWOT analysis and scrum-of-scrums; captured in a RAID log with mitigations and clearly defined escalation routes through HMCTS governance

- Tracked and governed delivery progress with weekly automated reporting, sprint burn-down charts and integrating with data and delivery governance processes

- Supported budget management, providing accurate spend to-date and forecasts

All six services were delivered on time and budget.

Evidence of capability to create and implement appropriate service operating models to enable successful live running of data products and services in a complex change environment. **(10%)**

Supplier Response (Max 750 Characters including spaces)

We successfully delivered the Strategic Data Platform (SDP) data warehouse for HMCTS (2020-current) into live.

We created a live-service operating model based on maintaining service continuity, enhancing the original policy goal and reducing total-life costs. Using core members of the original team, augmented with support engineers, we provide 2nd/3rd-line support (8am-8pm) with 24hr support integrating into ServiceNow.

To incorporate new requirements and develop service improvements we continue to focus on user-needs, using analytics, user-research and data analysts to develop a backlog capturing enhancements, defects and technical-debt.

We iteratively tested hypotheses, using DevOps pipelines and automated-tests releasing daily.

Nice to have skills and experience

Call-Off Schedule 20 (Call-Off Specification)

Summary of Requirement

We are looking for a managed service to deliver and develop our Financial Systems and Services. The delivery is a mix of continuous improvements to the financial systems and the end-to-end identification and delivery of new systems and service delivery (covering Discovery-Alpha-beta-live) as defined on the Programme pipeline.

Location

No specific location (for example they can work remotely)

Working Arrangements

The Delivery Partner will be issued a Statement of Work detailing the digital work commitment. Delivery progress will be governed via an existing Governance Board and Steering Group chaired by the SRO. The oversight of the work will be the responsibility of the Deputy Director (SRO) The supplier will be required to provide weekly progress/performance updates to the Head of Financial Systems and any role that the Department moves these responsibilities to. The working week will be Mon-Fri. System releases may be deployed over weekends/bank holidays to ensure continuity of services.

Why is the work being done

The DfE is responsible for timely and secure distribution of circa £ 100bn of public funds to educational institutions, teachers, employers, suppliers and staff. The Department's financial accounting and financial reporting systems are Microsoft Dynamics 365 Business Central (BC) and Adaptive Planning. We operate several related corporate systems and services across a suite of federated digital products - including payment technologies, identity verification Commercial (Jaggaer) and HCM (Workday) services, publishing tools and other internally facing services – via digital interfaces (largely enterprise API's). To ensure we can administer public services effectively, maintain pace with industry best practice, government policy and technological opportunities and risks, we operate a programme of sustained investment and renewal of our technology stack, processes and data. Services are provided to a range of entities within the Department's accounting group in a 'captive' shared service model. The ongoing maintenance, security and development of the financial systems and interfaces is paramount to ensuring the Department can fulfil its responsibilities to continue to account for and pay monies into the education sector on a timely, transparent, and secure basis. The Department's financial systems have a defined pipeline of developments to improve and develop over the next 2 years.

Problem to solve

The DfE require a delivery partner to fulfil the digital delivery and development of the DfE's financial services. This will require a wide range of technical and delivery roles to successfully deliver significant change. The delivery team will form a programme of work and will be responsible for; continuing the delivery of harmonising the entities/companies within Business Central to ensure that they have the same (where appropriate) standard operating model, to develop enhancements for Business Central to secure the move to SaaS, deliver existing pipeline of improvements to Business Central via a backlog of

requirements, ensure security patches are deployed to Business Central, implementation of a payments solution and develop and enhance the supporting API's. We anticipate that the team will be required to deliver outcomes for 5-10 projects at any given time from the Programme pipeline.

Security

DfE requires everyone to have baseline personnel security standard clearance (BPSS). There may be a requirement to gain higher security clearance / enhanced DBS checks. This will be detailed in the SOW. The supplier will need to be compliant with the DfE's Security Standards and respond to a security questionnaire.

Budget

A pipeline of activity is foreseen over the next 24 months. The current committed budget is £4,680,000 inclusive of applicable VAT liabilities (£2.37m - year 1) and are not to exceed the approval limits with the potential to extend to £2.31m for year 2. The indicative budget against the requirements for this capability is £2.34m per year, but scope could change. The Department will define the delivery requirements within each Statement of Work and the Supplier will be expected to provide a breakdown of requirements to fulfil this deliverable.
